3. Briefly describe all manufacturing or service industries conducted at the sewer user's establishment:

The Coldwater Road Landfill is a closed RCRA landfill that received stabilized electroplating wastewater sludge; therefore, there are no current manufacturing or service industries conducted at the site at this time. The landfill is currently being maintained and monitored.

4. List the Standard Industrial Classification Code(s) which best describe all manufacturing or service industries conducted at the sewer user's establishment:

None.

5. Are any Primary Industries below, described in 40 CFR 413-471, engaged in at the sewer user's establishment? yes no

Note: RACER Trust does not believe that the following are primary industries for the site. However, the Coldwater Road Facility is a RCRA Landfill that received stabilized electroplating wastewater sludges, so it is most similar to 40 CFR 413 and 40 CFR 445.

If yes, indicated which ones:

6. Report the average flow volume over the last calendar year of each of the following types of wastewater discharged from the sewer user's establishment to drains that ultimately empty into sanitary sewers:

Type of Wastewater	Average Flow (gal/day)
Process wastewater directly contacting, or resulting from the production or use of, any raw material, intermediate product, finished product, byproduct, or waste product.	None
Sanitary wastewater from toilets, washrooms, drinking fountains, kitchens, and other sanitary facilities which may produce human and/or food wastes.	None
Non-contact cooling water used to reduce temperature which <i>does not</i> come into contact with a raw material, intermediate product, waste product other than heat, or finished product.	None
Blowdown or condensate from heating or cooling systems.	None
Other wastewater from miscellaneous sources. *	44.8**

Notes:

* Periodic discharge of accumulated liquids from the landfill sumps and vaults about every 2 to 3 months over 1 to 5 days.

** Based on last 5 year of discharge data.

7. Indicate the type of chemicals and chemical products used, produced, processed or housed at the sewer user's establishment and the amount of each type (as either some or none) known, assumed, or expected to normally enter at any time any drain at the sewer user's establishment that ultimately empties into any sanitary sewer:

Chemicals Present	Amount to Drains
<input checked="" type="checkbox"/> acids	<input type="checkbox"/> some <input checked="" type="checkbox"/> none
<input checked="" type="checkbox"/> bases	<input type="checkbox"/> some <input checked="" type="checkbox"/> none
<input type="checkbox"/> salts	<input type="checkbox"/> some <input type="checkbox"/> none
<input checked="" type="checkbox"/> soaps	<input checked="" type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> detergents	<input type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> solvents	<input type="checkbox"/> some <input type="checkbox"/> none
<input checked="" type="checkbox"/> paints	<input type="checkbox"/> some <input checked="" type="checkbox"/> none
<input type="checkbox"/> inks	<input type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> adhesives	<input type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> coolants	<input type="checkbox"/> some <input type="checkbox"/> none
<input checked="" type="checkbox"/> lubricants	<input type="checkbox"/> some <input checked="" type="checkbox"/> none
<input type="checkbox"/> hydraulic fluids	<input type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> biocides	<input type="checkbox"/> some <input type="checkbox"/> none
<input checked="" type="checkbox"/> other(s)	<input checked="" type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> none	

If other, describe the type of chemical(s) and/or chemical product(s):

Accumulated liquids from the landfill sumps and vaults. Also, acids and bases stored at the site within sample collection jars are used for groundwater sampling or equipment calibration, and are not discharged to the drains/sewer. Soap for washing hands and/or equipment may be discharged to the drains/sewer, but in very small quantities. All other materials stored on site are used solely for building or grounds maintenance.

In addition, the presence of per-and polyfluorinated alkyl substances (PFAS) consisting predominantly of perfluorooctanesulfonic acid (PFOS) and to a lesser extent perfluorooctanoic acid (PFOA) have been analyzed for and detected at the landfill site. The presence of PFOS and PFOA is likely associated with the former wastewater treatment plant operations and the stabilized electroplating wastewater sludge placed within the landfill.

On February 15, 2017, a sample was collected from the accumulation tank at the site and analyzed for per-and polyfluorinated substances. The analytical result from the sample (01-PRCC-17) of 4,053 ng/L (4.053 µg/L) for combined concentrations of PFOA and PFOS was above the MDEQ drinking water criteria of 70 ng/L (0.070 µg/L).

A Discharge Permit Modification and (Certified) Pretreatment Plan letter was submitted to the City of Flint on June 27, 2018, which provided a pretreatment system design package for the removal of PFAS from the discharge from the landfill. A pre-treatment system to PFOS/PFOA from the liquids contained in the accumulation tank was installed on August 21, 2018, August 22, 2018, and August 27, 2018.

Since September 2018, the accumulated liquids at the site are discharged through the pre-treatment system consisting of originally three or now four granular activated carbon (GAC) drums (and other accoutrements to compete the system) connected in series to remove the PFAS prior to discharging the liquids from the site to the sanitary sewer. The pre-treatment results are provided to the City of Flint in the quarterly periodic reports on continued compliance (PRCC).

Exclude those used at the sewer user's establishment solely for office work, sanitation, and building and grounds maintenance.

8. Indicate the following types of Potentially Harmful Substances used, produced, processed or housed at the sewer user's establishment and the amount of each type (as either some or none) known, assumed, or expected to normally enter at any time any drain at the sewer user's establishment that ultimately empties into any sanitary sewer.

Type of Potentially Harmful Substances	Amount to Drains
<input type="checkbox"/> Corrosive substances which have a pH of less than or equal to 2.0 Standard Units or greater than or equal to 12.0 Standard Units.	<input type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> Ignitable substances which have a closed-cup flash point of less than 140° F (60 °C).	<input type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> Reactive substances which are normally unstable and readily undergo violent change without detonating; react violently with water; form potentially explosive mixtures with water; when mixed with water, generate toxic gases, vapors, or fumes in a quantity sufficient to endanger humans; or are capable of detonation or explosive reaction.	<input type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> Biocides which eradicate organisms (i.e., disinfectant, insecticide, rodenticide, herbicide, etc.).	<input type="checkbox"/> some <input type="checkbox"/> none
<input checked="" type="checkbox"/> Carcinogens which cause an increased incidence of benign or malignant neoplasms in animals or humans or that substantially decreases the time in which neoplasms develop in animals or humans.	<input checked="" type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> None of the above.	

Exclude those used at the sewer user's establishment solely for office work, sanitation, and building and grounds maintenance.

9. Are any Potentially Harmful Substances **listed in Worksheet A** of this report, **including any in mixtures**, used, produced, processed, or housed at the sewer user's establishment? yes no

If yes, use worksheet A to identify them and report the maximum amount (either "small" or "large") of each one present at any time and the amount (either "some" or "none") of each one known, assumed, or expected to normally enter at any time any drain that ultimately empties into any sanitary sewer.

Exclude those used at the sewer user's establishment solely for office work, sanitation, and building and grounds maintenance.

10. Has an Emergency and Hazardous Chemical Inventory been prepared for the sewer user's establishment, pursuant to 40 CFR 370? yes no

If yes, submit a copy of the most recent one with this report.

Potentially Harmful Substances on Premises**

Worksheet A

Instructions: Check the appropriate spaces below to identify the following Potentially Harmful Substances present at the user's establishment, *including any in mixtures*, and to report the maximum amount (either "small" or "large") of each one present at any time and the amount (either "some" or "none") of each one known, assumed or expected to normally enter at any time any drain that ultimately empties into any sanitary sewer. A "small" amount is less than 55 gallons for any liquid substance or less than 100 pounds for any solid substance. Also enter the name of the user in the space after "SNDU" (Significant Non-domestic User) at the bottom of each page.

Potentially Harmful Substances on Premises**

Worksheet A

Instructions: Check the appropriate spaces below to identify the following Potentially Harmful Substances present at the user's establishment, *including any in mixtures*, and to report the maximum amount (either "small" or "large") of each one present at any time and the amount (either "some" or "none") of each one known, assumed or expected to normally enter at any time any drain that ultimately empties into any sanitary sewer. A "small" amount is less than 55 gallons for any liquid substance or less than 100 pounds for any solid substance. Also enter the name of the user in the space after "SNDU" (Significant Non-domestic User) at the bottom of each page.

**City of Flint Significant Non-domestic Sewer User Report
Potentially Harmful Substances on Premises**

Worksheet A

Instructions: Check the appropriate spaces below to identify the following Potentially Harmful Substances present at the user's establishment, *including any in mixtures*, and to report the maximum amount (either "small" or "large") of each one present at any time and the amount (either "some" or "none") of each one known, assumed or expected to normally enter at any time any drain that ultimately empties into any sanitary sewer. A "small" amount is less than 55 gallons for any liquid substance or less than 100 pounds for any solid substance. Also enter the name of the user in the space after "SNDU" (Significant Non-domestic User) at the bottom of each page.
