Notes

ug/L - Micrograms per litre
"-" - No value
U - Not detected at the associated reporting limit
J - Estimated concentration
UJ - Not detected; associated reporting limit is estimated
R - Rejected
s.u. - Standard units
nc - No criteria
ND - Non Detect (calculation)
BOLD[abc] Concentration exceeds associated screening level
IDEM Appendix A: Screening Levels Remedation Closure Guide - March 25, 2014
a - Exceeds IDEM residential tap screening levels
b - Exceeds IDEM residential vapor exposure screening levels
c - Exceeds IDEM commercial/industrial vapor screening levels

Notes
ug/L - Micrograms per litre
"-" - No value
U - Not detected at the associated reporting limit
J - Estimated concentration
UJ - Not detected; associated reporting limit is estimated
R - Rejected
s.u. - Standard units
nc - No criteria
ND - Non Detect (calculation)
BOLD[abc] Concentration exceeds associated screening level
IDEM Appendix A: Screening Levels Remedation Closure Guide - March 25, 2014
a - Exceeds IDEM residential tap screening levels
b - Exceeds IDEM residential vapor exposure screening levels
c - Exceeds IDEM commercial/industrial vapor screening levels

Notes

ug/L - Micrograms per litre
"-" - No value
U - Not detected at the associated reporting limit
J - Estimated concentration
UJ - Not detected; associated reporting limit is estimated
R - Rejected
s.u. - Standard units
nc - No criteria
ND - Non Detect (calculation)
BOLD[abc] Concentration exceeds associated screening level
IDEM Appendix A: Screening Levels Remedation Closure Guide - March 25, 2014
a - Exceeds IDEM residential tap screening levels
b - Exceeds IDEM residential vapor exposure screening levels
c - Exceeds IDEM commercial/industrial vapor screening levels

Notes

ug/L - Micrograms per litre
"-" - No value
U - Not detected at the associated reporting limit
J - Estimated concentration
UJ - Not detected; associated reporting limit is estimated
R - Rejected
s.u. - Standard units
nc - No criteria
ND - Non Detect (calculation)
BOLD[abc] Concentration exceeds associated screening level
IDEM Appendix A: Screening Levels Remedation Closure Guide - March 25, 2014
a - Exceeds IDEM residential tap screening levels
b - Exceeds IDEM residential vapor exposure screening levels
c - Exceeds IDEM commercial/industrial vapor screening levels

Notes

ug/L - Micrograms per litre
"-" - No value
U - Not detected at the associated reporting limit
J - Estimated concentration
UJ - Not detected; associated reporting limit is estimated
R - Rejected
s.u. - Standard units
nc - No criteria
ND - Non Detect (calculation)
BOLD[abc] Concentration exceeds associated screening level
IDEM Appendix A: Screening Levels Remedation Closure Guide - March 25, 2014
a - Exceeds IDEM residential tap screening levels
b - Exceeds IDEM residential vapor exposure screening levels
c - Exceeds IDEM commercial/industrial vapor screening levels

Notes

ug/L - Micrograms per litre
"-" - No value
U - Not detected at the associated reporting limit
J - Estimated concentration
UJ - Not detected; associated reporting limit is estimated
R - Rejected
s.u. - Standard units
nc - No criteria
ND - Non Detect (calculation)
BOLD[abc] Concentration exceeds associated screening level
IDEM Appendix A: Screening Levels Remedation Closure Guide - March 25, 2014
a - Exceeds IDEM residential tap screening levels
b - Exceeds IDEM residential vapor exposure screening levels
c - Exceeds IDEM commercial/industrial vapor screening levels

Notes

ug/L - Micrograms per litre
"-" - No value
U - Not detected at the associated reporting limit
J - Estimated concentration
UJ - Not detected; associated reporting limit is estimated
R - Rejected
s.u. - Standard units
nc - No criteria
ND - Non Detect (calculation)
BOLD[abc] Concentration exceeds associated screening level
IDEM Appendix A: Screening Levels Remedation Closure Guide - March 25, 2014
a - Exceeds IDEM residential tap screening levels
b - Exceeds IDEM residential vapor exposure screening levels
c - Exceeds IDEM commercial/industrial vapor screening levels

Sulfide	ug/L	--	--	--	--	--	--	--	--
Total dissolved solids (TDS)	ug/L	--	--	--	--	--	--	--	--
Total organic carbon (TOC)	ug/L	--	--	--	--	--	--	--	--

Notes

ug/L - Micrograms per litre
"-" - No value
U - Not detected at the associated reporting limit
J - Estimated concentration
UJ - Not detected; associated reporting limit is estimated
R - Rejected
s.u. - Standard units
nc - No criteria
ND - Non Detect (calculation)
BOLD[abc] Concentration exceeds associated screening level
IDEM Appendix A: Screening Levels Remedation Closure Guide - March 25, 2014
a - Exceeds IDEM residential tap screening levels
b - Exceeds IDEM residential vapor exposure screening levels
c - Exceeds IDEM commercial/industrial vapor screening levels

Notes

ug/L - Micrograms per litre
"-" - No value
U - Not detected at the associated reporting limit
J - Estimated concentration
UJ - Not detected; associated reporting limit is estimated
R - Rejected
s.u. - Standard units
nc - No criteria
ND - Non Detect (calculation)
BOLD[abc] Concentration exceeds associated screening level
IDEM Appendix A: Screening Levels Remedation Closure Guide - March 25, 2014
a - Exceeds IDEM residential tap screening levels
b - Exceeds IDEM residential vapor exposure screening levels
c - Exceeds IDEM commercial/industrial vapor screening levels

Nitrate (as N)	ug/L	--	--	--
Nitrite (as N)	ug/L	--	--	--
pH	s.u.	--	--	--
Sulfate	ug/L	--	--	--
Sulfide	ug/L	--	--	--
Total dissolved solids (TDS)	ug/L	--	--	--
Total organic carbon (TOC)	ug/L	--	--	--

Notes
ug/L - Micrograms per litre
"-" - No value
U - Not detected at the associated reporting limit
J - Estimated concentration
UJ - Not detected; associated reporting limit is estimated
R - Rejected
s.u. - Standard units
nc - No criteria
ND - Non Detect (calculation)
BOLD[abc] Concentration exceeds associated screening level
IDEM Appendix A: Screening Levels Remedation Closure Guide - March 25, 2014
a - Exceeds IDEM residential tap screening levels
b - Exceeds IDEM residential vapor exposure screening levels
c - Exceeds IDEM commercial/industrial vapor screening levels

Sanborn® Map Report

Ship to: Kelly F. Connolly
CRA
8615 West Bryn Mawr Ave
Chicago, IL 60631

1103659LIZ 773-380-9933

Order Date: 1/21/2002 **Completion Date:** 01/22/2002
Inquiry #: 725701.4S
P.O. #: NA
Site Name: 19703 - Muncie, Indiana
Address: 1200 West Eighth Street
City/State: Muncie, IN 47302
Cross Streets:

Based on client-supplied information, fire insurance maps for the following years were identified

1911 - 4 - maps
1950 - 4 - maps
1954 - 4 - maps
1972 - 4 - maps

Total Maps: 16

Limited Permission to Photocopy

CRA (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

All maps provided pursuant to a Sanborn® Map Report are currently reproducible of fire insurance maps owned or licensed by Environmental Data Resources, Inc. NO WARRANTY, EXPRESSED OR IMPLIED IS MADE WHATSOEVER. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, WARRANTIES AS TO ACCURACY, VALIDITY, COMPLETENESS, SUITABILITY, CONDITION, QUALITY, MERCHANTABILITY, OR FITNESS FOR A PARTICULAR USE OR PURPOSE WITH RESPECT TO THE REPORT, THE MAPS, THE INFORMATION CONTAINED THEREIN, OR THE RESULTS OF A SEARCH OR OTHERWISE. ALL RISK IS ASSUMED BY THE USER. Environmental Data Resources, Inc. assumes no liability to any party for any loss or damage whether arising out of errors or omissions, negligence, accident or any other cause. In no event shall Environmental Data Resources, Inc., its affiliates or agents, be liable to anyone for special, incidental, consequential or exemplary damages.

Copyright 2002, Environmental Data Resources, Inc. All rights reserved. Reproduction in any media or format of any map of Environmental Data Resources, Inc. (whether obtained as a result of a search or otherwise) may be prohibited without prior written permission from Environmental Data Resources, Inc. Electronic Sanborn Map Images
USER'S GUIDE

Thank you for your interest in electronic Sanborn Map images. The following are guidelines for accessing the images and for transferring them to your system. If you have any questions about the use of electronic Sanborn Map images, contact your EDR Account Executive at 1-800-352-0050.

Organization of Electronic Sanborn Image File

- First Page — Sanborn Map Report, listing years of coverage
- Second Page — Electronic Sanborn Map Images USER'S GUIDE
- Third Page — Oldest Sanborn Map Image
- Last Page — Most recent Sanborn Map Image

Navigating the Electronic Sanborn Image File

- Open file on screen.
- Identify TP (Target Property) on the most recent map.
- Find TP on older printed images.
- To view the image more clearly, zoom to 250%.
  - 200-250% is the approximate equivalent scale of hardcopy Sanborn Maps.
  - Viewing above 400% will tend to pixelate the display.
- Zooming in on an image:
  - Click on the % in the lower left hand corner and type in ____%.
  - Use the magnifying tool and drag a box around the TP area.

Printing a Sanborn Map from the Electronic File

- EDR recommends printing all images at 300 dpi (300 dpi prints faster than 600 dpi).
- To print only the TP area, cut and paste the area from Adobe Acrobat to your word processor.

  <u>For Adobe Acrobat Version 3</u>
  - Go to the Menu Bar.
  - Highlight 'Tools'.
  - Highlight 'Select Graphics'.
  - Draw a box around the area of interest.
  - Go to the Menu Bar.
  - Highlight 'Edit'.
  - Highlight 'Copy'.
  - Go to a word processor such as Microsoft Word and paste. Print from the word processor.

  <u>For Adobe Acrobat Version 4</u>
  - Go to the Menu Bar.
  - Press and hold the 'T' button.
  - Choose the Graphics Select Tool.
  - Draw a box around the area of interest.
  - Go to the Menu Bar.
  - Highlight 'Edit'.
  - Highlight 'Copy'.
  - Go to a word processor such as Microsoft Word and paste. Print from the word processor.

Important Information about Email Delivery of Electronic Sanborn Map Images

- Images are grouped into one file, up to 2MB.
- In cases where in excess of 6-7 map years are available, the file size typically exceeds 2MB. In these cases, you will receive multiple files, labeled as 1 of 3, 2 of 3, etc. including all available map years.
- Due to file size limitations, certain ISPs, including AOL, may occasionally delay or decline to deliver files. Please contact your ISP to identify their specific file size limitations.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
B	Compound was found in the blank and sample.

GC Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Metals

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
4	MS, MSD: The analyte present in the original sample is 4 times greater than the matrix spike concentration; therefore, control limits are not applicable.
F	MS or MSD exceeds the control limits
F	RPD of the MS and MSD exceeds the control limits

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CNF	Contains no Free Liquid
DL, RA, RE, IN	Indicates a Dilution, Reanalysis, Re-extraction, or additional Initial metals/anion analysis of the sample
EDL	Estimated Detection Limit
EPA	United States Environmental Protection Agency
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
RL	Reporting Limit
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job ID: 240-6099-1

Narrative

CASE NARRATIVE

Client: Conestoga-Rovers & Associates, Inc.

Project: 17324-T07, RACER Former MTM

Report Number: 240-6099-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica North Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 11/18/2011; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 3.2 C.

VOLATILE ORGANIC COMPOUNDS (GC-MS)

Samples S-017324-111711-TP-001 (240-6099-1), S-017324-111711-TP-002 (240-6099-2), S-017324-111711-TP-004 (240-6099-4) and S-017324-111711-TP-005 (240-6099-5) were analyzed for volatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8260B. The samples were prepared on 11/18/2011 and analyzed on 11/29/2011.

1,2,4-Trichlorobenzene was detected in method blank MB 240-24807/7 at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". If the associated sample reported a result above the MDL and/or RL, the result has been "B" flagged.

The presence of the '4' qualifier in the data indicates analytes where the concentration in the unspiked sample exceeded four times the spiking amount.

No other difficulties were encountered during the VOCs analyses.

All other quality control parameters were within the acceptance limits.

Job ID: 240-6099-1 (Continued)

Laboratory: TestAmerica North Canton (Continued)

SEMIVOLATILE ORGANIC COMPOUNDS (GC-MS)

Samples S-017324-111711-TP-004 (240-6099-4) and S-017324-111711-TP-005 (240-6099-5) were analyzed for semivolatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8270C. The samples were prepared on 11/22/2011 and analyzed on 11/30/2011.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

Bis(2-ethylhexyl) phthalate was detected in method blank MB 240-24339/20-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged.

Sample S-017324-111711-TP-004 (240-6099-4)[2.5X] required dilution prior to analysis due to matrix interference. The reporting limits have been adjusted accordingly.

No other difficulties were encountered during the SVOC analyses.

All other quality control parameters were within the acceptance limits.

POLYCHLORINATED BIPHENYLS (PCBS)

Samples S-017324-111711-TP-004 (240-6099-4) and S-017324-111711-TP-005 (240-6099-5) were analyzed for polychlorinated biphenyls (PCBs) in accordance with EPA SW-846 Method 8082. The samples were prepared on 11/22/2011 and analyzed on 11/28/2011.

All samples required a tetrabutylammonium sulfite (TBA) clean-up to reduce matrix interferences caused by sulfur.

No difficulties were encountered during the PCBs analyses.

All other quality control parameters were within the acceptance limits.

TOTAL METALS (ICP)

Samples S-017324-111711-TP-004 (240-6099-4) and S-017324-111711-TP-005 (240-6099-5) were analyzed for total metals (ICP) in accordance with EPA SW-846 Method 6010B. The samples were prepared on 11/21/2011 and analyzed on 11/28/2011, 11/29/2011 and 11/30/2011.

Several analytes were detected in method blank MB 240-24164/1-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged.

Several analytes failed the recovery criteria low for the MS of sample S-017324-111711-TP-004MS (240-6099-4) in batch 240-24992. Magnesium and Calcium failed the recovery criteria high.

For the MSD of sample S-017324-111711-TP-004MSD (240-6099-4) in batch 240-24992, Antimony and Iron failed the recovery criteria low. Magnesium, Aluminum and Calcium failed the recovery criteria high. Also, Aluminum exceeded the rpd limit.

Samples S-017324-111711-TP-004 (240-6099-4)[4X] and S-017324-111711-TP-005 (240-6099-5)[4X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No other difficulties were encountered during the metals analyses.

All other quality control parameters were within the acceptance limits.

TOTAL MERCURY

Samples S-017324-111711-TP-004 (240-6099-4) and S-017324-111711-TP-005 (240-6099-5) were analyzed for total mercury in accordance with EPA SW-846 Method 7471A. The samples were prepared on 11/21/2011 and analyzed on 11/30/2011.

Job ID: 240-6099-1 (Continued)

Laboratory: TestAmerica North Canton (Continued)

No difficulties were encountered during the mercury analyses.

All quality control parameters were within the acceptance limits.

TestAmerica Cooler Receipt Form/Narrative **Lot Number:** 6099
North Canton Facility

Client CRA Project _____ By: _____
Cooler Received on 11-18-11 Opened on 11-18-11 (Signature)
FedEx ☑ UPS ☐ DHL ☐ FAS ☐ Stetson ☐ Client Drop Off ☐ TestAmerica Courier ☐ Other _____
TestAmerica Cooler # A843 Multiple Coolers ☐ Foam Box ☐ Client Cooler ☐ Other _____

1. Were custody seals on the outside of the cooler(s)? Yes ☑ No ☐ Intact? Yes ☑ No ☐ NA ☐
   If YES, Quantity 2 Quantity Unsalvageable _____
   Were custody seals on the outside of cooler(s) signed and dated? Yes ☑ No ☐ NA ☐
   Were custody seals on the bottle(s)? Yes ☐ No ☑
   If YES, are there any exceptions? _____
2. Shippers' packing slip attached to the cooler(s)? Yes ☑ No ☐
3. Did custody papers accompany the sample(s)? Yes ☑ No ☐ Relinquished by client? Yes ☑ No ☐
4. Were the custody papers signed in the appropriate place? Yes ☑ No ☐
5. Packing material used: Bubble Wrap ☑ Foam ☐ None ☐ Other _____
6. Cooler temperature upon receipt 3.2 °C See back of form for multiple coolers/temps ☐
   METHOD: IR ☑ Other ☐ _____
   COOLANT: Wet Ice ☑ Blue Ice ☐ Dry Ice ☐ Water ☐ None ☐
7. Did all bottles arrive in good condition (Unbroken)? Yes ☑ No ☐
8. Could all bottle labels be reconciled with the COC? Yes ☑ No ☐
9. Were sample(s) at the correct pH upon receipt? Yes ☐ No ☐ NA ☑
10. Were correct bottle(s) used for the test(s) indicated? Yes ☑ No ☐
11. Were air bubbles >6 mm in any VOA vials? Yes ☐ No ☐ NA ☑
12. Sufficient quantity received to perform indicated analyses? Yes ☑ No ☐
13. Was a trip blank present in the cooler(s)? Yes ☐ No ☑ Were VOAs on the COC? Yes ☐ No ☑

Contacted PM _____ Date _____ by _____ via Verbal ☐ Voice Mail ☐ Other ☐
Concerning

14. CHAIN OF CUSTODY

The following discrepancies occurred:

15. SAMPLE CONDITION

Sample(s) _____ were received after the recommended holding time had expired.
Sample(s) _____ were received in a broken container.
Sample(s) _____ were received with bubble >6 mm in diameter. (Notify PM)

16. SAMPLE PRESERVATION

Sample(s) _____ were further preserved in Sample Receiving to meet recommended pH level(s). *Nitric Acid Lot# 110410-HNO_3; Sulfuric Acid Lot# 110410-H_2SO_4; Sodium Hydroxide Lot# 121809 -NaOH; Hydrochloric Acid Lot# 041911-HCl; Sodium Hydroxide and Zinc Acetate Lot#* 100108-*$(CH_3COO)_2ZN$/NaOH*. What time was preservative added to sample(s)? _____

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	N/A	
The cooler's custody seal, if present, is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	3.2
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

GC/MS Semi VOA

Qualifier	Qualifier Description
X	Surrogate is outside control limits
U	Indicates the analyte was analyzed for but not detected.
F	MS or MSD exceeds the control limits
F	RPD of the MS and MSD exceeds the control limits
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
4	MS, MSD: The analyte present in the original sample is 4 times greater than the matrix spike concentration; therefore, control limits are not applicable.
F	RPD of the MS and MSD exceeds the control limits
U	Indicates the analyte was analyzed for but not detected.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CNF	Contains no Free Liquid
DL, RA, RE, IN	Indicates a Dilution, Reanalysis, Re-extraction, or additional Initial metals/anion analysis of the sample
EDL	Estimated Detection Limit
EPA	United States Environmental Protection Agency
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
RL	Reporting Limit
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: Conestoga-Rovers & Associates, Inc.

Project: 17324-T07, RACER Former MTM

Report Number: 240-6184-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica North Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 11/22/2011; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 2.9 C.

SEMIVOLATILE ORGANIC COMPOUNDS (GC-MS)

Samples S-017324-112111-TP-006 (240-6184-1), S-017324-112111-TP-007 (240-6184-2), S-017324-112111-TP-008 (240-6184-3), S-017324-112111-TP-009 (240-6184-4), S-017324-112111-TP-010 (240-6184-5), S-017324-112111-TP-011 (240-6184-6) and S-017324-112111-TP-012 (240-6184-7) were analyzed for semivolatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8270C. The samples were prepared on 11/28/2011 and 11/29/2011 and analyzed on 12/01/2011.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

Benzo[a]pyrene failed the recovery criteria high for the MSD of sample S-017324-112111-TP-011MSD (240-6184-6) in batch 240-25162. Benzo[a]pyrene exceeded the rpd limit.

The presence of the '4' qualifier in the data indicates analytes where the concentration in the unspiked sample exceeded four times the spiking amount.

Job ID: 240-6184-1 (Continued)

Laboratory: TestAmerica North Canton (Continued)

Samples S-017324-112111-TP-006 (240-6184-1)[50X], S-017324-112111-TP-009 (240-6184-4)[20X] and S-017324-112111-TP-011 (240-6184-6)[5X] required dilution prior to analysis due to matrix interference. The reporting limits have been adjusted accordingly. The surrogates are considered diluted out.

No other difficulties were encountered during the SVOC analyses.

All other quality control parameters were within the acceptance limits.

The samples were prepared on 11/23/2011 and analyzed on 11/29/2011 and 11/30/2011.

Lead failed the recovery criteria low for the MS/MSD of sample S-017324-112111-TP-011 (240-6184-6) in batch 240-24992.

Samples S-017324-112111-TP-009 (240-6184-4)[5X] and S-017324-112111-TP-011 (240-6184-6)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No other difficulties were encountered during the metals analyses.

All other quality control parameters were within the acceptance limits.

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	N/A	
The cooler's custody seal, if present, is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	2.9
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

Metals

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CNF	Contains no Free Liquid
DL, RA, RE, IN	Indicates a Dilution, Reanalysis, Re-extraction, or additional Initial metals/anion analysis of the sample
EDL	Estimated Detection Limit
EPA	United States Environmental Protection Agency
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
RL	Reporting Limit
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: Conestoga-Rovers & Associates, Inc.

Project: 17324-T07, RACER Former MTM

Report Number: 240-6200-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica North Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 11/22/2011; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 3.4 C.

TOTAL METALS (ICP)

Samples S-017324-112111-TP-038 (240-6200-1), S-017324-112111-TP-039 (240-6200-2), S-017324-112111-TP-041 (240-6200-4), S-017324-112111-TP-042 (240-6200-5), S-017324-112111-TP-043 (240-6200-6), S-017324-112111-TP-044 (240-6200-7), S-017324-112111-TP-045 (240-6200-8), S-017324-112111-TP-046 (240-6200-9), S-017324-112111-TP-047 (240-6200-10), S-017324-112111-TP-048 (240-6200-11), S-017324-112111-TP-049 (240-6200-12), S-017324-112111-TP-050 (240-6200-13), S-017324-112111-TP-051 (240-6200-14) and S-017324-112111-TP-052 (240-6200-15) were analyzed for total metals (ICP) in accordance with EPA SW-846 Method 6010B. The samples were prepared on 11/23/2011 and analyzed on 11/30/2011.

No difficulties were encountered during the metals analyses.

All quality control parameters were within the acceptance limits.

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	N/A	
The cooler's custody seal, if present, is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	3.4
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

TestAmerica Job ID: 240-6243-1

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
*	LCS or LCSD exceeds the control limits
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
X	Surrogate is outside control limits

Metals

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
L	A negative instrument reading had an absolute value greater than the reporting limit

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CNF	Contains no Free Liquid
DL, RA, RE, IN	Indicates a Dilution, Reanalysis, Re-extraction, or additional Initial metals/anion analysis of the sample
EDL	Estimated Detection Limit
EPA	United States Environmental Protection Agency
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
RL	Reporting Limit
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: Conestoga-Rovers & Associates, Inc.

Project: 17324-T07, RACER Former MTM

Report Number: 240-6243-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica North Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 11/23/2011; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 3.4 C.

VOLATILE ORGANIC COMPOUNDS (GC-MS)

Samples S-017324-112211-TP-073 (240-6243-20), S-017324-112211-TP-074 (240-6243-21) and S-017324-112211-TP-075 (240-6243-22) were analyzed for volatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8260B. The samples were prepared on 11/23/2011 and analyzed on 12/03/2011.

1,2,4-Trichlorobenzene was detected in method blank MB 240-25411/6 at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". If the associated sample reported a result above the MDL and/or RL, the result has been "B" flagged.

No other difficulties were encountered during the VOCs analyses.

All other quality control parameters were within the acceptance limits.

SEMIVOLATILE ORGANIC COMPOUNDS (GC-MS)

Samples S-017324-112211-TP-073 (240-6243-20), S-017324-112211-TP-074 (240-6243-21) and S-017324-112211-TP-075

Job ID: 240-6243-1 (Continued)

Laboratory: TestAmerica North Canton (Continued)

(240-6243-22) were analyzed for semivolatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8270C. The samples were prepared on 12/06/2011 and analyzed on 12/08/2011.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

3,3'-Dichlorobenzidine failed the recovery criteria low for LCS 240-25639/22-A.

The presence of the '4' qualifier in the data indicates analytes where the concentration in the unspiked sample exceeded four times the spiking amount.

No other difficulties were encountered during the SVOC analyses.

All other quality control parameters were within the acceptance limits.

POLYCHLORINATED BIPHENYLS (PCBS)

Samples S-017324-112211-TP-073 (240-6243-20), S-017324-112211-TP-074 (240-6243-21) and S-017324-112211-TP-075 (240-6243-22) were analyzed for polychlorinated biphenyls (PCBs) in accordance with EPA SW-846 Method 8082. The samples were prepared on 11/28/2011 and analyzed on 11/30/2011.

Surrogates are added during the extraction process prior to dilution. When the sample dilution is 5X or greater, surrogate recoveries are diluted out and no corrective action is required.

DCB Decachlorobiphenyl and Tetrachloro-m-xylene failed the surrogate recovery criteria low for S-017324-112211-TP-075 (240-6243-22).

Sample S-017324-112211-TP-075 (240-6243-22)[20X] required dilution prior to analysis due to matrix interference. The reporting limits have been adjusted accordingly. The surrogates are considered diulted out.

No other difficulties were encountered during the PCBs analyses.

All other quality control parameters were within the acceptance limits.

TOTAL METALS (ICP)

Samples S-017324-112211-TP-054 (240-6243-1), S-017324-112211-TP-055 (240-6243-2), S-017324-112211-TP-056 (240-6243-3), S-017324-112211-TP-058 (240-6243-5), S-017324-112211-TP-059 (240-6243-6), S-017324-112211-TP-061 (240-6243-8), S-017324-112211-TP-062 (240-6243-9), S-017324-112211-TP-064 (240-6243-11), S-017324-112211-TP-065 (240-6243-12), S-017324-112211-TP-067 (240-6243-14), S-017324-112211-TP-068 (240-6243-15), S-017324-112211-TP-070 (240-6243-17), S-017324-112211-TP-071 (240-6243-18), S-017324-112211-TP-073 (240-6243-20), S-017324-112211-TP-074 (240-6243-21) and S-017324-112211-TP-075 (240-6243-22) were analyzed for total metals (ICP) in accordance with EPA SW-846 Method 6010B. The samples were prepared on 11/29/2011 and analyzed on 11/30/2011 and 12/01/2011.

Several analytes were detected in method blank MB 240-24884/1-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged. Several analytes were detected in method blank MB 240-24887/1-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged.

Sample S-017324-112211-TP-075 (240-6243-22)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No other difficulties were encountered during the metals analyses.

All other quality control parameters were within the acceptance limits.

TOTAL MERCURY

Job ID: 240-6243-1 (Continued)

Laboratory: TestAmerica North Canton (Continued)

Samples S-017324-112211-TP-073 (240-6243-20), S-017324-112211-TP-074 (240-6243-21) and S-017324-112211-TP-075 (240-6243-22) were analyzed for total mercury in accordance with EPA SW-846 Method 7471A. The samples were prepared on 11/29/2011 and analyzed on 11/30/2011.

No difficulties were encountered during the mercury analyses.

All quality control parameters were within the acceptance limits.

TestAmerica Cooler Receipt Form/Narrative **Lot Number:** 6243
North Canton Facility

Client CRA Project _____ By: _____
Cooler Received on 11-23-11 Opened on 11-23-11 (Signature)
FedEx ☑ UPS ☐ DHL ☐ FAS ☐ Stetson ☐ Client Drop Off ☐ TestAmerica Courier ☐ Other _____
TestAmerica Cooler # No # Multiple Coolers ☐ Foam Box ☐ Client Cooler ☐ Other _____

1. Were custody seals on the outside of the cooler(s)? Yes ☑ No ☐ Intact? Yes ☑ No ☐ NA ☐
   If YES, Quantity 2 Quantity Unsalvageable _____
   Were custody seals on the outside of cooler(s) signed and dated? Yes ☑ No ☐ NA ☐
   Were custody seals on the bottle(s)? Yes ☐ No ☑
   If YES, are there any exceptions? _____
2. Shippers' packing slip attached to the cooler(s)? Yes ☑ No ☐
3. Did custody papers accompany the sample(s)? Yes ☑ No ☐ Relinquished by client? Yes ☑ No ☐
4. Were the custody papers signed in the appropriate place? Yes ☑ No ☐
5. Packing material used: Bubble Wrap ☑ Foam ☑ None ☐ Other _____
6. Cooler temperature upon receipt 3.4 °C See back of form for multiple coolers/temps ☐
   METHOD: IR ☑ Other ☐ _____
   COOLANT: Wet Ice ☑ Blue Ice ☐ Dry Ice ☐ Water ☐ None ☐
7. Did all bottles arrive in good condition (Unbroken)? Yes ☑ No ☐
8. Could all bottle labels be reconciled with the COC? Yes ☑ No ☐
9. Were sample(s) at the correct pH upon receipt? Yes ☐ No ☐ NA ☑
10. Were correct bottle(s) used for the test(s) indicated? Yes ☑ No ☐
11. Were air bubbles >6 mm in any VOA vials? Yes ☐ No ☐ NA ☑
12. Sufficient quantity received to perform indicated analyses? Yes ☑ No ☐
13. Was a trip blank present in the cooler(s)? Yes ☐ No ☑ Were VOAs on the COC? Yes ☐ No ☑

Contacted PM _____ Date _____ by _____ via Verbal ☐ Voice Mail ☐ Other ☐
Concerning

14. CHAIN OF CUSTODY

The following discrepancies occurred:

15. SAMPLE CONDITION

Sample(s) _____ were received after the recommended holding time had expired.
Sample(s) _____ were received in a broken container.
Sample(s) _____ were received with bubble >6 mm in diameter. (Notify PM)

16. SAMPLE PRESERVATION

Sample(s) _____ were further preserved in Sample Receiving to meet recommended pH level(s). *Nitric Acid Lot# 110410-HNO_3; Sulfuric Acid Lot# 110410-H_2SO_4; Sodium Hydroxide Lot# 121809 -NaOH; Hydrochloric Acid Lot# 041911-HCl; Sodium Hydroxide and Zinc Acetate Lot#* 100108-$(CH_3COO)_2ZN$/NaOH. What time was preservative added to sample(s)? _____

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	N/A	
The cooler's custody seal, if present, is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	3.4
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Project/Site: 17324-T07, RACER Former MTM

TestAmerica Job ID: 240-6243-3

Qualifiers

Metals

Qualifier	Qualifier Description
B	Compound was found in the blank and sample.
U	Indicates the analyte was analyzed for but not detected.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
H	Sample was prepped or analyzed beyond the specified holding time

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CNF	Contains no Free Liquid
DL, RA, RE, IN	Indicates a Dilution, Reanalysis, Re-extraction, or additional Initial metals/anion analysis of the sample
EDL	Estimated Detection Limit
EPA	United States Environmental Protection Agency
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RL	Reporting Limit
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: Conestoga-Rovers & Associates, Inc.

Project: 17324-T07, RACER Former MTM

Report Number: 240-6243-3

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica North Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

On December 22, 2011, CRA requested metals analysis on sample S-017324-112211-TP-071. A revised chain of custody was not provided.

RECEIPT

The samples were received on 11/23/2011; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 3.4 C.

TOTAL METALS (ICP)

Sample S-017324-112211-TP-071 (240-6243-18) was analyzed for total metals (ICP) in accordance with EPA SW-846 Method 6010B. The samples were prepared on 12/27/2011 and analyzed on 12/28/2011.

Several analytes were detected in method blank MB 240-28207/1-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged "J". If the associated sample reported a result above the MDL and/or RL, the result has been "B" flagged.

The presence of the '4' qualifier in the data indicates analytes where the concentration in the unspiked sample exceeded four times the spiking amount.

No other difficulties were encountered during the metals analysis.

Job ID: 240-6243-3 (Continued)

Laboratory: TestAmerica North Canton (Continued)

All other quality control parameters were within the acceptance limits.

TOTAL MERCURY

Sample S-017324-112211-TP-071 (240-6243-18) was analyzed for total mercury in accordance with EPA SW-846 Method 7471A. The samples were prepared on 12/27/2011 and analyzed past the 28 day method recommended holding time on 12/28/2011.

No difficulties were encountered during the mercury analysis.

All quality control parameters were within the acceptance limits.

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	N/A	
The cooler's custody seal, if present, is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	3.4
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Client: Conestoga-Rovers & Associates, Inc.
Project/Site: 17324-T07, RACER Former MTM

TestAmerica Job ID: 240-6243-4

Qualifiers

Metals

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CNF	Contains no Free Liquid
DL, RA, RE, IN	Indicates a Dilution, Reanalysis, Re-extraction, or additional Initial metals/anion analysis of the sample
EDL	Estimated Detection Limit
EPA	United States Environmental Protection Agency
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RL	Reporting Limit
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: Conestoga-Rovers & Associates, Inc.

Project: 17324-T07, RACER Former MTM

Report Number: 240-6243-4

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica North Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

On January 31, 2012, CRA request lead analysis on sample ID: S-017324-112211-TP-072. A revised chain of custody was not provided.

RECEIPT

The samples were received on 11/23/2011; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 3.4 C.

TOTAL METALS (ICP)

Sample S-017324-112211-TP-072 (240-6243-19) was analyzed for total metals (ICP) in accordance with EPA SW-846 Method 6010B. The samples were prepared on 02/03/2012 and analyzed on 02/06/2012.

No difficulties were encountered during the metals analysis.

All quality control parameters were within the acceptance limits.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
H	Sample was prepped or analyzed beyond the specified holding time
U	Indicates the analyte was analyzed for but not detected.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
B	Compound was found in the blank and sample.
F	MS or MSD exceeds the control limits
F	RPD of the MS and MSD exceeds the control limits

GC/MS Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
X	Surrogate is outside control limits
E	Result exceeded calibration range.
F	MS or MSD exceeds the control limits

GC Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
X	Surrogate is outside control limits
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
L	A negative instrument reading had an absolute value greater than the reporting limit
4	MS, MSD: The analyte present in the original sample is 4 times greater than the matrix spike concentration; therefore, control limits are not applicable.
F	MS or MSD exceeds the control limits

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CNF	Contains no Free Liquid
DL, RA, RE, IN	Indicates a Dilution, Reanalysis, Re-extraction, or additional Initial metals/anion analysis of the sample
EDL	Estimated Detection Limit
EPA	United States Environmental Protection Agency
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
RL	Reporting Limit
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: Conestoga-Rovers & Associates, Inc.

Project: 17324-T07, RACER Former MTM

Report Number: 240-6291-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica North Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 11/26/2011; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 1.6, 2.0, 2.4C.

VOLATILE ORGANIC COMPOUNDS (GC-MS)

Samples S-017324-112311-TP-076 (240-6291-1), S-017324-112311-TP-077 (240-6291-2), S-017324-112311-TP-078 (240-6291-3), S-017324-112311-TP-079 (240-6291-4), S-017324-112311-TP-080 (240-6291-5), S-017324-112311-TP-081 (240-6291-6), S-017324-112311-TP-082 (240-6291-7), S-017324-112311-TP-085 (240-6291-10), S-017324-112311-TP-086 (240-6291-11), S-017324-112311-TP-087 (240-6291-12), S-017324-112311-TP-088 (240-6291-13), S-017324-112311-TP-089 (240-6291-14), S-017324-112311-TP-090 (240-6291-15), S-017324-112311-TP-091 (240-6291-16) and S-017324-112311-TP-092 (240-6291-17) were analyzed for volatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8260B. The samples were prepared on 11/26/2011 and 11/30/2011 and analyzed on 12/05/2011 and 12/06/2011.

All water preserved terracores were received past the method recommended 48 preservation by freezing holding time. The samples effected are noted in the report with the qualifier H.

m-Xylene & p-Xylene was detected in method blank MB 240-25136/1-A at a level exceeding the reporting limit. If the associated sample reported a result above the MDL and/or RL, the result has been "B" flagged. 1,2,4-Trichlorobenzene was detected in method blank MB 240-25537/6 at a level that was above the method detection limit but below the reporting limit. The value should be considered an

Job ID: 240-6291-1 (Continued)

Laboratory: TestAmerica North Canton (Continued)

estimate, and has been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged.

Several analytes failed the recovery criteria low for the MS/MSD of sample S-017324-112311-TP-078 (240-6291-3) in batch 240-25537. Several analytes exceeded the rpd limit.

The presence of the '4' qualifier in the data indicates analytes where the concentration in the unspiked sample exceeded four times the spiking amount.

Sample S-017324-112311-TP-088 (240-6291-13)[25X] required dilution prior to analysis due to matrix interference. The reporting limits have been adjusted accordingly.

No other difficulties were encountered during the VOCs analyses.

All other quality control parameters were within the acceptance limits.

SEMIVOLATILE ORGANIC COMPOUNDS (GC-MS)

Samples S-017324-112311-TP-076 (240-6291-1), S-017324-112311-TP-077 (240-6291-2), S-017324-112311-TP-078 (240-6291-3), S-017324-112311-TP-079 (240-6291-4), S-017324-112311-TP-080 (240-6291-5), S-017324-112311-TP-081 (240-6291-6), S-017324-112311-TP-082 (240-6291-7), S-017324-112311-TP-085 (240-6291-10), S-017324-112311-TP-086 (240-6291-11), S-017324-112311-TP-087 (240-6291-12), S-017324-112311-TP-088 (240-6291-13), S-017324-112311-TP-089 (240-6291-14), S-017324-112311-TP-090 (240-6291-15), S-017324-112311-TP-091 (240-6291-16) and S-017324-112311-TP-092 (240-6291-17) were analyzed for semivolatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8270C. The samples were prepared on 11/29/2011 and analyzed on 12/01/2011, 12/02/2011, 12/05/2011 and 12/06/2011.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

2,4,6-Tribromophenol (Surr), Nitrobenzene-d5 (Surr) and Phenol-d5 (Surr) failed the surrogate recovery criteria low for S-017324-112311-TP-087 (240-6291-12). 2,4,6-Tribromophenol (Surr) failed the surrogate recovery criteria low for S-017324-112311-TP-091 (240-6291-16).

Several analytes failed the recovery criteria low for the MS/MSD of sample S-017324-112311-TP-078 (240-6291-3) in batch 240-25162.

Samples S-017324-112311-TP-087 (240-6291-12)[50X], S-017324-112311-TP-089 (240-6291-14)[10X], S-017324-112311-TP-089 (240-6291-14)[25X] and S-017324-112311-TP-091 (240-6291-16)[10X] required dilution prior to analysis due to matrix interference. The reporting limits have been adjusted accordingly. The surrogates are considered diluted out.

No other difficulties were encountered during the SVOC analyses.

All other quality control parameters were within the acceptance limits.

POLYCHLORINATED BIPHENYLS (PCBS)

Samples S-017324-112311-TP-076 (240-6291-1), S-017324-112311-TP-077 (240-6291-2), S-017324-112311-TP-078 (240-6291-3), S-017324-112311-TP-079 (240-6291-4), S-017324-112311-TP-080 (240-6291-5), S-017324-112311-TP-081 (240-6291-6), S-017324-112311-TP-082 (240-6291-7), S-017324-112311-TP-083 (240-6291-8), S-017324-112311-TP-084 (240-6291-9), S-017324-112311-TP-085 (240-6291-10), S-017324-112311-TP-086 (240-6291-11), S-017324-112311-TP-087 (240-6291-12), S-017324-112311-TP-088 (240-6291-13), S-017324-112311-TP-089 (240-6291-14), S-017324-112311-TP-090 (240-6291-15), S-017324-112311-TP-091 (240-6291-16) and S-017324-112311-TP-092 (240-6291-17) were analyzed for polychlorinated biphenyls (PCBs) in accordance with EPA SW-846 Method 8082. The samples were prepared on 11/28/2011 and 11/30/2011 and analyzed on 11/30/2011 and 12/02/2011.

Surrogates are added during the extraction process prior to dilution. When the sample dilution is 5X or greater, surrogate recoveries are diluted out and no corrective action is required.

DCB Decachlorobiphenyl and Tetrachloro-m-xylene failed the surrogate recovery criteria low for S-017324-112311-TP-087 (240-6291-12).

Job ID: 240-6291-1 (Continued)

Laboratory: TestAmerica North Canton (Continued)

Sample S-017324-112311-TP-087 (240-6291-12)[10X] required dilution prior to analysis due to matrix interference. The reporting limits have been adjusted accordingly. The surrogates are considered diluted out.

All samples required a tetrabutylammonium sulfite (TBA) clean-up to reduce matrix interferences caused by sulfur.

No other difficulties were encountered during the PCBs analyses.

All other quality control parameters were within the acceptance limits.

TOTAL METALS (ICP)

Samples S-017324-112311-TP-076 (240-6291-1), S-017324-112311-TP-077 (240-6291-2), S-017324-112311-TP-078 (240-6291-3), S-017324-112311-TP-079 (240-6291-4), S-017324-112311-TP-080 (240-6291-5), S-017324-112311-TP-081 (240-6291-6), S-017324-112311-TP-082 (240-6291-7), S-017324-112311-TP-083 (240-6291-8), S-017324-112311-TP-084 (240-6291-9), S-017324-112311-TP-085 (240-6291-10), S-017324-112311-TP-086 (240-6291-11), S-017324-112311-TP-087 (240-6291-12), S-017324-112311-TP-088 (240-6291-13), S-017324-112311-TP-089 (240-6291-14), S-017324-112311-TP-090 (240-6291-15), S-017324-112311-TP-091 (240-6291-16) and S-017324-112311-TP-092 (240-6291-17) were analyzed for total metals (ICP) in accordance with EPA SW-846 Method 6010B. The samples were prepared on 11/29/2011 and 11/30/2011 and analyzed on 11/30/2011, 12/01/2011 and 12/02/2011.

Several analytes were detected in method blank MB 240-24899/1-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged. Several analytes were detected in method blank MB 240-25054/1-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged.

Antimony, Calcium, Iron and Manganese failed the recovery criteria low for the MS of sample S-017324-112311-TP-078MS (240-6291-3) in batch 240-25145. Aluminum and Magnesium failed the recovery criteria high.

Antimony, Calcium and Iron failed the recovery criteria low for the MSD of sample S-017324-112311-TP-078MSD (240-6291-3) in batch 240-25145. Aluminum failed the recovery criteria high.

Samples S-017324-112311-TP-082 (240-6291-7)[5X], S-017324-112311-TP-086 (240-6291-11)[5X], S-017324-112311-TP-087 (240-6291-12)[5X], S-017324-112311-TP-088 (240-6291-13)[5X], S-017324-112311-TP-089 (240-6291-14)[5X], S-017324-112311-TP-090 (240-6291-15)[5X] and S-017324-112311-TP-092 (240-6291-17)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No other difficulties were encountered during the metals analyses.

All other quality control parameters were within the acceptance limits.

TOTAL MERCURY

Samples S-017324-112311-TP-076 (240-6291-1), S-017324-112311-TP-077 (240-6291-2), S-017324-112311-TP-078 (240-6291-3), S-017324-112311-TP-079 (240-6291-4), S-017324-112311-TP-080 (240-6291-5), S-017324-112311-TP-081 (240-6291-6), S-017324-112311-TP-082 (240-6291-7), S-017324-112311-TP-083 (240-6291-8), S-017324-112311-TP-084 (240-6291-9), S-017324-112311-TP-085 (240-6291-10), S-017324-112311-TP-086 (240-6291-11), S-017324-112311-TP-087 (240-6291-12), S-017324-112311-TP-088 (240-6291-13), S-017324-112311-TP-089 (240-6291-14), S-017324-112311-TP-090 (240-6291-15), S-017324-112311-TP-091 (240-6291-16) and S-017324-112311-TP-092 (240-6291-17) were analyzed for total mercury in accordance with EPA SW-846 Method 7471A. The samples were prepared on 11/29/2011 and 11/30/2011 and analyzed on 11/30/2011.

No difficulties were encountered during the mercury analyses.

All quality control parameters were within the acceptance limits.

TestAmerica Cooler Receipt Form/Narrative **Lot Number:** #6291
North Canton Facility

Client CRA Project MTM By: (Signature)
Cooler Received on 11/26/11 Opened on 11/26/11
FedEx UPS DHL FAS Stetson Client Drop Off TestAmerica Courier Other
TestAmerica Cooler # Multiple Coolers Foam Box Client Cooler Other

1. Were custody seals on the outside of the cooler(s)? Yes No Intact? Yes No NA
   If YES, Quantity 2 Quantity Unsalvageable
   Were custody seals on the outside of cooler(s) signed and dated? Yes No NA
   Were custody seals on the bottle(s)? Yes No
   If YES, are there any exceptions?
2. Shippers' packing slip attached to the cooler(s)? Yes No
3. Did custody papers accompany the sample(s)? Yes No Relinquished by client? Yes No
4. Were the custody papers signed in the appropriate place? Yes No
5. Packing material used: Bubble Wrap Foam None Other
6. Cooler temperature upon receipt BACK °C See back of form for multiple coolers/temps
   METHOD: IR Other
   COOLANT: Wet Ice Blue Ice Dry Ice Water None
7. Did all bottles arrive in good condition (Unbroken)? Yes No
8. Could all bottle labels be reconciled with the COC? Yes No
9. Were sample(s) at the correct pH upon receipt? Yes No NA
10. Were correct bottle(s) used for the test(s) indicated? Yes No
11. Were air bubbles >6 mm in any VOA vials? Yes No NA
12. Sufficient quantity received to perform indicated analyses? Yes No
13. Was a trip blank present in the cooler(s)? Yes No Were VOAs on the COC? Yes No

Contacted PM DH Date 11/26/11 by JM via Verbal Voice Mail Other
Concerning #14

14. CHAIN OF CUSTODY

The following discrepancies occurred:
All samples included expired terra core kits (except 083 + 084 that have no VOC). All weights are covered by client labels.

15. SAMPLE CONDITION

Sample(s) were received after the recommended holding time had expired.
Sample(s) were received in a broken container.
Sample(s) were received with bubble >6 mm in diameter. (Notify PM)

16. SAMPLE PRESERVATION

Sample(s) were further preserved in Sample Receiving to meet recommended pH level(s). *Nitric Acid Lot# 110410-HNO_3; Sulfuric Acid Lot# 041911-H_2SO_4; Sodium Hydroxide Lot# 121809 -NaOH; Hydrochloric Acid Lot# 041911-HCl; Sodium Hydroxide and Zinc Acetate Lot#* 100108-$(CH_3COO)_2ZN$/NaOH. What time was preservative added to sample(s)?

Question	Answer	Comment
Radioactivity either was not measured or, if measured, is at or below background	N/A	
The cooler's custody seal, if present, is intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	True	
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	1.6, 2.0, 2.4
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	True	
There are no discrepancies between the sample IDs on the containers and the COC.	True	
Samples are received within Holding Time.	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	True	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
VOA sample vials do not have headspace or bubble is <6mm (1/4") in diameter.	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
B	Compound was found in the blank and sample.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

GC/MS Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
*	LCS or LCSD exceeds the control limits
X	Surrogate is outside control limits
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
F	MS or MSD exceeds the control limits
F	RPD of the MS and MSD exceeds the control limits

GC Semi VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
X	Surrogate is outside control limits
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Metals

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
B	Compound was found in the blank and sample.
L	A negative instrument reading had an absolute value greater than the reporting limit
4	MS, MSD: The analyte present in the original sample is 4 times greater than the matrix spike concentration; therefore, control limits are not applicable.
F	MS or MSD exceeds the control limits
F	RPD of the MS and MSD exceeds the control limits
^	ICV,CCV,ICB,CCB, ISA, ISB, CRI, CRA, DLCK or MRL standard: Instrument related QC exceeds the control limits.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CNF	Contains no Free Liquid
DL, RA, RE, IN	Indicates a Dilution, Reanalysis, Re-extraction, or additional Initial metals/anion analysis of the sample
EDL	Estimated Detection Limit
EPA	United States Environmental Protection Agency
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
RL	Reporting Limit
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: Conestoga-Rovers & Associates, Inc.

Project: 17324-T07, RACER Former MTM

Report Number: 240-6309-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica North Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 11/29/2011; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 1.9, 2.3 and 2.8 C.

VOLATILE ORGANIC COMPOUNDS (GC-MS)

Samples S-017324-112811-TP-093 (240-6309-1), S-017324-112811-TP-094 (240-6309-2), S-017324-112811-TP-095 (240-6309-3), S-017324-112811-TP-096 (240-6309-4), S-017324-112811-TP-097 (240-6309-5), S-017324-112811-TP-098 (240-6309-6), S-017324-112811-TP-099 (240-6309-7), S-017324-112811-TP-100 (240-6309-8), S-017324-112811-TP-101 (240-6309-9), S-017324-112811-TP-102 (240-6309-10) and S-017324-112811-TP-103 (240-6309-11) were analyzed for volatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8260B. The samples were prepared on 11/29/2011 and 11/30/2011 and analyzed on 12/06/2011.

1,2,4-Trichlorobenzene was detected in method blank MB 240-25593/6 at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged "J". If the associated sample reported a result above the MDL and/or RL, the result has been "B" flagged.

the water preserved VOC vials cracked in the freezer. As a result, the methanol vial for sample S-017324-112811-TP-103 (240-6309-11) was used for analysis.

Job ID: 240-6309-1 (Continued)

Laboratory: TestAmerica North Canton (Continued)

No other difficulties were encountered during the VOCs analyses.

All other quality control parameters were within the acceptance limits.

SEMIVOLATILE ORGANIC COMPOUNDS (GC-MS)

Samples S-017324-112811-TP-093 (240-6309-1), S-017324-112811-TP-094 (240-6309-2), S-017324-112811-TP-095 (240-6309-3), S-017324-112811-TP-096 (240-6309-4), S-017324-112811-TP-097 (240-6309-5), S-017324-112811-TP-098 (240-6309-6), S-017324-112811-TP-099 (240-6309-7), S-017324-112811-TP-100 (240-6309-8), S-017324-112811-TP-101 (240-6309-9), S-017324-112811-TP-102 (240-6309-10) and S-017324-112811-TP-103 (240-6309-11) were analyzed for semivolatile organic compounds (GC-MS) in accordance with EPA SW-846 Method 8270C. The samples were prepared on 12/02/2011 and 12/06/2011 and analyzed on 12/06/2011, 12/08/2011, 12/09/2011 and 12/12/2011.

Surrogates are added during the extraction process prior to dilution. When the sample is diluted, surrogate recoveries are diluted out and no corrective action is required.

3,3'-Dichlorobenzidine failed the recovery criteria low for LCS 240-25639/22-A.

2,4-Dinitrophenol, 4,6-Dinitro-2-methylphenol and Pentachlorophenol failed the recovery criteria low for the MS of sample S-017324-112811-TP-099MS (240-6309-7) in batch 240-26096.

4-Nitrophenol and Hexachlorocyclopentadiene exceeded the rpd limit for the MSD of sample S-017324-112811-TP-099MSD (240-6309-7) in batch 240-26185.

The presence of the '4' qualifier in the data indicates analytes where the concentration in the unspiked sample exceeded four times the spiking amount.

Samples S-017324-112811-TP-095 (240-6309-3)[20X], S-017324-112811-TP-101 (240-6309-9)[50X], S-017324-112811-TP-102 (240-6309-10)[50X] and S-017324-112811-TP-103 (240-6309-11)[50X] required dilution prior to analysis. The reporting limits have been adjusted accordingly. The surrogates are considered diluted out.

No other difficulties were encountered during the SVOC analyses.

All other quality control parameters were within the acceptance limits.

POLYCHLORINATED BIPHENYLS (PCBS)

Samples S-017324-112811-TP-093 (240-6309-1), S-017324-112811-TP-094 (240-6309-2), S-017324-112811-TP-095 (240-6309-3), S-017324-112811-TP-096 (240-6309-4), S-017324-112811-TP-097 (240-6309-5), S-017324-112811-TP-098 (240-6309-6), S-017324-112811-TP-099 (240-6309-7), S-017324-112811-TP-100 (240-6309-8), S-017324-112811-TP-101 (240-6309-9), S-017324-112811-TP-102 (240-6309-10), S-017324-112811-TP-103 (240-6309-11), S-017324-112811-TP-104 (240-6309-12), S-017324-112811-TP-105 (240-6309-13), S-017324-112811-TP-106 (240-6309-14), S-017324-112811-TP-107 (240-6309-15), S-017324-112811-TP-108 (240-6309-16), S-017324-112811-TP-109 (240-6309-17), S-017324-112811-TP-110 (240-6309-18), S-017324-112811-TP-111 (240-6309-19) and S-017324-112811-TP-112 (240-6309-20) were analyzed for polychlorinated biphenyls (PCBs) in accordance with EPA SW-846 Method 8082. The samples were prepared on 12/02/2011 and analyzed on 12/07/2011.

Surrogates are added during the extraction process prior to dilution. When the sample dilution is 5X or greater, surrogate recoveries are diluted out and no corrective action is required.

Two surrogates are used for this analysis. The laboratory's SOP allows 1 of these surrogates to be outside acceptance criteria without performing re-extraction/re-analysis. The following samples contained an allowable number of surrogate compounds outside limits: S-017324-112811-TP-099 (240-6309-7 MS), S-017324-112811-TP-099 (240-6309-7 MSD), S-017324-112811-TP-100 (240-6309-8), S-017324-112811-TP-105 (240-6309-13), S-017324-112811-TP-107 (240-6309-15), S-017324-112811-TP-108 (240-6309-16), S-017324-112811-TP-110 (240-6309-18). Tetrachloro-m-xylene failed the surrogate recovery criteria high for MB 240-25326/23-A. Tetrachloro-m-xylene failed the surrogate recovery criteria high for LCS 240-25326/24-A. These results have been reported and qualified.

Sample S-017324-112811-TP-105 (240-6309-13)[5X] required dilution prior to analysis. The reporting limits have been adjusted

Job ID: 240-6309-1 (Continued)

Laboratory: TestAmerica North Canton (Continued)

accordingly.

All samples required a tetrabutylammonium sulfite (TBA) clean-up to reduce matrix interferences caused by sulfur.

No other difficulties were encountered during the PCBs analyses.

All other quality control parameters were within the acceptance limits.

TOTAL METALS (ICP)

Samples S-017324-112811-TP-093 (240-6309-1), S-017324-112811-TP-094 (240-6309-2), S-017324-112811-TP-095 (240-6309-3), S-017324-112811-TP-096 (240-6309-4), S-017324-112811-TP-097 (240-6309-5), S-017324-112811-TP-098 (240-6309-6), S-017324-112811-TP-099 (240-6309-7), S-017324-112811-TP-100 (240-6309-8), S-017324-112811-TP-101 (240-6309-9), S-017324-112811-TP-102 (240-6309-10), S-017324-112811-TP-103 (240-6309-11), S-017324-112811-TP-104 (240-6309-12), S-017324-112811-TP-105 (240-6309-13), S-017324-112811-TP-106 (240-6309-14), S-017324-112811-TP-107 (240-6309-15), S-017324-112811-TP-108 (240-6309-16), S-017324-112811-TP-109 (240-6309-17), S-017324-112811-TP-110 (240-6309-18), S-017324-112811-TP-111 (240-6309-19) and S-017324-112811-TP-112 (240-6309-20) were analyzed for total metals (ICP) in accordance with EPA SW-846 Method 6010B. The samples were prepared on 11/30/2011 and 12/01/2011 and analyzed on 12/01/2011, 12/02/2011 and 12/05/2011.

Several analytes were detected in method blank MB 240-25067/1-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged. Several analytes were detected in method blank MB 240-25201/1-A at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged “J”. If the associated sample reported a result above the MDL and/or RL, the result has been “B” flagged.

Antimony and Iron failed the recovery criteria low for the MS of sample S-017324-112811-TP-099MS (240-6309-7) in batch 240-25468. Aluminum, Magnesium, Manganese and Calcium failed the recovery criteria high.

For the MSD of sample S-017324-112811-TP-099MSD (240-6309-7) in batch 240-25468, Antimony and Iron failed the recovery criteria low. Aluminum, Magnesium, Manganese and Calcium failed the recovery criteria high. Also, Magnesium exceeded the rpd limit.

Several analytes failed the recovery criteria low for the MS of sample S-017324-112811-TP-100MS (240-6309-8) in batch 240-25597. Aluminum failed the recovery criteria high.

Antimony, Calcium and Magnesium failed the recovery criteria low for the MSD of sample S-017324-112811-TP-100MSD (240-6309-8) in batch 240-25597. Aluminum and Iron failed the recovery criteria high.

Samples S-017324-112811-TP-093 (240-6309-1)[5X], S-017324-112811-TP-095 (240-6309-3)[5X], S-017324-112811-TP-096 (240-6309-4)[5X], S-017324-112811-TP-097 (240-6309-5)[5X], S-017324-112811-TP-098 (240-6309-6)[5X] and S-017324-112811-TP-099 (240-6309-7)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

The CCB was greater than or equal to the requested reporting for Selenium. Since the sample result was below the requested reporting limit the result was accepted for sample S-017324-112811-TP-101 (240-6309-9).

No other difficulties were encountered during the metals analyses.

All other quality control parameters were within the acceptance limits.

TOTAL MERCURY

Samples S-017324-112811-TP-093 (240-6309-1), S-017324-112811-TP-094 (240-6309-2), S-017324-112811-TP-095 (240-6309-3), S-017324-112811-TP-096 (240-6309-4), S-017324-112811-TP-097 (240-6309-5), S-017324-112811-TP-098 (240-6309-6), S-017324-112811-TP-099 (240-6309-7), S-017324-112811-TP-100 (240-6309-8), S-017324-112811-TP-101 (240-6309-9), S-017324-112811-TP-102 (240-6309-10), S-017324-112811-TP-103 (240-6309-11), S-017324-112811-TP-104 (240-6309-12), S-017324-112811-TP-105 (240-6309-13), S-017324-112811-TP-106 (240-6309-14), S-017324-112811-TP-107 (240-6309-15), S-017324-112811-TP-108 (240-6309-16), S-017324-112811-TP-109 (240-6309-17), S-017324-112811-TP-110 (240-6309-18),

Job ID: 240-6309-1 (Continued)

Laboratory: TestAmerica North Canton (Continued)

S-017324-112811-TP-111 (240-6309-19) and S-017324-112811-TP-112 (240-6309-20) were analyzed for total mercury in accordance with EPA SW-846 Method 7471A. The samples were prepared on 11/30/2011 and 12/01/2011 and analyzed on 12/05/2011.

No difficulties were encountered during the mercury analyses.

All quality control parameters were within the acceptance limits.

Method Summary

Client: Conestoga-Rovers & Associates, Inc.
Project/Site: 17324-T07, RACER Former MTM

TestAmerica Job ID: 240-6309-1

Method	Method Description	Protocol	Laboratory
8260B	Volatile Organic Compounds (GC/MS)	SW846	TAL NC
8270C	Semivolatile Organic Compounds (GC/MS)	SW846	TAL NC
8082	Polychlorinated Biphenyls (PCBs) by Gas Chromatography	SW846	TAL NC
6010B	Metals (ICP)	SW846	TAL NC
7471A	Mercury (CVAA)	SW846	TAL NC
