Re: Addendum to Special Discharge Permit No.: SD6-94508
(Effective from June 10, 2021 to July 31, 2021)
Site: RACER Eckles Road
12950 Eckles Road
Livonia, MI 48150

Dear Mr. Trigger:

The Great Lakes Water Authority (GLWA) hereby authorizes RACER Trust to discharge approximately 300,000 gallons of water collected in the stormwater clarifier and diversion pit, into the GLWA sewer system. The discharge point shall be the sanitary manhole located 42 feet north of Amrhein Road and 320 feet east of Eckles Road.

The maximum discharge rate from the site shall not exceed 300 gallon per minute. The discharge shall be made only after passing through a filter. The company shall adjust the flow rate to avoid any overflow from the discharge point during discharge. This authorization is granted in accordance and in conformity with plans, specifications, and other substantial data submitted to the GLWA by RACER Trust. The time of discharge shall be from 7:00 AM to 7:00 AM, Monday to Friday.

The Industrial Waste Control Group must be notified at least twenty-four (24) hours before the discharge begins. The GLWA can rescind this permit at any time if the GLWA determines that the effluent has an adverse effect on the treatment plant. The company is responsible for providing adequate safety for pedestrian and vehicle traffic at the discharge location. The open catch basin/manhole must not be left unattended at any time.

The GLWA reserves the right to inspect the discharge location, and procedure of discharge. This letter is effective as of June 10, 2021 and expires on July 31, 2021. No discharge shall be made after the expiration date without further approval from the GLWA. The company shall submit to GLWA a report specifying the actual discharge quantity and the actual discharge period within fifteen (15) days of completion of the project.

Mr. Grant Trigger
RACER Trust

The Special Discharge Permit shall not be reassigned or transferred without the written approval of the GLWA. Any violations of the permit parameter limitations shall be subjected to a penalty of \$500.00 per violation per day, or as authorized by law.

The company shall pay applicable sewer charges to the City of Livonia based on the current sewer charge rate. In the event of slug loading or accidental discharge the Permittee shall telephone the GLWA at the Systems Control Center (313 267-6000) and inform the GLWA about the details of discharge within one (1) hour of becoming aware.

If you have any questions, please contact Ms. Tessy Jose at (313) 297-5878.

Sincerely,

Joe Belen, P.E.

Engineer
