Mail Code 485-118-230
Flint, Michigan 48550

Mr. Robert Metcalf:

SUBJECT: Third Annual Groundwater Sampling and Methane Monitoring Report for
the Linden Road Landfill, Genesee County

The Michigan Department of Environmental Quality (MDEQ) has received the above referenced document dated 5 December 2002, submitted on your behalf by Weston Solutions, Inc. (Weston).

Vinyl chloride concentrations in groundwater samples taken from monitoring well MW-3S consistently exceed Generic Residential Drinking Water Criteria. Previously submitted flow diagrams show groundwater at MW-3S migrates to the southeast, potentially off site. Further investigation to delineate the extent of the groundwater contamination found at the MW-3S location is warranted.

The MDEQ requests General Motors submit a plan to delineate the horizontal and vertical extent of groundwater contamination in the area of MW-3S. Please submit this plan for MDEQ's review prior to scheduling the meeting Weston has proposed.

Feel free to contact me if you have any questions.

Sincerely,

James E. Innes
