Subject: RE: SAP for North Ditch Area and Select Monitoring Wells, Saginaw Nodular ~CON-058502~

I have reviewed the subject SAP for investigative work pertaining to the North Ditch at the RACER Saginaw Nodular site and find it to be a reasonable approach and the proposed data collection.

Also, I reviewed the Budget Adjustment for the work as per the submittal of May 10, 2013 and accept the modifications as they relate to the North Ditch and the Primary settling Basin stabilization.

According Racer may proceed with implementing the work as per the SAP of April 2013.

If there are any questions , please let me know.

Subject: SAP for North Ditch Area and Select Monitoring Wells, Saginaw Nodular ~CON-058502~

Nate, please find attached a sampling and analysis plan, for your review and comment.

The scope of the investigation includes the following:

- North Ditch - sampling surface water, sediment, and soil on the banks to evaluate stormwater management options
- Select monitoring wells - groundwater sampling for pH and ammonia to confirm RFI concentrations (HHRA identified increased risk due to these constituents in groundwater in one area). We're re-sampling the area and downgradient.

Please let me know if you need anything else.
Thanks Mike
