PER20010001
Hazardous Waste Closure Report

Dear Mr. Burroughs:

The Permits Division is in receipt of your submittal dated November 19, 2003. This submittal is a closure report for two hazardous waste management units being closed via the mechanism of a RECAP document.

Based upon the review of the closure certification report, the closure plan and subsequent revisions, and the verification inspection on February 6, 2004, the Permits Division, in conjunction with the Environmental Technology Division, has determined that the two interim status units, the waste drum pad and the tank system pad, have been closed in accordance with the provisions contained in General Motor's approved plan.

Should you have any questions concerning this matter, contact Mr. Willard F. Steele of the Permits Division at (225) 219-3134.

Sincerely,

Linda Korn Levy
Assistant Secretary
