Table 2  
Summary of Groundwater Analytical Results  
2019 Annual Groundwater Report  
RACER Trust Plants 2, 3, and 6 - Lansing, Michigan

**Table Notes:**  
**Bold font** represents data where detections were noted above the laboratory method detection limit.  
**Gray shading** represents result exceeding either or both the EGLE Part 201 Generic Cleanup Criteria and Screening Levels (dated January 10, 2018) or the EGLE GSI Criteria (Updated June 25, 2018)

1,4-Dioxane is compared to a drinking water criteria of 7.2 µg/L per the *MDEQ Establishment of Cleanup Criteria for 1,4 -Dioxane: Emergency Rules* dated October 27, 2016.

Data shown in [ ] represent duplicate sample analytical results.  
- - = Not listed in the MDEQ Criteria Tables.  
\* = Analyzed for 1,4-Dioxane via EPA Method 522 (TWP-90-03, TWP-90-04, TWP-90-05, MW-19-125)  
Deg. C. = degrees celcius  
EGLE = Michigan Department of Environment, Great Lakes, and Energy  
mg/L = milligrams per liter  
NA = Not Analyzed  
NTU = Nephelometric Turbidity Unit  
s.u. = standard unit  
ug/L = micrograms per liter  
µS/cm = microSiemens per centimeter

**Lab and Validation Data Qualifiers:**  
J = The compound was positively identified, however, the associated numerical value is an estimated concentration only.  
U = The compound was analyzed for but not detected. The associated value is the compound quantitation limit.  
X = Elevated reporting limit due to matrix interference.  
Y = Elevated reporting limit due to high target concentration.

**Notes:**

LNAPL = light nonaqueous phase liquid

msl = mean sea level

NAPL = nonaqueous phase liquid

NM = not measured

NP = no product

TOC = top of casing

RACER = Revitalizing Auto Communities Environmental Response

\*Groundwater elevations have been corrected for the presence of LNAPL using a measured LNAPL density of 0.8995 gram per milliliter.

Table 4  
LNAPL Recovery, January through December 2019  
2019 Annual Groundwater Monitoring Report  
RACER Trust Plants 2, 3, and 6  
Lansing, Michigan

| Well ID    | Recovery Date** | Reference Elevation (TOC) | Ground Surface Elevation (feet msl) | Total Well Depth (feet below TOC) | Depth to Water (feet below TOC) | Depth to LNAPL (feet below TOC) | Starting LNAPL Thickness (feet) | Groundwater Elevation (feet msl) | Estimated LNAPL Volume Recovered (gallons) | Cumulative LNAPL Volume Recovered (gallons) | Water Recovered (Gallons) *** | Liquid Recovered (Gallons) *** | 2019 Cumulative Liquid Recovery (Gallons) |

LNAPL = light nonaqueous phase liquid  
msl = mean sea level  
NA = not applicable  
NM = not measured  
PVC = polyvinyl chloride  
RACER = Revitalizing Auto Communities Environmental Response  
TOC = top of casing  
\* Groundwater elevations have been corrected for the presence of LNAPL using a measured LNAPL density of 0.8995 gram per milliliter.  
\*\* Depth-to-water and depth-to-LNAPL measurements were collected at beginning of the associated quarterly groundwater sampling event or LNAPL gauging event.  
\*\*\* Recovery performed via 1.5-inch-diameter weighted PVC bailers. Volume includes groundwater and LNAPL recovered.

**Table 5**  
**Groundwater Elevations, January to December 2018**  
**2018 Annual Groundwater Monitoring Report**  
**RACER Trust Plants 2, 3, and 6**  
**Lansing, Michigan**

**Notes:**  
\* Groundwater elevations have been corrected for the presence of LNAPL using a measured LNAPL density of 0.8995 gram per milliliter.  
bgs = below ground surface  
LNAPL = light nonaqueous phase liquid  
msl = mean sea level  
NM = not collected or not available  
NS = not surveyed  
RACER = Revitalizing Auto Communities Environmental Response  
TOC = top of casing

**Notes:**  
mg/L = milligrams per liter  
n = number of samples  
p = Indication of statistical significance of trend direction. Concentration trends considered statistically significant at p-values less than 0.1 (90% confidence level).  
RACER = Revitalizing Auto Communities Environmental Response  
% = percent  
< = less than  
S = Mann-Kendall test statistic. Sign indicates trend direction.  
µg/L = micrograms per liter

LEGEND

- INCREASING TREND OBSERVED
- DECREASING, STABLE, OR NO SIGNIFICANT TREND OBSERVED
- DOES NOT MEET CRITERIA FOR TREND ANALYSIS\*
- LOWER 1,4-DIOXANE IMPACTS > DW CRITERIA (7.2 µg/L)

APPROXIMATE PLANT BOUNDARIES

- PLANT 2
- PLANT 3
- PLANT 6

NOTES:

\* MANN-KENDALL TREND ANALYSIS CONDUCTED AT 90% CONFIDENCE LEVEL FOR WELL/COC PAIRS MEETING THE FOLLOWING CRITERIA:  
- AT LEAST FOUR SAMPLING EVENTS HAVE BEEN COMPLETED  
- AT LEAST 65% OF SAMPLING RESULTS WERE ABOVE DETECTION LIMITS  
- AT LEAST ONE DETECTION IN THE DATASET EXCEEDED THE LOWEST CRITERIA  
- EITHER AN INCREASING TREND WAS IDENTIFIED DURING THE PREVIOUS ANALYSIS, THE WELL IS LOCATED AT THE PROPERTY BOUNDARY, OR THE TREND HAS NOT BEEN ANALYZED PREVIOUSLY DUE TO INSUFFICIENT DATA.  
- ALL DATA COLLECTED THROUGH DECEMBER 2019 IS SHOWN.

ANALYTICAL DATA AVAILABLE IN TABLE 2. TREND RESULTS SUMMARIZED IN TABLE 7.

## Sample Information

|               |                                |
|---------------|--------------------------------|
| Sample Time   | 11:25                          |
| Color         | Clear/slightly yellowish green |
| Notable odors | None                           |

## Metals, Total

|                      |                |
|----------------------|----------------|
| Constituent Sampled  | Metals, Total  |
| Container Type       | 125 mL Plastic |
| Number of Containers | 1              |
| Preservative         | HNO3           |

## Hexavalent Chromium

|                      |                     |
|----------------------|---------------------|
| Constituent Sampled  | Hexavalent Chromium |
| Container Type       | 125 mL Plastic      |
| Number of Containers | 1                   |
| Preservative         | None                |

## PFAS

|                      |                |
|----------------------|----------------|
| Constituent Sampled  | PFAS           |
| Container Type       | 250 mL Plastic |
| Number of Containers | 2              |
| Preservative         | None           |

## Well Information

|                          |      |
|--------------------------|------|
| Condition of Well        | Good |
| Well Locked at Arrival   | Yes  |
| Well Locked at Departure | Yes  |
| Signature                |      |

A handwritten signature in black ink, appearing to read "A. W. H.", is centered on the page.

## Well Information

|                          |                                                                                                                                   |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| Condition of Well        | Flush mount pad could be replaced. The cover will no longer bolt down, but the j-plug is in great shape and provides a nice seal. |
| Well Locked at Arrival   | Yes                                                                                                                               |
| Well Locked at Departure | Yes                                                                                                                               |

Signature

A handwritten signature in black ink, appearing to be 'Andrew', with a long horizontal stroke extending to the right.

Signed 2019-12-06 17:05:38 UTC

Signature

A handwritten signature in black ink, appearing to read 'ZyLL'. The 'Z' is stylized with a loop, and the 'y' has a small tail. The 'L' is a simple vertical stroke with a horizontal base.

parameters

@13:30, DTW:3.79, pH:7.41, temp:15, cond:0.84, turb:1.75, DO:0.38, redox:142.5

Well is considered stabilized and ready for sample collection when the following is met for three consecutive readings collected at 3 to 5 minute intervals: -Turbidity remains within 10% (or within 1 NTU if turbidity is <10NTU) -Specific conductance and temp remain within 3% - ORP within + or - 10 mV -DO within 10% -pH within 0.1 unit

### Sample Information

|               |       |
|---------------|-------|
| Sample Time   | 09:30 |
| Color         | Clear |
| Notable odors | None  |

### 1,4-Dioxane

|                      |             |
|----------------------|-------------|
| Constituent Sampled  | 1,4-Dioxane |
| Container Type       | 40 mL Vial  |
| Number of Containers | 3           |
| Preservative         | HCL         |

### Well Information

|                          |         |
|--------------------------|---------|
| Well Location            | Plant 2 |
| Condition of Well        | Good    |
| Well Locked at Arrival   | Yes     |
| Well Locked at Departure | Yes     |

Signature

A handwritten signature in black ink, consisting of stylized, overlapping loops and strokes, likely representing the initials 'ML' followed by a flourish.

parameters

@12:25, DTW:59.61, pH:6.65, temp:9.4, cond:2.32, turb:10.8, DO:0.5, redox:-44.1

Well is considered stabilized and ready for sample collection when the following is met for three consecutive readings collected at 3 to 5 minute intervals: -Turbidity remains within 10% (or within 1 NTU if turbidity is <10NTU) -Specific conductance and temp remain within 3% - ORP within + or - 10 mV -DO within 10% -pH within 0.1 unit

**@12:30, DTW:59.61, pH:6.65, temp:8.9, cond:2.35, turb:10.7, DO:0.49, redox:-46.7**

|                                  |       |
|----------------------------------|-------|
| Reading Time                     | 12:30 |
| Minutes Elapsed between readings | 5     |
| Rate (mL/min)                    | 100   |
| Depth to Water (ft)              | 59.61 |
| Milliliters Purged (total)       | 6000  |
| pH                               | 6.65  |
| Conductivity (mS/cm)             | 2.35  |

|                                                                                                                                                                                                                                                                                                                                                  |                                                                                  |
