## Sample Information

|               |              |
|---------------|--------------|
| Sample Time   | 12:15        |
| Color         | Tan to clear |
| Notable odors | No           |

## PFAS

|                      |                |
|----------------------|----------------|
| Constituent Sampled  | PFAS           |
| Container Type       | 250 mL Plastic |
| Number of Containers | 2              |
| Preservative         | None           |

## Well Information

|                          |          |
|--------------------------|----------|
| Well Location            | Off site |
| Condition of Well        | Good     |
| Well Locked at Arrival   | No       |
| Well Locked at Departure | Yes      |

Signature

A handwritten signature in black ink, appearing to read 'Zuh'. The 'Z' is a simple cursive loop, the 'u' is a small loop, and the 'h' is a tall, thin stroke with a horizontal base.

Well is considered stabilized and ready for sample collection when the following is met for three consecutive readings collected at 3 to 5 minute intervals: -Turbidity remains within 10% (or within 1 NTU if turbidity is <10NTU) -Specific conductance and temp remain within 3% - ORP within + or - 10 mV -DO within 10% -pH within 0.1 unit

## Sample Information

|               |       |
|---------------|-------|
| Sample Time   | 11:10 |
| Color         | Clear |
| Notable odors | None  |

## PFAS

|                      |                |
|----------------------|----------------|
| Constituent Sampled  | PFAS           |
| Container Type       | 250 mL Plastic |
| Number of Containers | 2              |
| Preservative         | None           |

## Well Information

|                          |      |
|--------------------------|------|
| Condition of Well        | Good |
| Well Locked at Arrival   | Yes  |
| Well Locked at Departure | Yes  |

Signature

A handwritten signature in black ink, appearing to read "André" followed by a stylized flourish.

Well is considered stabilized and ready for sample collection when the following is met for three consecutive readings collected at 3 to 5 minute intervals: -Turbidity remains within 10% (or within 1 NTU if turbidity is <10NTU) -Specific conductance and temp remain within 3% - ORP within + or - 10 mV -DO within 10% -pH within 0.1 unit

Signature

A handwritten signature in black ink, reading "Gary Schubert". The signature is written in a cursive, flowing style. The first name "Gary" is on the top line, and the last name "Schubert" is on the line below it, starting under the 'y' of "Gary".

## Sample Information

|               |       |
|---------------|-------|
| Sample Time   | 12:10 |
| Color         | Clear |
| Notable odors | None  |

## PFAS

|                      |                |
|----------------------|----------------|
| Constituent Sampled  | PFAS           |
| Container Type       | 250 mL Plastic |
| Number of Containers | 2              |
| Preservative         | None           |

## Well Information

|                          |      |
|--------------------------|------|
| Condition of Well        | Good |
| Well Locked at Arrival   | Yes  |
| Well Locked at Departure | Yes  |

Signature

A handwritten signature in black ink, appearing to be 'André' or similar, written in a cursive style.

## Sample Information

|               |       |
|---------------|-------|
| Sample Time   | 15:55 |
| Color         | Clear |
| Notable odors | No    |

## 1,4-Dioxane

|                      |             |
|----------------------|-------------|
| Constituent Sampled  | 1,4-Dioxane |
| Container Type       | 40 mL Vial  |
| Number of Containers | 3           |
| Preservative         | HCL         |

## P, TKN

|                      |                |
|----------------------|----------------|
| Constituent Sampled  | P, TKN         |
| Container Type       | 250 mL Plastic |
| Number of Containers | 1              |
| Preservative         | H2SO4          |

## Nitrate

|                      |                |
|----------------------|----------------|
| Constituent Sampled  | Nitrate        |
| Container Type       | 250 mL Plastic |
| Number of Containers | 1              |
| Preservative         | None           |

## Well Information

Well is considered stabilized and ready for sample collection when the following is met for three consecutive readings collected at 3 to 5 minute intervals: -Turbidity remains within 10% (or within 1 NTU if turbidity is <10NTU) -Specific conductance and temp remain within 3% -ORP within + or - 10 mV -DO within 10% -pH within 0.1 unit

|--------------------------|------|
| Condition of Well        | Good |
| Well Locked at Arrival   | Yes  |
| Well Locked at Departure | Yes  |

Signature

A handwritten signature in black ink, appearing to read "And W". The signature is fluid and cursive, with the first part being a large loop and the second part being a smaller, more distinct "W" followed by a horizontal stroke.

## Sample Information

|               |       |
|---------------|-------|
| Sample Time   | 10:15 |
| Color         | Clear |
| Notable odors | None  |

## 1,4-Dioxane

|                      |             |
|----------------------|-------------|
| Constituent Sampled  | 1,4-Dioxane |
| Container Type       | 40 mL Vial  |
| Number of Containers | 3           |
| Preservative         | HCL         |

## Metals, Total

|                      |                |
|----------------------|----------------|
| Constituent Sampled  | Metals, Total  |
| Container Type       | 125 mL Plastic |
| Number of Containers | 1              |
| Preservative         | HNO3           |

## Hexavalent Chromium

|                      |                     |
|----------------------|---------------------|
| Constituent Sampled  | Hexavalent Chromium |
| Container Type       | 125 mL Plastic      |
| Number of Containers | 1                   |
| Preservative         | None                |

## PFAS

|                      |                |
|----------------------|----------------|
| Constituent Sampled  | PFAS           |
| Container Type       | 250 mL Plastic |
| Number of Containers | 2              |
| Preservative         | None           |

### Well Information

|                          |                                                                                          |
|--------------------------|------------------------------------------------------------------------------------------|
| Condition of Well        | Poor. The flush mount could be reconstructed and a new cap or j-plug could be installed. |
| Well Locked at Arrival   | No                                                                                       |
| Well Locked at Departure | No                                                                                       |
| Signature                |                                                                                          |

A handwritten signature in black ink, appearing to read "And all", written in a cursive style.

Signature

A handwritten signature in black ink, consisting of the letters 'ZuL' in a cursive style. The 'Z' and 'u' are connected, and the 'L' has a long horizontal stroke extending to the right.

Well is considered stabilized and ready for sample collection when the following is met for three consecutive readings collected at 3 to 5 minute intervals: -Turbidity remains within 10% (or within 1 NTU if turbidity is <10NTU) -Specific conductance and temp remain within 3% - ORP within + or - 10 mV -DO within 10% -pH within 0.1 unit

### Sample Information

|               |       |
|---------------|-------|
| Sample Time   | 17:45 |
| Color         | None  |
| Notable odors | None  |

### 1,4-Dioxane

|                      |             |
|----------------------|-------------|
| Constituent Sampled  | 1,4-Dioxane |
| Container Type       | 40 mL Vial  |
| Number of Containers | 3           |
| Preservative         | HCL         |

### Well Information

|                          |      |
|--------------------------|------|
| Well Location            | P2   |
| Condition of Well        | Good |
| Well Locked at Arrival   | Yes  |
| Well Locked at Departure | Yes  |
| Signature                |      |

A handwritten signature in black ink, reading "Daniel Stockard". The signature is written in a cursive style with a large, looped "D" and a long, sweeping "S".

## Sample Information

|               |       |
|---------------|-------|
| Sample Time   | 12:20 |
| Color         | Clear |
| Notable odors | None  |

## 1,4-Dioxane

|                      |             |
|----------------------|-------------|
| Constituent Sampled  | 1,4-Dioxane |
| Container Type       | 40 mL Vial  |
| Number of Containers | 3           |
| Preservative         | HCL         |

## Well Information

|                          |         |
|--------------------------|---------|
| Well Location            | Plant 2 |
| Condition of Well        | Good    |
| Well Locked at Arrival   | Yes     |
| Well Locked at Departure | Yes     |

Signature

A handwritten signature in black ink, consisting of stylized, cursive letters that appear to be 'M' and 'P' followed by a flourish.

## Sample Information

|               |       |
|---------------|-------|
| Sample Time   | 13:10 |
| Color         | Tan   |
| Notable odors | No    |

## 1,4-Dioxane

|                      |             |
|----------------------|-------------|
| Constituent Sampled  | 1,4-Dioxane |
| Container Type       | 40 mL Vial  |
| Number of Containers | 9           |
| Preservative         | HCL         |

## P, TKN

|                      |                |
|----------------------|----------------|
| Constituent Sampled  | P, TKN         |
| Container Type       | 250 mL Plastic |
| Number of Containers | 2              |
| Preservative         | H2SO4          |

## Nitrate

|                      |                |
|----------------------|----------------|
| Constituent Sampled  | Nitrate        |
| Container Type       | 250 mL Plastic |
| Number of Containers | 2              |
| Preservative         | None           |

## Well Information

|                          |         |
|--------------------------|---------|
| Well Location            | Plant 3 |
| Condition of Well        | Good    |
| Well Locked at Arrival   | Yes     |
| Well Locked at Departure | Yes     |

## Sample Information

|               |       |
|---------------|-------|
| Sample Time   | 10:25 |
| Color         | Clear |
| Notable odors | No    |

## 1,4-Dioxane

|                      |             |
|----------------------|-------------|
| Constituent Sampled  | 1,4-Dioxane |
| Container Type       | 40 mL Vial  |
| Number of Containers | 3           |
| Preservative         | HCL         |

## P, TKN

|                      |                |
|----------------------|----------------|
| Constituent Sampled  | P, TKN         |
| Container Type       | 250 mL Plastic |
| Number of Containers | 1              |
| Preservative         | H2SO4          |

## Nitrate

|                      |                |
|----------------------|----------------|
| Constituent Sampled  | Nitrate        |
| Container Type       | 250 mL Plastic |
| Number of Containers | 1              |
| Preservative         | None           |

## Well Information

|                          |         |

| Dissolved Oxygen (mg/L)          | 2.81  |
| Temperature (Degrees Celsius)    | 9.5   |
| Redox (ORP mV)                   | 26.6  |

parameters

@13:50, DTW:66.88, pH:6.57, temp:9.5, cond:3.25, turb:9.23, DO:2.81, redox:26.6

Well is considered stabilized and ready for sample collection when the following is met for three consecutive readings collected at 3 to 5 minute intervals: -Turbidity remains within 10% (or within 1 NTU if turbidity is <10NTU) -Specific conductance and temp remain within 3% - ORP within + or - 10 mV -DO within 10% -pH within 0.1 unit

**@13:55, DTW:66.88, pH:6.56, temp:9.7, cond:3.24, turb:9.34, DO:2.78, redox:26.4**

## Sample Information

|               |       |
|---------------|-------|
| Sample Time   | 13:55 |
| Color         | Clear |
| Notable odors | No    |

## 1,4-Dioxane

|                      |             |
|----------------------|-------------|
| Constituent Sampled  | 1,4-Dioxane |
| Container Type       | 40 mL Vial  |
| Number of Containers | 3           |
| Preservative         | HCL         |

## Well Information

|                          |         |
|--------------------------|---------|
| Well Location            | Plant 3 |
| Condition of Well        | Good    |
| Well Locked at Arrival   | Yes     |
| Well Locked at Departure | Yes     |

Signature

A handwritten signature in black ink, appearing to be 'Zur/L' or similar, written in a cursive style.
