VOC	volatile organic compound
WDS	Waste Data System
WWTP	wastewater treatment plant

1.0 Executive Summary

Fishbeck has performed a Phase I Environmental Site Assessment (ESA) of a property located at 824 St. Clair Street, Pontiac, Michigan (Subject Property). The Phase I ESA has been performed in accordance with the American Society for Testing and Materials (ASTM) Standard Practice for Phase I ESAs (Standard E1527-21) and in conformance with the federal rule for All Appropriate Inquiry. For reference, Appendix 1 contains the ASTM Standard Practice E1527-21 Definitions. A Location Map and a Site Map for the Subject Property are included in Appendix 2.

Non-Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) issues that are not typically part of the ASTM standard scope of investigation (i.e., asbestos, lead paint, radon, mold, vapor intrusion, wetlands, emerging contaminants, and universal wastes) were not addressed as part of this Phase I ESA. The Phase I ESA was conducted for redevelopment planning. This report was prepared for the exclusive use of Detroit Regional Partnership, RACER Trust, and RACER Properties LLC (the Users), which may rely on the report contents.

The Subject Property consists of one legal parcel occupying approximately 18.83 acres. Historically, the Subject Property was occupied by a power plant (known as the powerhouse) beginning in the mid-1920s that provided power and steam for the larger Pontiac North Campus (located north and east adjacent to the Subject Property). The Subject Property was owned and operated by General Motors (GM) until the powerhouse operations were leased to DTE Energy from 2007 until January 2017. Ownership of the Subject Property was transferred to RACER Trust in March 2011. The building sat unoccupied from January 2017 until 2019/2020, when the powerhouse was decommissioned and demolished. Since 2020 the Subject Property has been leased by various tenants or remained vacant.

No significant data gaps were encountered for the Phase I ESA.

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E1527-21 of the Subject Property. Any exceptions to, or deletions from, this practice are described in the Limitations and Exceptions section of this report. This assessment has revealed no evidence of Recognized Environmental Conditions (RECs) in connection with the property except for the following:

- The use of the Subject Property as a power plant that serviced the greater Pontiac North Campus has resulted in contaminated soil and groundwater conditions. Prior environmental site assessments have identified the presence of volatile organic compounds (VOCs) and per- and polyfluoroalkyl substances (PFAS) compounds in groundwater at concentrations exceeding Part 201 Generic Residential Cleanup Criteria (GRCC) and the presence of VOCs, polynuclear aromatic hydrocarbons (PNAs), metals, and polychlorinated biphenyls (PCBs) in soil at concentrations exceeding Part 201 GRCC. Therefore, the Subject Property meets the definition of a *facility* as defined by Part 201 of the Natural Resources and Environmental Protection Act (NREPA).
- A review of the soil and groundwater data collected at the north adjoining property (888–900 Baldwin Avenue) has identified VOCs, semi-volatile organic compounds (SVOCs), PFAS compounds, and metals at concentrations above Part 201 GRCC in soil and groundwater. Impacts from this property have migrated onto the Subject Property. The confirmed migration of contamination from the north adjoining property has been identified as a REC.

The presence of contaminants above Part 201 residential cleanup criteria demonstrates that the Subject Property meets the definition of a *facility* as defined by Part 201 of NREPA.

This Phase I ESA report will remain viable if it was completed no more than 180 days prior to the date of acquisition or occupancy. The viability date is based on the earliest of the dates of the following five components:

1. Date of site reconnaissance: November 10, 2025
2. Date of interviews: October 21, 2025

3. Date of search for recorded environmental liens: October 15, 2025
4. Date of review of federal, state, and local government records: October 15, 2025
5. Date of Environmental Professional Declaration: April 14, 2026

Report 180-day viability date: April 13, 2026

(Note: The report will require to be updated if longer than 180 days up to 1 year.)

The report shall be considered viable for up to one year prior to the acquisition date, if the five components listed above are updated within one year of the earliest date of the five components.

Report one-year viability date: October 15, 2026

2.0 Introduction

2.1 Purpose

This document presents the results of a Phase I ESA on the Subject Property.

This assessment was conducted to provide an objective, independent professional opinion of the potential environmental risks, if any, associated with the Subject Property. The purpose of this assessment is to identify RECs in connection with the Subject Property and to support redevelopment planning.

A REC means: *(1) the presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the Subject Property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the Subject Property under conditions that pose a material threat of a future release to the environment.*

2.2 Detailed Scope of Services

This Phase I ESA was conducted in general accordance with the scope and limitations of the ASTM Standard. This assessment included a site reconnaissance, review of governmental records and environmental databases, interviews with persons knowledgeable of site conditions, review of available historical information on the Subject Property and surrounding properties, and report preparation.

The Users did not request that any common non-scope considerations be addressed in this report.

2.3 Data Gap Analysis

A User questionnaire was not completed by Detroit Regional Partnership as part of this Phase I ESA. It is Fishbeck's understanding that Detroit Regional Partnership has provided all known environmental documentation for the Subject Property. It is unlikely that Detroit Regional Partnership would have additional knowledge or documentation that would have a material impact upon the findings and conclusions of this report; therefore, this data gap is not considered a significant data gap. In addition, RACER Properties LLC completed an owner questionnaire for the Subject Property and made documents available.

Fishbeck was unable to determine the first developed use of the Subject Property and was, therefore, unable to achieve the historical research objectives identified in the ASTM standard, even after reviewing the standard historical resources identified in the ASTM standard that were reasonably ascertainable and likely to be useful. Based on our knowledge of the historic developed uses, this data gap is not considered likely to have a material impact upon the findings and conclusions of this report. Therefore, this data gap is not considered a significant data gap.

The site reconnaissance was limited by several inches of snow covering exterior portions of the Subject Property, preventing direct observation of the ground surface. Due to the availability of other data sources (e.g., aerial photographs, fire insurance maps, and personal interviews), the data gap is not considered a significant data gap.

2.4 Significant Assumptions

Fishbeck assumes the information reviewed in this assessment (including government records and environmental databases, prior ESAs, and historical sources) is reliable and accurate and that all interviewees have responded truthfully and to the extent of their knowledge, unless Fishbeck had actual knowledge that the information received is incorrect or it is obvious that certain information is incorrect based on other information reviewed.

2.5 Limitations and Exceptions

The information gathered for this Phase I ESA is limited to information that is publicly available, obtainable within reasonable time and cost constraints, and practically reviewable. It is also limited to accessible areas and conspicuous visual indicators encountered during the site reconnaissance. The ESA interpretations are made within the context of these limitations.

2.6 Special Terms and Conditions

No special terms and conditions were required in this assessment.

2.7 User Reliance

This Phase I ESA report is provided for the exclusive use of the Users. The report may also be used by any lender that is loaning funds in connection with the Subject Property. Any use of the report by others, without the written consent of Fishbeck, will be without liability to Fishbeck.

3.0 User-Provided Records

A User questionnaire was not completed by Detroit Regional Partnership as part of this Phase I ESA. It is Fishbeck's understanding that Detroit Regional Partnership has provided all known environmental documentation for the Subject Property available via the RACER website (www.racertrust.org). It is unlikely that Detroit Regional Partnership would have additional knowledge or documentation that would have a material impact upon the findings and conclusions of this report; therefore, this data gap is not considered a significant data gap.

An owner questionnaire was completed by David Favero, Michigan Deputy Cleanup Manager, for RACER Properties LLC, which is further discussed in Section 10.0. RACER Properties LLC is considered a User of this assessment and owner of the Subject Property due to their stewardship position of the Subject Property.

3.1 Title Records

RACER Properties LLC provided Fishbeck with a Quit Claim Deed for the Subject Property, issued by Title Source Inc, dated March 31, 2025, which is presented in Appendix 3.

3.2 Environmental Liens or Activity and Use Limitations

The Users were unaware of any federal, state, or local environmental cleanup liens in effect for the Subject Property. In addition, the Users were unaware of any activity use limitations, such as engineering controls, land use restrictions, or institutional controls that are in place at the Subject Property and/or have been filed or recorded in a registry under federal, tribal, state, or local law.

Fishbeck reviewed the MiEnviro Portal (https://mienviro.michigan.gov/nsite/map/help) and Michigan Department of Environment, Great Lakes, and Energy (EGLE) Remediation Information Data Exchange (RIDE) Mapper (https://experience.arcgis.com/experience/caac24695429449bbf6cc6d89c111d3b/page/Mapper) online databases for any readily available information that may be indicative of land use or activity restrictions for the Subject Property. The databases did not show any recorded land use or activities restrictions on the Subject Property. Additionally, there were no environmental conditions identified that, in Fishbeck's opinion, would necessitate the recording of an environmental lien by a governmental agency or an activity use limitation on the Subject Property's deed.

Fishbeck also reviewed the online Michigan Remediation and Redevelopment Division Enforcement Actions - Perfected Lien List (https://www.michigan.gov/egle/about/organization/remediation-and-redevelopment/rrd-enforcement-perfected-lien-list). The Subject Property was not listed.

3.3 User Knowledge

Detroit Regional Partnership, RACER Trust, and RACER Properties LLC (the Users) are aware of the environmental condition of the Subject Property. Previous environmental investigations are summarized in Section 8.1.1. The files referenced in this report and supplementary files are available at the RACER Trust website (www.racertrust.org).

3.4 Valuation Reduction for Environmental Issues

This Phase I ESA is not being conducted in the event of a transaction; therefore, the value of the Subject Property is not applicable to this property transaction.

3.5 Prior Subject Property Investigations

Additional information regarding previous environmental investigations conducted at the Subject Property are discussed in Section 8.1.1.

3.6 Reasons for Performing Phase I ESA

The Users requested the completion of this Phase I ESA to evaluate the current environmental condition of the Subject Property and position it for potential redevelopment.

3.7 Other

Other than the documents summarized in Section 8.1, no additional documents were provided to Fishbeck during the preparation of this Phase I ESA.

4.0 Subject Property Description

4.1 Location and Legal Description

Address	824 St. Clair Street
City/Township/Village	Pontiac
County	Oakland
State	MI
Section	20
Quarter Section	NE ¼
Town	03N
Range	01E
Parcel No.	64-14-20-201-004
Approximate Acreage	18.83
Legal Description	See Appendix 4
Latitude	42.659648°
Longitude	-83.296486°
Latitude and Longitude Reference Point	Center of Subject Property
Latitude and Longitude Collection Method	Interpolation

4.2 Physical Description

The Subject Property is not directly connected to any utilities. The Subject Property consists of a large, fenced, L-shaped lot. A defunct substation is located in the central section of the Subject Property. During the site reconnaissance, sections of the property were observed to be paved with concrete and concrete foundations, which were notably in poor condition. An asphalt parking area and gravel area is located over the footprint of the former powerhouse in the north central section of the Subject Property. A former railroad bed was located on the eastern property boundary. A grassy, unpaved section of the Subject Property (the former coal storage area) was observed on the south section of the property. Excavations were observed around some of the storm drains on the Subject Property. According to Cliff Lewis, the site manager, DTE Energy was completing some utility work on the Subject Property that involved accessing subsurface utilities.

4.3 Current Uses of the Subject Property

The Subject Property is currently a grassy/paved lot occupied by a defunct electrical substation.

4.4 Current Uses of Adjoining Properties

Adjoining properties were assessed during the site reconnaissance to identify uses that may potentially create an offsite source of contamination that could impact the Subject Property. The adjoining properties were viewed from the Subject Property and/or readily accessible public roadways or right-of-ways. The observed uses of the adjoining properties are summarized below:

Direction	Observed Use	Environmental Concerns
North	Green For Life (GFL)	None observed
South	Residences, Jimenez Tire Shop	None observed
East	Former railway now industrial land used for vehicle/material storage, vehicle storage yard, electrical substation, USPS Michigan Metroplex P&DC	None observed

Direction	Observed Use	Environmental Concerns
West	MG Brick Restoration, residences	None observed

4.5 Current Uses of Surrounding Area

This Subject Property is located in a mixed-use area.

5.0 Physical Setting Sources

5.1 Topography and Surface Water

The current U.S. Geological Survey topographic map (provided in Appendix 5) indicates the surface elevation of the Subject Property is approximately 955 to 965 feet above mean sea level. The closest surface water body is Harris Lake, which is located approximately 945 feet to the south.

5.2 Soils

According to the U.S. Department of Agriculture (USDA) Natural Resources Conservation Service Web Soil Survey (http://websoilsurvey.nrcs.usda.gov/app/), the soils on the Subject Property consist of Urban Land. A copy of the soil survey is provided in Appendix 5.

According to a *Draft RCRA Corrective Action Summary Report* prepared by Arcadis of Michigan, LLC for RACER Trust in July 2023 and presented in Appendix 8, fill material was encountered on the Subject Property from 0 to 15 feet below ground surface (bgs). An interbedded unit of silt, sand, and clay is present from 5 to 30 feet bgs, a layer of well-sorted sands was encountered between 20 and 40 feet bgs, and a basal clay unit consisting of clays and silts was typically encountered at approximately 40 feet bgs.

5.3 Hydrogeology

According to previous sampling events completed by Arcadis, in most areas across the Pontiac North Campus, groundwater was encountered within the sand unit beneath the interbedded unit of silt, sand, and clay at around 16 to 20 feet bgs. However, in select locations, groundwater has been encountered much shallower within the interbedded silt, sand, and clay unit at around 10 to 12 feet bgs. In general, the groundwater flow direction follows the topography of the Subject Property to the south-southwest.

5.4 Oil and Gas Well Information

Based on a review of the EGLE online GeoWebFace database, oil and/or gas wells were not identified within 1/4 mile of the Subject Property.

6.0 Subject Property History

The historical uses of the Subject Property have been reconstructed through various historical databases and resources summarized below:

Standard Historical Sources Reviewed

Historical Source	Available/ Reasonably Obtained	Source/Dates	Comments
Aerial Photographs	Yes	EDR 1937–2022	Section 6.1
Fire Insurance Maps	Yes	EDR 1924–1970	Section 6.1
Municipal Records	Yes	City of Waterford Oakland County Health Department	Section 8.4
Title Records	Yes	Amrock, LLC, dated August 26, 2024	Section 3.1
Topographic Maps	Yes	EDR 1907–2019	Section 6.1
City Directories	Yes	EDR 1958–2022	Section 6.1
Interviews/ Questionnaires	Yes	User/Owner	Sections 3.0 and 10.0 Section 6.1
Other	Yes	Previous Environmental	Section 3.5 Section 8.1

6.1 Historical Use of the Subject Property

Based on a review of the available resources/records (summarized above), the historical uses of the Subject Property are summarized below:

Year(s)	Subject Property Use
Mid-1920s–2020	The Subject Property was occupied by a power plant (known as the powerhouse) that provided power and steam for the larger Pontiac North Campus (located north and east adjacent to the Subject Property) owned and operated by General Motors (GM). The powerhouse operations were leased to DTE Energy from 2007 until January 2017. Ownership of the Subject Property was transferred to RACER Trust in March 2011. The building sat unoccupied from January 2017 until 2019/2020, when the powerhouse was decommissioned and demolished.
2020–2025	The Subject Property has remained vacant since 2020.

The review of historical resources/records indicates the following:

- The use of the Subject Property as a power plant that serviced the greater Pontiac North Campus has resulted in contaminated soil and groundwater conditions, which are further discussed in Section 8.1.1.

Copies of historical records are provided in Appendix 6.

7.0 Surrounding Properties History

Based on the historical resources identified in Section 6.0, the historical uses of the properties surrounding the Subject Property are summarized in the table below.

Northern Adjoining Property	
Dates	Findings
Mid-1920s–2011	The property was originally constructed as an automobile finishing and assembly plant (Fiero Assembly) manufacturing auto bodies for Oakland Motor Cars operating under the Fisher Body Corporation Division of the former GMC. These operations continued through the late 1970s, when the facility was retooled to manufacture and assemble Fiero vehicles, which occurred for approximately 10 years from 1980 through 1990. From the time at which GMC ceased manufacturing Fiero models and decommissioned assembly operations in the early 1990s until the late 2000s, the former Fiero Assembly building was used for prototyping, storage, and other non-manufacturing processes.
2011–2012	The property was transferred to RACER Trust as a result of the 2009 GM bankruptcy process. The property was sold in 2012, and the new owner demolished the onsite structures.
2012–2016	Vacant lot.
2017–2025	Green For Life Inc. (GFL) waste transfer facility.
Southern Adjoining Property	
Dates	Findings
Mid-1920s–2025	Residences have been present south of the Subject Property since at least the 1920s.
Late 1950s–2025	Since at least the late 1950s, the Subject Property has been bordered to the south by Motor Mart Service Center and Jimenez Tire in addition to the residential neighborhood. A small area of land in the southeast portion of the Subject Property is currently owned and operated by Jimenez Investments, LLC; this parcel was sold by RACER to Jimenez Investments on June 25, 2015.
Eastern Adjoining Property	
Dates	Findings
Mid-1920s–Late 1990s	Pontiac North Campus (Plant 6, Foundry; Plant 8, Final Vehicle Assembly; and Plant 9, Engine Construction). Operations in Plants 6, 8, and 9 ceased in 1987, and these plants were demolished between 1995 and 1997. A railway and railroad marshalling area were present east and northeast adjacent to the Subject Property and were used for temporary storage of railcars loaded with scrap material before being shipped offsite.
Early 2000s–2025	The former Plant 14 is currently occupied by the GM Pontiac Metal Center. In the early 2010s, the USPS Michigan Metroplex distribution center was constructed in the area of the former Plants 6, 8, and 9. The former railroad and railroad marshalling area were decommissioned by the early 2000s. The former railroad area now consists of industrial land used for vehicle/material storage.

Western Adjoining Property	
Dates	Findings
Late 1930s–2025	The historical use of the western adjoining properties is characterized as mixed use. Residences, parking lots, and various commercial businesses have all operated on the western adjoining properties since the late 1930s. Currently, the western adjoining properties are occupied by residences and MG Brick Restoration, a masonry contractor.

The review of historical resources/records indicates the following:

- The historical use of the east adjoining Pontiac North Campus is a potential environmental concern. Based on environmental investigations conducted on this property and the Subject Property (further discussed in Section 8.1.1), this adjoining property is not considered an environmental concern to the Subject Property.
- The historical use of the north adjoining property, now owned by GFL, is a potential environmental concern. Based on environmental investigations conducted on this property and the Subject Property (further discussed in Section 8.1.1), this adjoining property is considered an environmental concern to the Subject Property.

8.0 Records Review

8.1 Database Review

Environmental Data Resources, Inc. (EDR) generated an "EDR Radius Map Report" that is provided in Appendix 7. The purpose of the database report is to identify potential and confirmed sources of contamination at or near the Subject Property. EDR searched and reviewed appropriate state and federal environmental databases within the approximate minimum search distance from the Subject Property in accordance with ASTM Standard E1527-21 requirements. The following state and federal environmental databases were reviewed:

Standard Environmental Record Source	Approximate Minimum Search Distance (Miles)
Federal NPL site list	1.0
Federal Delisted NPL site list	0.5
Federal CERCLIS list	0.5
Federal CERCLIS NFRAP site list	0.5
Federal RCRA CORRACTS facilities list	1.0
Federal RCRA non-CORRACTS TSD facilities list	0.5
Federal RCRA generators list	Property and adjoining properties
Federal institutional control/engineering control registries	Property only
Federal ERNS list	Property only
State and Tribal equivalent NPL	1.0
State and Tribal equivalent CERCLIS	0.5
State and Tribal landfill and/or solid waste disposal site lists	0.5
State and Tribal leaking storage tank lists	0.5
State and Tribal registered storage tank lists	Property and adjoining properties
State and Tribal institutional control/engineering control registries	Property only
State and Tribal voluntary cleanup sites	0.5
State and Tribal Brownfield sites	0.5

Other reasonably ascertainable, publicly available databases were included in the database report. Refer to Appendix 7 for a full list of databases accessed.

8.1.1 Subject Property

The Subject Property is listed in the ICIS, US AIRS, ENVIRO, ASBESTOS, WDS, RCRA-VSQG, FINDS, ECHO, and NPDES databases.

Environmental assessments have been completed on the Subject Property since the early 1990s. The reports summarized below were identified as key findings pertaining to the history of environmental investigations that have taken place onsite. The files referenced in this section and supplementary files are available at the RACER Trust website (www.racertrust.org).

Based on the historical use of the Subject Property as a power plant (known as the powerhouse) that provided power and steam for the larger Pontiac North Campus (located north and east adjacent to the Subject Property) owned and operated by GM. The following Areas of Interest (AOIs), presented on the Site Figure in Appendix 2, were identified in association with the Subject Property:

- F-1: Former Satellite Accumulation Areas, drum storage of waste paint thinners and waste oils.

- F-3: Former Liquid and Solid Waste Management Area, drum storage of wastes including ignitable waste, chlorinated solvents, and paint wastes.
- F-4: Former Closed Container Storage Area, former liquid and solid waste management area. Wastes included scraped sealers, adhesives, paint thinners, and waste solvents.
- F-5: Former Fiero Wastewater Treatment Plant. The wastewater treatment plant (WWTP) managed wastewater, wastewater treatment sludge, paint sludge, and bonderite (corrosion pre-treatment) sludge.
- F-7: Former Wastewater Collection Sumps, a series of wastewater collection sumps formerly located beneath the basement of the former powerhouse.
- F-10: Former High-Pressure Fly Ash Storage Silo.
- F-11: Former Two Low-Pressure Fly Ash Storage Silos.
- F-12: Former Coal Storage Area.
- F-14: Former Fuel AST Area.
- F-15: Former Oil/Solvent Catch Basin.

The southeastern portion of the powerhouse property (referred to as the Panhandle) formerly housed a closed container storage area (CSA). This area managed both liquid and solid waste and was identified as solid waste management unit (SWMU) 4 in historical reports (referenced as AOI F-4). Based on historical records, the closed CSA was in operation from before 1977 to August 1985. Clean closure certification of the CSA was received from the Michigan Department of Natural Resources (now EGLE) in February 1988. The closed CSA was situated on an enclosed, bermed concrete pad with a maximum capacity of 375 55-gallon drums. Waste stored in the closed CSA included scraped sealers, adhesives, paint thinners, and waste solvents (PRC 1992). The closed CSA ceased being used on August 15, 1985. A total of 37 containers were removed from the closed CSA (AOI F-4), visible residue was removed from the concrete pad, and the pad was washed with detergent and water. Wastewater was collected and transferred to the WWTP (formerly located in the southeastern portion of the powerhouse property). The closed CSA berm and concrete pad were dismantled, removed, and paved.

A former WWTP was also historically located in the eastern portion of the powerhouse property (AOI F-5). The WWTP consisted of above-grade steel tanks situated on a concrete pad with secondary containment and operated from 1973 through 1983. No documented releases were associated with the WWTP.

For closure activities requirements of the powerhouse, soil sampling was completed within all AOIs on the Subject Property to assess subsurface conditions. A review of the soil data collected has shown concentrations of VOCs, semi-volatile organic compounds (SVOCs), polychlorinated biphenyls (PCBs), and metals above applicable criteria in soil. The soil impacts are a result of the former operations in the area and are acting as a continuing source to groundwater impacts:

- F-15: 1,1,1-Trichloroethane, 1,1-dichloroethane, 1,1-dichloroethylene, tetrachloroethene (PCE), trichloroethene (TCE), and vinyl chloride were identified at concentrations in exceedance of Nonresidential Site-Specific Volatilization to Indoor Air Criteria (SSVIAC).
- F-12: Naphthalene was identified at concentrations in exceedance of Residential GRCC.
- F-7: Arsenic was identified at concentrations in exceedance of Nonresidential Direct Contact Criteria. Benzene, chloroform, PCE, and TCE were identified at concentrations in exceedance of Nonresidential SSVIAC. PCBs were identified in soil in one sample (MWF7-01) at concentrations in exceedance of Toxic Control Substance Act (TSCA) criteria of 1 ppm in 2001.

A review of the groundwater data collected indicated that an area of elevated PCE and TCE in groundwater is present in the northeast section of the Subject Property and the south-central section of the north adjoining property. Elevated concentrations of PCE and TCE on the north adjoining property have contributed to the detection of TCE at concentrations above the Residential SSVIAC in groundwater at monitoring well MWOS-10

(located in the St. Clair Street right-of-way) in November 2021. However, the well was resampled in December 2021, and results were below the Residential SSVIAC.

A Draft RCRA Corrective Action Summary Report was prepared by Arcadis of Michigan, LLC for RACER Trust in July 2023 and is presented in Appendix 8. The report summarizes the following Corrective Action activities (i.e., investigation, monitoring, and corrective measures) completed since 2011, when ownership of the Subject Property was transferred to RACER Trust:

- *Fiero Temporary Monitoring Plan* (2022) described the approach for temporary groundwater and soil vapor monitoring at the former Fiero and Fiero Powerhouse properties to evaluate concentration trends of chlorinated VOCs in groundwater and soil vapor for the 2022 calendar year.
- *Summary of Former Fiero VOC Detections in Storm Sewer Outfalls* (2020) summarized previous activities and provided document references that described how detected contaminant impacts in the Fiero storm sewer catch basins/manholes, distribution piping, and outfalls were addressed by GMC before the property was transferred to RACER Trust. Based on the documented information summarized, VOCs and other contaminant impacts within the former Fiero storm sewer system were investigated, remediated, and adequately addressed, and no further actions were recommended.
- *Fiero Property Vapor Intrusion (VI) Well Installation and Groundwater Monitoring* (2020) documented well installation and groundwater sampling results in the former Fiero Assembly and Powerhouse properties as outlined in the Fiero VI Well Installation Work Plan. No offsite exceedances of Fiero SSVIAC were noted, and additional groundwater monitoring was recommended as well as a historical document review for potential chlorinated VOC sources and an assessment of degradation of VOCs.
- *Vapor Intrusion Conceptual Site Model* (CSM) (2021) summarized the potential exposure pathways and nature and extent of contamination at the former Fiero portion of the Pontiac North Campus properties. The report summarized soil and groundwater data with respect to chlorinated VOCs VI criteria exceedances near the western boundary of the Fiero property.
- *Fiero Property Source Investigation Scope of Work* (2021) described the scope of work for an investigation to address data gaps identified in the Vapor Intrusion CSM for the Fiero properties. The key objectives of the investigation were to further assess potential VI risks to offsite receptors, specifically two residential structures located southwest of the Fiero properties (the northern of which was not habitable as of July 2022 due to a fire at the structure); characterize groundwater impacts downgradient of potential source areas and at the Fiero Site boundary to help identify preferential pathways and key upgradient source areas; and install additional monitoring wells for a more robust monitoring network.

8.1.1.1 PFAS Groundwater Sampling

PFAS groundwater sampling has been conducted on the Subject Property since 2023.

The initial sampling event was completed on April 24, 2023, and Arcadis began monitoring activities by gauging existing site monitoring wells. Following the gauging event, monitoring wells were sampled for PFAS over a 5-day period from April 25 to May 2, 2023. A total of seven groundwater samples were collected from seven monitoring wells and submitted for analysis of 28 PFAS compounds in accordance with modified U.S. Environmental Protection Agency (USEPA) Method 537M. In addition, laboratory quality assurance/quality control samples were collected, including field duplicate and matrix spike/matrix spike duplicate (MS/MSD) samples.

The supplemental sampling event was completed on September 11, 2023, and Arcadis began monitoring activities by gauging site monitoring wells. Following the gauging event, monitoring wells were sampled for PFAS from September 12 through 25, 2023. An additional three groundwater samples were submitted to Pace Analytical and analyzed for the same 28 PFAS compounds in accordance with modified USEPA Method 537M.

Perfluorooctanoic acid (PFOA) was identified in multiple groundwater samples at concentrations in exceedance of Part 201 GRCC for Drinking Water Criteria. Perfluorooctane sulfonic acid (PFOS) was identified at concentrations in exceedance of Part 201 Groundwater/Surface Water Interface Criteria and Drinking Water Criteria.

Other than sampling and groundwater monitoring, no soil removal or remediation activities have been completed.

The use of the Subject Property as a power plant that serviced the greater Pontiac North Campus has resulted in contaminated soil and groundwater conditions. Prior environmental site assessments have identified the presence of VOCs and PFAS compounds in groundwater at concentrations exceeding Part 201 GRCC and the presence of VOCs, PNAs, metals, and PCBs in soil at concentrations exceeding Part 201 GRCC. Therefore, the Subject Property meets the definition of a *facility* as defined by Part 201 of NREPA.

8.1.2 Adjoining Properties

8.1.2.1 888–900 Baldwin Avenue

The adjoining property to the north is listed in the following databases: UST, ENVIRO, INVENTORY, PART 201, BEA, WDS, SEMS-ARCHIVE, CORRACTS, RCRA-TSDF, RCRA-VSQG, 2020 COR, ACTION, FINDS, ECHO, E MANIFEST, MANIFEST, and RCRA NonGen/NLR.

The north adjoining property was historically occupied by the former Fiero Plant 17 associated with the Subject Property. Historical references indicate the presence of steel storage and fabrication operations; trim ship operations; lacquer mixing, spraying, and drying operations; printing and upholstering operations; and woodworking and assembly operations. These operations continued through the late 1970s, when the facility was retooled to manufacture and assemble Fiero vehicles, which occurred for an approximate 10-year period from 1980 through 1990.

8.1.2.1.1 Soil Sampling

Soil sampling was completed within all AOIs on the adjoining property (F-16, F-2, F-6, and F-9) to assess subsurface conditions. A review of the soil data collected has shown concentrations of VOCs, SVOCs and metals above applicable criteria in soil. The soil impacts are a result of the former operations in the area and are acting as a continuing source to groundwater impacts:

- F-16: 1,1-Dichloroethane, 1,1-dichloroethylene, carbon tetrachloride, benzene, chloroform, cis-1,2-dichloroethylene, ethylbenzene, isopropyl benzene, naphthalene, PCE, toluene, TCE, and xylene (total) were identified at concentrations in exceedance of Part 201 Generic Nonresidential Cleanup Criteria (GNRCC).

8.1.2.1.2 Groundwater Sampling

A 2023 *Fiero Temporary Groundwater Monitoring Plan Summary* was completed by Arcadis, dated April 2023, for the north adjoining property. To investigate groundwater conditions and assess the potential for the migration of contamination to the adjoining properties to the south and west, a total of 22 groundwater wells were sampled on the north adjoining property.

The Temporary Groundwater Monitoring Plan Summary outlined the following groundwater sampling activities:

- *There were no exceedances of Nonresidential SSVIAC in groundwater.*
- *The primary compounds detected in groundwater include PCE, TCE, and cis-1,2-DCE. Other compounds detected above the residential SSVIAC in groundwater, but are not as extensive as PCE, TCE, and cis-1,2-DCE, include: 1,1-dichloroethane (1,1-DCA), carbon tetrachloride, chloroform, and ethylbenzene.*
- *Elevated VOC detections remain upgradient near the identified source areas in the central portion of the Site and decrease steadily as they approach the southwest property boundary.*

- *All off-site monitoring wells were below the Residential SSVIAC for all monitoring events, except for MWOS-10, which exceeded the Residential SSVIAC in groundwater for TCE (8.1 µg/L) during the Q2 event.*
- *Geochemical conditions are not strongly reducing due to elevated dissolved oxygen concentrations with as evidenced by the presence of oxidized forms of iron (i.e., total iron concentrations greater than dissolved iron concentrations), and methane concentrations generally below the laboratory detection limit.*
- *Based on the trend analysis, concentrations in both on-site and off-site monitoring wells for PCE, TCE, and cis-DCE since 2017 are generally stable, and concentrations are expected to remain consistent with previous sampling events. A select few on-site locations including MWF16-05, MWF16-16, MWF16-18, and MWF16-25 exhibit increasing trends for one or more VOCs.*

Soil and groundwater impacts identified on the north adjoining property have been identified as migrating south onto the Subject Property. Therefore, a Notice of Migration has been submitted for the adjoining property.

Groundwater data collected at the north adjoining property (888–900 Baldwin Avenue) has identified VOCs, SVOCs, and metals at concentrations above Part 201 GRCC in soil and groundwater. Impact from this property has migrated onto the Subject Property. The confirmed migration of contamination from the north adjoining property has been identified as a REC.

8.1.3 Nearby Properties

Sites beyond the adjacent properties listed on the database were evaluated to determine if further records review was warranted. This determination included evaluation of the following factors:

- Known or presumed groundwater flow direction in the area.
- Distance and direction of the identified site from the Subject Property.
- Whether the database listing indicates a release has occurred from the identified site.
- Sites within 0.33 miles of the site that represent a potential for vapor migration (i.e., have had a reported release of VOCs) and are in an upgradient position relative to groundwater flow direction.

Based on these criteria, further records regarding the following site were reviewed to assess its potential to impact the project site.

8.1.3.1 Pontiac North Campus

A light non-aqueous phase liquid (LNAPL) groundwater plume has been identified on the nearby Pontiac North Campus to the east. An *LNAPL Assessment Summary* was completed for Pontiac North Campus by Arcadis. The LNAPL plume is identified in the area of the former Plant 6, Foundry; Plant 8, Final Vehicle Assembly; and Plant 9, Engine Construction, buildings. Currently USPS Michigan Metroplex P&DC is located in this area.

LNAPL Area identifiers have changed over various evaluations due to LNAPL composition differences/similarities and commingling of LNAPL. Historical operations in nearby areas included a foundry, an engine plant, an assembly plant, waste storage, and a rail marshalling area. Automobile-related operations in this part of the site were terminated between the late 1980s and early 1990s, and the buildings were decommissioned and demolished in the mid-1990s. The former railroad marshalling area is identified as the closest extent of the LNAPL plume to the Subject Property, approximately 380 feet east.

Based on the results from multiple LNAPL interim measures, delineation and mobility investigations that have been completed since 2005, the following conclusions were identified:

- Some remaining LNAPL across the LNAPL Areas may be mobile within the LNAPL Area extent, but it is neither migrating nor recoverable.
- The LNAPL plume is degrading over time.

- There are no compositional or mobility concerns associated with LNAPL. Groundwater sampling and LNAPL gauging will continue to confirm the LNAPL extent is stable and there continue to be no compositional concerns.
- Institutional controls (Restrictive Covenant RC-OWMRP-111-21-006, dated 2022) are/will be in place to provide notice of the presence of residual LNAPL and prevent unacceptable exposure to potential receptors in the future.
- No further remedial actions are recommended at this time.

PCBs were additionally investigated in soil on the nearby property. The extent of the PCB contamination in soil mirrors the extent of the LNAPL plume discussed above. Soil sampling activities identified concentrations of PCBs closest to the Subject Property to be below the TSCA Exposure Limits and are unlikely to migrate onto the Subject Property.

Sampling conducted on the Subject Property does not give any indication that contamination present on the Subject Property has originated from an offsite source associated with the greater Pontiac North Campus area, with the exception of the north adjoining property, as discussed in Section 8.1.2. In addition, potential releases of LNAPL were also investigated during assessments completed at the Subject Property. LNAPL was not detected at the Subject Property during any of the subsurface investigations. Based on the fully delineated extent of the LNAPL and the analytical results collected on the Subject Property, the nearby property to the east is not identified as a REC to the Subject Property at this time.

8.1.4 Orphan Sites

The database report did not list any orphan sites.

8.2 County Health Department

Fishbeck submitted a Freedom of Information Act (FOIA) request to the Oakland County Health Department. No information was on file for the Subject Property at the Oakland County Health Department.

8.3 Local Fire Department

Fishbeck submitted a FOIA request to the City of Waterford Fire Department. The Waterford Fire Department did not provide records or information on the Subject Property that Fishbeck would interpret as a REC.

8.4 Assessing/Building Department Records

Fishbeck submitted a FOIA request to the City of Pontiac for Assessing/Building Department Records. As of the date of this report, the Assessing and Building Department has not responded to the FOIA request.

9.0 Site Reconnaissance

Solomon Boisvert, Environmental Specialist with Fishbeck, conducted a site reconnaissance of the Subject Property on November 10, 2025. The site reconnaissance included an inspection of the Subject Property. The Subject Property was walked in a counterclockwise direction beginning at the west gate. Adjacent properties were viewed from the Subject Property. Photographs taken during the reconnaissance are included in Appendix 9. The site reconnaissance was limited by several inches of snow covering exterior portions of the Subject Property, preventing direct observation of the ground surface. Due to the availability of other data sources (e.g., aerial photographs, fire insurance maps, and personal interviews), the data gap is not considered a significant data gap. A summary of observations made during the reconnaissance is provided below.

9.1 Subject Property Observations

Features, Activities, Uses, and Conditions	Observations
Current Uses of Subject Property	See Section 4.3.
Past Uses of Subject Property	Past uses of the Subject Property could not be determined based on Subject Property observations. Past Subject Property uses are also summarized in Section 6.1.
Current Uses of Adjoining Properties	See Section 4.4.
Past Uses of Adjoining Properties	Past uses of the adjoining properties could not be determined based on observations. Past uses of the adjoining properties are also summarized in Section 7.0.
Current and Past Uses of Surrounding Areas	See Section 4.5.
Geologic, Hydrogeologic, Hydrologic, and Topographic Conditions	See Section 5.0.
Structures, Other Improvements, and Roads	See Section 4.2.
Heating/Cooling	See Section 4.2.
Potable Water Supply	The Subject Property has no potable water supply.
Sewage Disposal System	The Subject Property is not currently connected to the municipal sanitary sewer.
Septic Systems	There were no septic systems observed.
Sanitary and/or Process Wastewater	Sanitary wastewater is not currently generated.
Interior Drains or Sumps	The Subject Property is not structurally developed; therefore, no interior drains or sumps were observed.
Storm Water	Several stormwater drains were observed across the Subject Property. No staining or notable odors were observed in association with the storm drains.
Wells	Approximately 18 groundwater monitoring wells were observed across the Subject Property during the site reconnaissance. The presence of these wells is noted in prior groundwater assessments completed on the Subject Property, which are discussed in Section 8.0.

Features, Activities, Uses, and Conditions	Observations
Stains, Corrosion, or Odors in Association with Either Soils, Pavement, or Building Surfaces.	No stains, corrosion, or odors were observed.
Solid Waste/Fill Material	On the eastern property boundary, railroad base was observed. The presence of this material correlates with the historical presence of a railroad in this section of the Subject Property.
Unidentified Substance Containers/Abandoned Containers	There were no unidentified substance containers or abandoned containers observed.
Pits, Ponds, Lagoons	There were no pits, ponds, or lagoons observed.
Stressed Vegetation	There was no stressed vegetation observed.
Storage Tanks	There were no aboveground storage tanks or evidence of current or former underground storage tanks (such as vent pipes or fill pipes) observed.
Hazardous Substances or Petroleum Products/Drums, Totes, Intermediate Bulk Containers	There were no hazardous substances or petroleum products observed.
Hydraulic Equipment/Electrical Transformers	A small, pad-mounted transformer was observed on the southeastern section of the Subject Property. No staining or releases were observed in association with the transformer. Two large transformers were observed within the fenced substation on the northern section of the Subject Property. No staining or releases were identified in association with the transformers. One pole-mounted transformer was observed southwest of the substation. No leaking or staining was noted in association with the pole mounted transformer.
PCB-Containing Items (older hydraulic equipment/electrical transformers)	See above.
Surface Water/Sumps Containing Hazardous Substances or Petroleum Products	There were no surface waters, pools, or sumps containing hazardous substances or petroleum products observed.

The Subject Property consists of a large, fenced, L-shaped lot. A defunct substation is located in the central section of the Subject Property. During the site reconnaissance, sections of the property were observed to be paved with concrete and concrete foundations, which were notably in poor condition. An asphalt parking area and gravel area is located over the footprint of the former powerhouse in the north central section of the Subject Property. A former railroad bed was located on the eastern property boundary. A grassy, unpaved section of the Subject Property (the former coal storage area) was observed on the south section of the property. Excavations were observed around some storm drains on the Subject Property. According to Cliff Lewis, the site manager, DTE Energy was completing some utility work on the Subject Property that involved accessing subsurface utilities.

10.0 Interviews

10.1 Interview with Owner

Various interviews have been conducted by phone and email with representatives of RACER Trust regarding the environmental conditions associated with the Subject Property. An owner questionnaire was completed on behalf of RACER Properties LLC by David Favero, Michigan Deputy Cleanup Manager, and presented in Appendix 10. Mr. Favero did not identify any additional Subject Property conditions that were not previously disclosed during prior interviews.

RACER Trust has owned the Subject Property since 2011. RACER Trust has compiled a database (www.racertrust.org) of all known environmental site assessments completed on the Subject Property since the late 1990s.

11.0 Findings, Opinions, and Conclusions

Significant findings, and Fishbeck's opinions on whether those findings meet the definition of a REC, are discussed as they are identified within the body of this report, and the following conclusion was drawn:

Fishbeck has performed a Phase I ESA in conformance with the scope and limitations of the ASTM Standard at 824 St. Clair Street, Pontiac, Michigan, the Subject Property. Any exceptions to, or deletions from, this practice are described in the Limitations and Exceptions section of this report. This assessment has revealed the following RECs, Historical Recognized Environmental Conditions (HRECs), and/or Controlled Recognized Environmental Conditions (CRECs):

- The use of the Subject Property as a power plant that serviced the greater Pontiac North Campus has resulted in contaminated soil and groundwater conditions. Prior environmental site assessments have identified the presence of volatile organic compounds (VOCs) and per- and polyfluoroalkyl substances (PFAS) compounds in groundwater at concentrations exceeding Part 201 Generic Residential Cleanup Criteria (GRCC) and the presence of VOCs, polynuclear aromatic hydrocarbons (PNAs), metals, and polychlorinated biphenyls (PCBs) in soil at concentrations exceeding Part 201 GRCC. Therefore, the Subject Property meets the definition of a *facility* as defined by Part 201 of the Natural Resources and Environmental Protection Act (NREPA).
- A review of the soil and groundwater data collected at the north adjoining property (888–900 Baldwin Avenue) has identified VOCs, semi-volatile organic compounds (SVOCs), PFAS compounds, and metals at concentrations above Part 201 GRCC in soil and groundwater. Impacts from this property have migrated onto the Subject Property. The confirmed migration of contamination from the north adjoining property has been identified as a REC.

The presence of contaminants above Part 201 residential cleanup criteria demonstrates that the Subject Property meets the definition of a *facility* as defined by Part 201 of NREPA.

12.0 Deviations

In the process of conducting this Phase I ESA, the following deviation was made from the ASTM Standard:

- The State of Michigan does not publish two separate lists that are directly comparable to the NPL and CERCLIS listings. Michigan compiles a List of Contaminated Sites (Part 201 sites, Inventory sites, and/or BEA sites) that includes both sites that have been investigated and those requiring investigation. This one list serves the purpose of both the CERCLIS and NPL lists on a state level.

13.0 Non-scope Services

No additional services were requested as part of this Phase I ESA.

15.0 Signatures of Environmental Professionals

I declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional, as defined in 40 CFR §312.10.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed the *all appropriate inquiries* in conformance with the standards and practices set forth in 40 CFR Part 312.

Assessment Conducted By: Solomon Boisvert

Assessment Reviewed By:

Courtney Dunaj

Qualification statements for the Fishbeck personnel responsible for conducting this Phase I ESA are provided as Appendix 11.

fishbeck

Appendix

1

abandoned property – property that can be presumed to be deserted, or an intent to relinquish possession or control can be inferred from the general disrepair or lack of activity thereon such that a reasonable person could believe that there was an intent on the part of the current owner to surrender rights to the property.

activity and use limitations (AULs) – legal or physical restrictions or limitations on the use of, or access to, a site or facility: (1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil, soil vapor, groundwater, and/or surface water on the property, or (2) to prevent activities that could interfere with the effective ness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls, are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil, soil vapor, groundwater, and/or surface water on a property.

> **Discussion** – The term activity and use limitations (AULs) is taken from Guide E2091 to include both legal (that is, institutional) and physical (that is, engineering) controls within its scope. Other agencies, organizations, and jurisdictions may define or utilize these terms differently (for example, EPA and California do not include physical controls within their definitions of "institutional controls." Department of Defense and International County/City Management Association use "Land Use Controls." The term "land use restrictions" is used but not defined in the Brownfields Amendments).

actual knowledge – knowledge actually possessed by an individual who is a real person, rather than an entity. Actual knowledge is to be distinguished from constructive knowledge that is knowledge imputed to an individual or entity.

adjoining properties – any real property or proper ties the border of which is contiguous or partially contiguous with that of the subject property, or that would be contiguous or partially contiguous with that of the subject property but for a street, road, or other public thoroughfare separating them.

aerial photographs – photographs taken from an aerial platform with sufficient resolution to allow identification of development and activities.

all appropriate inquiries – that inquiry constituting all appropriate inquiries into the previous ownership and uses of the subject property consistent with good commercial and customary practice as defined in CERCLA, 42 USC § 9601(35)(B) and 40 CFR Part 312, that will qualify a party to a commercial real estate transaction for one of the threshold criteria for satisfying the LLPs to CERCLA liability (42 USC §§ 9601(35)(A) & (B), § 9607(b)(3), § 9607(q), and § 9607(r)), assuming compliance with other elements of the defense. See Appendix X1.

approximate minimum search distance – the area for which records must be obtained and reviewed pursuant to Section 8 subject to the limitations provided in that section. This may include areas outside the subject property and shall be measured from the nearest subject property boundary. This term is used in lieu of radius to include irregularly shaped properties.

bona fide prospective purchaser [42 USC § 9607(r)] – a person may qualify as a bona fide prospective purchaser if, among other requirements, such person made "all appropriate inquiries into the previous ownership and uses of the facility in accordance with generally accepted good commercial and customary standards and practices." Knowledge of contamination resulting from all appropriate inquiries would not generally preclude this liability protection. A person must make all appropriate inquiries on or before the date of purchase. The facility must have been purchased after January 11, 2002. See Appendix X1 for the other necessary requirements that are beyond the scope of this practice.

Brownfields Amendments – amendments to CER CLA pursuant to the Small Business Liability Relief and Brownfields Revitalization Act, Pub. L. No. 107118 (2002), 42 USC § 9601 et seq.

building department records – those records of the local government in which the subject property is located indicating permission of the local government to construct, alter, or demolish improvements on a property.

business environmental risk (BER) – a risk which can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more nonscope considerations, some of which are identified in Section 13.

commercial real estate – any real property except a dwelling or property with no more than four dwelling units exclusively for residential use (except that a dwelling or property with no more than four dwelling units exclusively for residential use is included in this term when it has a commercial function, as in the construction of such dwellings for profit). This term includes but is not limited to undeveloped real property and real property used for industrial, retail, office, agricultural, other commercial, medical, or educational purposes; property used for residential purposes that has more than four residential dwelling units; and property with no more than four dwelling units for residential use when it has a commercial function, as in the building of such dwellings for profit.

commercial real estate transaction – a transfer of title to or possession of real property or receipt of a security interest in real property, except that it does not include transfer of title to or possession of real property or the receipt of a security interest in real property with respect to an individual dwelling or building containing fewer than five dwelling units, nor does it include the purchase of a lot or lots to construct a dwelling for occupancy by a purchaser, but a commercial real estate transaction does include real property purchased or leased by persons or entities in the business of constructing or developing dwelling units.

construction debris – concrete, brick, asphalt, and other such building materials discarded in the construction of a building or other improvement to property.

contaminated public wells – public wells used for drinking water that have been designated by a government entity as contaminated by hazardous substances (for example, chlorinated solvents) or petroleum products, or as having water unsafe to drink without treatment.

contiguous property owner [42 USC § 9607(q)] – a person may qualify for the contiguous property owner liability protection if, among other requirements, such person owns real property that is contiguous to, and that is or may be contaminated by hazardous substances from other real property that is not owned by that person. Furthermore, such person conducted all appropriate inquiries at the time of acquisition of the subject property and did not know or have reason to know that the subject property was or could be contaminated by a release or threatened release from the contiguous property. The all-appropriate inquiries must not result in knowledge of contamination. If it does, then such person did "know" or "had reason to know" of contamination and would not be eligible for the contiguous property owner liability protection. See Appendix X1 for the other necessary requirements that are beyond the scope of this practice.

controlled recognized environmental condition – recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations). For examples of controlled recognized environmental conditions, see Appendix X4.

> **Discussion** – Identification of a controlled recognized environmental condition is a multistep process that shall be reflected in the report's Findings and Opinions section(s), as described in 12.5 and 12.6, including the environmental professional's rationale for concluding that a finding is a controlled recognized environmental condition:
>
> (1) When determining whether a recognized environmental condition has been "addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place," the environmental professional shall review reasonably ascertainable documentation, such as no further action letters (or similar certifications or approvals) issued by the applicable regulatory authority or authorities, or, in the case of self-directed actions, documentation and relevant data that satisfy risk-based criteria established by the applicable regulatory authority or authorities.

(2) In determining whether a recognized environmental condition is "subject to implementation of required controls (for example, activity and use limitations or other property use limitations)," the environmental professional shall identify the documentation providing the control(s) that addresses the recognized environmental condition in the report's Findings and Opinions section(s).

(3) When the environmental professional determines that a recognized environmental condition is "subject to implementation of required controls," this determination does not imply that the environmental professional has evaluated or confirmed the adequacy, implementation, or continued effectiveness of the control(s).

(4) A past release that previously qualified as a controlled recognized environmental condition may no longer constitute a controlled recognized environmental condition at the time of the Phase I Environmental Site Assessment if new conditions or information have been identified such as, among other things, a change in regulatory criteria, a change of use at the subject property, or a subsequently identified migration pathway that was not previously known or evaluated.

data failure – failure to achieve the historical research objective in 8.3.1 even after reviewing the standard historical resources in 8.3.4.1 through 8.3.4.8 that are reason ably ascertainable and likely to be useful. Data failure is one type of data gap. See 8.3.6.

data gap – a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to, site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.). See 12.6.

de minimis condition – a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a de minimis condition is not a recognized environmental condition nor a controlled recognized environmental condition.

demolition debris – concrete, brick, asphalt, and other such building materials discarded in the demolition of a building or other improvement to a property.

drum – a container (typically, but not necessarily, holding 55 gal (208 L) of liquid) that may be used to store hazardous substances or petroleum products.

dry wells – underground areas where soil has been removed and replaced with pea gravel, coarse sand, or large rocks. Dry wells are used for drainage, to control storm runoff, for the collection of spilled liquids (intentional and nonintentional), and wastewater disposal (often illegal).

due diligence – the process of inquiring into the environmental characteristics of commercial real estate or other conditions, usually in connection with a commercial real estate transaction. The degree and kind of due diligence vary for different properties, and differing purposes. See Appendix X1.

dwelling – structure or portion thereof used for residential habitation.

engineering controls – physical modifications to a site or facility (for example, capping, slurry walls, or point of use water treatment) to reduce or eliminate the potential for exposure to hazardous substances or petroleum products in the soil or groundwater on a property. Engineering controls are a type of activity and use limitation (AUL).

environment – environment shall have the same meaning as the definition of environment in CERCLA 42 USC § 9601(8)). For additional background information, see Legal Appendix (Appendix X1) to X1.1.1 "Releases or Threatened Releases."

environmental compliance audit – the investigative process to determine if the operations of an existing facility are in compliance with applicable environmental laws and regulations. This term should not be used to describe this practice, although an environmental compliance audit may include an environmental site assessment or, if prior audits are available, may be part of an environmental site assessment.

environmental lien – a charge, security, or encumbrance upon title to a property to secure the payment of a cost, damage, debt, obligation, or duty arising out of response actions, cleanup, or other remediation of hazardous substances or petroleum products upon a property, including (but not limited to) liens imposed pursuant to CERCLA 42 USC §§ 9607(1) & 9607(r) and similar state or local laws.

environmental professional – a person meeting the education, training, and experience requirements as set forth in 40 CFR § 312.10(b). For the convenience of the reader, this section is reprinted in Appendix X2. The person may be an independent contractor or an employee of the user.

environmental site assessment (ESA) – the process by which a person or entity seeks to determine if a subject property is subject to recognized environmental conditions. At the option of the user, an environmental site assessment may include more inquiry than that constituting all appropriate inquiries or, if the user is not concerned about qualifying for the LLPs, less inquiry than that constituting all appropriate inquiries. An environmental site assessment is both different from and often less rigorous than an environmental compliance audit.

ERNS list – EPA's emergency response notification system list of reported CERCLA hazardous substance releases or spills in quantities greater than the reportable quantity, as maintained at the National Response Center. Notification requirements for such releases or spills are codified in 40 CFR Parts 302 and 355.

fill dirt – dirt, soil, sand, or other earth, that is obtained offsite, that is used to fill holes or depressions, create mounds, or otherwise artificially change the grade or elevation of real property. It does not include material that is used in limited quantities for normal landscaping activities.

fire insurance maps – maps originally produced for fire insurance purposes that indicate uses of properties at specified dates.

good faith – absence of any intention to seek an unfair advantage or to defraud another party; an honest and sincere intention to fulfill one's obligations in the conduct or transaction concerned.

hazardous substance – a substance defined as a hazardous substance pursuant to CERCLA 42 USC § 9601(14), as interpreted by EPA regulations and the courts: "(A) any substance designated pursuant to section 1321(b)(2)(A) of Title 33, (B) any element, compound, mixture, solution, or substance designated pursuant to section 9602 of this title, (C) any hazardous waste having the characteristics identified under or listed pursuant to section 3001 of the Resource Conservation and Recovery Act of 1976 (RCRA), as amended, (42 USC § 6921) (but not including any waste the regulation of which under RCRA (42 USC § 6901 et seq.) has been suspended by Act of Congress), (D) any toxic pollutant listed under section 1317(a) of Title 33, (E) any hazardous air pollutant listed under Section 112 of the Clean Air Act (42 USC § 7412), and (F) any imminently hazardous chemical substance or mixture with respect to which the Administrator (of EPA) has taken action pursuant to section 2606 of Title 15. The term does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas)." (See Appendix X1.)

hazardous waste – any hazardous waste having the characteristics identified under or listed pursuant to Section 3001 of RCRA, as amended, (42 USC § 6921) (but not including any waste the regulation of which under RCRA (42 USC §§ 69016992k) has been suspended by Act of Congress). RCRA is sometimes also identified as the Solid Waste Disposal Act. RCRA defines a hazardous waste, at 42 USC § 6903, as: "a solid waste, or combination of

solid wastes, which because of its quantity, concentration, or physical, chemical, or infectious characteristics may: (A) cause, or significantly contribute to an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness, or (B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of, or otherwise managed."

hazardous waste/contaminated sites – sites on which a release has occurred, or is suspected to have occurred, of any hazardous substance, hazardous waste, or petroleum products, and that release or suspected release has been reported to a government entity.

historical recognized environmental condition – a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A historical recognized environmental condition is not a recognized environmental condition. For examples of historical recognized environmental conditions, see Appendix X4.

Discussion – Identification of a historical recognized environmental condition is a multistep process that shall be reflected in the report's Findings and Opinions section(s), as described in 12.5 and 12.6, including the environmental professional's rationale for concluding that a finding is a historical recognized environmental condition:

(1) When determining whether a recognized environmental condition has been "addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the regulatory authority or authorities," the environmental professional shall review reasonably ascertainable documentation and relevant data that demonstrate that unrestricted use criteria established by the applicable regulatory authority or authorities was met.

(2) A past release that qualified as a historical recognized environmental condition may no longer qualify as a historical recognized environmental condition if new conditions or information have been identified such as, among other things, a change in regulatory criteria or a subsequently identified migration pathway that was not previously known or evaluated. As noted, the report's Findings and Opinions section(s) shall include the environmental professional's rationale for concluding that a condition at the subject property is or is not currently a recognized environmental condition or a historical recognized environmental condition.

IC/EC registries – databases of institutional controls or engineering controls that may be maintained by a federal, state, or local environmental agency for purposes of tracking sites that may contain residual contamination and AULs. The names for these may vary from program to program and state to state, and include terms such as, but not limited to the following: Declaration of Environmental Use Restriction database (Arizona), Land Use Restriction Sites (California Department of Toxic Substances Control), Sites with Deed Restrictions (California State Water Resources Control Board), Environmental Covenant List (Washington), Sites With Environmental Covenants and Use Restrictions (Colorado), Institutional Control Registry (Indiana), Environmental Site Tracking and Research Tool (Missouri), and the Pennsylvania Activity and Use Limitation (PA AUL) Registry.

innocent landowner [42 USC §§ 9601(35) & 9607(b)(3)] – a person may qualify as one of three types of innocent landowners: (1) a person who "did not know and had no reason to know" that contamination existed on the subject property at the time the purchaser acquired the subject property; (2) a government entity which acquired the subject property by escheat, or through any other involuntary transfer or acquisition, or through the exercise of eminent domain authority by purchase or condemnation; or (3) a person who "acquired the facility by inheritance or bequest." To qualify for the innocent landowner defense, such person must have made all appropriate inquiries on or before the date of purchase. Furthermore, the all-appropriate inquiries must not have resulted in knowledge of the contamination. If it does, then such person did "know" or "had reason to know" of contamination and would not be eligible for the innocent landowner defense. See Appendix X1 for the other necessary requirements that are beyond the scope of this practice.

institutional controls (IC) – a legal or administrative mechanism (for example, "deed restrictions," restrictive covenants, easements, or zoning) on the use of, or access to, a site or facility to (1) reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the property, or (2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. An institutional control is a type of activity and use limitation (AUL).

interviews – those portions of this practice that are conducted to gather information from an individual or individuals in person, by telephone, in writing, or via other electronic media to meet the objectives of this practice.

key site manager – the person identified by the owner or operator of a subject property as having good knowledge of the uses and physical characteristics of the subject property. See 10.5.1.

land title records – records that affect the title of real estate, which may include, among other things, deeds, mortgages, leases, land contracts, court orders, easements, liens, and AULs recorded within the recording systems or land registration systems created by state statute in every state and ordinarily administered in the local jurisdiction (usually the county) in which the subject property is located, and available by performing a title search. Such records are publicly accessible, though the process of performing a title search to find land title records often requires specialized expertise or knowledge of the local system (see 5.4 – AULs and Environ mental Liens in Land Title Records). Information about the title to the subject property that is filed or stored in any place other than where land title records are, by law or custom, recorded for the local jurisdiction in which the subject property is located, are not considered land title records.

landfill – a place, location, tract of land, area, or premises used for the disposal of solid wastes as defined by state solid waste regulations. The term is synonymous with the term solid waste disposal site and is also known as a garbage dump, trash dump, or similar term.

landowner liability protections (LLPs) – a defense to CERCLA available to bona fide prospective purchasers, contiguous property owners, and innocent landowners. See 42 USC §§ 9601(35)(A), 9601(40), 9607(q), and 9607(r).

local government agencies – those agencies of municipal or county government having jurisdiction over the subject property. Municipal and county government agencies include but are not limited to cities, parishes, townships, and similar entities.

local street directories – directories published by private or government entities that list the occupant(s) of a specific address at the time the occupant data were collected, typically within a year of the publication date of the directory.

major occupants – those tenants, subtenants, or other persons or entities each of which uses at least 40% of the leasable area of the subject property or any anchor tenant when the subject property is a shopping center.

material safety data sheet (MSDS) – see safety data sheet.

material threat – obvious threat which is likely to lead to a release and that, in the opinion of the environmental professional, would likely result in impact to public health or the environment. An example might include an aboveground storage tank system that contains a hazardous substance and which shows evidence of damage. The damage would represent a material threat if it is deemed serious enough that it may cause or contribute to tank integrity failure with a release of contents to the environment.

migrate/migration, v/n – for the purposes of this practice, "migrate" and "migration" refers to the movement of hazardous substances or petroleum products in any form, including, for example, solid and liquid at the surface or subsurface, and vapor in the subsurface.

Discussion – Vapor migration in the subsurface is described in Guide E2600; however, nothing in this practice should be construed to require application of the Guide E2600 standard to achieve compliance with all appropriate inquiries.

National Priorities List (NPL) – list compiled by EPA pursuant to CERCLA 42 USC § 9605(a)(8)(B) of sites with the highest priority for cleanup pursuant to EPA's Hazard Ranking System. See 40 CFR Part 300.

obvious – that which is plain or evident; a condition or fact that could not be ignored or overlooked by a reasonable observer.

occupants – those tenants, subtenants, or other persons or entities using a property or a portion of a property.

operator – person responsible for the overall operation of a facility.

other historical resources – any resource other than those designated in 8.3.4.1 through 8.3.4.8 that are credible to a reasonable person and that identify past uses of properties. See 8.3.4.9.

owner – generally the fee owner of record of a property.

petroleum exclusion – the exclusion from CER CLA liability provided in 42 USC § 9601(14), as interpreted by the courts and EPA: "The term (hazardous substance) does not include petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under subparagraphs (A) through (F) of this paragraph, and the term does not include natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas)."

petroleum products – those substances included within the meaning of the petroleum exclusion to CERCLA, 42 USC § 9601(14), as interpreted by the courts and EPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under Subparagraphs (A) through (F) of 42 USC § 9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas). (The word fraction refers to certain distillates of crude oil, including gasoline, kerosine, diesel oil, jet fuels, and fuel oil, pursuant to *Standard Definitions of Petroleum Statistics, American Petroleum Institute, Fifth Edition, 1995*.)

Phase I Environmental Site Assessment – the process described in this practice.

physical setting sources – resources that provide information about the geologic, hydrogeologic, hydrologic, or topographic characteristics of the area that includes the subject property. See 8.2.1.

pits, ponds, or lagoons – manmade or natural depressions in a ground surface that are likely to hold liquids or sludge containing hazardous substances or petroleum products. The likelihood of such liquids or sludge being present is determined by evidence of factors associated with the pit, pond, or lagoon, including, but not limited to, discolored water, distressed vegetation, or the presence of an obvious wastewater discharge.

practically reviewable – information that is practically reviewable means that the information is provided by the source in a manner and in a form that, upon examination, yields information relevant to the subject property without the need for extraordinary analysis of irrelevant data. The form of the information shall be such that the user can review the records for a limited geographic area. Records that cannot be feasibly retrieved by reference to the location of the subject property or a geographic area in which the subject property is located are not generally practically reviewable. Most data bases of public records are practically reviewable if they can be obtained from the source agency by the county, city, zip code, or other geographic area of the facilities listed in the record system. Records that are sorted, filed, organized, or maintained by the source agency only

chronologically are not generally practically reviewable. Listings in publicly available records which do not have adequate address information to be located geographically are not generally considered practically reviewable. For large databases with numerous records (such as RCRA hazardous waste generators and registered underground storage tanks), the records are not practically review able unless they can be obtained from the source agency in the smaller geographic area of zip codes. Even when information is provided by zip code for some large databases, it is common for an unmanageable number of sites to be identified within a given zip code. In these cases, it is not necessary to review the impact of all of the sites that are likely to be listed in any given zip code because that information would not be practically reviewable. In other words, when so much information is generated that it cannot be feasibly reviewed regarding its impact on the subject property, it is not practically reviewable.

property – real property, including buildings and other fixtures and improvements located on and affixed to the land.

property use limitation – limitation or restriction on current or future use of a property in connection with a response to a release, in accordance with the applicable regulatory authority or authorities that allows hazardous substances or petroleum products to remain in place at concentrations exceeding unrestricted use criteria.

property tax files – files kept for property tax purposes by the local jurisdiction which may include records of past ownership, appraisals, maps, sketches, photographs, or other information.

publicly available – information that is publicly available means that the source of the information allows access to the information by anyone upon request.

RCRA generators – those persons or entities that generate hazardous wastes, as defined and regulated by RCRA.

RCRA TSD facilities – those facilities on which treatment, storage, and/or disposal of hazardous wastes takes place, as defined and regulated by RCRA.

reasonably ascertainable – information that is (1) publicly available, (2) obtainable from its source within reasonable time and cost constraints, and (3) practically reviewable.

recognized environmental conditions – (1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

> Discussion – For the purposes of this definition, “likely” is that which is neither certain nor proved, but can be expected or believed by a reasonable observer based on the logic and/or experience of the environmental professional, and/or available evidence, as stated in the report to support the opinions given therein.
>
> Discussion – A de minimis condition is not a recognized environmental condition. See Appendix X4: Additional Examination of the Recognized Environmental Condition Definition and Logic.

records review – that part that is contained in Section 8 of this practice that addresses which records shall or may be reviewed.

release – a release of any hazardous substance or petroleum product shall have the same meaning as the definition of “release” in CERCLA 42 USC § 9601(22). There are a number of statutory exclusions from the definition of release that may impact the environmental professional’s opinions and conclusions, such as the normal application of fertilizer. For additional background information, see Legal Appendix (Appendix X1) to X1.1.1 “Releases and Threatened Releases.”

report – written report prepared by the environ mental professional and constituting part of a "Phase I Environmental Site Assessment," as required by this practice.

safety data sheets – written or printed material that is prepared by chemical manufacturers and importers for distributors' and employers' use that provides comprehensive information regarding a hazardous chemical pursuant to OS HA's Hazard Communication Standard (HCS), 29 C.F.R. § 1910.1200.

significant data gap – a data gap that affects the ability of the environmental professional to identify a recognized environmental condition. See 12.6.2.

site reconnaissance – that part that is contained in Section 9 of this practice and addresses what should be done in connection with the site visit. The site reconnaissance includes, but is not limited to, the site visit done in connection with such a Phase I Environmental Site Assessment.

site visit – the visit to the subject property during which observations are made constituting the site reconnaissance section of this practice.

solid waste disposal site – a place, location, tract of land, area, or premises used for the disposal of solid wastes as defined by state solid waste regulations. The term is synonymous with the term landfill and is also known as a garbage dump, trash dump, or similar term.

solvent – a chemical compound that is capable of dissolving another substance and may itself be a hazardous substance, used in a number of manufacturing/industrial processes including but not limited to the manufacture of paints and coatings for industrial and household purposes, equipment cleanup, and surface degreasing in metal fabricating industries.

standard environmental record sources – those records specified in 8.2.2.

standard historical resources – those resources of information about the history of uses of properties specified in 8.3.4.

standard physical setting resources – recent USGS 7.5 Minute Topographic Map (or equivalent) showing contour lines and the area on which the subject property is located, and site-specific physical setting information obtained pursuant to agency file reviews. See 8.2.1.

standard practice – the activities set forth in this practice.

standard sources – sources of environmental, physical setting, or historical records specified in Section 8 of this practice.

subject property – the property that is the subject of the environmental site assessment described in this practice.

sump – pit, cistern, cesspool, or similar receptacle where liquids drain, collect, or are stored.

topographic map – graphic representation delineating natural and manmade features of an area or region in a way that shows their relative positions and elevations.

TSD facility – treatment, storage, or disposal facility. See 3.2.71.

underground injection – the emplacement or discharge of fluids into the subsurface by means of a well, improved sinkhole, sewage drain hole, subsurface fluid distribution system or other system, or groundwater point source.

underground storage tank (UST) – any tank, including underground piping connected to the tank, that is or has been used to contain hazardous substances or petroleum products and the volume of which is 10 % or more beneath the surface of the ground.

User – the party seeking to use Practice E1527 to complete an environmental site assessment of the subject property.

> Discussion – A user may include, without limitation, a potential purchaser of subject property, a potential tenant of subject property, an owner of the subject property, a lender, or a property manager. A user seeking to qualify for an LLP to CERCLA liability, or a user that is an EPA Brownfield Assessment and Characterization grantee, has specific responsibilities for completing a successful application of this practice as outlined in Section 6.

USGS 7.5-Minute Topographic Map – USGS Topographic Map, including the current US Topo 7.5Minute Series or the historical 7.5Minute Topographic Series, which is available from the United States Geologic Survey and showing the subject property.

Visually and/or physically observed, v – during a site visit pursuant to this practice, this term means observations made by visual, auditory, or olfactory means while performing the site reconnaissance.

Wastewater – water that (1) is or has been used in an industrial or manufacturing process, (2) conveys or has conveyed sewage, or (3) is directly related to manufacturing, processing, or raw materials storage areas at an industrial plant. Wastewater does not include water originating on or passing through or adjacent to a site, such as stormwater flows, that has not been used in industrial or manufacturing processes, has not been combined with sewage, or is not directly related to manufacturing, processing, or raw materials storage areas at an industrial plant.

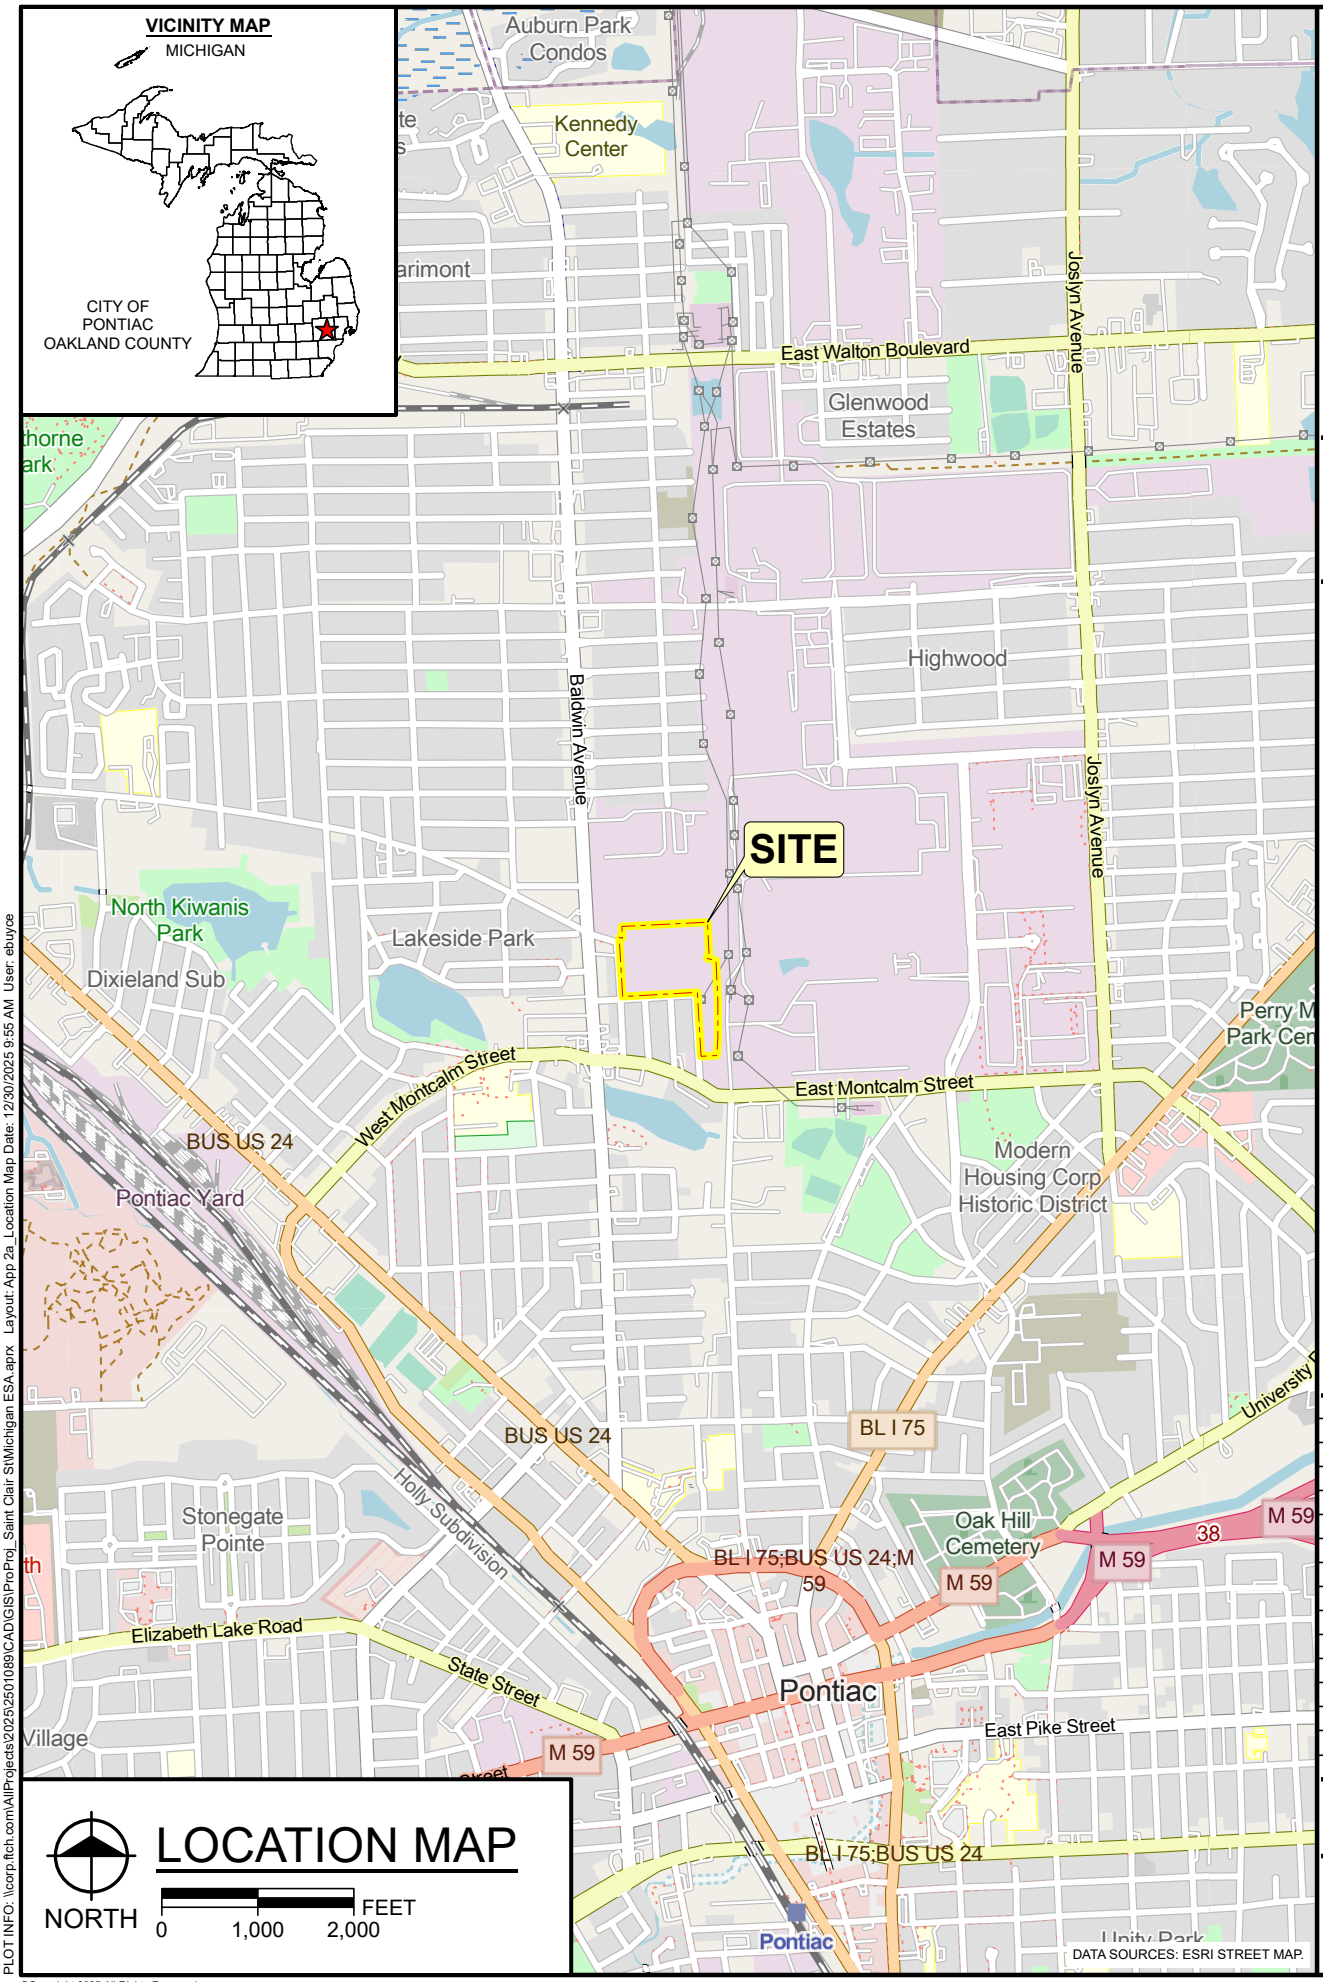

Zoning/land use records – those records of the local government of areas encompassing the subject property indicating the uses permitted by the local government in particular zones within its jurisdiction. The records may consist of maps or written records.

AP Services, LLC, a Michigan limited liability company, acting solely in its capacity as Trust Administrator and Trustee of Motors Liquidation Company DIP Lenders Trust, as its authorized signatory (on behalf of **MOTORS LIQUIDATION COMPANY,** formerly known as General Motors Corporation, a dissolved Delaware corporation, "MLC"), having a tax mailing address at 2010 Cedar Springs Road, Suite 1100, Dallas, TX 75201, Attention: Bryan Porter, hereinafter called "GRANTOR", and **RACER PROPERTIES LLC**, a Delaware limited liability company, having a tax mailing address at 500 Woodward Avenue, Suite 1510, Detroit, MI 48226, Attention: Rick Zablocki, hereinafter called "GRANTEE", for and in consideration of, the sum of One ($1.00) Dollar, received to its full satisfaction, does hereby **quitclaim, release, convey and grant** unto GRANTEE, in fee simple, any and all right, title and interest, if any, GRANTOR may possess in and to the following described real estate located in the above-referenced County, and State of Michigan, and being more particularly described to-wit (the "Property"):

SEE ATTACHED "EXHIBIT A" incorporated herein. OK - LG

MLC # 1116 (Fiero Powerhouse)

US_ACTIVE:\44337346\3\64323.0004

together with all right, title and interest of Grantor, if any, in and to the following (collectively, with the Property, herein referred to as the "Premises"): (a) all buildings, structures, fixtures, additions and other improvements of every kind and nature, located in, on, at, under, or affixed to, the Property, including without limitation, all roofs, building systems and paved parking areas (no matter how affixed to the Property) (collectively, the "Improvements"); (b) all easements, rights-of-way, strips and gores of land, streets, ways, alleys, passages, sewer rights, water, wells, water courses, minerals, oil and gas, mining rights, drilling rights, water rights, ditches, reservoirs, air rights and development rights, lateral supports, foundations and drainage, and all and singular tenements, hereditaments, appurtenances, estates, rights, interests, reversions and remainders of any nature whatsoever located on, at, under, above or below the surface of, or belonging or appertaining to, the Property or Improvements, if any (collectively, the "Appurtenances"); (c) all personalty related to the Property, including without limitation, all fixtures, improvements and equipment located thereon as of the date hereof; and (d) all permits, licenses, consents and other regulatory approvals related to the Property to the extent permitted by law.

GRANTOR is transferring and conveying its right, title and interest, if any, in and to the Premises, in its "as is" and "where is" condition.

On June 1, 2009, MLC filed a voluntary petition for relief under Chapter 11 of title 11 of the United States Code (the "Bankruptcy Code") in the United States Bankruptcy Court for the Southern District of New York (the "Bankruptcy Court"). MLC's Chapter 11 case was jointly administered with the Chapter 11 cases of certain of its affiliates under Case No. 09-50026 (REG) (the "Case"). This Correction Quitclaim Deed is made pursuant to that certain Debtors' Amended Joint Chapter 11 Plan, dated December 7, 2010 and filed with the Bankruptcy Court in connection with the Case (as transmitted to parties in interest, such Plan being referred to as the "Amended Plan"; and as subsequently modified and amended, the "Plan"), and that certain Findings of Fact, Conclusions of Law, and Order Pursuant to Sections 1129(a) and (b) of the Bankruptcy Code and Rule 3020 of the Federal Rules of Bankruptcy Procedure Confirming Debtors' Second Amended Joint Chapter 11 Plan, dated March 29, 2011, issued by the Bankruptcy Court approving the Plan (the "Confirmation Order"), free and clear of all liens, claims, and encumbrances, provided that this Quitclaim Deed and the Premises are expressly subject to any statutory liens for property taxes and ad valorem taxes not yet due and payable and all liens, claims, or security interests of the Lenders under that certain $1,175,000,000 Amended and Restated Secured Superpriority Debtor-in-Possession Credit Agreement dated as of July 10, 2009 (as amended from time to time, the "DIP Credit Agreement") by and among MLC, the Guarantors named therein, and the Lenders party thereto from time to time, including without limitation, the mortgages and assignments of leases and rents described on the attached "Exhibit B" incorporated herein (including without limitation, any mortgage, deed of trust, deed to secure debt or other similar lien in favor of the Lenders under the DIP Credit Agreement), and any Order of the Bankruptcy Court approving the DIP Credit Agreement (collectively, the "Excepted Liens"), but subject to any obligations imposed by the Plan and all holders of any liens, claims and encumbrances (other than holders of Excepted Liens) are directed by the Bankruptcy Court to remove and release their respective liens, claims and encumbrances from and against the Premises immediately subsequent to the "Effective Date" (as defined in the Plan).

US_ACTIVE:\44337346\3\64323.0004

MLC was dissolved as of December 15, 2011. Pursuant to that certain Stipulation and Agreed Order Between Motors Liquidation Company and Certain Affiliated Debtors and Revitalizing Auto Communities Environmental Response Trust Approving the Appointment of a Trustee to Complete the Transfer of Assets Post-Dissolution, approved by the Bankruptcy Court January 4, 2012, copy of which is attached hereto as Exhibit C, AP Services, LLC, acting solely in its capacity as trust administrator and trustee of the Motors Liquidation Company DIP Lenders Trust, is authorized and empowered by the Bankruptcy Court to serve as the trustee for, and authorized signatory on behalf of, MLC in order to complete the transfer of the Property and execute and deliver this Correction Quitclaim Deed.

This Correction Quitclaim Deed shall be governed by, and construed in accordance with, the laws of the State of Michigan.

The Property may be located within the vicinity of farmland or a farm operation. Generally accepted agricultural and management practices which may generate noise, dust, odors, and other associated conditions may be used and are protected by the Michigan Right to Farm Act.

GRANTOR further grants to GRANTEE the right to make all divisions under Section 108 of the Land Division Act, Act No 288 of the Public Acts of 1967, as amended.

Pursuant to the Confirmation Order and Section 1146(a) of the Bankruptcy Code, the Bankruptcy Court has ordered the conveyance of the Premises in furtherance of and in connection with the Plan, and this Correction Quitclaim Deed is therefore exempt from any and all stamp, real estate transfer, mortgage recording, sales, use or other similar tax.

This Correction Quitclaim Deed may be executed in any number of counterparts, and all counterparts so executed shall constitute one Correction Quitclaim Deed, binding upon all of the parties hereto, notwithstanding that all the parties are not signatory to the original or same counterpart.

This Correction Quitclaim Deed is made as a deed of correction of that certain Quitclaim Deed, dated as of March 31, 2011 executed May 1, 2012, from Grantor to Grantee recorded on May 11, 2012 in Liber 44177, Page 247, of the Office of the Register of Deeds of Oakland County, Michigan (herein referred to as the "**Original Deed**"), to correct the legal description attached as Exhibit A to the Original Deed. In all other respects except as indicated herein, the Original Deed is hereby confirmed and ratified.

UNITED STATES BANKRUPTCY COURT
SOUTHERN DISTRICT OF NEW YORK

In re	:	**Chapter 11 Case No.**
MOTORS LIQUIDATION COMPANY, *et al.*, f/k/a General Motors Corp., *et al.*	:	**09-50026 (REG)**
Debtors.	:	**(Jointly Administered)**

STIPULATION AND AGREED ORDER BETWEEN MOTORS LIQUIDATION COMPANY AND CERTAIN AFFILIATED DEBTORS AND THE REVITALIZING AUTO COMMUNITIES ENVIRONMENTAL RESPONSE TRUST APPROVING THE APPOINTMENT OF A TRUSTEE TO COMPLETE THE TRANSFER OF ASSETS POST- DISSOLUTION

Motors Liquidation Company ("MLC") (f/k/a General Motors Corporation) and Remediation and Liability Management Company, Inc. ("REALM") (each of MLC and REALM being a "Debtor"; and collectively, the "Debtors"), and the Revitalizing Auto Communities Environmental Response Trust ("Trust," and together with the Debtors, the "Parties"), each by their undersigned counsel, respectfully submit this Stipulation and Agreed Order Between Motors Liquidation Company and Certain Affiliated Debtors and the Revitalizing Auto Communities Environmental Response Trust Approving the Appointment of a Trustee to Complete the Transfer of Assets Post-Dissolution (the "Stipulation") and state:

RECITALS

WHEREAS, on June 1, 2009, MLC and certain of its affiliated debtors, as debtors in possession (collectively, the "Initial Debtors"), commenced voluntary cases under Chapter 11 of title 11 of the United States Code (the "Bankruptcy Code") before the United States Bankruptcy

Court for the Southern District of New York (the "Court"), Case No. 09-50026 (REG)(the "Case");

WHEREAS, on October 9, 2009, REALM commenced a voluntary case under chapter 11 of the Bankruptcy Code, which cases are being jointly administered with those of the Initial Debtors;

WHEREAS, on March 29, 2011, the Court entered an order (the "Confirmation Order") confirming Debtors' Second Amended Joint Chapter 11 Plan (the "Plan");

WHEREAS, on March 31, 2011, the Plan became effective as of that date;

WHEREAS, the Debtors' Plan provided for the creation of an "Environmental Response Trust" pursuant to that certain Environmental Response Trust Agreement (the "Trust Agreement"), which was defined in and incorporated into the Environmental Response Trust Consent Decree and Settlement Agreement (the "Settlement Agreement"), both of which were approved by the Court in the Confirmation Order;

WHEREAS, the "Environmental Response Trust" created by the Plan is the Trust; and

WHEREAS, the Settlement Agreement (at paragraph 30 and elsewhere) and the Plan (at section 5.2 and elsewhere) required the Debtors to transfer, assign and deliver to the Trust all of their respective right, title and interest in and to the former General Motors properties described in the Settlement Agreement as "Properties" and listed on Attachment A to the Settlement Agreement, together with any of the Debtors' interests in any other assets included in the "Environmental Response Trust Assets" (as defined in the Plan), if any, except for the "Shortfall Amount" defined in, and which is the subject of, that certain *Stipulation and Order Regarding Motion of Revitalizing Auto Communities Environmental Response Trust for an Order Enforcing Debtors' Payment Obligations Under Second Amended Joint Chapter 11 Plan and Confirmation*

Order, filed with and entered by the Court in the Case on December 12, 2011 as Docket. #11228 (09-50026) (collectively, the "RACER Assets");

WHEREAS, certain states do not permit a trust to take title to real property, and as a result, the Trust formed a wholly-owned subsidiary, RACER Properties LLC (together with the Trust, "RACER"), for purposes of acquiring title to the RACER Assets in such states;

WHEREAS, some of the RACER Assets have not yet been properly transferred, assigned and delivered to RACER because, among other things, there are several outstanding issues preventing the recording of the deeds transferring such RACER Assets to RACER;

WHEREAS, as a result, the Debtors are still the record title holder of various RACER Assets or parts thereof, and the obligations of the Debtors under the Plan to transfer, assign and deliver all of the RACER Assets have not yet been discharged;

WHEREAS, section 6.10 of the Plan provides that the Debtors shall be dissolved no later than December 15, 2011 and all of the Debtors other than MLC and REALM have already been dissolved prior to the date hereof;

WHEREAS, MLC and REALM shall each file a certificate of dissolution effective as of December 15, 2011 (the "Dissolution Date"), and upon the Dissolution Date, each of MLC and REALM will be dissolved; and

NOW, THEREFORE, the Parties, by and through their undersigned counsel, do hereby agree as follows:

STIPULATION

1. AP Services, LLC ("APS"), acting solely in its capacity as trust administrator and trustee of the Motors Liquidation Company DIP Lenders Trust (the "DIP Trust"), is hereby authorized, directed, approved and empowered to, *inter alia*, serve as the trustee for, and authorized signatory on behalf of, each of the Debtors with respect to the "Required Transfers"

(as hereinafter defined) in accordance with Section 279 of Title 8 of the Delaware Corporation Law.

2. APS, acting solely in its capacity as trust administrator and trustee of the DIP Trust (the "Authorized Signatory"), is hereby authorized, directed, approved and empowered to, and shall: (a) effectuate the transfer, assignment and delivery by the Debtors to RACER of all of the Debtors' respective rights, title and interest in and to the RACER Assets, including without limitation, completing the "Mansfield Site" matters described in Section 3(b) below (collectively, the "Required Transfers"), in each case, solely to the extent that such Required Transfers have not been completed prior to the Dissolution Date; and (b) complete, execute, deliver and file any and all documents (including quitclaim deeds, transfer tax forms, assignments and related conveyance documentation) in furtherance thereof, and take such other actions, in each case on behalf of the applicable Debtor, that are required to effectuate the Required Transfers.

3. Each of the Debtors is hereby authorized and directed to, and shall, authorize, direct and empower the Authorized Signatory to:

(a) cooperate with RACER to ascertain and verify the correct metes and bounds, legal or other descriptions for any Required Transfers which have not been completed prior to the Dissolution Date; and

(b) immediately commence and proceed diligently to complete the following matters with respect to the Stamping Facility located at 2525 West Fourth Street, Mansfield, Ohio (the "Mansfield Site"), which shall be deemed to be included in the Required Transfers:

(i) cause a survey of the Mansfield Site to be performed in accordance with Richland County, OH requirements, and a new metes and bounds legal description based thereupon (the "Survey");

(ii) obtain the approval of the Richland County Tax Map Department and any other requisite governmental authorities to the Survey (the "Approvals"); and

(iii) deliver to RACER a fully-executed quitclaim deed effective as of March 31, 2011, attaching and incorporating the new corrected legal description as soon as the Approvals referred to in Paragraph 3(b)(ii) of this Stipulation are granted, together with all other transfer and related documents required to record said quitclaim deed with the appropriate Richland County authorities; and

(c) seek reimbursement from RACER with respect to the reasonable fees and expenses that the Authorized Signatory incurs in completing the Required Transfers, and any other matters specifically requested in writing by RACER or its attorneys; provided, however, such reimbursement of any professional fees that the Authorized Signatory incurs in connection with the foregoing are capped, individually and in the aggregate, at $15,000.00.

4. This Court shall retain jurisdiction to resolve any disputes or controversies arising from or related to this Stipulation.

5. This Stipulation is subject to the approval of the Court. If this Stipulation is not approved by the Court, the Stipulation shall be deemed null and void, and shall not be referred to or used for any purpose by any Party.

6. This Stipulation sets forth the entire understanding of the Parties with respect to the matters set forth herein and may not be modified or amended except by a writing signed by the Parties and/or their counsel, and approved by the Court.

7. The Parties represent and warrant to each other that the signatories to this Stipulation have full power and authority to enter into this Stipulation to bind the Parties.

8. This Stipulation may be executed in counterparts, each of which shall be deemed an original but all of which together shall constitute one and the same instrument, and it shall constitute sufficient proof of this Stipulation to present any copies or facsimiles signed by the Parties to be charged.

[Remainder of Page Intentionally Left Blank]

The foregoing has been stipulated and agreed by the following parties.

MOTORS LIQUIDATION COMPANY, for itself, and its wholly-owned direct subsidiary, and Remediation and Liability Management Company, Inc.

SCHEDULE B - PART II

(Exceptions)

If a Policy of Policies are requested, Schedule B of the policy or policies to be issued will contain exceptions to the following matters unless the same are disposed of to the satisfaction of the Company:

1. Any defect, lien, encumbrance, adverse claim, or other matter that appears for the first time in the Public Records or is created, attaches, or is disclosed between the Commitment Date and the date on which all of the Schedule B, Part I - Requirements are met.

2. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land.

3. Rights or claims of parties in possession not shown by the Public Records.

4. Easements or claims of easements not shown by the Public Records.

5. Any lien or rights to lien for services, labor or material, heretofore or hereafter furnished, imposed by law and not shown by the Public Records.

6. Taxes and assessments that have become a lien against the property but are not yet due and payable. The Company assumes no liability for tax increases occasioned by retroactive revaluation, changes in the land usage or loss of any exemption status for the insured premises.

7. Reversionary Rights contained in Quit Claim Deed recorded March 23, 1939 in Liber 1172, Page 9.

8. Right of Way granted to the City of Pontiac for sewers recorded November 9, 1942 in Liber 1459, Page 492.

9. Agreement between General Motors Corporation and the City of Pontiac and the terms, conditions, and provisions therein, dated July 2, 1947, recorded August 25, 1947 in Liber 2142, Page 1.

10. Resolutions vacating Streets and alleys lying within Civic Improvement Company's Marquette Subdivision as recorded in Liber 4931, Page 809; Liber 4931, Page 810; Liber 1452, Page 562; Liber 4071, Page 127; Liber 2142, Page 9 and reservations of public utilities as contained therein.

11. Easement Agreement and the terms, conditions, and provisions therein, between Grand Trunk Western Railroad Company and General Motors Corporation, recorded April 13, 1967 in Liber 5013, Page 848.

12. Lease by and between General Motors Corporation, a Delaware corporation ("Landlord"), and General Motors Company, a Delaware corporation ("Tenant"), evidenced of record by Memorandum of Lease dated July 10, 2009 and recorded August 6, 2009 in Liber 41392, Page 439. (also covers other land)

13. UCC Financing Statement between U.S. Bank National Association, as Owner Trustee, as Debtor, and Wells Fargo Bank Northwest, National Association, as Indenture Trustee, as Secured Party, recorded May 21, 2010 in Liber 42088, Page 631. Continuation recorded March 6, 2020 in Liber 53915, Page 659. (also covers other land)

14. UCC Financing Statement between General Motors LLC, as Debtor, and Wells Fargo Bank Northwest, National Association, as Indenture Trustee, as Secured Party, recorded May 21, 2010 in Liber 42088, Page 651. Continuation recorded March 6, 2020 in Liber 53915, Page 671. UCC Financing Statement Amendment recorded May 15, 2020 in Liber 54215, Page 647. (also covers other land)

15. UCC Financing Statement between General Motors LLC, as Debtor, and U.S. Bank National Association, as Owner Trustee, as Secured Party, recorded May 21, 2010 in Liber 42088, Page 670. Continuation recorded March 6, 2020 in Liber 53915, Page 683. (Also covers other land)

16. Environmental Easement Agreement and the terms, conditions and provisions therein, between Racer Properties LLC and Revitalizing Auto Communities Environmental Response Trust, recorded November 7, 2017 in Liber 51261, Page 809.

17. Private Utilities Easement Agreement and the terms, conditions and provisions therein, between Racer Properties LLC and Proastio Properties, LLC, recorded December 4, 2017 in Liber 51345, Page 839.

18. Rights of the public and any governmental unit in any part of the land taken, deeded or used for street, road or highway purposes.

19. Rights-of-way for railroad, switch tracks, spur tracks, railway facilities and other related easements, if any, on and across the land.

20. Rights, if any, of the United states government, the State of Michigan, any other governmental entity, riparian owners, the public or private persons existing in or with respect to the present and past bed, banks, bottomland and waters of drains crossing subject property.

21. Rights of tenants now in possession of the land under unrecorded leases or otherwise.

22. Easements, restrictions and set back lines, as shown on the recorded plat.

23. Notice: Please be aware that due to the conflict between federal and state laws concerning the cultivation, distribution, manufacture or sale of marijuana, the Company is not able to close or insure any transaction involving Land that is associated with these activities.

24. Any rights, interests or claim that may arise pursuant to the Perishable Agricultural Commodities Act of 1930, as amended, 7 USC §499a et seq., the Packers and Stockyard Act of 1921, as amended, 7 USC §181 et seq., or similar state laws.

25. Interest of others in oil, gas and mineral rights, if any, whether or not recorded in the Public Records.

26. Interest, if any of the United States, State of Michigan, or any political subdivision thereof, in the oil, gas and minerals in and under and that may be produced from the captioned Land.

NOTE: Any map/plat that is furnished is only an aid in locating the herein described Land in relation to adjoining streets, natural boundaries and other land, and is not a survey of the land depicted. Except to the extent a policy of title insurance is expressly modified by endorsement, if any, the Company does not insure dimensions, distances, location of easements, acreage or other matters shown thereon.

NOTE: This report and any policy issued pursuant hereto omits any covenant, condition or restriction based on race, color, religion, age, sex, handicap, familial status or national origin, unless and only to the extent that the restriction is not in violation of state or federal law, or relates to a handicap, but does not discriminate against handicapped people.

MAP INFORMATION

The soil surveys that comprise your AOI were mapped at 1:15,800.

Warning: Soil Map may not be valid at this scale.

Enlargement of maps beyond the scale of mapping can cause misunderstanding of the detail of mapping and accuracy of soil line placement. The maps do not show the small areas of contrasting soils that could have been shown at a more detailed scale.

Please rely on the bar scale on each map sheet for map measurements.

Source of Map: Natural Resources Conservation Service
Web Soil Survey URL:
Coordinate System: Web Mercator (EPSG:3857)

Maps from the Web Soil Survey are based on the Web Mercator projection, which preserves direction and shape but distorts distance and area. A projection that preserves area, such as the Albers equal-area conic projection, should be used if more accurate calculations of distance or area are required.

This product is generated from the USDA-NRCS certified data as of the version date(s) listed below.

Soil Survey Area: Oakland County, Michigan
Survey Area Data: Version 24, Sep 4, 2025

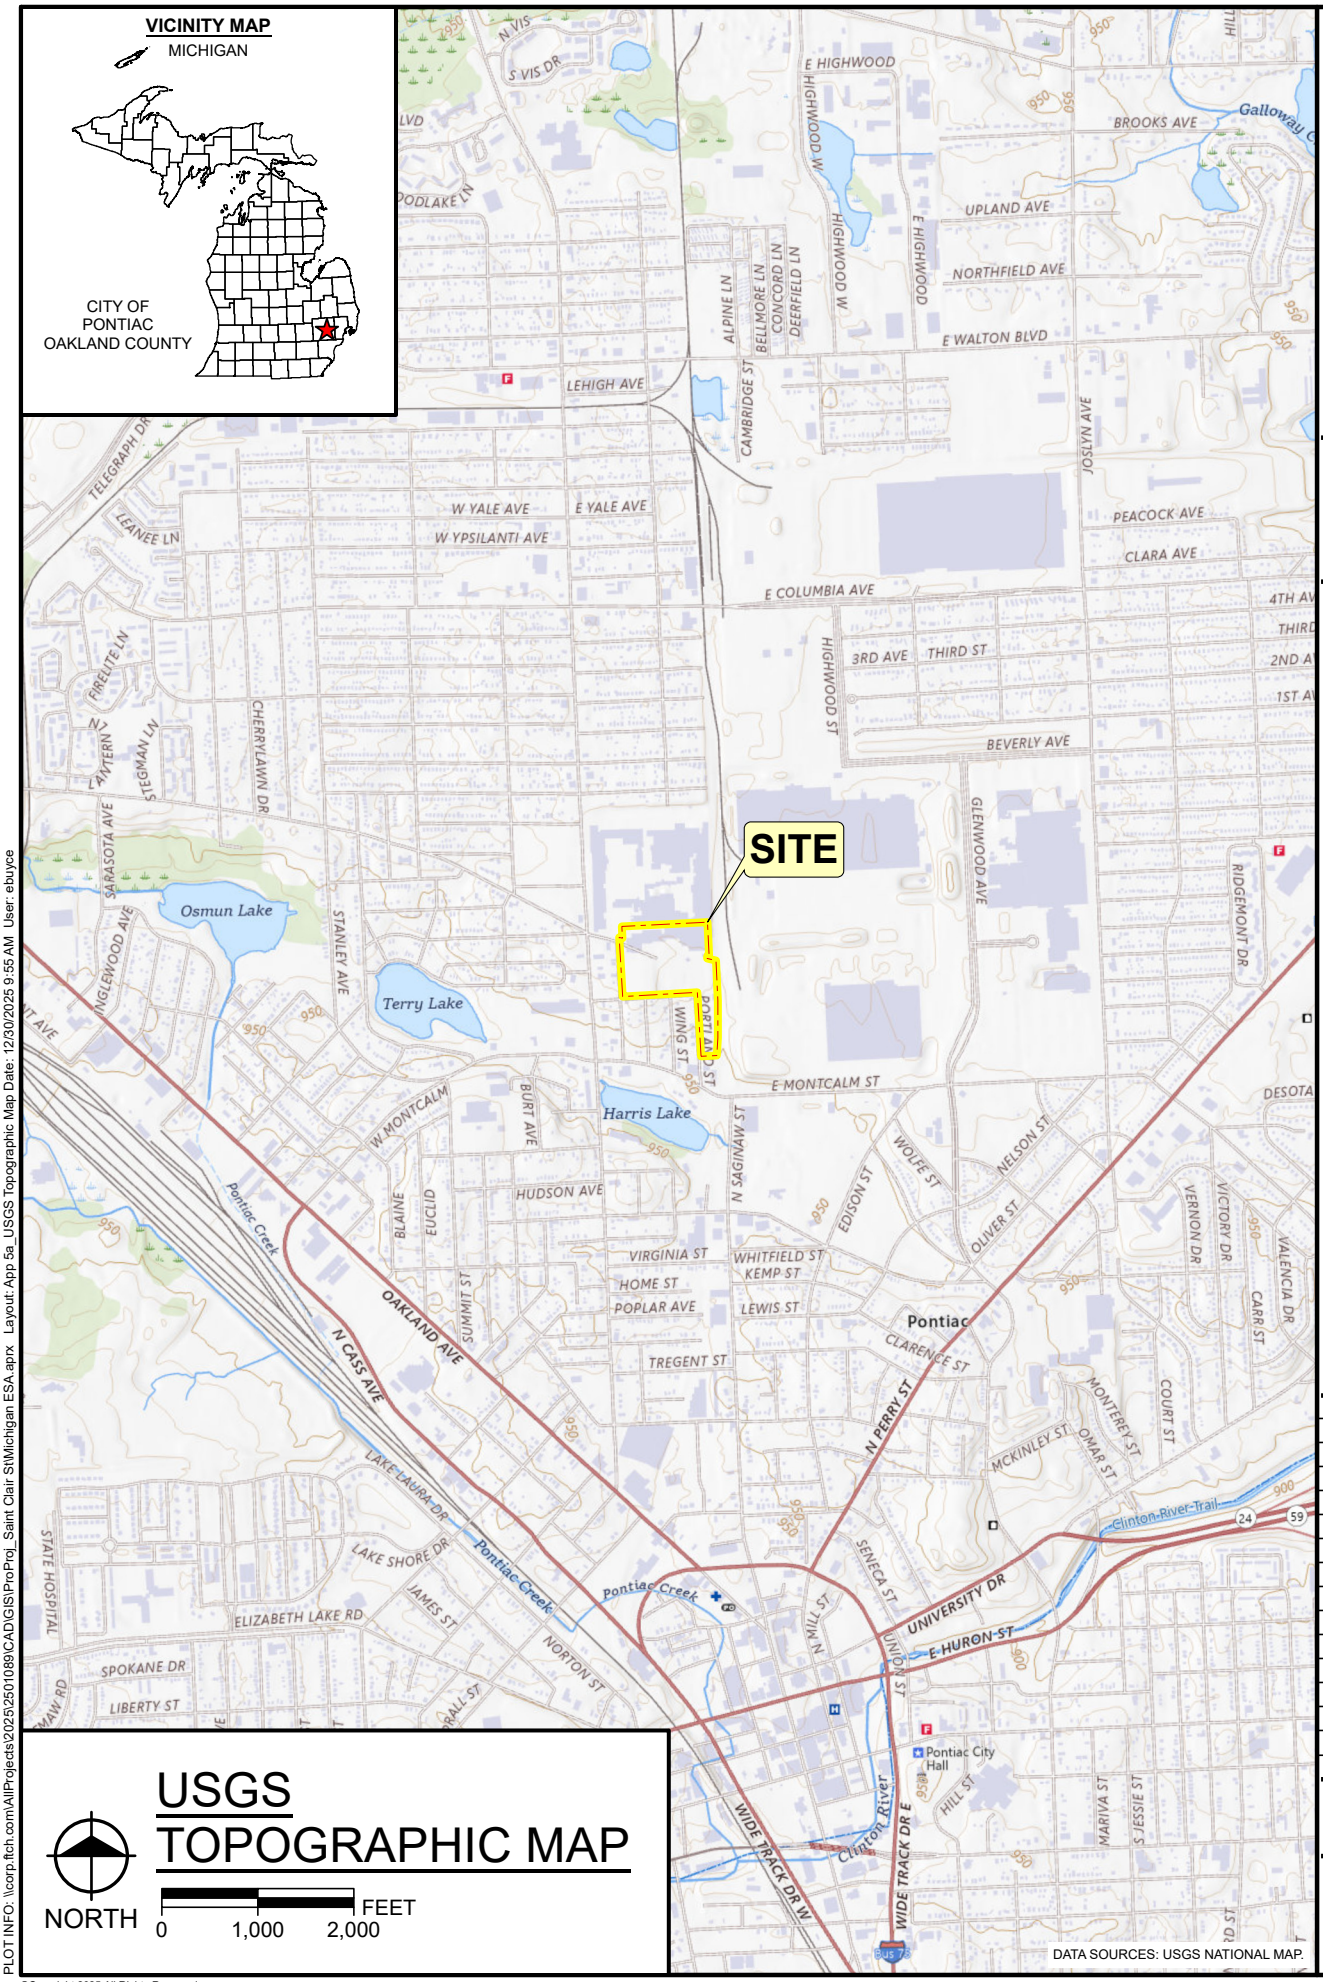

Soil map units are labeled (as space allows) for map scales 1:50,000 or larger.

Date(s) aerial images were photographed: Oct 9, 2022—Oct 21, 2022

The orthophoto or other base map on which the soil lines were compiled and digitized probably differs from the background imagery displayed on these maps. As a result, some minor shifting of map unit boundaries may be evident.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Historical Topo Map Report

10/15/25

Site Name:	Client Name:
824 Saint Clair Street	Fishbeck
824 Saint Clair Street	1515 Arboretum Drive SE
Pontiac, MI 48340	Grand Rapids, MI 49546
EDR Inquiry # 8140451.4	Contact: Solomon Boisvert

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Fishbeck were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:

P.O.# 2501089.09

Project: 2501089.09

Coordinates:

Latitude:	42.659648 42° 39' 35" North
Longitude:	-83.296664 -83° 17' 48" West
UTM Zone:	Zone 17 North
UTM X Meters:	311768.60
UTM Y Meters:	4725577.58
Elevation:	970.00' above sea level

Maps Provided:

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Fishbeck were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Sanborn® Library search results

Certification #: CBD1-4F60-AC16

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Fishbeck (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 06/26/2025 has revealed that there are 2 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/02/2025 has revealed that there are 5 CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 06/02/2025 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/02/2025 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/02/2025 has revealed that there is 1

RCRA-VSQG site within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

MI PART 201: A Part 201 Listed site is a location that has been evaluated and scored by the DEQ using the Part 201 scoring model. The location is or includes a "facility" as defined by Part 201, where there has been a release of a hazardous substance(s) in excess of the Part 201 residential criteria, and/or where corrective actions have not been completed under Part 201 to meet the applicable cleanup criteria for unrestricted residential use. The Part 201 List does not include all of the sites of contamination that are subject to regulation under Part 201 because owners are not required to inform the DEQ about the sites and can pursue cleanup independently. Sites of environmental contamination that are not known to DEQ are not on the list, nor are sites with releases that resulted in low environmental impact.

A review of the MI PART 201 list, as provided by EDR, and dated 07/14/2025 has revealed that there are 27 MI PART 201 sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Facility ID: 63005966

MI INVENTORY: The Inventory of Facilities has three data sources: Facilities under Part 201, Environmental Remediation, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA) identified through state funded or private party response activities (Projects); Facilities under Part 213, Leaking Underground Storage Tanks of the NREPA; and Facilities identified through submittals of Baseline Environmental Assessments (BEA) submitted pursuant to Part 201 or Part 213 of the NREPA. The Part 201 Projects Inventory does not include all of the facilities that are subject to regulation under Part 201 because owners are not required to inform the Department of Environmental Quality (DEQ) about the facilities and can pursue cleanup independently. Facilities that are not known to DEQ are not on the Inventory, nor are locations with releases that resulted in low environmental impact. Part 213 facilities listed here may have more than one release; a list of releases for which corrective actions have been completed and list of releases for which corrective action has not been completed is located on the Leaking Underground Storage Tanks Site Search webpage. The DEQ may or may not have reviewed and concurred with the conclusion that the corrective actions described in a closure report meets criteria. A BEA is a document that new or prospective property owners/operations disclose to the DEQ identifying the property as a facility pursuant to Part 201 and Part 213. The Inventory of BEA Facilities overlaps in part with the Part 201 Projects facilities and Part 213 facilities. There may be more than one BEA for each facility.

A review of the MI INVENTORY list, as provided by EDR, and dated 07/14/2025 has revealed that there are 17 MI INVENTORY sites within approximately 0.5 miles of the target property.

MI DEL PART 201: A deleted site has been removed from the Part 201 List because information known to the DEQ at the time of the evaluation does not support inclusion on the Part 201 List. This designation is often applied to sites where changes in cleanup criteria resulted in a determination that the site no longer exceeds any applicable cleanup criterion. A delisted site has been removed from the Part 201 List because response actions have reduced the levels of contaminants to concentrations which meet or are below the criteria for unrestricted residential use.

A review of the MI DEL PART 201 list, as provided by EDR, and dated 07/14/2025 has revealed that there is 1 MI DEL PART 201 site within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/02/2025 has revealed that there are 5 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EPA ID:: MID985659499

2020 COR ACTION: The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

A review of the 2020 COR ACTION list, as provided by EDR, and dated 09/30/2017 has revealed that there is 1 2020 COR ACTION site within approximately 0.25 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 5 UST FINDER sites within approximately 0.25 miles of the target property.

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 9 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 06/02/2025 has revealed that there are 3 E MANIFEST sites within approximately 0.25 miles of the target property.

MI BEA: A BEA is a document that new or prospective property owners/operations disclose to the DEQ identifying the property as a facility pursuant to Part 201 and Part 213. The Inventory of BEA Facilities overlaps in part with the Part 201 Projects facilities and Part 213 facilities. There may be more than one BEA for each facility.

A review of the MI BEA list, as provided by EDR, and dated 05/08/2025 has revealed that there are 10 MI BEA sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

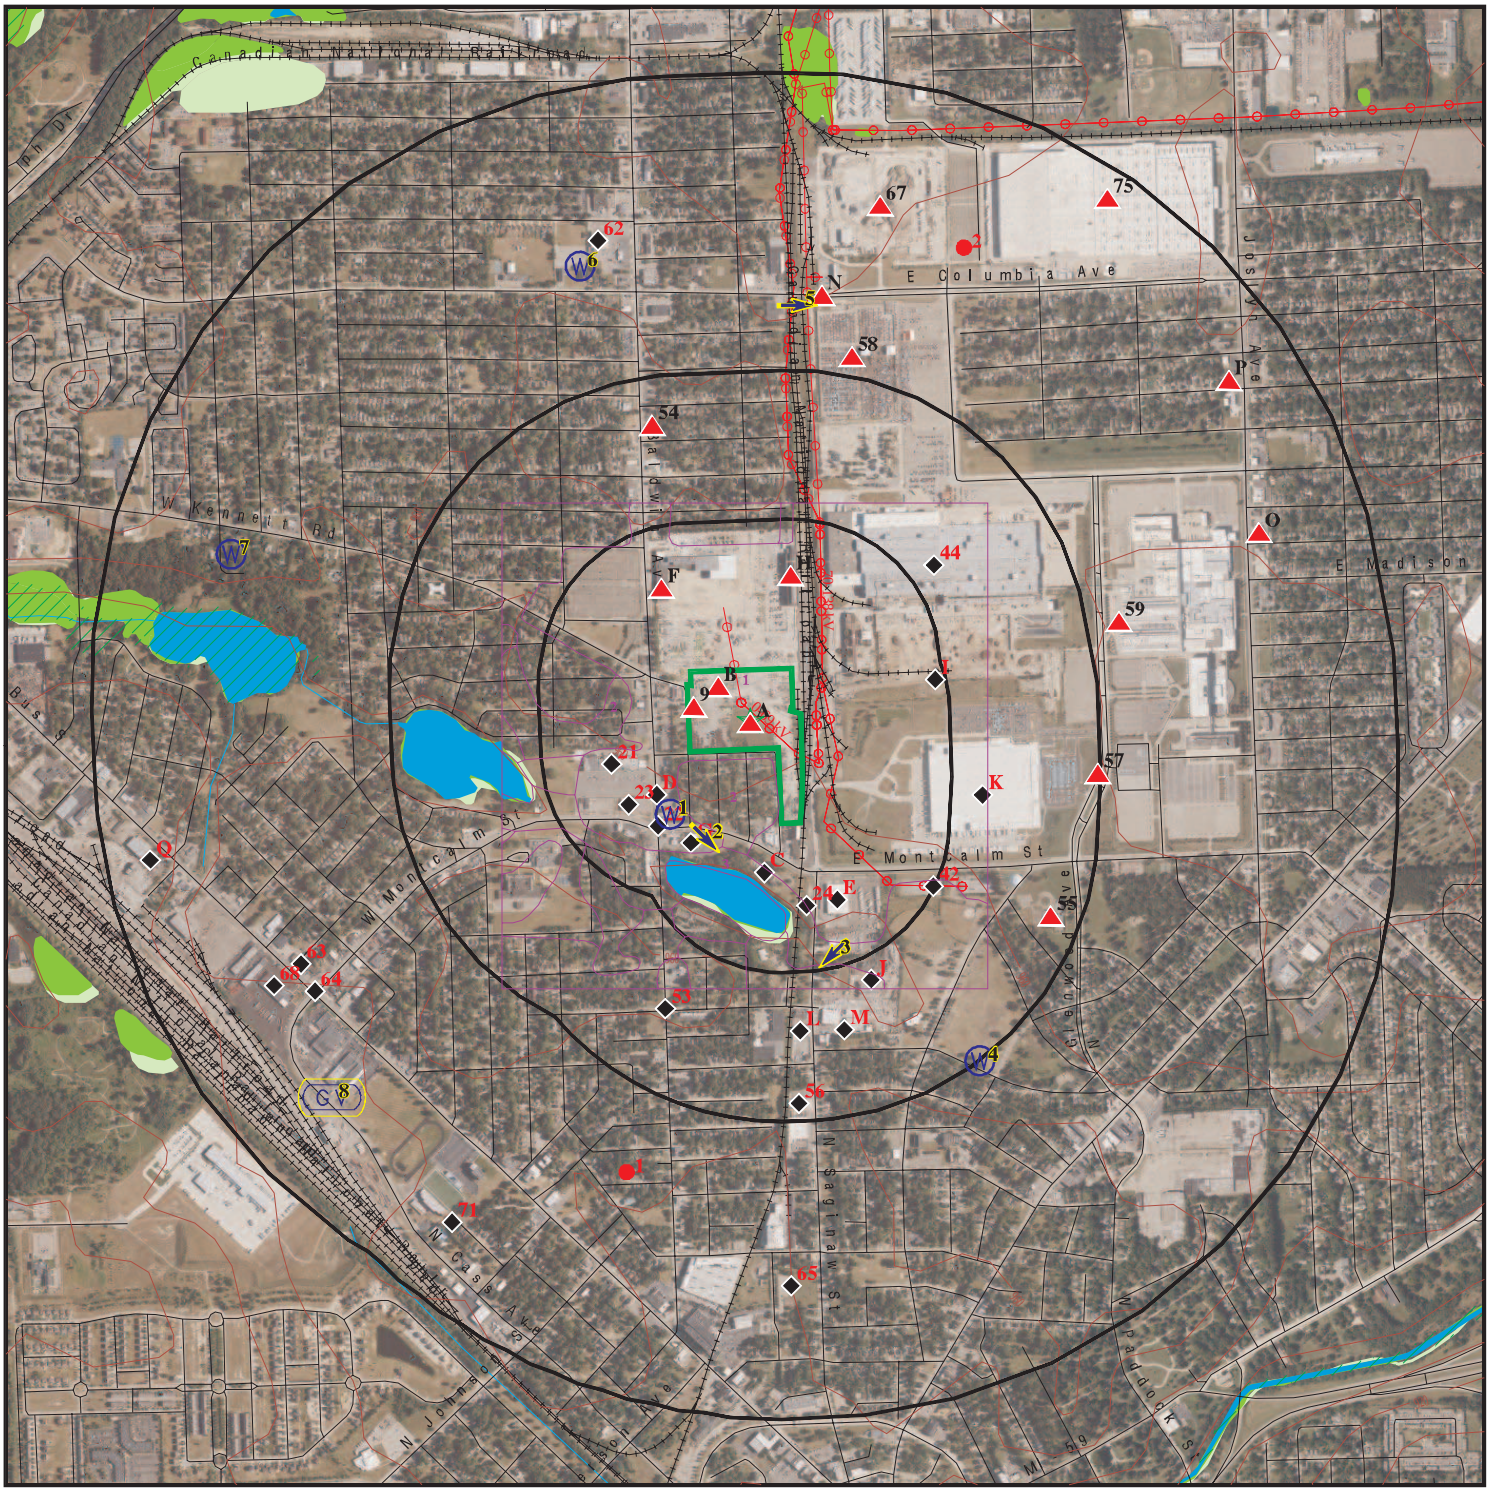

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:
The Clean Air Markets Division Business System (CAMDBS) supports the implementation of market-based air pollution control programs administered by the EPA Clean Air Markets Division, within the Office of Air and Radiation. Programs include the Acid Rain Program and regional programs designed to reduce the transport of ozone.
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

B8 Target Property **RACER FIERO POWERHOUSE** **FINDS** **1024032016**
824 ST. CLAIR STREET **ECHO** **N/A**
PONTIAC, MI 48340

Site 3 of 3 in cluster B

Actual: 970 ft.

FINDS:
Registry ID: 110070155107

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Comments:	Category B2 The assembly plant was constructed in 1922, and closed in 1991. Past operation of the plant, including use of ASTs/USTs, chemicals, and hazardous materials at the site, was considered a REC. A 2013 Phase I ESA was referenced, as were previous subsurface investigations identifying exceedances of Part 201 GRCC in soil and shallow groundwater. Previous site evaluations included groundwater monitoring at the Pontiac North Campus (south of the site), and RCRA facility investigation

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D004
Waste Description:	Arsenic
Waste Code:	D005
Waste Description:	Barium
Waste Code:	D007
Waste Description:	Chromium
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D009
Waste Description:	Mercury
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	D022
Waste Description:	Chloroform
Waste Code:	D035
Waste Description:	Methyl Ethyl Ketone
Waste Code:	D039
Waste Description:	Tetrachloroethylene
Waste Code:	D040
Waste Description:	Trichloroethylene
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent

GENERAL MOTORS, LLC - PONTIAC METAL CENT (Continued) **1024363817**

Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: P042
Waste Description: 1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine

Waste Code: U154
Waste Description: Methanol (I) (Or) Methyl Alcohol (I)

Waste Code: U188
Waste Description: Phenol

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D004
Waste Description: Arsenic

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D009
Waste Description: Mercury

Waste Code: D010
Waste Description: Selenium

Waste Code: D011
Waste Description: Silver

Waste Code: D016
Waste Description: 2,4-D (2,4-Dichlorophenoxyacetic Acid)

Waste Code: D018
Waste Description: Benzene

Waste Code: D019
Waste Description: Carbon Tetrachloride

Waste Code: D021
Waste Description: Chlorobenzene

Waste Code: D028
Waste Description: 1,2-Dichloroethane

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

GENERAL MOTORS LLC (Continued) **1012180529**

Waste Code: D040
Waste Description: Trichloroethylene

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F009
Waste Description: Spent Stripping And Cleaning Bath Solutions From Electroplating Operations In Which Cyanides Are Used In The Process.

Waste Code: P042
Waste Description: 1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine

Waste Code: P076
Waste Description: Nitric Oxide (Or) Nitrogen Oxide No

Waste Code: P078

GENERAL MOTORS LLC (Continued) **1012180529**

Waste Description: Nitrogen Dioxide (Or) Nitrogen Oxide No2

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U003
Waste Description: Acetonitrile (I,T)

Waste Code: U080
Waste Description: Methane, Dichloro- (Or) Methylene Chloride

Waste Code: U134
Waste Description: Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)

Waste Code: U162
Waste Description: 2-Propenoic Acid, 2-Methyl-, Methyl Ester (I,T) (Or) Methyl Methacrylate (I,T)

Waste Code: U182
Waste Description: 1,3,5-Trioxane, 2,4,6-Trimethyl- (Or) Paraldehyde

Waste Code: U213
Waste Description: Furan, Tetrahydro-(I) (Or) Tetrahydrofuran (I)

Waste Code: U228
Waste Description: Ethene, Trichloro- (Or) Trichloroethylene

Hazardous Waste Summary:

Waste Code:	D001
Waste Description:	Ignitable Waste
Waste Code:	D002
Waste Description:	Corrosive Waste
Waste Code:	D005
Waste Description:	Barium
Waste Code:	D007
Waste Description:	Chromium
Waste Code:	D008
Waste Description:	Lead
Waste Code:	D018
Waste Description:	Benzene
Waste Code:	F003
Waste Description:	The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	F005
Waste Description:	The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.
Waste Code:	P042
Waste Description:	1,2-Benzenediol, 4-[1-Hydroxy-2-(Methylamino)Ethyl]-, (R)- (Or) Epinephrine
Waste Code:	P081
Waste Description:	1,2,3-Propanetriol, Trinitrate (R) (Or) Nitroglycerine (R)
Waste Code:	U226
Waste Description:	Ethane, 1,1,1-Trichloro- (Or) Methyl Chloroform

Comments:	BEA Report submitted on CD. Site is and will continue to be operated as a liquor store. RECs: The site had a 600-gallon heating oil UST closed in place. Surrounding properties have historicaly been used as automotive businesses including a scrap yard. Site evaluation identified SVOCs (2-methylnaphthalene, naphthalene, phenanthrene) in soil above residential GSI protection criteria.

Comments:	Records Manager: Box 210 To Lansing for scanning on 5/26/16 Telephone call to Ron Borngesser, represenative of owner. Asked if he had discussed the direct contact exceedance reported in the BEA with his consultant. He had, and they do not use this part of the property currently for recreational use. A building is planned for this part of the property. Advised him they have Due Care responsibilities for the property to use the property in such a way to prevent unacceptable

Comments:	BEA Report submitted on CD. Category A2. The property is a closed LUST site (closed 1985). Soil: TEQ, lead, and 2,3,7,8-TCDD above direct contact. Groundwater: VOCs exceeded multiple cleanup criteria, also Barium and PCBs above drinking water and GSI. LNAPL was identified in 2011 and 2014, and is shown on BEA figure. NOTE: BEA indicates reports that NFA was processed, but site does not exist under BEA address or apparently related Pontiac GM plant.

FINDS:

GENERAL MOTORS LLC (Continued) **1012180785**

Registry ID: 110008447519

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

INVENTORY: Inventory of Facilities

The Inventory of Facilities has three data sources: Facilities under Part 201, Environmental Remediation, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA) identified through state funded or private party response activities (Projects); Facilities under Part 213, Leaking Underground Storage Tanks of the NREPA; and Facilities identified through submittals of Baseline Environmental Assessments (BEA) submitted pursuant to Part 201 or Part 213 of the NREPA. The Part 201 Projects Inventory does not include all of the facilities that are subject to regulation under Part 201 because owners are not required to inform the Department of Environmental Quality (DEQ) about the facilities and can pursue cleanup independently. Facilities that are not known to DEQ are not on the Inventory, nor are locations with releases that resulted in low environmental impact. Part 213 facilities listed here may have more than one release; a list of releases for which corrective actions have been completed and list of releases for which corrective action has not been completed is located on the Leaking Underground Storage Tanks Site Search webpage. The DEQ may or may not have reviewed and concurred with the conclusion that the corrective actions described in a closure report meets criteria. A BEA is a document that new or prospective property owners/operations disclose to the DEQ identifying the property as a facility pursuant to Part 201 and Part 213. The Inventory of BEA Facilities overlaps in part with the Part 201 Projects facilities and Part 213 facilities. There may be more than one BEA for each facility.

PART 201: Part 201 Site List

A Part 201 Listed site is a location that has been evaluated and scored by the DEQ using the Part 201 scoring model. The location is or includes a "facility" as defined by Part 201, where there has been a release of a hazardous substance(s) in excess of the Part 201 residential criteria, and/or where corrective actions have not been completed under Part 201 to meet the applicable cleanup criteria for unrestricted residential use. The Part 201 List does not include all of the sites of contamination that are subject to regulation under Part 201 because owners are not required to inform the DEQ about the sites and can pursue cleanup independently. Sites of environmental contamination that are not known to DEQ are not on the list, nor are sites with releases that resulted in low environmental impact.

DEL PART 201: Delisted List of Contaminated Sites

A deleted site has been removed from the Part 201 List because information known to the DEQ at the time of the evaluation does not support inclusion on the Part 201 List. This designation is often applied to sites where changes in cleanup criteria resulted in a determination that the site no longer exceeds any applicable cleanup criterion. A delisted site has been removed from the Part 201 List because response actions have reduced the levels of contaminants to concentrations which meet or are below the criteria for unrestricted residential use.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS PROJECT: NORTHEASTERN UNIVERSITY PFAS PROJECT

The PFAS Contamination Site Tracker records qualitative and quantitative data from each site in a chart, specifically examining discovery, contamination levels, government response, litigation, health impacts, media coverage, and community characteristics. All data presented in the chart were extracted from government websites, such as state health departments or the Environmental Protection Agency, and news articles.

PFAS ECHO: Facilities in Industries that May Be Handling PFAS Listing

Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

AQUEOUS FOAM NRC: Aqueous Foam Related Incidents Listing

The National Response Center (NRC) serves as an emergency call center that fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. The spreadsheets posted to the NRC website contain initial incident data that has not been validated or investigated by a federal/state response agency. Response center calls from 1990 to the most recent complete calendar year where there was indication of Aqueous Film Forming Foam (AFFF) usage are included in this dataset. NRC calls may reference AFFF usage in the ?Material Involved? or ?Incident Description? fields.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UST FINDER: UST Finder Database

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

PFAS: PFAS Contaminated Sites Listing

PFAS have been widely used in numerous industrial and residential applications since the 1950a??s. Their stability and unique chemical properties produce waterproof, stain resistant, and nonstick qualities in products. They are found in some firefighting foams and a wide range of consumer products such as carpet treatments, non-stick cookware, water-resistant fabrics, food packaging materials, and personal care products.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Elevation:	970 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	14468161 PONTIAC NORTH, MI
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

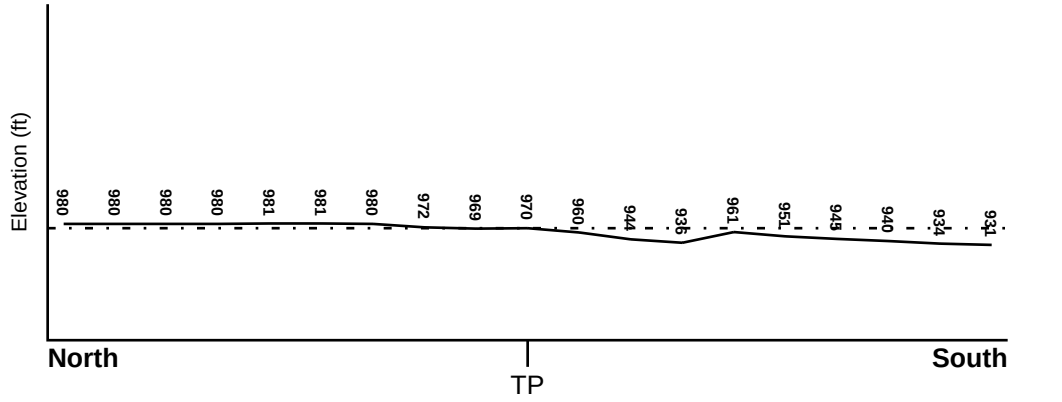

TOPOGRAPHIC INFORMATION

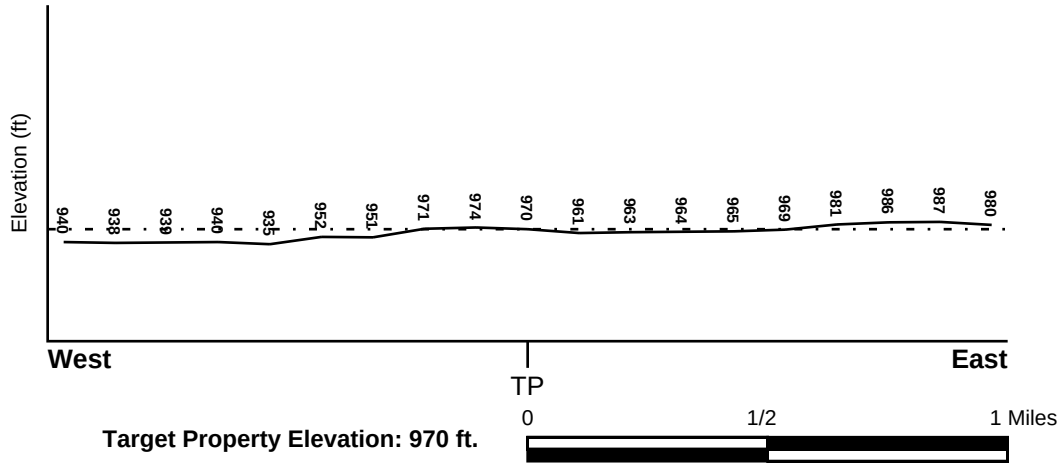

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 970 ft.

0 1/2 1 Miles

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
26125C0366F	FEMA FIRM Flood data

26125C0369F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
PONTIAC NORTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
2	1/8 - 1/4 Mile SSW	SE
3	1/4 - 1/2 Mile SSE	SW
5	1/2 - 1 Mile North	E
8	1/2 - 1 Mile SW	Varies

4G	1/2 - 1 Mile SW	Varies

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 3

Soil Component Name: Aquents

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Very poorly drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	59 inches	variable	Not reported	Not reported	Max: Min:	Max: Min:

Soil Map ID: 4

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 130 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Data
Source: Department of Environmental Quality
Telephone: 517-335-9218
The data in this file was obtained from Wellogic, the Michigan Department of Environmental Quality Statewide Groundwater Database (SGWD). Wellogic contains approximately 425,000 water well records found within the State of Michigan, and although it represents the best available data, it cannot be considered a complete database of all the wells or well records in existence. Locations of verified municipal and private water well sites compiled from Michigan Department of Public Health, Water Well and Pump Records. Available in the following MI counties: Calhoun, Eaton, Genesee, Ingham, Jackson, Kalamazoo, Kent, Midland, Muskegon, Oakland, Ottawaw, Saginaw, St. Clair, Washtenaw.

OTHER STATE DATABASE INFORMATION

Michigan Oil and Gas Wells
Source: Department of Environmental Quality
Telephone: 517-241-1528
Locations of oil and gas wells are compiled from permit records on file at the Geological Survey Division (GSD), Michigan Department of Natural Resources.

RADON

State Database: MI Radon
Source: Department of Environmental Quality
Telephone: 517-335-9551
Radon Test Results

Michigan Radon Test Results
Source: Department of Environmental Quality
Telephone: 517-335-8037
These results are from test kits distributed by the local health departments and used by Michigan residents. There is no way of knowing whether the devices were used properly, whether there are duplicates (or repeat verification) test (i.e., more than one sample per home), etc.

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Owner/Tenant Questionnaire

ASTM Standard Practice E1527-21

PROJECT NAME		PROJECT NO.	

Fiero Industrial Land

Owner's/Tenant's Name: RACER Properties, LLC - form filled out by David Favero

Owner's/Tenant's Telephone Number: 313-486-2911

Owner's/Tenant's Email Address: info@racertrust.org

Years Familiar with Subject Property: 14+

1. Current Land Use: Is the Subject Property or adjoining property currently used for manufacturing or industrial uses? Adjoining properties include those that border the immediate site and include properties across the street from the Subject Property.

   ☒ Yes *If yes, please describe below.* ☐ No Subject Property is currently vacant

   North: Solid waste transfer facility

   South: Residential

   East: General Motors manufacturing facility and landscape company and related materials storage yard

   West: Brick restoration company yard and residential

2. Historical Land Use: Has the Subject Property or adjoining property been used for manufacturing or industrial purposes in the past?

   ☒ Yes *If yes, please describe below.* ☐ No Subject Property formerly used as powerhouse for former GM operations in the area

   North: Former GMC auto manufacturing facility

   South: Residential and auto repair facility

   East: Former GMC auto manufacturing - including placement of waste fill, rail car storage, and iron foundry

   West: Commercial and residential

3. Are there any hazardous substances/petroleum products stored or used on the Subject Property?

   ☐ Yes *If yes, please summarize what types and quantities.* ☒ No

4. Are storage tanks above or underground located on the Subject Property?

   ☐ Yes *If yes, please describe below.* ☒ No

5. Are vent pipes protruding from the ground at the Subject Property or adjacent to any structure located on the Subject Property?

   ☐ Yes *If yes, please describe below.* ☒ No

6. Has fill dirt been brought on to the Subject Property that could be contaminated?

   ☐ Yes *If yes, please describe below.* ☒ No

   Fill dirt/material brought to the Subject Property in the 2019-2020 time frame. Fill was characterized prior to it being brought on-site and determined to be acceptable. Unknown what fill dirt may have been brought to the site prior to 2011.

Owner/Tenant Questionnaire

ASTM Standard Practice E1527-21

7. Are there any pits, ponds, or lagoons located on the Subject Property in connection with waste treatment or waste disposal?

   ☒ Yes *If yes, please describe below.* ☐ No

   Not currently but their was a former WWTP on-site.

8. Does the Subject Property discharge waste water, other than storm water, directly to a ditch or stream on or adjacent to the Subject Property?

   ☐ Yes *If yes, please describe below.* ☒ No

9. Did the Subject Property historically discharge waste water, other than storm water, directly to a ditch or stream on or adjacent to the Subject Property?

   ☐ Yes *If yes, please describe below.* ☒ No

10. Is the Subject Property served by a private well or non-public water system?

    ☐ Yes *If yes, please answer the question below.* ☒ No

    a. Has the well(s) been sampled?

       ☐ Yes *If yes, please describe if there were any concerns.* ☐ No

11. Was the Subject Property served by a private well or non-public water system historically?

    ☐ Yes *If yes, please describe below (i.e., former location(s), type, depth, were there any identified concerns, etc.).* ☒ No

12. Is the Subject Property connected to an on-site septic system?

    ☐ Yes *If yes, please describe below.* ☒ No

13. Was the Subject Property historically connected to an on-site septic system?

    ☐ Yes *If yes, please describe below.* ☒ No

14. Have Polychlorinated Biphenyls (PCBs) been used in electrical transformers, capacitors, or other equipment at the Subject Property?

    ☒ Yes *If yes, please describe below.* ☐ No

    Exact uses unknown but PCBs were evaluated in preparation for and addressed in 2019/2020 during site decommissioning and demolition.

Owner/Tenant Questionnaire

ASTM Standard Practice E1527-21

15. Have there been any fires on the Subject Property?
    ☐ Yes *If yes, please describe below.* ☒ No

16. Have you been informed of the presence of hazardous substances or environmental violations in regards to the Subject Property?
    ☒ Yes *If yes, please describe below.* ☐ No

    Response activities have been conducted at the Subject Property by Former GMC and then RACER as part of RCRA Corrective Action in accordance with Administrative Orders with USEPA. Env reports available on RACER webpage for Pontiac North property.

17. Are you aware of any environmental liens or governmental notification relating to violations of environmental laws in regard to the Subject Property?
    ☒ Yes *If yes, please describe below.* ☐ No

    A RCRA 3008(h) Performance-Based Administrative Order on Consent with USEPA, dated 9/29-2011 - RCRA-05-2011-0019

18. Are you aware of any environmental assessments of the property that indicated the presence of hazardous substances on the Subject Property or recommend further assessment of the Subject Property?
    ☒ Yes *If yes, please provide copies to Fishbeck and describe below.* ☐ No

    See response to Item 16 above.

19. Are there past, current or pending lawsuits or administrative proceedings for alleged environmental damages involving the Subject Property or any owner or tenant of the Subject Property?
    ☒ Yes *If yes, please describe below.* ☐ No

    The 2011 AOC has not been closed.

20. Does the purchase price and/or sales price of this property reflect the presence of hazardous substances on the Subject Property?
    ☐ Yes *If yes, please describe below.* ☐ No

    Unknown. I am not aware of the sale price.

This questionnaire was completed by the Subject Property Owner/Tenant.
The preparer presents that to the best of their knowledge, the above statements and facts are true and correct and that to the best of the preparer's knowledge, no material facts have been omitted or misstated.

Owner's/Tenant's (Representative) Signature: David Favero on behalf of RACER Properties, LLC
Owner's/Tenant's Printed Name: David Favero to the best of my knowledge and belief
Address: 660 Woodward Ave., Suite 1521
City, State, Zip Code: Detroit, MI 48226
Telephone Number: 217-741-6235
Email Address: dfavero@racertrust.org
Relationship to Subject Property: Michigan Deputy Cleanup Manager

SOLOMON BOISVERT

ENVIRONMENTAL SPECIALIST

Solomon is experienced in Phase I ESAs, Phase II ESAs, BEAS, and documentation of due care compliance for various types of active and shuttered properties.

EXPERIENCE

- Conduct Phase I ESAs, Phase II ESAs, BEAs, and documentation of due care compliance for various types of active and shuttered residential, commercial, agricultural, and industrial properties.
- Assist project managers with Phase II ESAs and remedial investigations.
- Assist project managers with the completion of NEPA environmental assessments.
- Research site history, review public government agency files, and risk assessment of nearby properties.

YEARS OF EXPERIENCE

2 years — Fishbeck
2 years — total

EDUCATION

MS in Water Resource Policy, Grand Valley State University

BS in Geography, Grand Valley State University

Geographic Information Systems Certification, Grand Valley State University

COURTNEY DUNAJ

SENIOR HYDROGEOLOGIST

Courtney has experience in environmental due diligence, including Phase I and II environmental site assessments (ESAs), baseline environmental assessments (BEAs), and documents of due care compliance (DDCC); hydrogeology; proposal development and client communications; and project management.

YEARS OF EXPERIENCE

4 years — Fishbeck
9 years — total

EDUCATION

BS in Hydrogeology and Environmental Studies, Western Michigan University

2016 Presidential Scholar for Geoscience Department

REGISTRATIONS/ CERTIFICATIONS

HAZWOPER Site Worker

MEMBERSHIPS

Michigan Association of Environmental Professionals

Women Among Women Networking Group

EXPERIENCE

- Conducted hundreds of Phase I ESAs for vacant, agricultural, residential, commercial, and industrial properties, including historical research, agency file reviews, and site inspections to identify environmental risks.
- Managed projects and prepared Phase II ESA reports, BEAs, and due care documentation.
- Managed and reviewed NEPA categorical exclusions and Environmental Assessments (EAs) to support federal and delegated state grant requirements for agencies including HUD, USDA, USEPA, DOE, FTA, GSA, the National Guard, and the U.S. Air Force.
- Prepared regulatory documents for Michigan and Indiana gasoline station sites, including Initial Assessment Reports (IARs), Final Assessment Reports (FARs), Quarterly Monitoring Reports (QMRs), exposure evaluations, and closure reports.
- Performed aquifer evaluations and calculated site-specific hydraulic parameters—gradient, conductivity, and groundwater velocity—and assessed plume stability using Mann-Kendall trend analysis.
- Interpreted hydrogeological data to support remediation selection, evaluate corrective action effectiveness, and prepare site closure requests.
- Evaluated, implemented, and trained staff on soil boring log programs, statistical analysis tools, and groundwater modeling software, and developed soil boring logs and data tables to support technical analysis.
- Experienced with ProUCL, Aqtesolv, Strater, Surfer, ArcGIS, AutoCAD, and groundwater monitoring software.

DETROIT REGIONAL PARTNERSHIP | MULTIPLE LOCATIONS

2024 – 2025

As project manager, led due diligence services across 11 counties, overseeing Phase I and II ESAs, BEAs, and DDCCs to position properties for redevelopment and future acquisitions. Additionally, provide technical peer reviews and collaborate with internal teams, consultants, and property owners to ensure environmental risks are understood.

EGLE | KALAMAZOO, MICHIGAN

FORMER OTTO SCHUHARDT SERVICE COMPANY | 2021 - 2023

Completed Phase I ESA, Phase II ESA, vapor intrusion investigation, BEAs, and a DDCC report on an abandoned gasoline and automotive service station. Collaborated with stakeholders to mitigate environmental risks and ensure the site was safe for its intended future use.

EGLE | ESCANABA, MICHIGAN

ESCANABA NORTHSHORE DEVELOPMENT | 2022 - 2024

Oversaw due diligence activities for three developers, ensuring the timely and accurate completion of environmental assessments. Managed the execution of Phase I and Phase II ESAs, BEAs, and DDCC reports. Coordinated all aspects of each project, including managing timelines, resources, and communication with stakeholders. Worked closely with internal teams and external partners to ensure that all activities met regulatory requirements and aligned with project objectives.

fishbeck

COURTNEY DUNAJ

SENIOR HYDROGEOLOGIST

EGLE | ADRIAN, MICHIGAN

FORMER DURA AUTOMOTIVE | 2022, 2024

Led environmental assessments to support development projects and inform stakeholders of potential concerns. Managed and completed a Phase I ESA in 2022 for Lenawee County and the City, identifying risks for future development. Directed a Phase I ESA and BEA for a developer planning battery storage use, ensuring compliance and addressing environmental considerations.

EGLE | KINGSLEY, MICHIGAN

103, 105, 111, AND 115 WEST MAIN STREET | 2023

Successfully managed environmental assessments for multiple properties, including completing a Phase I ESA on four separate lots and a Phase II ESA and BEA on two additional lots. Worked closely with the Village and the Grand Traverse County Land Bank Authority, providing guidance on due care considerations during ownership and demolition activities to ensure compliance and safety.

EGLE AND RENOVARE | BENTON HARBOR, MICHIGAN

960 AGARD AVENUE AND 807 WELD STREET | 2023 - 2025

Managed site activities for both EGLE and Renovare (the private developer) simultaneously, ensuring compliance with Michigan State Housing Development Authority (MSHDA) environmental requirements. Oversaw the completion of multiple assessments and reports, including: Phase I ESA, Phase II ESA, ground penetrating radar (GPR) survey, response activity plan, and BEA. Led Phase II ESA activities, which included a soil gas investigation, light non-aqueous phase liquid (LNAPL) assessment, soil and groundwater sampling, all aimed at informing due care considerations for future residential development.

EGLE | KINCHELOE, MICHIGAN

KINCHELOE AIR FORCE BASE BUILDING 435 | 2023

Led environmental due diligence activities, overseeing the completion of a Phase I ESA, a Phase II ESA, and a due care report to address potential contamination and ensure compliance with environmental regulations.

- Directed EGLE's geological and site services (GSS) field team during Phase II ESA activities, providing detailed scope of work and guiding field operations.
- Reviewed and evaluated the results of soil, groundwater, and other environmental samples collected during the Phase II ESA to assess the extent of contamination and inform remediation strategies.
- Worked closely with environmental consultants and other stakeholders to ensure that all assessments met regulatory requirements and accurately reflected site conditions.
- Prepared and submitted the due care report, outlining necessary steps to manage environmental risks and ensure that future site activities adhered to Michigan's environmental standards.

ALRO STEEL CORPORATION | MULTIPLE LOCATIONS

MULTIPLE LOCATIONS ACROSS UNITED STATES | 2021 - 2025

As project manager, led due diligence services across the U.S., overseeing Phase I and II ESAs, BEAs, and DDCCs to support acquisitions and leases. Directed soil and groundwater investigations, documented site conditions, and ensured compliance with state and federal regulations. Collaborated with internal teams, consultants, and agencies to complete assessments and align environmental strategies with Alro Steel's goals while mitigating liabilities.

CITY OF GRAND RAPIDS, MICHIGAN | 2025

501 MARKET STREET

Led and managed the environmental assessment process, overseeing the completion of key environmental reports and assessments, including Phase I and II ESAs, and Vapor Intrusion Investigations. Provided senior review for all reports except the hazardous materials

COURTNEY DUNAJ

SENIOR HYDROGEOLOGIST

inventory (HMI). Managed the overall site, ensuring timely completion and compliance with regulatory standards. Additionally, provided consulting services to the City during building demolition and soil management activities. Advised on due care considerations for potential future uses of the site, ensuring that environmental risks were addressed and mitigated.
