Dear Ms. Katko:

Re: Feasibility Study for Interim Response Action - Schedule Update
Company Vehicle Operations Area
Ypsilanti, Michigan

As a follow up to our conversation on December 5, 2006, we are providing this correspondence to update the schedule in regards to the Interim Response Action (IRA) under consideration at the Company Vehicle Operations (CVO) area (Site) located in Ypsilanti, Michigan. In a letter dated October 2, 2006 Conestoga-Rovers & Associates Inc. (CRA) on behalf of ENCORE, a wholly owned subsidiary of General Motors Corporation (GM) provided plans and a schedule to address an exceedance of a groundwater surface water interface (GSI) criterion based on acute toxicity, consistent with the requirements of R299.5716(14)(a) for Part 201 of 1994 PA 451, as amended.

In summary, the plans include a Short-Term Remedial Option to destroy groundwater contamination on an interim basis, and a Long-Term Remedy to address contamination on a permanent basis. The Short-Term Remedial Option was addressed in a letter to you dated November 17, 2006. You indicated that our Short-Term Remedial Option would be reviewed by the MDEQ Committee on January 11, 2006.

We have established a meeting date of January 10, 2006 to review with you our progress and findings of the Feasibility Study for the Long-Term Remedy. We will provide you with a summary of our findings prior to that meeting. Based on our findings, we will evaluate the appropriateness of a Short-Term Remedial Option and will be prepared to discuss this with you on January 10.
