Closed Hazardous Waste Surface Impoundment

RACER Trust

INR000021436

Indianapolis, Marion County

Bob & Heather;

This e-mail notifies you that I evaluated the ground sampling results and statistical analysis from the October 2011 sampling event for GM Former AGT Division, a closed hazardous waste surface impoundment. ARCADIS submitted the report on behalf of RACER Trust on January 20, 2012. The ground water sampling event and the statistical evaluation of the ground water data obtained under the authority of the Sampling and Analysis Plan, and the Statistical Evaluation Plan found in Attachment H of the modification to the Post-Closure Permit dated February 17, 2010 (VFC # 54288558).

I noted that according to the field sheets you adequately purged and sampled the monitoring wells using the low flow technique described in your approved SAP. I noted that you adequately followed your statistical evaluation plan. In addition, you provided the necessary graphical display of the distributions of the specified indicator parameters.

We loaded the ground water data electronically into the Office of Land Quality database on January 27, 2012, after I modified the well name of the duplicate samples. We request that future digital submittals of the ground water dataset follow the format specified in the permit, and identify each well as listed in the permit.

I find the January 20, 2012 report complies with your Post-Closure Permit and approved plans. If you would like to discuss my evaluation further, please contact me. Thank you for your continued compliance.

Sincerely,  
Harold R. Templin, L.P.G.  
Senior Geologist
