EPA ID # INR000021436

Dear Mr. Hare:

On February 27, 2024, we received the report from ARCADIS on behalf of the facility. The following comments are the result of our review.

We reviewed the report required by the Post-Closure Permit (Permit) dated September 1, 2017 (VFC # [80513708](#)), for the closed hazardous waste surface impoundment at 2701 West Raymond Avenue, Indianapolis, Indiana.

The report provided a summary of operation and maintenance at the facility, including mowing, pest control, and groundwater monitoring. The facility concluded that it did not need to lower groundwater elevation inside the slurry wall to keep an inward hydraulic head difference across the slurry wall of at least one foot (Permit Requirement E2).

Per the 2023 annual groundwater monitoring results (in report dated August 28, 2023 (VFC # [83525791](#))), the facility does not need to take remedial actions at this time because no constituent concentrations exceeded their respective facility background screening levels.

The facility performed the latest cover settlement monument survey on July 27, 2023. The next monument survey is scheduled for 2026.

We agree with the maintenance the facility performed in 2023.

Visit on.IN.gov/survey or scan the QR code to provide feedback.

We appreciate your input!

Mr. Robert Hare
