RE: Parameter Exceedance

Dear Ms. Landale:

The following letter is in response to the June 2012 Self-monitoring Report submitted by Conestoga-Rovers & Associates on behalf of R.A.C.E.R. Trust located at 2901 Tyler Road in Ypsilanti, MI. The Ypsilanti Community Utilities Authority (YCUA) received the report on July 20, 2012. Conestoga-Rovers & Associates provided initial notification to the YCUA on July 17, 2012 that an exceedance of the vinyl chloride parameter had occurred during the June 22, 2012 self-monitoring event. The batch of wastewater discharged on June 22, 2012 was the same batch that YCUA sampled, analyzed, and reported for a Control Authority monitoring event. YCUA issued enforcement for the concentration of vinyl chloride (0.53 mg/l) found in the sample. Since the June 22, 2012 has already received enforcement no additional enforcement is warranted. Conestoga-Rovers & Associates on behalf of R.A.C.E.R. Trust has already provided YCUA with a report on changes being made to prevent the reoccurrence of this type of violation.

Please contact me with any questions you may have by phone at 734-484-4600 Ext. 121 or by email at pthomas@ycua.org.

Sincerely,

A handwritten signature in black ink, reading "Perry M. Thomas". The signature is written in a cursive, flowing style. The first name "Perry" is written in a larger, more prominent script, followed by "M." and "Thomas". The signature is positioned below the word "Sincerely," and above the printed name and title.

Perry M. Thomas
YCUA Chief Compliance Officer
