Flint, Michigan 48550

Mr. Robert Metcalf:

SUBJECT: Additional Groundwater Testing of MW-3S at the Linden Road Landfill site, Genesee County

The Michigan Department of Environmental Quality (MDEQ) has received the above referenced document dated 13 August 2002, submitted on your behalf by Weston Solutions, Inc. (Weston), and has the following comments:

- The MDEQ is concerned vinyl chloride is migrating from the site at concentrations exceeding Generic Residential Cleanup Criteria. If the results of the Third Annual Groundwater Sampling and Methane Monitoring continue to show potential off site migration of contaminants from MW-3S, additional investigation to delineate the extent of any off site impact may be required.
- The MDEQ requests the report of the Third Annual Groundwater Sampling and Methane Monitoring provide all analytical results of sample locations since implementation of the Remedial Action Plan. It will assist the MDEQ if this data is presented in a tabular format by location and date sampled.

Feel free to contact me if you have any questions.

Sincerely,

James E. Innes
