EXECUTIVE SUMMARY

The Mannik & Smith Group, Inc. (MSG) was retained by Detroit Regional Partnership (hereinafter, the "User") to perform a Phase I Environmental Site Assessment (ESA) for a reported 80.35 acres of real property located on East Stanley Road in Genesee Township & Mount Morris, Genesee County, Michigan 48458 (hereinafter, the "Subject Property"). Collectively, the Subject Property consists of four parcels of land that are split into a north section and a south section by an electrical power line corridor that traverses west to east. The Subject Property as referenced to nearby roads and major topographical features is presented on *Figure 1, Subject Property Location Map*. A general layout of the Subject Property is presented on *Figure 2, Subject Property Schematic*.

This Phase I ESA was conducted in general conformance with the typical scope and limitations recommended by ASTM International (ASTM) in their document E1527-21, titled: "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process," and the United States Environmental Protection Agency (USEPA) rule identifying federal standards and processes for conducting All Appropriate Inquiries (AAI) codified in Federal Regulation – 40 Code of Federal Regulations (CFR) Part 312 - Standards and Practices for All Appropriate Inquiries. The goal of the process established by this practice is to identify recognized environmental conditions (RECs), historical RECs (HRECs), controlled RECs (CRECs) and business environmental risk (BER), as defined within ASTM Standard Practice E1527-21.

This Executive Summary is provided to summarize potential environmental concerns that were identified for the Subject Property, as a result of performing this Phase I ESA. It is not intended as a stand-alone document and does not contain all of the information that is presented within the body of the report. The attached Phase I ESA report should be read in its entirety to obtain a complete understanding of the information provided and to assist you with your plans for the Subject Property.

1. The Subject Property consists of four parcels of land that are split into a north section and a south section by a utility line that traverses west to east. The southern section consists of one parcel, whose parcel identification number is 25-11-07-400-016 (14.92 acres), and the northern section consists of three parcels, whose parcel identification numbers are 25-11-07-200-035 (60.87 acres), 25-57-07-100-018 (0.86 acres), and 25-57-07-100-017 (3.7 acres). The majority of the Subject Property is located off of East Stanley Road in Genesee Township, Genesee County, Michigan 48458. In addition, a 4.5-acre portion of land on the northwest corner of the Subject Property is in the City of Mount Morris, Genesee County, Michigan. The Subject Property is located west of North Lewis Road, east of North Saginaw Road, and north of East Stanley Road in a mixed residential and commercial area of Mount Morris and Genesee Township. Access to the Subject Property is available from East Stanley Road. At the time of MSG's site reconnaissance, the Subject Property was vacant land that is heavily wooded. A man-made pond was observed in the southeast corner of the northern section of the Subject Property. The northern section of the Subject Property contains many walking trails throughout. The southern section of the Subject Property is predominately dense woods with a small two-track path that leads to the electrical power line corridor. There is a railroad track and a petroleum pipeline that adjoins the entire western border of the Subject Property.
2. Based on readily available and reasonably ascertainable historical and current documentation reviewed as part of this study; the Subject Property consisted of undeveloped land from at least 1937 to at least 2020. From at least 1964 to at least 1982, gravel pits or landfill activities appear to be associated with portions of the Subject Property. By at least 1999, the gravel pits or landfill area were filled in. A small structure located in the southeastern corner of the Subject Property was constructed by at least 1950 and demolished by at least 1982.

3. The elevation of the Subject Property is approximately 786 feet above mean sea level (MSL). The surface topography in the vicinity of the Subject Property is generally flat. The Costello Drain traverses east to west through the northern portion of the Subject Property, draining to the northwest. This appears to be where localized groundwater from the Subject Property is flowing due to the Costello Drain being located on the Subject Property. In general, regional groundwater is likely to flow southeast towards Flint River and C.S. Mott Lake. The nearest identified surface water body is C.S. Mott Lake, which is located approximately two miles southeast of the Subject Property. C.S. Mott Lake is hydraulically downgradient of the Subject Property at an elevation of approximately 728 feet above MSL. The direction of shallow groundwater movement typically mimics the ground surface contours, moving from topographic highs to topographic lows. This assumes that all lakes, rivers, streams, wetlands, and/or other surface water bodies are interconnected expressions of the water table.

This ESA has revealed evidence of the following HREC relative to the Subject Property.

HREC-1 Based on review of historical documentation as part of this study, there is evidence that landfilling activities took place on the Subject Property by General Motors Corporation (GMC) from at least 1964 to at least 1982. The historical document indicated that GMC disposed waste materials, including metal grindings, wooden floor blocks, general refuse, and paint wastes, in two areas (DA1 and DA2) located in southwest corner of parcel identification number 25-11-07-200-035. A total of 14,478 tons of fill and soil were reportedly removed from the two areas with remnants of twenty-eight 55-gallon drums of paint removed from DA2. Verification soil and groundwater samples were collected and submitted for laboratory analysis of select volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), and polychlorinated biphenyls (PCBs). The parameters were selected based on previous investigation results that were in excess of generic residential cleanup criteria (GRCC). Toluene and xylene were detected in two soil samples at DA2 above GRCC drinking water protection criteria (DWPC); however, sampling of groundwater that occurred post soil excavation activities indicated that toluene and xylene were not detected. According to a December 18, 2001 closure letter from the Michigan Department of Environmental Quality (MDEQ) (predecessor to Michigan Department of Environmental, Great Lakes, and Energy (EGLE)), the disposal sites were remediated to GRCC and that *"all response activities required have been completed*". Based on the information reviewed and the closure letter from MDEQ/EGLE indicating regulatory closure has been attained, the historical landfilling constitutes an HREC.

This ESA has revealed evidence of the following BERs relative to the Subject Property.

BER-1 During MSG's site reconnaissance and reviewing of the National Pipeline Mapping System (NPMS), a petroleum pipeline traverses south to north alongside a railroad that adjoins the western border of the Subject Property. The pipeline is owned and operated by Buckeye Partners, L.P. A review of the NPMS database did not indicate a spill or leak had occurred from this pipeline. The mere presence of this pipeline is not representative of a REC; however, should be considered when evaluating future land use of the Subject Property.

BER-2 Based on review of historical documents, a small structure was located in the southeastern corner of the property from at least 1950 to at least 1981. This structure appears to have been demolished by at least 1982. There was no evidence of this structure during MSG's site reconnaissance and no documentation that was reasonably ascertainable regarding the construction or demolition of this small structure. The undocumented demolition of this structure does not warrant a REC; however, should be considered when evaluating future land use of the Subject Property.

BER-3 Based on a review of historical documents, the northern and southern portions of the Subject Property were utilized as agricultural land from at least 1937 until at some time prior to 1957. Agricultural chemicals, such as pesticides, herbicides, and fertilizer would likely have been used during this time period. No information was discovered that would suggest that agricultural chemicals and fertilizers were not applied in accordance with manufacturer recommendations. Application of agricultural chemicals for intended use in accordance with manufacturer's recommendations is not considered a release; therefore, potential residuals, if any, do not constitute a REC; however, should be considered when evaluating future land use of the Subject Property.

1.0 INTRODUCTION

The Mannik & Smith Group, Inc. (MSG) was retained by Detroit Regional Partnership (DRP) (hereinafter, the "User") to perform a Phase I Environmental Site Assessment (ESA) in general conformance with the typical scope and limitations recommended by ASTM International (ASTM) in their document E1527-21, titled: "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" (hereinafter, "ASTM Standard Practice E1527-21") and the United States Environmental Protection Agency's (USEPA) rule identifying federal standards and processes for conducting All Appropriate Inquiries (AAI) codified in Federal Regulation – *40 Code of Federal Regulations (CFR) Part 312 - Standards and Practices for All Appropriate Inquiries* (hereinafter, "Standards and Practices for AAI").

1.1 Subject Property Location and Description

The User has authorized MSG to prepare this Phase I ESA report for a reported 80.35 acres of real property; the majority of the Subject Property is located off of East Stanley Road in Genesee Township, Genesee County, Michigan 48458. In addition, a 4.5 acre portion of land on the northwest corner of the Subject Property is in the City of Mount Morris, Genesee County, Michigan (hereinafter, the "Subject Property"). Collectively, the Subject Property consists of four parcels of land, split into two sections by electrical utility lines crossing from the west to the east. The parcel identification numbers are 25-57-07-100-017 (3.7 acres), 25-57-07-100-018 (0.86 acres), 25-11-07-200-035 (60.87 acres), and 25-11-07-400-016 (14.92 acres). The Subject Property is located west of North Lewis Road, east of North Saginaw Road, and north of East Stanley Road in a mixed residential and commercial area of Mount Morris and Genesee Township. Access to the Subject Property is available on East Stanley Road.

At the time of MSG's site reconnaissance, the Subject Property is vacant land that is heavily wooded. A man-made pond was observed in the southeast corner of the northern section of the Subject Property. The northern section of the Subject Property contains many walking trails throughout. The southern section of the Subject Property is predominately dense woods with a small two track path that leads to the electrical power line corridor. There is a railroad track and a petroleum pipeline that adjoins the entire western border of the Subject Property.

The Subject Property as referenced to nearby roads and major topographical features is presented as *Figure 1, Subject Property Location Map*. A general layout of the Subject Property is presented as *Figure 2, Subject Property Schematic*.

1.2 Purpose and Scope of Services

The purpose for conducting this Phase I ESA is to identify potential RECs[1], CRECs[2], HRECs[3] and *de minimis conditions*[4]. In addition, BERs[5] are considered for informational purposes only and are considered beyond the scope of ASTM Standard Practice E1527-21, but may warrant consideration by the User.

[1] A REC is defined as the presence or likely presence of hazardous substances or petroleum products in, on, or at the subject property: (1) due to a release to the environment; (2) due to a release or likely release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.
[2] A CREC is defined as a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with *hazardous substances* or *petroleum products* allowed to remain in place subject to the implementation of required controls (e.g., property use limitations, activity and use limitations, institutional controls or engineering controls).
[3] A HREC is defined as a previous r*elease of hazardous substances* or *petroleum products* affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (e.g., property use limitations, activity and use limitations, institutional controls or engineering controls). HRECs are not considered RECs.
[4] A *De minimis* condition is a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a *de minimis* condition is not a REC nor a CREC.
[5] A BER is defined as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of *commercial real estate*, not necessarily related to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope considerations.

According to Section 1.1 of ASTM Standard Practice E1527-21, "...the purpose of this practice... is to define good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of real estate with respect to the range of contaminants within the scope of CERCLA and petroleum products." As such, this practice is intended to permit a User, whom we understand to be the Detroit Regional Partnership, to satisfy due diligence requirements necessary to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser defenses, as defined within the Small Business Liability Relief and Brownfields Revitalization Act amendments to CERCLA; that is, the practices that constitute "all appropriate inquiries into the previous ownership and use of the property consistent with good commercial or customary practice" as defined in 42 USC § 9601(35)(B).

The Scope of Services for conducting a Phase I ESA, as outlined in ASTM Standard Practice E1527-21 and Standards and Practices for AAI, typically includes the following four components: a site walk-through and visual survey of the Subject Property; a review of pertinent records for evidence of present or historical use of the Subject Property and adjacent properties; interviews with current owners or operators and local government officials; and evaluation of information collected and development of a report.

In order to fulfill the objectives of this Phase I ESA and meet due diligence requirements, the following tasks were completed:

- A visual survey of the Subject Property to identify areas of potential environmental concern. Color photographs taken to document conditions of the Subject Property at the time of the site reconnaissance are provided in *Appendix A, Site Reconnaissance Photographs*;
- A visual observation of neighboring properties or facilities from the Subject Property or public access areas to assess whether surface conditions on these properties may have adverse environmental impact on the Subject Property;
- Historical land use review of the Subject Property back to 1940 or the first developed use, whichever occurred earlier;
- Collection and review of existing published information relating to general geology, hydrogeology, and topographical information for the Subject Property;
- A regulatory agency file search to identify federal and state listed sites of known or potential environmental concern located within the minimum search distances from the Subject Property as specified in ASTM Standard Practice E1527-21 and Standards and Practices for AAI;
- Interviews with the Subject Property owner, the owner's representative(s), representatives of the state, county, and local regulatory agencies, or other persons with knowledge of the Subject Property (if achievable); and
- Evaluation of compiled information and preparation of a report.

This Phase I ESA Report describes MSG's evaluation of compiled information as proposed by MSG on September 11, 2024, and authorized by the User through the presentation of a Work Order from the User on October 10, 2024. Brief summaries of the qualifications of the individuals who conducted, prepared, and reviewed this Phase I ESA Report are included in *Section 9, Qualifications and Environmental Professional Statement*.

1.3 Significant Assumptions

In preparation of this report, MSG has relied upon information contained in the files of federal, state and local governmental agencies that were available at the time this report was written. Although there may have been some degree of overlap in the information provided by these sources, MSG did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this assessment. Furthermore, MSG has relied upon information received from the owner, owner's representative(s), or other person's with knowledge

of the Subject Property and considers all such information received to be accurate unless contradicted by written documentation or field observations.

1.4 Limiting Conditions

MSG evaluated the current environmental condition of the Subject Property by completing a site reconnaissance on November 6, 2024. General limitations for Phase I ESAs are presented in *Appendix B, Limitations for Phase I ESAs.* Data gaps specific to this Phase I ESA are discussed in Section 7.0.

1.5 Deviations

No significant deviations from the ASTM Standard Practice E1527-21 standard scope of work were undertaken as part of this project.

1.6 Special Terms and Conditions

No special terms or conditions have been imposed upon or requested of MSG in the performance of this Phase I ESA.

1.7 User Reliance

This Report is addressed to and provided for the exclusive use of the User and such other persons as may be designated by the User and their respective successors and assigns. Special Conditions include (i) the Report may be relied upon in determining whether to make a loan evidenced by a note ("the Property Note") secured by the Subject Property, (ii) the Report is provided for the exclusive use of the User in determining whether to purchase, lease, foreclosure, or otherwise occupy the Subject Property, (iii) the Report may be referred to in and included with materials offering the Property Note for sale or an interest in the Property Note, (iv) persons who acquire the Property Note may not rely on the Report without the express written consent of MSG, and (v) the Report speaks only as of its date in the absence of a specific written update of the Report.

The findings of this report are valid as of the report date, subject to the Phase I ESA Limitations, presented in Appendix B, which are incorporated by reference herein. An updated Phase I ESA will be required for the Subject Property after a period of 180 days.

2.0 USER-PROVIDED INFORMATION

Pursuant to the requirements of ASTM Standard Practice E1527-21, MSG requested that User provide information related to the following:

- Environmental liens or activity and use limitations filed against the Subject Property;
- Specialized knowledge about environmental conditions at the Subject Property;
- Commonly known or reasonably ascertainable information about the Subject Property;
- Copies of previous environmental reports of the Subject Property; and,
- Information indicating that a reduction in property value exists due to the presence of environmental issues at or nearby the Subject Property.

Any User provided information that was received and reviewed as part of this ESA is presented in *Appendix C, User Provided Information*.

2.1 Environmental Liens, Judicial Records, or Activity and Use Limitations (AULs)

The User stated that they are not aware of any environmental liens, judicial records, or activity and use limitations currently active on the Subject Property. However, they did state that they believe there may be a monetary lien by the

United States (US) Treasury as a result of the GM Bankruptcy settlement. Additionally, RACER Trust plans to record a restrictive covenant prior to a sale of the Subject Property.

2.2 Specialized Knowledge about Environmental Conditions

The User stated that they are aware of this type of information from the result of environmental assessments and reports completed for the Subject Property and that copies of these reports are available from RACER's public access webpage.

2.3 Commonly Known or Reasonably Ascertainable Information

MSG did not receive reasonably ascertainable or commonly known User-provided information indicating that the Subject Property is impacted by environmental issues other than reference to the reports found on RACER trust website. See section 4.10 for further discussion.

2.4 Copies of Previous Environmental Reports

The User stated that RACER's public access webpage has copies of previous environmental reports.

2.5 Information Indicating that a Reduction in Subject Property Value Exists Due to the Presence of Environmental Issues

The User did not state that the Subject Property value has been reduced in consideration of environmental issues. They did state that a monetary lien may be present on the Subject Property (see Section 2.1).

3.0 PHYSICAL SETTING

MSG reviewed available aerial photographs, soils information, and topographic maps to determine the physical setting of the Subject Property and surrounding areas. This information was reviewed to assess the topographic and subsurface characteristics of the Subject Property and surrounding areas and how those characteristics may ultimately influence potential environmental concerns at and surrounding the Subject Property.

3.1 Topography and Local Hydrogeology

The United States Geological Survey (USGS) electronic 7.5-minute topographical map titled *Flint, Michigan (dated 2023)* was reviewed for topographical information in the vicinity of the Subject Property. The elevation of the Subject Property is approximately 786 feet above mean sea level (MSL). Based off surrounding elevation, groundwater appears to flow to the southeast of the Subject Property.

The surface topography in the vicinity of the Subject Property is generally flat, with the Costello Drain traversing generally east to west on the Subject Property, draining to the northwest. Due to the presence of Costello Drain, groundwater on the Subject Property appears to flow to the northwest. In general, regional groundwater is likely to flow southeast towards Flint River and C.S. Mott Lake. The nearest identified surface water body is C.S. Mott Lake, which is located approximately 2 miles southeast of the Subject Property. C.S. Mott Lake is hydraulically downgradient of the Subject Property at an elevation of approximately 728 feet above MSL. The direction of shallow groundwater movement typically mimics the ground surface contours, moving from topographic highs to topographic lows. This assumes that all lakes, rivers, streams, wetlands, and/or other surface water bodies are interconnected expressions of the water table.

3.2 Geology and Local Soils

According to the map *Quaternary Geology of Michigan*, W. R. Farrand (1982), the geology in the vicinity of the Subject Property consists of end moraines of medium-textured till. Upon review of the *Bedrock Geology of Michigan*, R. L. Milstein (1987), the bedrock geology in the vicinity of the Subject Property consists of the Saginaw Formation.

The *Soil Survey of Genesee County, Michigan*, issued 2024; was consulted for soil classification. The following is a brief description of the individual soil mapping units present on the Subject Property:

- *Adrian muck, Erie-Huron lake plain (AdrabA),* 0 to 1 percent slopes – This soil is described as very poorly drained herbaceous organic material over sandy and gravelly glaciofluvial deposits. There is no frequency of flooding, but there is frequent ponding. Adrian muck, Erie-Huron lake plain is described as not prime farmland; associated landforms are described as depressions on drainageways. This soil unit is generally located in the northeast corner of the Subject Property.
- *Carlisle muck (CarabA)*, 0 to 2 percent slopes – This soil is described as very poorly drained woody organic material. There is no frequency of flooding, but there is frequent ponding. Carlisle muck is described as not prime farmland; associated landforms are described as depressions on moraines, depressions on glacial drainage channels, depressions on outwash plains, depressions on till plains. This soil unit is generally located in the northwest corner of the Subject Property.
- *Celina-Owosso sandy loams (CmB)*, 2 to 6 percent slopes – Celina soil is described as moderately well drained loamy till. Owosso soil is described as well drained loamy glaciofluvial deposits over loamy till. There is no frequency of flooding or ponding in Celina-Owosso sandy loams. Celina-Owosso sandy loam is described as being prime farmland; associated landforms include knolls on ground moraines. This soil unit is generally located in the eastern portion near the border of the Subject Property.
- *Udorthents and Udipsamments (EtmaaE)*, nearly level to hilly – Udorthents soil is described as well drained loamy till. Udipsamments soil is described as well drained sandy glaciofluvial deposits. There is no listed frequency of flooding or ponding in Udorthents and Udipsamments. This soil is described as being not prime farmland; associated landforms include ground moraines. This soil unit is generally located in the northeast corner and the southern section of the Subject Property.
- *Granby loamy sand (Gm)* – This soil is described as poorly drained sandy glaciolacustrine deposits. There is no listed frequency of flooding or ponding. Granby loamy sand is described as farmland of local importance; associated landforms include flats on lake plains, flats on outwash plains. This soil unit is generally located along the eastern border towards the middle of the Subject Property.
- *Lamson loamy fine sand (Lb)* - This soil is described as poorly drained loamy glaciolacustrine deposits and/or glaciofluvial deposits. Lamson loamy fine sand is described as prime farmland if drained; associated landforms include flats on lake plains. This soil unit is generally located in the center of the Subject Property.
- *Pits, sand and gravel (PITx)* - Described as not prime farmland.
- *Spinks-Oakville loamy sands (SvB),* 2 to 6 percent slopes - This soil is described as well drained sandy glaciofluvial deposits. Spinks-Oakville loamy sand is described as farmland of local importance; associated landforms include knolls on steam terraces and knolls on outwash plains. This soil unit is located all throughout the Subject Property.
- *Spinks- Oakville loamy sands (SvC),* 6 to12 percent slopes – This soil is described as well drained sandy glaciofluvial deposits. Spinks-Oakville loamy sand is described as farmland of local importance; associated landforms include moraines. This soil unit is located in the northeastern corner of the Subject Property.
- Water (W)

4.0 RECORDS REVIEW

4.1 Fair Market Value

Fair market value (FMV) is an estimate of the market value of a property, based on what a knowledgeable, willing, and unpressured buyer would probably pay to a knowledgeable, willing, and unpressured seller. An estimate of FMV may be founded on either precedent or extrapolation. Since market transactions are often not observable for assets such as privately held businesses and most personal and real property, FMV must be estimated. An estimate of FMV is usually subjective due to the circumstances of place, time, the existence of comparable precedents, and the evaluation principles of each involved person. Opinions on value are always based upon subjective interpretation of available information at the time of assessment.

The intent of this section is to provide the User with information that may be useful in determining the FMV. MSG makes no representation or warranty of FMV of the Subject Property. Information obtained as part of this study is included in *Appendix D, Legal Description and Subject Property Information*.

4.2 Historical Subject Property Ownership Information

Copies of parcel information that were reviewed as part of this study are included in *Appendix D, Legal Description and Subject Property Information*.

According to the RACER Trust, "*property ownership was transferred to RACER on March 31, 2011, as a result of the GMC bankruptcy settlement agreement*".

4.3 Environmental Lien Information

The User is not aware of any environmental liens on the Subject Property. The Subject Property is not listed in the Regulatory Database Report as having any environmental liens or AULs. However, the indicated that there may be a monetary lien by the United States Treasury as a result of the GM bankruptcy settlement, and that RACER intends to place restrictions on the Subject Property prior to a property transaction.

4.4 City Directory Review

MSG reviewed information regarding the Subject Property and adjacent properties from city directories provided by Environmental Data Resources Inc. (EDR). City directories were available for select years ranging from 1960 to 2020. City directories were reviewed to identify current or former occupants associated with the Subject Property or other property information that would indicate or assist with identifying potential environmental concerns in the vicinity of the Subject Property.

Copies of the directories reviewed as part of the Phase I ESA are provided in *Appendix E, City Directories*. The following provides a summary of interpretations for the Subject Property and surrounding properties that could have historically or currently affect the Subject Property.

4.4.1 Summary of City Directories (Subject Property)

The Subject Property does not have a reported address other than East Stanley Road, therefore the city directories do not have information pertaining to the exact property location. MSG only received information on the surrounding properties.

4.4.2 Summary of City Directories (Surrounding Properties)

MSG also reviewed city directories for select surrounding properties to determine their past occupancy. From at least 1960 until at least 2020, adjacent properties predominately consisted of residential properties. The

surrounding property's historical residential ownership is not considered an environmental concern relative to the Subject Property.

4.5 Historical Topographic Map Review

MSG reviewed historical topographic maps for the Subject Property and surrounding areas dated 1920, 1922, 1969, 1975, 2014, 2017, and 2019. Copies of the historical topographic maps reviewed as part of the Phase I ESA are provided in *Appendix F, Historical Topographic Maps*.

The following table provides a summary of observations and interpretations for the Subject Property and surrounding areas based on review of each historical topographic map.

Year	Subject Property Observations	Surrounding Property Observations	Possible Concern?
1920	Not developed, Costello Drain illustrated as traversing east to west through northern portion of Subject Property	A railroad adjoins the western boundary of the Subject Property; undeveloped land surrounds the Subject Property; Mount Morris developed to the northwest	No
1922	Same as previous with the addition of marsh/swamp/wetland denoted on the eastern side of the Subject Property	Same as previous	No
1969	Same as previous, with the addition of three gravel pits illustrated south to north in the middle of the Subject Property; an access roadway is also shown coming from Lewis Road onto the eastern side of the Subject Property. Costello Drain is no longer depicted	Same as previous with the addition of three small structures adjoining the southeastern border of the Subject Property; a substation adjoins to the middle eastern border of the Subject Property	No
1975	Same as previous	Same as previous	No
2014	No public buildings observed, only public roadways and waterways depicted	No public buildings observed, only public roadways and waterways depicted	No
2017	Same as previous, wetland/swap depicted throughout northern portion of Subject Property	Same as previous	No
2019	Same as previous	Same as previous	No

Upon review of the provided historical topographic maps, the Subject Property was illustrated as undeveloped land with the exception of the use of three gravel pits from at least 1969 to at least 1975. There was no evidence of any structures constructed on the property from at least 1920 to at least 2019. Wetland/marsh/swamp land are depicted on the Subject Property and adjoining properties. A railroad is depicted as adjoining the western boundary of the Subject Property from at least 1920 until at least 2019. Based upon review of the provided historical topographic maps, the gravel pits from at least 1969 to at least 1975, are considered an environmental concern relative to the Subject Property and should be considered when evaluating future land use.

Surrounding properties generally consist of small structures typical of residential dwellings, drainage areas, and wetland/marsh/swamp land. Based upon review of the provided historical topographic maps, surrounding and adjoining properties are not considered an environmental concern relative to the Subject Property.

4.6 Historical Aerial Photograph Review

MSG reviewed historical aerial photographs for the Subject Property and surrounding areas dated 1937, 1941, 1950, 1957, 1964, 1967, 1972, 1975, 1982, 1999, 2006, 2009, 2012, 2016, and 2020. Below is a summary of observations and interpretations for the Subject Property based on review of each historical aerial photograph. Copies of historical aerial photographs reviewed as part of the Phase I ESA are provided in *Appendix G, Historical Aerial Photographs*. The following table provides a summary of observations and interpretations for the Subject Property and surrounding areas based on review of each historical aerial photograph.

Year	Subject Property Observations	Surrounding Property Observations	Possible Concern?
1937	Appears to be undeveloped land, mostly open field with a small section of forest on the western border of the Subject Property; some evidence of previous agricultural use in the southern portion of the Subject Property	A railroad is observed adjoining the western boundary of the Subject Property; agricultural fields and small structures or vacant land adjoin the south, east and west borders of the Subject Property; vacant land adjoins the north border	No
1941	Same as previous	Same as previous	No
1950	Same as previous, with the exception of a small structure observed in the southeast corner of the Subject Property; agricultural fields in the southern section, as well as in the southeast and middle of the northern section of the Subject Property	Same as previous	Yes
1957	Same as previous, agricultural fields appear to no longer be in use	Same as previous, a substation is constructed southeast of Subject Property	No
1964	Three gravel pits/landfills appear traversing south to north throughout the Subject Property, access road connecting from the east side to the gravel pit areas	Same as previous, with the exception of northern border appears to have a gravel pit adjoining it	Yes
1967	Same as previous	Same as previous	Yes
1972	Access road from north connecting to eastern access road and gravel pits; forest on western border no longer depicted; majority of Subject Property is vacant open field	Same as previous, gravel pit adjoining northwestern border appears to be filled, more residential to the north	Yes
1975	Same as previous	Same as previous	Yes
1982	Same as previous; small structure observed in southeast corner of the Subject Property is no longer observed; more trees and vegetation throughout Subject Property, gravel pits/landfills appear to be filled to grade	Same as previous	Yes
1999	Same as previous, access roadways appear overgrown, much more forest/vegetation throughout Subject Property	Same as previous, except a commercial structure built adjoining southwest corner of Subject Property	No
2006	Same as previous with the addition of a man-made pond in the southeast corner of the northern section of the Subject Property	Same as previous	No
2009	Same as previous	Same as previous	No
2012	Same as previous	Same as previous	No
2016	Same as previous	Same as previous	No
2020	Same as previous	Same as previous	No

As indicated in the table above, the Subject Property was undeveloped land or land used for agricultural purposes from at least 1937 to at least 2020. From at least 1964 to at least 1982, the Subject Property appears to have been associated with three gravel pits or landfill areas. The gravel pits/landfills areas were filled sometime between 1982 and 1999. This poses a possible environmental concern for the User and should be considered when evaluating future land use of the Subject Property. The small structure observed in the southeastern corner of the Subject Property was constructed by at least 1950 and demolished by at least 1982. While the demolition of this small structure does not warrant a REC, it should be considered by the User when evaluating future land use of the Subject Property. The northern and southern portions of the Subject Property were utilized as agricultural land from at least 1937 until at some time prior to 1957. Therefore, the historical use of the Subject Property as agricultural land; agricultural chemicals, such as pesticides, herbicides, and fertilizer would likely have been used. No information was found to suggest that agricultural chemicals were not applied in accordance with manufacturer recommendations. Application of agricultural chemicals for intended use in accordance with manufacturer's recommendations is not considered a release; therefore, potential residuals, if any, do not constitute a REC. The User should consider the use of agricultural chemicals when evaluating future land use of the Subject Property.

The Subject Property's surrounding properties generally consisted of small structures, vacant undeveloped land and some agricultural fields from at least 1937 to at least 2020. A railroad track runs adjoined the western border of the Subject Property from at least 1937 to at least 2020. Surrounding properties observed use as agricultural land, residential and commercial development, and a railroad, does not appear to pose an environmental concern relative to the Subject Property.

4.7 Sanborn Fire Insurance Map Review

Sanborn Fire Insurance Maps for the Subject Property are unmapped, therefore, were not available through EDR. A Copy of the "No Coverage Letter" is presented in *Appendix H, Sanborn Fire Insurance Maps.*

4.8 Federal and State Database Search

MSG subcontracted with EDR to perform a regulatory agency database search to evaluate the possible presence of federal and state listed sites of known or potential environmental concern that may be located within the recommended minimum search distances from the Subject Property as specified in ASTM Standard Practice E1527-21. EDR has verified to MSG that the information they have provided complies with the ASTM Standard Practice E1527-21, in that the information has been updated within the last 90 days or within 90 days of the date, the government agency makes the information available to the public.

A list of the federal and state databases researched by EDR for the current study, including a brief description of each database searched and their respective search distance radius is presented in *Appendix I, Regulatory Database Report*.

4.8.1 Database Results Summary

The Regulatory Database Report provides an extensive list of Federal, State, local and other environmental databases. Upon review of the Regulatory Database Report search of available ("reasonably ascertainable") government records, 36 geocoded database entries were identified as being located (mappable by address) within the ASTM Standard Practice E1527-21 specified minimum search distances from the Subject Property (provided in Appendix I).

4.8.1.1 Subject Property-Specific Results

The Subject Property parcels were associated with eight database entries, as summarized below:

Regulatory Database Report Map ID and Address	Identified Database	Land Use or Owners Name	Possible Concern?
A1 REALM WETLAND BANK-TROY: 03-25-0087-P	ENVIRO	REALM WETLAND BANK-TROY: 03-25-0087-P	No
2 MT MORRIS DUMPSITE	PART 201 DEL PART 201	MT MORRIS DUMPSITE	Yes
3 REMEDIATION AND LIABILITY MANAGEMENT COMPANY INC-T	ENVIRO	REMEDIATION AND LIABILITY MANAGEMENT COMPANY-TROY: 02-25-0005-WA	Yes
A4 REMEDIATION & LIABILITY MGMT. CO., -02-25-0116-1-EA	ENVIRO	REMEDIATION & LIABILITY MGMT. CO., -02-25-0116-1-EA	Yes
5 REMEDIATION & LIABILITY MGMT CO-TROY: 03-25-0081-P	ENVIRO	REMEDIATION & LIABILITY MGMT CO-TROY: 03-25-0081-P	Yes
6 3535-HUGHES DRAIN TRIB.	ENVIRO	3535-HUGHES DRAIN TRIB.	No
7 02-25-0116-MT-1	ENVIRO	02-25-0116-MT-1	Yes
8 REMEDIATION & LIABILITY MANAGEMENT-TROY: 02-25-011	ENVIRO	REMEDIATION & LIABILITY MANAGEMENT-TROY: 02-25-011	Yes

As indicated in the table above, the Subject Property is listed in the Part 201 database as well as the ENVIRO database. The Part 201 listing is due to soil and groundwater sampling due to historical waste disposal by GMC at two locations on the Subject Property. The ENVIRO database listings are from the remediation conducted at these locations on the Subject Property.

Based on review of historical documentation, there is evidence that landfilling activities took place on the Subject Property by GMC from at least 1964 to at least 1982. The historical document indicated that GMC disposed waste materials, which included metal grindings, wooden floor blocks, general refuse, and paint wastes, in two areas denoted as DA1 and DA2. These areas are located in southwest corner of Parcel Number 25-11-07-200-035. A total of 14,478 tons of fill and soil and /or remnants of twenty-eight, 55-gallon drums of paint were removed from these two areas. Verification soils and groundwater samples were collected and sampled for selected volatile organic compounds (VOCs), selected semi-volatile organic compounds (SVOCs), selected metals, and polychlorinated biphenyls (PCBs). The parameters were selected based on previous investigation

results exceeding generic residential cleanup criteria (GRCC). The results were either non-detect or below GRCC. Toluene and xylene were detected in two soil samples at DA2 above GRCC drinking water protection criteria (DWPC); however, sampling of groundwater after soil excavation indicated that toluene and xylene were not detected at DA2. According to a December 18, 2001 closure letter from the Michigan Department of Environmental Quality (MDEQ) (predecessor to Michigan Department of Environmental, Great Lakes, and Energy (EGLE)), the disposal sites were remediated to GRCC and that "all response activities required have been completed. Based on the information reviewed and the closure letter from MDEQ/EGLE indicating regulatory closure has been attained, the historical landfilling constitutes an HREC.

4.8.1.2 Adjoining Property Summary

No adjoining properties to the Subject Properties were listed in the regulatory databases.

4.8.1.3 Surrounding Properties Summary

After review of the Regulator Database Report, available mapping software, observations made during reconnaissance of the Subject Property and EGLE's Remediation Information Data Exchange (RIDE), MSG has concluded that no surrounding properties pose an environmental concern to the Subject Property. These properties were discovered to be either outside the recommended ASTM Standard Practice E1527-21 specified minimum search radii for their databases, downgradient relative to the Subject Property, or the environmental concern was properly monitored and contained.

4.8.1.4 Non-Geocoded Properties Summary

A review of the Regulatory Database Report indicates that seven non-geocoded properties were identified during the regulatory database search. When possible, MSG used available mapping software and observations made during reconnaissance of the Subject Property to eliminate these properties. As a result, these properties were discovered to be either located outside the recommended ASTM Standard Practice E1527-21 specified minimum search radii for their respective databases or of a downgradient location relative to the Subject Property.

4.9 Freedom of Information Act Requests

The following sections contain summaries of information regarding the Subject Property obtained from Freedom of Information Act (FOIA) requests submitted to the following entities:

- EGLE;
- Michigan Department of Licensing and Regulatory Affairs, Bureau of Fire Services, Storage Tank Division (LARA);
- Genesee County; and
- Genesee Township.

Regulatory requests and responses are included in Appendix J, Regulatory Correspondence.

4.9.1 Subject Property Specific Results

EGLE has not responded to MSG's FOIA request at the time of the report's presentation. Should a response be received that constitutes an environmental concern; an addendum to this report will be issued.

LARA responded to MSG's FOIA request on November 14, 2024, denying MSG's request due an address for the Subject Property not being provided.

Genesee County has not responded to MSG's FOIA request at the time of the report's presentation. Should a response be received that constitutes an environmental concern; an addendum to this report will be issued.

Genesee Township has not responded to MSG's FOIA request at the time of the report's presentation. Should a response be received that constitutes an environmental concern; an addendum to this report will be issued.

State government, county, and local government information requests and responses are included in Appendix J.

4.10 Public Information Search

As part of this Phase I ESA, MSG searched for additional information on the Subject Property on the following public information sites:

- EGLE RIDE
- National Pipeline Mapping System (NPMS)
- GIS Open Data EGLE Conservation Easements
- RACER Trust Webpage

Information obtained from RIDE and RACER Trust Webpage is summarized, as needed in Section 4.8.1.

According to the NPMS database, a petroleum pipeline traverses south to north, alongside a railroad that adjoins the western border of the Subject Property. The pipeline is owned and operated by Buckeye Partners, L.P. A review of the NPMS database did not indicate a spill or leak has occurred from the pipeline near the Subject Property. The mere presence of a pipeline adjoining the Subject Property does not warrant a REC, but should be considered when evaluating future land use of the Subject Property and is considered a BER.

According to the GIS Open Data EGLE Conservation Easements database, there are currently two conservation easements located on the Subject Property. One is 4.049 acres in size and the other is 0.174 acres in size. No other information relating to these easements is reasonably ascertained.

The current Subject Property owners, RACER Trust, provide a public access page where all documentation of previous environmental site investigations received by RACER can be found. The following documents were located on the access page for the Subject Property:

- Conestoga-Rovers & Associates (CRA) prepared a *Removal Action Completion Report (RACR)* for GM. The report on the RACER website is missing a cover with the preparation date; however, based on figures in the RACR it appears the report was prepared August 30, 2001. The RACR discussed the remedial activities completed, background information regarding the disposal areas at the Subject Property, summary of previous investigative activities conducted in June 1991, September to November 1992, and 1996, removal activities, verification sampling during excavation activities, statistical analysis of verification sampling results, and conclusions based on remedial activities performed. The RACR document indicated that GMC disposed waste materials, which included metal grindings, wooden floor blocks, general refuse, and paint wastes, in two areas (DA1 and DA2) located in southwest corner of Parcel Number 25-11-07-200-035. A total of 14,478 tons of fill and soil were removed from the two areas with remnants of twenty-eight 55-gallon drums of paint removed from DA2. Verification soils and groundwater samples were collected and sampled for selected VOCs, selected SVOCs, selected metals, and PCBs. The parameters were selected based on previous investigation results GRCC. The results were either non-detect or below GRCC. Toluene and xylene were detected in two soil samples at DA2 above GRCC DWP criteria; however, sampling of groundwater after soil excavation indicated that toluene and xylene were not detected at DA2. CRA made the following conclusions:

- *"all of the surface debris was removed from the Sites. A total of approximately 8.6 tons of surface debris consisting of old cars, household appliances, and wooden floor blocks was removed from the Sites;*
- *all of the impacted soils have been removed from the Sites. A total of 14,748 tons of soil were excavated and disposed off-Site;*
- *a total of twenty-eight 55-gallon drum remnants were removed from the Site;*
- *the soil verification sampling demonstrates that Sites have been successfully remediated to Generic Residential Criteria; and*
- *additional groundwater monitoring conducted at the Sites confirmed that there are no remaining impacts to groundwater."*

CRA stated, "*The Sites have been successfully remediated to the Generic Residential Criteria. Therefore, the Sites no longer meet the definition of a Facility under Part 201 of Michigan Public Act 451.*"

- A December 18, 2001 closure letter from the Michigan Department of Environmental Quality (MDEQ) (predecessor EGLE). The closure letter indicated that the disposal areas were remediated to GRCC and that "all response activities required have been completed."

5.0 INTERVIEWS

Pursuant to ASTM Standard Practice E1527-21, MSG attempted to conduct an interview with the owner or others knowledgeable with the Subject Property to obtain information relating to the environmental conditions at the Subject Property. The interview questions attempted to obtain information about uses and conditions noted during the record review and site reconnaissance; the existence and availability of any reports including but not limited to environmental assessments, compliance audits, environmental permits; material safety data sheets, community right-to-know or safety plans; notices or correspondence from government environmental agencies; any pending, threatened, or past litigation relevant to hazardous substances or petroleum and/or activity use limitations relating to the Subject Property.

5.1 Interview with the Owner

MSG was not accompanied by the Subject Property owner at the time of the site reconnaissance and therefore was unable to identify a representative familiar with the Subject Property to be interviewed at that time. The inability to interview the Subject Property owner is not considered a significant data gap as other sources of information indicates the prior use of the Subject Property.

5.2 Interview with Past Owner(s)

Interviews with past owners were not reasonably able to be completed within the time period during which the Phase I ESA was completed. The inability to interview the Subject Property owners is not considered a significant data gap as other sources of information indicates the prior uses of the Subject Property.

5.3 Interview with Occupants

The Subject Property is vacant; therefore, interviews with occupants were not completed as part of this study.

5.4 Interview with Others

Interviews with others were not reasonably able to be completed within the time period during which the Phase I ESA was completed. The inability to interview others regarding the Subject Property is not considered a significant data gap as other sources of information indicate the prior uses of the Subject Property.

5.5 Interviews with Local and State Governmental Officials

Interviews with local and/or state governmental officials were not reasonably able to be completed within the time period during which the Phase I ESA was completed. MSG corresponded with local and state governmental agencies through FOIA requests. Any information obtained has been incorporated into the appropriate sections of this report.

6.0 SITE RECONNAISSANCE

On November 6, 2024, Mr. Devon Conti and Mr. Michael Reece of MSG performed a visual reconnaissance survey of the Subject Property. The site reconnaissance methodologies and observations are described below.

6.1 Methodology and Limiting Conditions

During the site reconnaissance, the Subject Property was observed for evidence of potential environmental concerns such as stressed vegetation, stained surface soils, discolored surface water, aboveground storage tanks (ASTs), underground storage tanks (USTs), pad- or pole-mounted transformers, hazardous waste containers, and improper waste disposal practices.

Land use in the immediate vicinity of the Subject Property was also observed from the Subject Property or public access areas. Photographs collected during the site reconnaissance are provided in Appendix A.

6.2 General Subject Property Setting

The Subject Property is located in Mount Morris and Genesee Township, Genesee County, Michigan in a mixed residential, agricultural, and commercial area. The Subject Property totals a reported 80.35 acres of real property; the Subject Property does not have a direct address associated with it; however, the majority of the Subject Property is located off of East Stanley Road in Genesee Township, Genesee County, Michigan 48458. In addition, a 4.5 acre portion of land on the northwest corner of the Subject Property is in the City of Mount Morris, Genesee County, Michigan. Collectively, the Subject Property consists of five parcels of land, whose parcel identification numbers are 25-57-07-100-017 (3.7 acres), 25-57-07-100-018 (0.86 acres), 25-11-07-200-035 (60.87 acres), and 25-11-07-400-016(14.92 acres).

6.3 Current Uses of Adjacent Properties

A summary of current uses of adjoining properties relative to the Subject Property is listed below:

Direction	Land Use
North	Residential
West	Railroad/ Michigan Pipe & Valve/ Forested property/ Residential
East	Forested Land/ Residential/ Utility line Sub-Station (electrical)
South	Residential

MSG observed the adjacent properties from the Subject Property or public access areas. Based upon observations made at the time of MSG's site reconnaissance, the current uses of these adjoining properties do not present an environmental concern relative to the Subject Property.

6.4 Current Uses of the Subject Property

At the time of MSG's site reconnaissance, the Subject Property was observed to be undeveloped, unoccupied, vegetated and wooded land. It is split into north and south sections by an electrical power line corridor that traverses east to west through the middle of the Subject Property. There is a man-made pond in the southeastern part of the north section. Throughout the north section of the Subject Property there are walking trails that allow access to some parts of the property. The south section is predominantly dense woods with a small two-track path that leads to the electrical power line corridor.

6.4.1 Hazardous Substances and Petroleum Products in Connection with Identified Uses

At the time of MSG's site reconnaissance, MSG did not observe petroleum products or hazardous substances on the Subject Property.

6.4.2 Storage Tanks

At the time of MSG's site reconnaissance, no storage tanks were observed on the Subject Property.

6.4.3 Odors

At the time of MSG's site reconnaissance, no odors were detected on the Subject Property.

6.4.4 Pools of Liquid

At the time of MSG's site reconnaissance, no pools of liquid were observed.

6.4.5 Drums

At the time of MSG's site reconnaissance, no drums were observed.

6.4.6 Hazardous Substances and Petroleum Products Containers

At the time of MSG's site reconnaissance, no petroleum products or hazardous substances containers were observed.

6.4.7 Unidentified Substance Containers

At the time of MSG's site reconnaissance, no unidentified substance containers were observed on the Subject Property.

6.4.8 Polychlorinated Biphenyls (PCBs)

At the time of MSG's site reconnaissance, the property was surveyed for the presence of liquid-cooled electrical units (transformer and capacitors). Such units are of possible concern because they may be potential PCB sources. No transformers were observed in the immediate vicinity of the Subject Property.

6.5 Observations

The Subject Property and surrounding properties that were observed from the public right-of-way were inspected or viewed during site reconnaissance.

6.5.1 Pits, Ponds or Lagoons

At the time of MSG's site reconnaissance, a man-made pond was observed on the southeastern portion of the north section of the Subject Property. The pond was constructed due to the previous gravel pitting and landfilling done on the Subject Property; however, it was dug to use as fill dirt and sand. The pond is not an environmental concern.

6.5.2 Stained Soil or Pavement

At the time of MSG's site reconnaissance, no stained soil or pavement were observed on the Subject Property.

6.5.3 Stressed Vegetation

At the time of MSG's site reconnaissance, no signs of stressed vegetation were observed on the Subject Property.

6.5.4 Solid Waste

During MSG's site reconnaissance, some solid waste/debris was observed on the ground throughout the Subject Property. Tarps, windblown debris, bikes, a couch, some car parts (muffler), concrete and other miscellaneous waste/debris was seen throughout. This debris is most likely illegally dumped on the Subject Property. No reasonably ascertainable documentation was found to suggest that the solid waste/debris has any hazardous substances or petroleum products present or a release to the environment has occurred.

6.5.5 Wastewater

At the time of MSG's site reconnaissance, no wastewater was observed on the Subject Property.

6.5.6 Wells

At the time of MSG's site reconnaissance, no active water supply wells were observed on the Subject Property.

6.5.7 Septic Systems

At the time of MSG's site reconnaissance, no evidence of a septic system was observed on the Subject Property.

7.0 DATA GAPS

Sources of historical information that are reviewed for past uses of the Subject Property and adjacent properties include historical topographic maps, historical aerial photographs, historical city directories, federal, state and local records, and interviews of persons knowledgeable of the Subject Property. When appropriate, MSG attempted to acquire information regarding the Subject Property from each of these sources. However, our ability to opine on potential environmental concerns was limited due to the following data gaps: 1) incomplete or a lack of coverage for the Subject Property; 2) lack of FOIA responses; 3) available historical documentation that was not available in five-year increments, 4) interviews were not reasonably able to be completed within the time period during which the Phase I ESA was completed; and 5) sections of the Subject Property were unable to be accessed due to very dense vegetation and woods.

With the exception of the above-mentioned data gaps and any new information not identified heretofore, MSG does not believe there are significant data gaps that would substantially change the findings and opinions regarding this Phase I ESA for the Subject Property.

8.0 FINDINGS

MSG has performed a Phase I ESA in general conformance with the scope and limitations of ASTM Standard Practice E1527-21 for the Subject Property. Any exceptions to, or deletions from, this practice are described in Appendix B. The following is a summary of the findings associated with the Subject Property and adjacent properties discovered during the Phase I ESA investigation.

1. The Subject Property consists of four parcels of land that are split into a north section and a south section by a utility line that traverses west to east. The southern section consists of one parcel, whose parcel identification number is 25-11-07-400-016 (14.92 acres), and the northern section consists of three parcels, whose parcel identification numbers are 25-11-07-200-035 (60.87 acres), 25-57-07-100-018 (0.86 acres), and 25-57-07-100-017 (3.7 acres). The majority of the Subject Property is located off of East Stanley Road in Genesee Township, Genesee County, Michigan 48458. In addition, a 4.5 acre portion of land on the northwest corner of the Subject Property is in the City of Mount Morris, Genesee County, Michigan. The Subject Property is located west of North Lewis Road, east of North Saginaw Road, and north of East Stanley Road in a mixed residential and commercial area of Mount Morris and Genesee Township. Access to the Subject Property is available from East Stanley Road. At the time of MSG's site reconnaissance, the Subject Property was vacant land that is heavily wooded. A man-made pond was observed in the southeast corner of the northern section of the Subject Property. The northern section of the Subject Property contains many walking trails throughout. The southern section of the Subject Property is predominately dense woods with a small two-track path that leads to the electrical power line corridor. There is a railroad track and a petroleum pipeline that adjoins the entire western border of the Subject Property.
2. Based on readily available and reasonably ascertainable historical and current documentation reviewed as part of this study, the Subject Property consisted of vacant, undeveloped land from at least 1937 to at least 2020. From at least 1964 to at least 1982 gravel pitting or landfill areas appear to be associated with portions of the Subject Property. By at least 1999 these gravel pits or landfill areas were filled to grade. A small structure in the southeastern corner of the Subject Property was constructed by at least 1950 and demolished by at least 1982.
3. The elevation of the Subject Property is approximately 786 feet above mean sea level (MSL). The surface topography in the vicinity of the Subject Property is generally flat. The Costello Drain traverses east to west through the northern portion of the Subject Property, draining to the northwest. This appears to be where groundwater from the Subject Property is flowing due to the Costello Drain being located on the Subject Property. In general, regional groundwater is likely to flow southeast towards Flint River and C.S. Mott Lake. The nearest identified surface water body is C.S. Mott Lake, which is located approximately 2 miles southeast of the Subject Property. C.S. Mott Lake is hydraulically downgradient of the Subject Property at an elevation of approximately 728 feet above MSL. The direction of shallow groundwater movement typically mimics the ground surface contours, moving from topographic highs to topographic lows. This assumes that all lakes, rivers, streams, wetlands, and/or other surface water bodies are interconnected expressions of the water table.

This ESA has revealed evidence of the following HREC relative to the Subject Property.

HREC-1 Based on review of historical documentation as part of this study, there is evidence that landfilling activities took place on the Subject Property by GMC from at least 1964 to at least 1982. The historical document indicated that GMC disposed waste materials, including metal grindings, wooden floor blocks, general refuse, and paint wastes, in two areas (DA1 and DA2) located in southwest corner of parcel identification number 25-11-07-200-035. A total of 14,478 tons of fill and soil were reportedly removed from the two areas with remnants of twenty-eight 55-gallon drums of paint removed from DA2. Verification soil and groundwater samples were collected and submitted for laboratory analysis of select VOCs, SVOCs, and PCBs. The parameters were selected based on previous investigation results that were in excess of GRCC. Toluene and xylene were detected in two soil samples at DA2 above GRCC DWPC; however, sampling of groundwater that occurred post soil excavation activities indicated that toluene and xylene were not detected. According to a December 18, 2001 closure letter from MDEQ (predecessor to EGLE), the disposal sites were remediated to GRCC and that *"all response activities required have been completed*". Based on the information reviewed and the

closure letter from MDEQ/EGLE indicating regulatory closure has been attained, the historical landfilling constitutes an HREC.

This ESA has revealed evidence of the following BERs relative to the Subject Property.

BER-1 During MSG's site reconnaissance and reviewing of the National Pipeline Mapping System (NPMS), a petroleum pipeline traverses south to north alongside a railroad that adjoins the western border of the Subject Property. The pipeline is owned and operated by Buckeye Partners, L.P. A review of the NPMS database did not indicate a spill or leak had occurred from this pipeline. The mere presence of this pipeline is not representative of a REC; however, should be considered when evaluating future land use of the Subject Property.

BER-2 Based on review of historical documents, a small structure was located in the southeastern corner of the property from at least 1950 to at least 1981. This structure appears to have been demolished by at least 1982. There was no evidence of this structure during MSG's site reconnaissance and no documentation that was reasonably ascertainable regarding the construction or demolition of this small structure. The undocumented demolition of this structure does not warrant a REC; however, should be considered when evaluating future land use of the Subject Property.

BER-3 Based on a review of historical documents, the northern and southern portions of the Subject Property were utilized as agricultural land from at least 1937 until at some time prior to 1957. Agricultural chemicals, such as pesticides, herbicides, and fertilizer would likely have been used during this time period. No information was discovered that would suggest that agricultural chemicals and fertilizers were not applied in accordance with manufacturer recommendations. Application of agricultural chemicals for intended use in accordance with manufacturer's recommendations is not considered a release; therefore, potential residuals, if any, do not constitute a REC; however, should be considered when evaluating future land use of the Subject Property.

9.0 QUALIFICATIONS AND ENVIRONMENTAL PROFESSIONAL STATEMENT

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. We have developed and performed the all appropriate inquiry in general conformance with the standards and practices set forth in 40 CFR Part 312.

A signatory page at the front of this report lists the MSG personnel primarily responsible for the completion of this report. The Phase I ESA site reconnaissance was performed by Mr. Devon Conti and Mr. Michael Reece. This Phase I ESA was written by Mr. Devon Conti. Mr. Michael Reece reviewed this report and Mr. Ryan Montri reviewed and approved this report. Mr. Conti has one year experience performing Phase I ESAs. Mr. Reece and Mr. Montri each have over 25 years of experience performing and reviewing Phase I ESAs. All work associated with the research and development of this report was performed under the supervision of an Environmental Professional and was performed in general accordance with ASTM E Standard Practice 1527-21 and EPA's standards for AAI described in *40 CFR Part 312*.

APPENDIX B

LIMITATIONS FOR PHASE I ESAS

LIMITATIONS OF PHASE I ESAs

Significant Assumptions and Reliance on Available Information

In preparing this report, The Mannik & Smith Group, Inc. (MSG) has relied on information contained in the files of federal, state, and local government agencies and files available to MSG at the time of completion of this Phase I Environmental Site Assessment (ESA). Although there may have been some degree of overlap in the information provided by these sources, MSG did not attempt to independently verify the accuracy or completeness of all information reviewed or received during the course of this assessment.

Limitations and Exceptions of Assessment

The evaluations and opinions presented in this report were completed by MSG in general accordance with the methodologies and protocols recommended by the American Society for Testing and Materials (ASTM) International in their document E1527-21, titled: "*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process*" (ASTM Standard Practice E1527-21, which incorporates the United States Environmental Protection Agency's (USEPA) rule identifying federal standards and processes for conducting All Appropriate Inquiry (AAI) codified in Federal Regulation – *40 Code of Federal Regulations (CFR) Part 312 - Standards and Practices for All Appropriate Inquiries* (Standards and Practices for AAI). This report has been prepared to assist our Client with making a reasonable assessment of potential environmental concerns associated with a property and is intended to reduce, but not necessarily eliminate, uncertainty regarding the potential for RECs to exist. The results of this Phase I ESA should not and cannot be construed as a certification as to the presence or absence of RECs at a property, but rather, as a diligent and prudent review of available information within an established work scope, timeframe and budget. Undocumented, unauthorized releases of hazardous materials or petroleum products, the remains of which are not readily identifiable by visual inspection, are very difficult and often impossible to detect within the scope of the investigation.

During the course of this site-specific assessment, various documents, data and information published and obtained from private organizations, as well as municipal, state and federal agencies have been relied upon. No independent verification or confirmation with regard to the accuracy of these documents, data and information has been made, and MSG neither warrants nor guarantees the accuracy or completeness of the information provided by these outside sources.

This report is provided for the exclusive use of our client, as named within the preceding report. This client has the right to reproduce this report, in whole or in part, but no other party may rely upon the contents of this report without the expressed written consent of MSG. The reliance of any and all persons, parties, entities and/or organizations is subject to MSG's Standard Terms and Conditions, unless otherwise specifically agreed to in writing. A copy of MSG's Standard Terms and Conditions can be obtained by contacting MSG.

The findings of this report are valid as of the date indicated. Changes in the Subject Property's condition can occur with the passage of time, whether due to natural processes or the works of man on the Subject Property or adjacent properties. Changes in state-of-the-art technologies and/or applicable laws may occur. Due to these such changes, the findings of this report may be invalidated wholly or in part by changes beyond the control of MSG.

APPENDIX C

USER PROVIDED INFORMATION

USER QUESTIONNAIRE
TO COMPLY WITH THE ALL-APPROPRIATE INQUIRY RULE

Site Location:	RACER Genesee Industrial Land
Name of Person Completing this Form:	
Return Completed Form to: Mike Reece	
Email Address:	mreece@manniksmithgroup.com

1. What is the reason this Phase I Environmental Site Assessment (ESA) is being performed? As part of a marketing package.
2. Is there any available title work that has been prepared for the Site? Not that I am aware of.
3. Are you aware of any environmental liens or activity and use limitations that have been filed against the Site? If so, please describe. Not aware of any environmental lien but there may be a monetary lien by the US Treasury as a result of the GM bankruptcy settlement. I am not aware of any current use limitations but RACER intends to place restrictions on the property prior to a property transaction
4. Do you have any specialized knowledge related to the Site? For example, do you know the former uses of the Site or chemicals that are or may have been used at the Site? This information is contained in reports on RACER's webpage for the site. See address below.
5. Are you aware of any environmental reports already completed for the Site? Environmental reports may include: environmental audits, environmental site assessments, environmental permits, underground storage tank registrations, hydrogeologic reports, drinking water well installation documentation and geotechnical studies. Please provide MSG with a copy of the appropriate reports. Yes, see RACER's webpage.
6. If the Phase I ESA is currently being completed as part of a property transaction, is the purchase price of the Site significantly lower than market value? If so, why? The Phase I is not being prepared as part of a property transaction.
7. Based upon your knowledge and experience with the Site, are you aware of any environmental contamination at the Site? Reports indicate that contamination was remediated to meet EGLE Part 201 residential cleanup criteria at the time when remediation was performed.

Property Summary

Genesee Industrial Land
East Stanley Road
Genesee Township & Mount Morris, MI 48458

An 80.35-acre parcel of land, this Property is heavily wooded with a man-made pond in an industrial-zoned area. The Property is bordered on the west by railroad tracks, and was historically used as a source of clean soil for other GM projects.

County:	Genesee
Land Area:	80.35 acres
General Description:	Vacant, wooded parcel with man-made pond
Zoning:	Light industrial
Tax Parcel Number:	25-57-07-100-017, 25-57-07-100-018, 25-11-07-200-035, 25-11-07-400-016
RACER Site ID:	11050

More information about this property may be reviewed on RACER's website at www.racertrust.org/Properties/PropertyDetail/Genesee_11050.

Property Assets

- 80.35-acre vacant parcel
- Man-made pond
- Rail line adjacent to Property's western edge
- Surrounded by mixed-use development, including residential
- 322 feet of frontage along E. Stanley Road, a Class A, "all-seasons" road that was resurfaced in 2022

For a comprehensive listing and description of RACER properties, please visit https://www.racertrust.org/.

Property Details

Overview	
Location	East Stanley Road, Genesee Township & Mount Morris, MI 48458
Road Frontage & Access	322' along E. Stanley Road (Class A, "all-seasons")
Zoning/Tax ID Number(s):	RC, Mobile Home Park: 25-57-07-100-017, 25-57-07-100-018 I-1, Light Industrial: 25-11-07-200-035, 25-11-07-400-016
Total Land Area of Property (Acres)	80.35
Taxable Value	$143,200
Total Annual Property Taxes	$4,313 (2023)
Shape	Irregular
Number of Structures at Property	None
Electricity	Property is adjacent to 138 kV and 46kV Consumers Energy distribution substations, which provide increased capacity and easier redundancy options for either station. The predicted reliability (percentage of time in service) is 99.998% for the 138 kV system and 99.996% for the 46 kV system. The substations allow the servicing of a wide range of possible electric demands with minimal line construction.
Regional Transmission Organization (RTO)	https://www.misoenergy.org
Public Utilities Commission (PUC)	https://www.michigan.gov/mpsc
Natural Gas	A 6-inch medium-capacity gas main serves the property, and a high-capacity gas main is nearby, allowing for competitive delivery rates and minimal upfront costs.

Property Details (continued)

Water	Public supply, under the jurisdiction of Genesee County Drain Commissioner Waste & Water Services. 16" main along North Dort Highway, approximately 0.4 miles east of the Property.
Sewer	8" sanitary gravity main along the north ROW of Stanley Road; 36" sanitary force main along the south ROW of Stanley Road. Under the jurisdiction of Genesee County Drain Commissioner Waste & Water Services.
Stormwater	Available
Sulfur Dioxide (2010)	Attainment Area
Particulate Matter 2.5 (2006)	Attainment Area
Lead (2008)	Attainment Area
Carbon Monoxide	Attainment Area
8-Hour Ozone (2008)	Attainment Area
Nitrogen Dioxide	Attainment Area
Particulate Matter 10	Attainment Area
Vehicle Parking (Number of Spaces)	None
Previous Operations by GM	Disposal site and borrow pit
Surrounding Owners/Uses	Commercial strip plaza, vacant land & residential areas
Rail Service	Lake State Railway (adjacent to Property at west)
Name and Proximity to Nearest Interstate Highway(s)	Route 54 (approximately 1 mile); I-475 (approximately 2.5 miles)
Name and Proximity to Nearest Commercial Airport(s)	Bishop International Airport (approximately 14 miles)
Name and Proximity to Nearest Commercial Seaport(s)	Port of Detroit (approximately 76 miles)
Available Incentives	New Market Tax Credits Eligible Area

Property Ownership and Recent History

The Property was used as a borrow pit, to haul out clean soil in support of other GM remediation projects. This has resulted in a standing water pond in the southeast corner of the Property.

Community Vision for Property

The RACER Trust was created in March 2011 by the U.S. Bankruptcy Court to clean up and position for redevelopment 89 properties and other facilities owned by the former General Motors Corp. before its 2009 bankruptcy. The Settlement Agreement establishing the Trust described the criteria that the Trust, at a minimum, must consider when selling properties. These criteria include the views of the local communities. The community has provided the following in response to RACER's request:

Charter Township of Genesee
7244 N. Genesee Road • PO Box 215
Genesee, Michigan 48437
810-640-2000 • Fax 810-640-1150
www.geneseetwp.com

Dear Mr. Rasher,

The Charter Township of Genesee strongly supports RACER's commitment to the redevelopment of former General Motors properties that are located in our township. The sites are located in a transportation hub that includes major rail facilities, highways, and access to Consumers Power facilities that are capable of supporting commercial, light industrial and heavy industrial development.

Community Vision for Property (continued)

We believe there are a number of possibilities for re-development of these sites that would be beneficial to the business enterprises that locate here and to the community. We look forward meeting with you and any potential investors that may be interested in developing viable enterprises in the Charter Township of Genesee.

Sincerely,

Supervisor Steven Fuhr
Charter Township of Genesee

Steven D. Fuhr, *Supervisor*
Wayne G. Bates, *Clerk*
Tod Sorensen, *Treasurer*

Trustees
Richard Burrus
Thomas Jean
Kathy Sutton
Patricia Witte

Environmental Conditions

Waste and trash was deposited at two small areas at this site — one area approximately 3.4 acres and the other 2.2 acres. However, the waste debris and associated impacted soils were removed to generic residential cleanup criteria. This cleanup effort was completed in 2000. Post-cleanup groundwater monitoring did not identify any groundwater impacts. There are currently no environmental concerns identified at this site.

RACER Trust, U.S. EPA and State regulatory authorities offer a variety of buyer protections designed to shield your investment and restrict or eliminate your liability for environmental impacts resulting from previous uses, regardless of whether these conditions were known at the time of purchase or transfer. For more information about liability protections, please visit http://bit.ly/1EsnxjB.

Collateral Information: Access/Linkage

The Charter Township of Genesee is located on C.S. Mott Lake, just northeast of Flint. It is roughly midway between Detroit and Lansing, the state capital.

The major thoroughfare network system includes freeways, principal arterials and minor arterials. These systems connect Genesee County with the remainder of Michigan and the nation.

I-475 forms a freeway loop within the urbanized area of Flint as well as an alternate route when traveling north or south through Genesee County. In addition, it allows easy access to one of Flint's auto manufacturing areas.

I-75 is a major north-south thoroughfare that connects Genesee County to the recreational areas in northern Michigan and Canada and to the manufacturing and industrial complexes south of Genesee County.

I-69 is the primary east-west freeway connection. This highway connects the Flint area with the Cities of Lapeer and Port Huron as well as the major international Blue Water Bridge crossing to Canada at Port Huron. This is the second-busiest truck crossing between Canada and the U.S, and funnels a vast majority of the truck traffic to I-69.

The region's central location makes it a natural transportation hub. It is home to Bishop International Airport, and Amtrak provides intercity passenger rail service through Flint on the Blue Water line from Chicago to Port Huron at the border to Canada.

This property was formerly serviced by CSX Transportation, and beginning in 2019, is now served by Lake State Railway (www.lsrc.com)

**Information obtained from RACER research.*

Collateral Information: Airports

Bishop International Airport (www.bishopairport.org) is conveniently located only a half-mile from the I-75/U.S. 23 and I-69 interchange in Flint. With a modern passenger terminal that was built in 1993, Bishop International is Michigan's third-busiest airport, and boasts the lowest average airfare in Michigan. For business travelers, there is a Business Center with free Wi-Fi (available throughout the terminal), work stations, electrical outlets and copier service.

Nonstop flights are available to Atlanta, Baltimore, Detroit, Chicago, Fort Myers, Fla., Las Vegas, Minneapolis, Orlando and Tampa.

FedEx operates a cargo-handling service at the airport.

To the south, Detroit Metropolitan Wayne County Airport (www.metroairport.com) is one of the busiest airports in the U.S. and among the world's largest air transportation hubs.

Detroit is the second-largest hub and primary Asian gateway for Delta, the world's largest airline. The airport also is a major base of operations for ultra-low cost carrier Spirit Airlines. Together with 13 additional passenger airlines — including three foreign flag carriers — Detroit's airlines and their regional partners offer service to more than 150 non-stop destinations around the globe.

Detroit also is one of the newest, most operationally capable and efficient airports in North America, with two new passenger terminals, 145 gates, six jet runways, and two modern Federal Inspection Services facilities for international arrivals.

More than 32 million passengers traveled through the Detroit airport in 2012, including more than 2.8 million international travelers. In addition, more than 218,000 metric tons of cargo are transferred through the airport that year.

Willow Run Airport (www.willowrunairport.com), managed by the Wayne County Airport Authority, is located seven miles west of Detroit Metropolitan Airport. Occupying 2,600 acres, Willow Run serves cargo, corporate and general aviation clients. The airport offers four runways, 24-hour FAA Tower and U.S. Customs operations to provide ease of access for its users.

**Information obtained from RACER research.*

Collateral Information: Airports (continued)

Willow Run Airport has more than 65,000 operations per year. Approximately 200 million pounds of cargo are transferred through the airport annually, making Willow Run the fourth-largest airport in Michigan.

The airport accommodates small private planes as well as international 747 cargo jets. Cargo, corporate and general aviation users receive the advantages of a large airport and the conveniences of a small one. Along with nearby inter-modal transportation, its prime location gives easy access to major U.S. and international markets and provides ample room for growth.

Duford Field is a small, limited-use airfield in Genesee Township.

Collateral Information: Port Facilities

Goods can be moved overland quickly to the Port of Detroit (www.portdetroit.com), which offers access to the Great Lakes and overseas via the St. Lawrence Seaway.

The Port of Detroit, operated by the Detroit/Wayne County Port Authority, moves 750,000 tons of steel annually, supplying the region's automotive industry. The port has long been used to import lumber, copper and automobiles as well. Its location near the Ambassador Bridge and major interstate freeways makes the Port of Detroit accessible and efficient.

The Port of Detroit, located on the Detroit River in southwest Detroit, covers 35 acres, with docks that are approximately 2,150 feet in length and a seaway depth of 27 feet. The facility has 128,000 square feet of covered storage for rolled steel or other products.

The port includes a foreign trade zone that is administered by the Greater Detroit Foreign Trade Zone, Inc. A foreign trade zone provides competitive advantages to companies involved in international trade through deferral, reduction or elimination of U.S. Customs duties. A foreign trade zone is an area within the geographical boundary of the United States that is considered to be outside the Customs territory of the U.S. Companies may bring foreign and domestic merchandise into zones for storage, testing, relabeling, displaying, manufacturing, and for the eventual entry into U.S. commerce or for exportation from the U.S. All Customs duties and federal excise taxes are deferred while merchandise is in a zone and, in many instances, these duties or taxes can be substantially reduced or eliminated through zone use.

**Information obtained from RACER research.*

Collateral Information: Regional Bus Service

The Mass Transportation Authority (www.mtaflint.org), a public transit provider, has more than 14 fixed-service routes providing service to Flint residents and visitors. Access to these routes is located along major arterials, such as North Saginaw, Franklin, South Saginaw and Fenton Road. Additionally, the MTA system provides access to the downtown area, and also the Flint campus at the University of Michigan.

Primary route service hours are Monday-Saturday 6:30 a.m.-11:30 p.m. and Sunday 9:30 a.m.-7 p.m. The MTA does not operate buses on New Year's Day, Memorial Day, Fourth of July, Labor Day, Thanksgiving and Christmas.

*Information obtained from RACER research.

Collateral Information: Utilities and Natural Gas

Consumers Energy (www.consumersenergy.com), headquartered in Jackson, Mich., provides natural gas and electricity to more than 6 million of Michigan's 10 million residents and serves customers in all 68 of the state's Lower Peninsula counties.

Consumers Energy works with local businesses and potential investors to make it easier and more efficient to do business. From energy efficiency solutions to e-business to economic development, Consumers Energy has the resources to help.

The Genesee Township Department of Public Works (www.geneseetwp.com/departments/dpw/) administers water and sewer service in the township.

Collateral Information: Zoning and Business Assistance

Zoning details can be found in the Property Details pages.

The Property is located within the boundaries of Foreign Trade Zone 140. A FTZ provides competitive advantages to companies involved in international trade through deferral, reduction or elimination of U.S. Customs duties. Potential buyers interested in applying for FTZ status should contact the FTZ 140 grantee, Flint and Genesee Chamber of Commerce, at 810-600-1429.

Flint-Genesee Chamber of Commerce (www.flintandgenesee.org) offers business services and expertise for companies expanding in Flint-Genesee County, established local businesses and entrepreneurs building start-ups. The chamber is dedicated to strengthening the businesses and economy of the community by welcoming and supporting new business and ensuring that local business owners have the tools and knowledge to stay competitive.

Through effective partnerships with multiple organizations and support from municipal, business and foundation funds, the chamber is able to offer many of these services at no cost:

- Assisting in diversification and expansion into new sectors
- Obtaining government contracts
- Streamlining processes and reducing waste
- Providing consulting and training sessions
- Conducting site searches
- Incentive assistance and negotiation
- Accessing workforce hiring and training support
- Consulting and project management assistance

Collateral Information: Zoning and Business Assistance (continued)

- Business attraction

The Brownfields Economic Development Initiative (www.hudexchange.info/bedi) is a key competitive grant program that the U.S. Department of Housing and Urban Development administers to stimulate and promote economic and community development. BEDI is designed to assist cities with the redevelopment of abandoned, idled and underused industrial and commercial facilities where expansion and redevelopment is burdened by real or potential environmental contamination.

BEDI grant funds are primarily targeted for use with a particular emphasis upon the redevelopment of brownfields sites in economic development projects and the increase of economic opportunities for low-and moderate-income persons as part of the creation or retention of businesses, jobs and increases in the local tax base.

BEDI funds are used as the stimulus for local governments and private sector parties to commence redevelopment or continue phased redevelopment efforts on brownfields sites where either potential or actual environmental conditions are known and redevelopment plans exist. HUD emphasizes the use of BEDI and Section 108 Loan Guarantee funds to finance projects and activities that will provide near-term results and demonstrable economic benefits.

The Michigan Economic Development Corporation (www.michiganbusiness.org) assists thousands of Michigan businesses each year. Whether it's a new venture, expansion, relocation or even a concern with another agency of state government, the MEDC can help. The MEDC can supply customized economic development services to help companies and communities — both large and small — find success in a very competitive global economy.

The MEDC's experienced staff helps businesses in the areas of information on Michigan's key industries; site development services; business financing and incentives; labor information; permit assistance; and environmental assistance.

Directory of Financial Programs and Incentives Available in Michigan

The State of Michigan offers a variety of financial programs and incentives to assist businesses seeking to build or expand in the state. Fact sheets and other details about each of the following can be found on the Michigan Economic Development Corporation website at www.michiganbusiness.org/Fact-Sheets/?f=sub_incent, or by clicking on the links at the top of each paragraph below:

- **Agribusiness Financing Programs** — http://puremi.ch/1Biyxxm

  The Michigan Department of Agriculture & Rural Development (MDARD), in partnership with the MEDC, offers multiple programs to help support the financing and growth of agricultural businesses in Michigan.

- **Border County Incentives** — http://bit.ly/1ceniFv

  Eligible new warehouse, distribution, or logistics facilities that locate in a county that borders another state or Canada may qualify for tax incentives.

- **Brownfield Redevelopment Authority (P.A. 381)** — http://bit.ly/11YWPqU

  The creation of a Brownfield Redevelopment Authority allows local decision-making in the various aspects of Brownfield redevelopment.

- **Business Improvement District / Principal Shopping District / Business Improvement Zone (BID/PSD/BIZ)** — http://puremi.ch/1C4RBiM

  Cities, villages and urban townships may create a Business Improvement District (BID) or a Principal Shopping District (PSD) to promote economic development within a defined area. A BID/PSD allows a municipality to collect revenue, levy special assessments and issue bonds in order to address maintenance, security and operation of that district. A Business Improvement Zone (BIZ) may levy special assessments to finance activities and projects outlined within a zone plan for a period of 10 years.

Directory of Financial Programs and Incentives Available in Michigan (continued)

- **Capital Access Program** — http://puremi.ch/19EZOQn

  The Capital Access Program, or CAP, is an innovative loan program available to assist businesses with capital needs. The maximum loan amount is $5 million.

- **Commercial Redevelopment Act (P.A. 255)** — http://bit.ly/1enLg7u

  This program encourages the replacement, restoration and new construction of eligible commercial property by abating the property taxes generated from new investment for a period up to 12 years.

- **Commercial Rehabilitation Act (P.A. 210)** — http://bit.ly/1aHIGoT

  This program encourages rehabilitation of eligible commercial property 15 years or older by abating the property taxes generated from new investment for a period up to 10 years. The primary purpose of the facility must be for operation of a commercial business enterprise or multifamily residential use.

- **Community Development Block Grant (CDBG) Program Business Development Initiatives** — http://puremi.ch/1AP2mS6

  CDBG is a federal grant program funded by the U.S. Department of Housing and Urban Development (HUD). Funds are used to provide grants to eligible counties, cities, villages and townships, usually with populations under 50,000, for economic development, community development and housing projects.

- **Community Development Block Grant (CDBG) Program Community Development Initiatives** — http://bit.ly/176lvSL

  The Michigan Strategic Fund (MSF), in cooperation with the MEDC, administers the economic and community development portions of the CDBG program. CDBG is a federal grant program utilizing funds received from the U.S. Department of Housing and Urban Development (HUD). This fact sheet provides a broad overview of the community development portions of the program that the MEDC administers, including Blight Elimination, Façade Improvements, Downtown Public Infrastructure and Signature Building Acquisition.

Directory of Financial Programs and Incentives Available in Michigan (continued)

- **Community Development Block Grant Revolving Loan Fund (RLF)** — http://bit.ly/144S2HH

  The Revolving Loan Fund (RLF) portion of Michigan's CDBG Program has a specific focus: lending to small businesses that are unable to secure competitive financing traditionally, but will meet a national objective of the CDBG Program. The program provides funds through either existing RLFs based within a specific Unit of General Local Government (UGLG) or through newly established Regional RLFs.

- **Community Ventures** — http://puremi.ch/19EZYHq

  An economic development initiative that promotes employment and social enterprise. The mission of CV is to alleviate poverty and promote safe and vibrant communities.

- **Corridor Improvement Authority (P.A. 280)** — http://bit.ly/15yUnZb

  The Corridor Improvement Authority assists communities with funding improvements in commercial corridors outside of their main commercial or downtown areas.

- **Emerging Technologies Fund (ETF)** — http://bit.ly/11IDV7R

  The Michigan Emerging Technologies Fund (ETF) expands funding opportunities for eligible Michigan technology-based small businesses in the federal innovation research and development arena.

- **Geographic Renaissance Zones** — http://bit.ly/11YZXmq

  Geographic Renaissance Zones are regions of the state designated as virtually tax free for any business or resident presently in or moving to a zone. The zones were designed to provide selected communities with a market-based incentive of no state or local taxes to encourage new jobs and investment.

Directory of Financial Programs and Incentives Available in Michigan (continued)

- **Historic Neighborhood Tax Increment Financing Authority (HNTIF)** — http://bit.ly/10NGCd6

  A Historic Neighborhood Tax Increment Financing Authority may be established to fund residential and economic growth in local historic districts. An authority may also issue bonds to finance these improvements.

- **Industrial Property Tax Abatement (P.A. 198)** — http://bit.ly/1fscJRT

  Industrial property tax abatements provide incentives for eligible businesses to make new investment in Michigan. These abatements encourage Michigan manufacturers to build new plants, expand existing plants, renovate aging plants, or add new machinery and equipment. High-technology operations also are eligible for the abatement.

- **Local Development Financing Act (LDFA) (P.A. 281)** — http://bit.ly/12dNC19

  The Local Development Financing Act allows a city, village or urban township to utilize tax increment financing to fund public infrastructure improvements — such as sewer and water lines, and roads — to promote economic growth and job creation.

- **Michigan Business Development Program** — http://bit.ly/1iq4PeD

  The Michigan Business Development Program is a new incentive program available from the Michigan Strategic Fund (MSF), in cooperation with the Michigan Economic Development Corporation (MEDC). The program is designed to provide grants, loans or other economic assistance to businesses for highly competitive projects in Michigan that create jobs and/or provide investment.

- **Michigan Collateral Support Program** — http://bit.ly/1358ue4

  The Michigan Collateral Support Program supplies cash collateral accounts to lending institutions to enhance the collateral coverage of borrowers. To be eligible, the company must fall under the definition of a firm that may be eligible for a Michigan Economic Growth Authority tax credit.

Directory of Financial Programs and Incentives Available in Michigan (continued)

- **Michigan Community Revitalization Program** — http://bit.ly/11Z1byb

  The Michigan Community Revitalization Program (CRProgram) is a new incentive program available from the Michigan Strategic Fund (MSF), in cooperation with the Michigan Economic Development Corporation (MEDC), designed to promote community revitalization that will accelerate private investment in areas of historical declining values, contribute to Michigan's reinvention as a vital, job generating state, foster redevelopment of functionally obsolete or historic properties, reduce blight and protect natural resources of the state. The program is designed to provide grants, loans, or other economic assistance for eligible investment projects in Michigan. Generally, no funds will be disbursed until the project is verified as complete.

- **Michigan Corporate Income Tax** — http://bit.ly/18b5rSy

  A 6% Michigan Corporate Income Tax (CIT) applies to C corporations and any entity that elects to be taxed as a C Corporation. Income is apportioned based 100% on the sales factor. Corporations with less than $350,000 of apportioned gross receipts or less than $100 in liability will not be required to file or pay the CIT.

- **Michigan Defense Center (formerly known as the Defense Contract Coordination Center or DC3)** — http://puremi.ch/19F04ig

  The Michigan Defense Center (MDC) provides resources and guidance to Michigan-based businesses to secure defense contracting opportunities to create jobs and increase Michigan's share of defense business.

- **Michigan Loan Participation Program** — http://bit.ly/11IFtP3

  The Michigan Loan Participation Program participates with lenders to finance diversification projects when faced with eligible borrower companies whose projected cash flows are considered speculative by the lender.

- **Michigan Manufacturing Technology Center (MMTC)** — http://puremi.ch/19F08yh

  MMTC offers direct technical assistance to small- and medium-sized manufacturers and food processors to connect them to the best manufacturing practices and technologies available. Services are delivered through regional affiliates.

Directory of Financial Programs and Incentives Available in Michigan (continued)

- **Michigan Personal Property Tax Reform** — http://puremi.ch/1C4UBM9

  Beginning in 2014, Personal Property Tax (PPT) was phased out for most businesses, substantially reducing compliance and administrative costs for businesses. This reform will be especially attractive to manufacturers who rely on expensive capital investments in tools and other equipment.

- **Neighborhood Enterprise Zone** — http://bit.ly/19vH8N8

  The Neighborhood Enterprise Zone Program provides a tax incentive for the development and rehabilitation of residential housing in communities where it may not otherwise occur.

- **Neighborhood Improvement Authority** — http://bit.ly/18b5VIk

  A Neighborhood Improvement Authority (NIA) may be established, and may use its funds for residential and economic growth in residential neighborhoods. An authority may also issue bonds to finance these improvements.

- **Next Michigan Development Act** — http://puremi.ch/1LzF7Gg

  Established by PA 275 of 2010, the Act is to encourage the creation of Next Michigan Development Corporations (NMDC) to foster economic opportunities in the Michigan. As of March 2015, there were five active NMDCs that can grant incentives to new and expanding businesses in Michigan.

- **Obsolete Property Rehabilitation Act (OPRA)** — http://bit.ly/1eRcCh7

  Obsolete Property Rehabilitation Act provides for a tax incentive to encourage the redevelopment of obsolete buildings that are contaminated, blighted or functionally obsolete. The goal is to rehabilitate older buildings into vibrant commercial and mixed-use projects.

Directory of Financial Programs and Incentives Available in Michigan (continued)

- **Personal Property Tax Relief in Distressed Communities (P.A. 328)** — http://bit.ly/1fMChuA

  Personal Property Tax Relief in Distressed Communities allows distressed communities, county seats and certain border county communities to abate personal property taxes on new investments made by eligible businesses.

- **Private Activity Bond Program (former IRDB)** — http://bit.ly/1bry5zw

  Similar to public financing for revenue-generating projects; the governmental unit borrows money from private capital markets, secured only by the project's revenues rather than the government's full faith and credit. Interest income earned on bonds is tax-exempt, thereby reducing the cost of capital.

- **Pure Michigan Business Connect - Program Overview** — http://puremi.ch/1BaVWMo

  Michigan Business Connect is a public-private initiative developed by the MEDC that introduces Michigan companies to growth opportunities. Companies receive business assistance at little to no cost; access to a new business-to-business (B2B) network; and find new customers while also leveraging procurement resources to enhance their supply chains.

- **State Essential Services Assessment Exemption and Alternative State Essential Services Incentive Programs (SESA)** — http://puremi.ch/1BWuohq

  Projects located in Eligible Distressed Areas (EDAs) that result in $25 million or more of qualifying investments in eligible manufacturing personal property may be considered for a State Essential Services Assessment (SESA) Exemption. Projects that are not located in a distressed area may be considered for an Alternative SESA if the MSF Board determines the project is a transformational project.

- **Tax Exemptions for Michigan Companies** — http://bit.ly/LvZPZU

  A variety of specialized tax exemptions are highlighted.

Directory of Financial Programs and Incentives Available in Michigan (continued)

- **Taxable Bond Financing** — http://bit.ly/MrQxPk

  This program can provide small- and medium-sized companies with access to public capital markets normally available to larger companies.

- **Tool & Die Recovery Zones** — http://bit.ly/1enN8gy

  The Michigan Strategic Fund Board is empowered to designate up to 35 tool and die renaissance recovery zones. A list of requirements for consideration can be found here: http://bit.ly/1enN8gy.

Regional Overview: Community Snapshot

The Charter Township of Genesee was established in 1838 and is bordered by the Flint, Burton, Mount Morris, Mount Morris Township, Richfield Township and Vienna Township. Family entertainment in Genesee Township includes such popular destinations as Huckleberry Railroad, Crossroads Village, Johnson Memorial Library, Mott Lake, Stepping Stones Falls and BlueBell Beach, among others.

The greater Flint area is the population and economic anchor of a larger region that extends into Oakland, Lapeer, Shiawassee, Saginaw and Tuscola counties. This primary trade area, with a total population of approximately 640,000 residents, is the geographic boundary from which Flint/Genesee County and its businesses draw approximately 60 percent of their visitors, customers and workforce.

Beginning in the late 1800s, the economy of the Flint area has been heavily influenced by the production of vehicles — initially, the wagon and carriage industry and, later, the automobile industry. The establishment of the Durant-Dort Carriage Company and numerous other subsidiary manufacturers in the 1880s first led to Flint becoming known as "Vehicle City." Beginning in the 1900s, Flint's manufacturing companies quickly shifted production from wagons to automobiles and automobile parts. During this time, General Motors and Chevrolet Motor Company established several large automobile manufacturing complexes within the Flint area.

The automobile industry flourished in the Flint area through the 1970s, with the total General Motors employment reaching more than 80,000 workers. Beginning in the late 1970s and continuing through today, however, a significant decline in the automobile industry has occurred, which has forced the closures of numerous manufacturing plants in the Flint area. Today, the total General Motors employment in Genesee County has declined to below 10,000 workers.

During this period of great economic upheaval, the Flint region is seeking to create a sustainable economy and reestablish economic prosperity.

Regional Overview: Workforce

The U.S. Department of Labor's Bureau of Labor Statistics reported a preliminary unemployment rate of 4.3 percent in the Flint labor market for September 2019, the most recent month for which statistics are available. The state rate was 4.2 percent and the national rate was 3.5 percent.

At the state level, a variety of industry sectors have been proposed as strategic opportunities for job growth to bring Michigan out of the recession and lessen the state's historical reliance on the manufacturing and automotive industries. Some prognosticators have recommended that Michigan secure its future by focusing on electronics, biotech and biofuels, and health care.

As demonstrated by the recent passage of the Clean Renewable and Efficient Energy Act, the State of Michigan also is eager to promote alternative energy and tap into the job growth potential of the alternative energy sector.

Within the Flint region, as the manufacturing and automotive sectors have declined, other industries have become much more prevalent in the local employment base. This represents a positive trend toward diversification and stabilization of the local economy.

By 2008, health care and social assistance had surpassed manufacturing as the largest employer at 19.5 percent, as well as generator of wages at 22.8 percent. Office-using industries had overtaken manufacturing as a share of county-wide wages, reflecting the growing importance of service-based industries in the local economy. This was driven primarily by growth in finance, insurance and health care sectors.

The 2010 Flint & Genesee County Comprehensive Economic Development Strategy introduces both short-term and long-term strategies to foster job creation within the Flint region. One short-term job creation strategy is to focus on capital spending for specific economic development projects that can sustain construction employment and lay the groundwork for long-term economic progress. Another short-term strategy is to focus on jobs sustained by maximizing existing local opportunities, such as stable automotive, health care and education sectors; construction employment; government contract acquisition; and small business support and incubation.

The Flint/Genesee Job Corps (www.flintgenesee.jobcorps.gov/faq.aspx) offers hands-on career technical training as well as academic training. Its services include career planning, on-the-job training, job placement, residential housing, food service,

Regional Overview: Workforce (continued)

driver's education, health and dental care, a bi-weekly basic living allowance and clothing allowance. Some centers offer childcare programs for single parents, as well.

The Michigan Economic Development Corporation (www.michiganbusiness.org) is ready and able to provide an extensive talent package through its Talent Enhancement program. These services are provided by a team that includes economic development experts, workforce development specialists and college placement offices, coordinated by a designated Talent Advisor who works closely with a company's leadership team to create and implement a custom Talent Enhancement strategy. The MEDC programs are designed to attract, train and retain key talent who will help drive business success.

The following tools are available to identify potential job candidates:

- Pure Michigan Talent Connect (www.MiTalent.org) for job postings and resume searches.
- Virtual Career Fairs.
- Feature opportunities and company profiles in e-newsletters that reach 500,000 job seekers.
- Social media campaigns that includes Facebook, LinkedIn and Twitter.
- Coordination with Michigan college and university placement offices for on-campus interviewing and promotions, as well as a feature in communications to all college placement offices.
- Robust series of events and career fairs to facilitate in-person connections.

The Michigan Talent Bank (www.mitalent.org) is a free internet-based resume and job bank available to employers. On average the system has 60,000 resumes from across the state.

Associated Builders & Contractors (www.abcgmc.org) provides training on all facets of construction from demolition to construction and maintenance.

Regional Overview: Education

The Genesee School District (www.genesee.k12.mi.us) is a small district with two schools — one for pre-k through 6th grade, the other for 7th through 12th.

The state-run Michigan School for the Deaf (www.michiganschoolforthedeaf.org) is located in Flint. The Valley School (www.valleyschool.org/vweb_home.htm) is a small private K-12 school.

There are four colleges universities in and around Flint, including the University of Michigan-Flint (www.umflint.edu). Since 1956, the University of Michigan-Flint has embraced the importance of "doing" as fundamental to each student's personal, professional and academic growth. As part of the world-renowned University of Michigan system, UM-Flint is committed to the development of the next generation of "Leaders and Best." UM-Flint faculty from more than 100 areas of study lead the development of research and service-learning projects that match course curriculum with today's most-pressing issues. Such projects bring learning to life, address community needs, and fulfill students' desires to contribute to "something bigger than themselves."

Kettering University (www.kettering.edu), formerly known as GMI for General Motors Institute, is best known for its engineering and hard sciences programs. Kettering offers some of the nation's most advanced cooperative education students, to build companies build highly productive, professional workforces. Innovation and entrepreneurship are infused throughout all of Kettering's engineering, science, math and business programs. Recognized by U.S. News & World Report as one of the top co-op schools in the nation, Kettering has the experts, the labs and the programs that bring theory and practice together better than anyplace else. Kettering also can satisfy the continuing education needs of a workforce. Corporations and organizations searching for a facility for research can connect to state-of-the-art labs and knowledgeable faculty through Kettering's research opportunities.

Mott Community College (www.mcc.edu) is a community college in Flint with satellite campuses in nearby Fenton, Lapeer and Clio. Since its founding in 1923 as Flint Junior College, Mott Community College has grown to become the largest college in the Flint/Genesee County region and an institution marked by innovation, excellence and wide support in the community. Surveys reveal that more than half the households in Genesee County contain a present or former MCC student. From traditional liberal arts and college transfer to high-tech computer and simulation manufacturing, MCC offers the community more than 100 different programs to prepare for successful careers and productive lives.

Regional Overview: Education (continued)

As of August 2014, Mott's president is Dr. Beverly Walker-Griffea, the first female and first African American president in Mott Community College's history. She is committed to academic excellence, student access and success, dynamic industry partnerships, and significantly impacting local economies. The college features its landmark Regional Technology Center (RTC), a $40 million high-technology educational facility that enabled Mott to create the world's first Manufacturing Simulation Technology curriculum with support from the National Science Foundation, the U.S. Department of Labor and the Mott Foundation.

Central Michigan University (www.cmich.edu) has a satellite location in Flint (http://bit.ly/OKlbz6). It offers master's and bachelor's degree completion programs designed for working adults. Its current location in Flint opened in 2004.

Regional Overview: Largest Employers in Flint Area

• General Motors	7,500 employees
• Genesys Medical Center	3,500
• McLaren Regional Medical Center	2,785
• Hurley Medical Center	2,780
• Diplomat Pharmacy	1,120
• University of Michigan-Flint	1,098
• Huntington Bank	600
• Creative Foam Corporation	600

• Northgate	211
• TMI Climate Solutions	200
• Client Financial Services	180
• HSS Material Management	165
• Goyette Mechanical	165

*: List does not include governments or school districts

Regional Overview: Medical Facilities and Emergency Services

Hurley Medical Center (www.hurleymc.com) in Flint provides the region's only Level I Trauma Center, as well as neonatal intensive care, pediatric intensive care, a pediatric emergency department and a burn unit.

Providing the most innovative, leading-edge technology and medical services, Hurley Medical Center is widely recognized as an institution of exceptional excellence.

As the safety-net provider for the Flint-Genesee County area, Hurley Medical Center is vitally important to the people of the community. It treats every person who comes in, regardless of ability to pay, and also routinely goes into surrounding neighborhoods to participate in health fairs, expos and community fundraisers. Its doctors and nurses visit schools, places of worship, community groups, libraries, professional organizations and assisted-living facilities, talking with people about their health and conducting screenings that can identify potential problems or conditions.

McLaren Regional Medical Center (www.mclarenregional.org/flint/flint.aspx) has a legacy of clinical excellence and a longstanding tradition of compassionate, patient-focused care.

McLaren-Flint continues to be mid-Michigan's leading health care provider. The 378-bed teaching hospital is affiliated with Michigan State University College of Human Medicine (www.humanmedicine.msu.edu), blending the experience and expertise of its medical staff with MSU's physicians-in-training, thereby delivering academic, clinical and research-based innovations, world-class treatment, and cutting-edge technology to mid-Michigan residents.

McLaren's 2,600 employees and 600 medical staff members combine "high tech" with "high touch" health care. McLaren's commitment to clinical quality earned it recognition among the Top 100 Hospitals nationwide.

Two former full-service hospitals — St. Joseph's Hospital and Flint Osteopathic Hospital — are now medical clinics that are part of the Genesys Health System (www.genesys.org), and currently referred to as Genesys East Flint Campus and Genesys West Flint Campus, respectively.

Who is RACER and What Do We Do

The RACER Trust was created in March 2011 by the U.S. Bankruptcy Court to clean up and position for redevelopment 89 properties and other facilities owned by the former General Motors Corp. before its 2009 bankruptcy.

Offers for purchase must be evaluated by RACER against six criteria required by a Settlement Agreement that, with the Court's approval, created the Trust. You may view the Settlement Agreement at www.racertrust.org/About_RACER/Settlement_Agreement. While purchase price is a factor, RACER also must consider each proposal's ability to create jobs and generate new economic opportunity in the communities hurt by the GM bankruptcy. RACER will require prospective buyers to furnish detailed information to demonstrate that its offer satisfies each of the six criteria described in the Settlement Agreement.

The RACER Trust Redevelopment Team:

Bruce Rasher
Redevelopment Manager
brasher@racertrust.org

Patricia Spitzley
Deputy Redevelopment Manager and
Director of Government Relations
pspitzley@racertrust.org

Steven Black
Transaction Manager
sblack@racertrust.org

Conditions

The material contained in this brochure is for the purpose of considering the purchase of the Property (the "Property") described herein.

The information contained in this brochure was prepared by the Revitalizing Auto Communities Environmental Response Trust ("RACER" or "Trust"), which owns the Property. It is intended to be used by prospective buyers in evaluating this Property for sale. Neither RACER, nor its respective officers, employees or agents, makes any representation or warranty, express or implied, as to the completeness or the accuracy of the material contained herein or any of its contents, and no legal commitments or obligations shall arise based upon this brochure or any of its contents.

Prospective buyers are advised (i) that changes may have occurred in the Property or property value described herein, as well as the condition of the Property since the time this brochure was issued and that (ii) all information is provided for general reference purposes only in that they are based on assumptions relating to the general economy, competition, and other factors beyond the control of RACER and, therefore, are subject to material variation. Prospective buyers are advised and encouraged to conduct their own comprehensive review and analysis of the information contained herein.

This brochure is a solicitation of interest only and is not an offer to sell the Property. RACER expressly reserves the right, at its sole discretion, to reject any or all expressions of interest or offers to purchase the Property, and expressly reserves the right, at its sole discretion, to terminate discussions with any entity at any time with or without notice.

RACER has no legal commitment or obligation to any entity reviewing this brochure or making an offer to purchase the Property unless and until a written agreement satisfactory to RACER has been fully executed, delivered and approved by RACER and any conditions to RACER thereunder have been satisfied or waived.

By accepting this brochure, you agree that the information contained herein (i) will be used solely for the purpose for which it is intended; (ii) will remain the property of RACER and; (iii) will not be used by you for your own purpose except in connection with a potential agreement with RACER.

The terms and conditions stated in this section relate to all sections of this brochure as if stated independently therein. If, after reviewing this brochure, you have no further interest in purchasing the Property at this time, kindly destroy any downloaded due diligence at your earliest possible convenience.

Detroit, MI 48226

Transaction Guidelines/Offer Instructions

Prospective buyers interested in making an offer on the Property described herein must first execute a Confidentiality Agreement, schedule a Property inspection through RACER's Redevelopment office and then submit a Letter of Intent form. A Confidentiality Agreement and Letter of Intent form are available for download at RACER's website: www.racertrust.org.

RACER will evaluate all Letters of Intent for the Property against six criteria (the "Sales Criteria") required by the Settlement Agreement that established the Trust. These Sales Criteria are described in detail on RACER's website and generally include:

i. whether the monetary value of the purchase price is sufficient in light of the projected budget for the sale of the Property, taking into account any surplus from past Properties sold or projected shortfall on the sale of the remaining Properties;
ii. the potential for the proposed reuse to create jobs in the State and the affected community;
iii. other benefits to the State and affected communities (such as increasing tax revenue, reducing blight, and providing a sense of renewal);
iv. avoiding a material increase in the cost of or interference with the Environmental Action;
v. the views of the State and affected communities; and
vi. the reputation and credibility of the prospective buyer.

The Letter of Intent will not constitute a binding offer by prospective buyers to purchase the Property for the price submitted. Letters of Intent must include a detailed proposal for the redevelopment of the Property and a detailed explanation with supporting information for how the proposal would satisfy all of the Settlement Agreement Sales Criteria.

RACER will evaluate the Letters of Intent received for the Property and may, in its sole discretion, select one or more for further due diligence and may request submission of final proposals for sale. If RACER approves a Letter of Intent, RACER is not obligated to sell the Property. RACER reserves the right to accept or reject any or all proposals, regardless of purchase price, or to withdraw the assets from the sale, in its sole discretion, for any or no reason. Approval or consent by any community or stakeholder is not needed for RACER to move forward with a particular project.

Prospective purchasers may be asked to participate in the negotiation of a Purchase and Sale Agreement, which will be available for download on RACER's website. Purchase and Sale Agreements for the Property will be evaluated against the Settlement Agreement Sales Criteria generally described above and more fully described on RACER's website.

Each transaction involving Trust property will have unique circumstances, which may require RACER to consider additional factors, and balance their relative merits and weight differently, after analyzing the requisite due diligence, including a careful review of objective information, consultations with community officials and local community investment in the subject project, with due consideration given to any intangible benefits of the offer. The Trust will strive to balance all of these factors, with the ultimate goal of achieving the optimum outcome for stakeholders in every case, but the Trust retains the ultimate discretion on how best to weight these factors and which offer or project, if any, best satisfies the Sales Criteria and the Trust's other requirements.

As Purchase and Sales Agreements are evaluated, RACER also will encourage local community officials to execute a development agreement with prospective buyers describing, among other things, the level of investment, schedule for the project and specific job creation goals.

The Property will be sold for cash, due at closing, based upon the terms and provisions described in the Purchase and Sales Agreement. RACER will not pay a seller's commission to brokers, unless approved in advance by RACER in writing.

File Review:

Prospective buyers are encouraged to review the information contained in this Brochure and on RACER's website prior to submission of a Letter of Intent.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available business directory data at approximately five year intervals.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

EDR Historical Topo Map Report

10/30/24

Site Name:	Client Name:
Genesee Industrial Land	The Mannik & Smith Group
Not Reported	2365 Haggerty Road South
Mount Morris, MI 48458	Canton, MI 48188
EDR Inquiry # 7808260.4	Contact: Olivia Mitchell

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by The Mannik & Smith Group were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:		*Coordinates:*	
P.O.#	NA	**Latitude:**	43.111383 43° 6' 41" North
Project:	Genesee Industrial Land	**Longitude:**	-83.685203 -83° 41' 7" West
		UTM Zone:	Zone 17 North
		UTM X Meters:	281523.89
		UTM Y Meters:	4776683.91
		Elevation:	779.28' above sea level

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by The Mannik & Smith Group were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 8D49-4148-B446

PO # NA

Project Genesee Industrial Land

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 8D49-4148-B446

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Hazardous waste / Contaminated Sites

INVENTORY: The Inventory of Facilities has three data sources: Facilities under Part 201, Environmental Remediation, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA) identified through state funded or private party response activities (Projects); Facilities under Part 213, Leaking Underground Storage Tanks of the NREPA; and Facilities identified through submittals of Baseline Environmental Assessments (BEA) submitted pursuant to Part 201 or Part 213 of the NREPA. The Part 201 Projects Inventory does not include all of the facilities that are subject to regulation under Part 201 because owners are not required to inform the Department of Environmental Quality (DEQ) about the facilities and can pursue cleanup independently. Facilities that are not known to DEQ are not on the Inventory, nor are locations with releases that resulted in low environmental impact. Part 213 facilities listed here may have more than one release; a list of releases for which corrective actions have been completed and list of releases for which corrective action has not been completed is located on the Leaking Underground Storage Tanks Site Search webpage. The DEQ may or may not have reviewed and concurred with the conclusion that the corrective actions described in a closure report meets criteria. A BEA is a document that new or prospective property owners/operations disclose to the DEQ identifying the property as a facility pursuant to Part 201 and Part 213. The Inventory of BEA Facilities overlaps in part with the Part 201 Projects facilities and Part 213 facilities. There may be more than one BEA for each facility.

A review of the INVENTORY list, as provided by EDR, and dated 07/15/2024 has revealed that there are 11 INVENTORY sites within approximately 0.5 miles of the target property.

PART 201: A Part 201 Listed site is a location that has been evaluated and scored by the DEQ using the Part 201 scoring model. The location is or includes a "facility" as defined by Part 201, where there has been a release of a hazardous substance(s) in excess of the Part 201 residential criteria, and/or where corrective actions have not been completed under Part 201 to meet the applicable cleanup criteria for unrestricted residential use. The Part 201 List does not include all of the sites of contamination that are subject to regulation under Part 201 because owners are not required to inform the DEQ about the sites and can pursue cleanup independently. Sites of environmental contamination that are not known to DEQ are not on the list, nor are sites with releases that resulted in low environmental impact.

A review of the PART 201 list, as provided by EDR, and dated 07/15/2024 has revealed that there are 7 PART 201 sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

DEL PART 201: A deleted site has been removed from the Part 201 List because information known to the DEQ at the time of the evaluation does not support inclusion on the Part 201 List. This designation is often applied to sites where changes in cleanup criteria resulted in a determination that the site no longer exceeds any applicable cleanup criterion. A delisted site has been removed from the Part 201 List because response actions have reduced the levels of contaminants to concentrations which meet or are below the criteria for unrestricted residential use.

A review of the DEL PART 201 list, as provided by EDR, and dated 07/15/2024 has revealed that there is 1 DEL PART 201 site within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/03/2024 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

MT MORRIS COATINGS I EPA ID:: MID980620041	11400 INDUSTRIAL ST	NW 1/8 - 1/4 (0.141 mi.)	B9	14

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 07/01/2024 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

BEA: A BEA is a document that new or prospective property owners/operations disclose to the DEQ identifying the property as a facility pursuant to Part 201 and Part 213. The Inventory of BEA Facilities overlaps in part with the Part 201 Projects facilities and Part 213 facilities. There may be more than one BEA for each facility.

A review of the BEA list, as provided by EDR, and dated 05/07/2024 has revealed that there are 3 BEA sites within approximately 0.5 miles of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/25/2024

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/25/2024
Date Data Arrived at EDR: 10/01/2024

Next Scheduled EDR Contact: 01/06/2025
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 09/25/2024

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 06/07/2024

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/03/2024
Date Data Arrived at EDR: 06/07/2024

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

PART 201: Part 201 Site List

A Part 201 Listed site is a location that has been evaluated and scored by the DEQ using the Part 201 scoring model. The location is or includes a "facility" as defined by Part 201, where there has been a release of a hazardous substance(s) in excess of the Part 201 residential criteria, and/or where corrective actions have not been completed under Part 201 to meet the applicable cleanup criteria for unrestricted residential use. The Part 201 List does not include all of the sites of contamination that are subject to regulation under Part 201 because owners are not required to inform the DEQ about the sites and can pursue cleanup independently. Sites of environmental contamination that are not known to DEQ are not on the list, nor are sites with releases that resulted in low environmental impact.

INVENTORY: Inventory of Facilities

The Inventory of Facilities has three data sources: Facilities under Part 201, Environmental Remediation, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA) identified through state funded or private party response activities (Projects); Facilities under Part 213, Leaking Underground Storage Tanks of the NREPA; and Facilities identified through submittals of Baseline Environmental Assessments (BEA) submitted pursuant to Part 201 or Part 213 of the NREPA. The Part 201 Projects Inventory does not include all of the facilities that are subject to regulation under Part 201 because owners are not required to inform the Department of Environmental Quality (DEQ) about the facilities and can pursue cleanup independently. Facilities that are not known to DEQ are not on the Inventory, nor are locations with releases that resulted in low environmental impact. Part 213 facilities listed here may have more than one release; a list of releases for which corrective actions have been completed and list of releases for which corrective action has not been completed is located on the Leaking Underground Storage Tanks Site Search webpage. The DEQ may or may not have reviewed and concurred with the conclusion that the corrective actions described in a closure report meets criteria. A BEA is a document that new or prospective property owners/operations disclose to the DEQ identifying the property as a facility pursuant to Part 201 and Part 213. The Inventory of BEA Facilities overlaps in part with the Part 201 Projects facilities and Part 213 facilities. There may be more than one BEA for each facility.

DEL PART 201: Delisted List of Contaminated Sites

A deleted site has been removed from the Part 201 List because information known to the DEQ at the time of the evaluation does not support inclusion on the Part 201 List. This designation is often applied to sites where changes in cleanup criteria resulted in a determination that the site no longer exceeds any applicable cleanup criterion.
A delisted site has been removed from the Part 201 List because response actions have reduced the levels of contaminants to concentrations which meet or are below the criteria for unrestricted residential use.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAIN: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PT 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/05/2024
Date Data Arrived at EDR: 08/06/2024

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Version Date:	2019
North Map:	14451100 CLIO, MI
Version Date:	2019

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

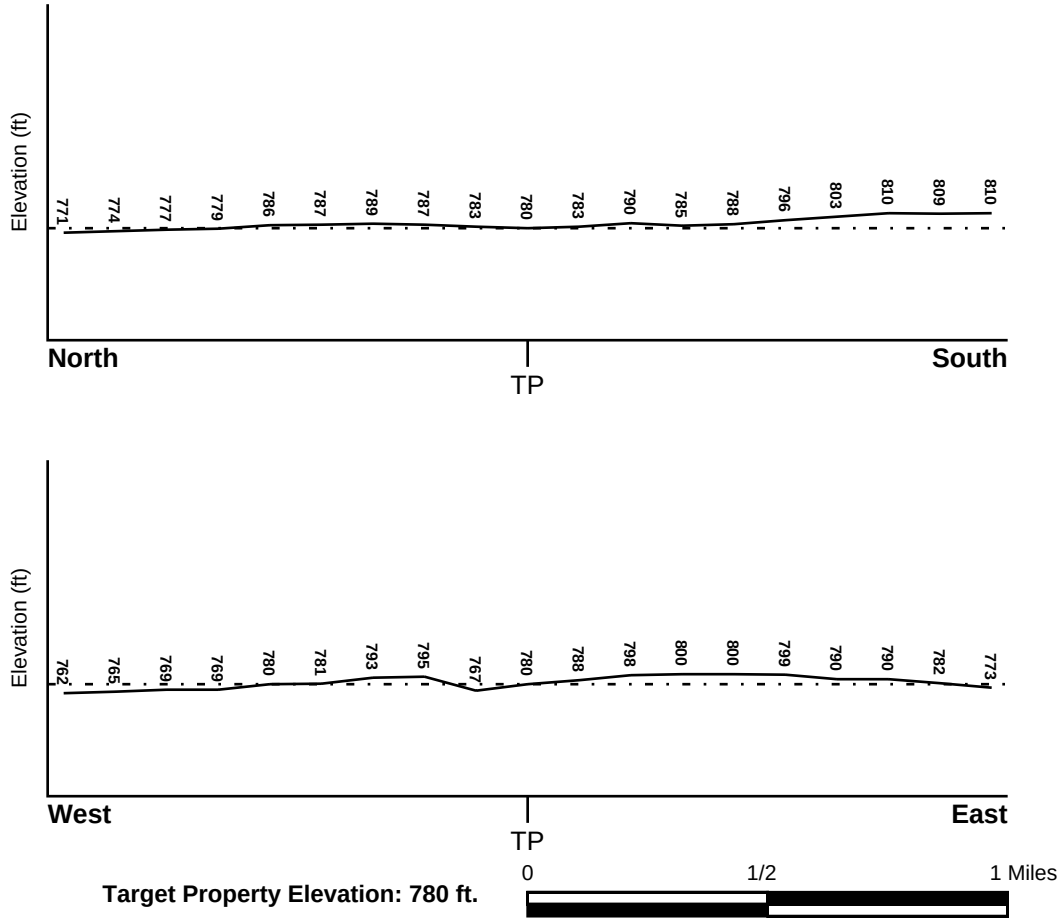
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
2600780005B	FEMA Q3 Flood data

Additional Panels in search area:	FEMA Source Type
26049C0075D	FEMA FIRM Flood data
26049C0064D	FEMA FIRM Flood data

2600780010B	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
FLINT NORTH	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
AK153	1/2 - 1 Mile NW	E
1G	1/2 - 1 Mile NW	E
2G	1/2 - 1 Mile NE	WNW
3G	1/2 - 1 Mile NNW	E
4G	1/4 - 1/2 Mile East	NE
5G	1/4 - 1/2 Mile West	SW
6G	1/4 - 1/2 Mile WSW	SW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Spinks

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 6.6
2	7 inches	16 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 6.6
3	16 inches	70 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 6.6

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
4	70 inches	79 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 6.6

Soil Map ID: 2

Soil Component Name: Lamson

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	9 inches	loamy fine sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 4	Max: 8.4 Min: 6.6
2	9 inches	29 inches	very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 4	Max: 8.4 Min: 6.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
3	29 inches	59 inches	very fine sand	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 4	Max: 8.4 Min: 6.6

Soil Map ID: 3

Soil Component Name: Borrow pits

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 4

Soil Component Name: Carlisle

Soil Surface Texture: muck

Hydrologic Group: Class A/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Very poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	59 inches	muck	A-8	Highly organic soils, Peat.	Max: 42 Min: 1.4	Max: Min:

Soil Map ID: 5

Soil Component Name: Spinks

Soil Surface Texture: loamy sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 6.6
2	7 inches	16 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 6.6

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
3	16 inches	70 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 6.6
4	70 inches	79 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 6.6

Soil Map ID: 6

Soil Component Name: Granby

Soil Surface Texture: loamy sand

Hydrologic Group: Class A/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	14 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 6.6

	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	14 inches	42 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 6.6
3	42 inches	59 inches	sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: 8.4 Min: 6.6

Soil Map ID: 7

Soil Component Name: Markey

Soil Surface Texture: muck

Hydrologic Group: Class A/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Very poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	24 inches	muck	A-8	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: Min:

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	24 inches	59 inches	sand	A-8	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: Min:

Soil Map ID: 8

Soil Component Name: Miami

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	11 inches	33 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4
3	33 inches	59 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 8.4 Min: 7.4

Soil Map ID: 9

Soil Component Name: Boyer

Soil Surface Texture: loamy sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 141	Max: 8.4 Min: 7.4

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
2	7 inches	18 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 141	Max: 8.4 Min: 7.4
3	18 inches	33 inches	sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 141	Max: 8.4 Min: 7.4
4	33 inches	59 inches	gravelly sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 141	Max: 8.4 Min: 7.4

Soil Map ID: 10

Soil Component Name: Celina

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 130 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	7 inches	sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
2	7 inches	11 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
3	11 inches	27 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6
4	27 inches	59 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 8.4 Min: 6.6

Soil Map ID: 11

Soil Component Name: Gravel pits

Soil Surface Texture: sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory
Source: Department of Natural Resources
Telephone: 517-241-2254

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Data
Source: Department of Environmental Quality
Telephone: 517-335-9218
The data in this file was obtained from Wellogic, the Michigan Department of Environmental Quality Statewide Groundwater Database (SGWD). Wellogic contains approximately 425,000 water well records found within the State of Michigan, and although it represents the best available data, it cannot be considered a complete database of all the wells or well records in existence. Locations of verified municipal and private water well sites compiled from Michigan Department of Public Health, Water Well and Pump Records. Available in the following MI counties: Calhoun, Eaton, Genesee, Ingham, Jackson, Kalamazoo, Kent, Midland, Muskegon, Oakland, Ottawaw, Saginaw, St. Clair, Washtenaw.

OTHER STATE DATABASE INFORMATION

Michigan Oil and Gas Wells
Source: Department of Environmental Quality
Telephone: 517-241-1528
Locations of oil and gas wells are compiled from permit records on file at the Geological Survey Division (GSD), Michigan Department of Natural Resources.

RADON

State Database: MI Radon
Source: Department of Environmental Quality
Telephone: 517-335-9551
Radon Test Results

Michigan Radon Test Results
Source: Department of Environmental Quality
Telephone: 517-335-8037
These results are from test kits distributed by the local health departments and used by Michigan residents. There is no way of knowing whether the devices were used properly, whether there are duplicates (or repeat verification) test (i.e., more than one sample per home), etc.

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary faultlines, prepared in 1975 by the United State Geological Survey

RE: PUBLIC RECORDS REQUEST of 11/6/2024, Reference # R146215-110424.

Dear Requester:

The Michigan Department of Licensing and Regulatory Affairs (LARA) has received your November 06, 2024 request for records and has processed it under the provisions of the Michigan Freedom of Information Act (FOIA), 1976 PA 442, MCL 15.231 *et seq.*

You requested the following, in summary:

"Pursuant to the Freedom of Information Act (MCL 15.231 et seq.), the Mannik & Smith Group, Inc. (MSG) is requesting copies of public record documents for the following property:

East Stanley Road along the west side of the Railroad in Genesee Township & Mount Morris, Genesee County, Michigan
(No listed address; consists of 4 parcels)
(Parcel ID # 57-07-100-018) 0.86 acres
(Parcel ID # 57-07-100-017) 3.7 acres
(Parcel ID # 11-07-200-035) 60.87 acres
(Parcel ID # 11-07-400-016) 14.92 acres

Requested public records include information pertaining to: 1) the storage or handling of hazardous substances or petroleum products; 2) current or former underground storage tanks (USTs) and above ground storage tanks (ASTs); and 3) licensed dry cleaning facilities.

MSG requests that the public records be provided using the actual and most reasonably economical cost (electronically mailed or otherwise electronically provided) in lieu of paper copies.

If the public body estimates or charges a fee in accordance with the cited act, MSG requests prior notification of the total amount; that the total fee be in accordance with the cited act; and not exceed the portion of labor costs directly associated with the necessary searching for, locating, and examining of public records in conjunction with receiving and fulfilling a granted written request.

Thank you for your assistance."

Your request has been denied. Please see comments below.

Olivia Mitchell:

Thank you for your interest in public records of the Department of Environment, Great Lakes, and Energy (EGLE). Your request, legally received on 11/6/2024, has been assigned reference number E501868-110424 for tracking purposes.

Description of Record(s) Requested: Pursuant to the Freedom of Information Act (MCL 15.231 et seq.), the Mannik & Smith Group, Inc. (MSG) is requesting copies of public record documents for the following properties:

East Stanley Road along the west side of the Railroad in Genesee Township & Mount Morris, Genesee County, Michigan
(No listed address; consists of 4 parcels)
(Parcel ID # 57-07-100-018) 0.86 acres
(Parcel ID # 57-07-100-017) 3.7 acres
(Parcel ID # 11-07-200-035) 60.87 acres
(Parcel ID # 11-07-400-016) 14.92 acres
Requested public records include information pertaining to: 1) the storage or handling of hazardous substances or petroleum products; 2) previous environmental reports (Phase I and II Environmental Site Assessments, Baseline Environmental Assessments, or similar environmental reports; 3) environmental liens or activity and use limitations; 4) specialized knowledge about environmental conditions; and 5) information indicating that a reduction in property value exists due to the presence of environmental issues at or nearby the property. Requested Departments include, but are not limited to: EGLE-RMG, EGLE-RRD, EGLE-AQD, and EGLE-WRD.

MSG requests that the public records be provided using the actual and most reasonably economical cost (electronically mailed or otherwise electronically provided) in lieu of paper copies. If the public body estimates or charges a fee in accordance with the cited act, MSG requests prior notification of the total amount; that the total fee be in accordance with the cited act; and not exceed the portion of labor costs directly associated with the necessary searching for, locating, and examining of public records in conjunction with receiving and fulfilling a granted written request.

If there are any questions please contact the undersigned at, 734-397-3100.

Address of Requested Site: East Stanley Road along the west side of the railroad, Genesee Township

EGLE will respond to a request within 5 business days. If necessary, the Department may issue an extension for up to 10 additional business days.

To monitor the progress of your request, please follow the link below. You will receive an email when your request has been completed.

Dear Environmental Scientist Olivia Mitchell:

Thank you for your interest in public records of the Department of Licensing and Regulatory Affairs of Michigan. Your 11/4/2024 request has been received in this office and given the reference number R146215-110424 for tracking purposes. A written request made by facsimile, electronic mail, or other electronic transmission is not received by a public body's FOIA coordinator until one (1) business day after the electronic transmission is made. (MCL15.235(1))

Records Requested: "Pursuant to the Freedom of Information Act (MCL 15.231 et seq.), the Mannik & Smith Group, Inc. (MSG) is requesting copies of public record documents for the following property: East Stanley Road along the west side of the Railroad in Genesee Township & Mount Morris, Genesee County, Michigan (No listed address; consists of 4 parcels) (Parcel ID # 57-07-100-018) 0.86 acres (Parcel ID # 57-07-100-017) 3.7 acres (Parcel ID # 11-07-200-035) 60.87 acres (Parcel ID # 11-07-400-016) 14.92 acres Requested public records include information pertaining to: 1) the storage or handling of hazardous substances or petroleum products; 2) current or former underground storage tanks (USTs) and above ground storage tanks (ASTs); and 3) licensed dry cleaning facilities. MSG requests that the public records be provided using the actual and most reasonably economical cost (electronically mailed or otherwise electronically provided) in lieu of paper copies. If the public body estimates or charges a fee in accordance with the cited act, MSG requests prior notification of the total amount; that the total fee be in accordance with the cited act; and not exceed the portion of labor costs directly associated with the necessary searching for, locating, and examining of public records in conjunction with receiving and fulfilling a granted written request. Thank you for your assistance."

In accordance with the Michigan Freedom of Information Act (FOIA), MI LARA provides copies of its public records. Records which are exempt from disclosure by state or federal law will not be provided.

The FOIA does not require governmental bodies to create new records or answer questions. A request must ask for records or information already in existence. A person has the right to subscribe to future issuance of public records that are created, issued or disseminated on a regular basis.

Michigan LARA will respond within five business days to a request. If needed, the agency may issue a notice extending for up to 10 additional business days the time it has to respond to your request.

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed.

FOIA Request Center

Department of Licensing and Regulatory Affairs

GENESEE COUNTY
FREEDOM OF INFORMATION ACT REQUEST FORM

Pursuant to the Michigan Freedom of Information Act (P.A. 442 of 1976, as amended), I request:

☑ Copies of the records described below

☐ To be permitted to review copies of the records described below

Public Records Requested:

Pursuant to the Freedom of Information Act (MCL 15.231 et seq.), The Mannik & Smith Group, Inc. (MSG) is requesting available files pertaining to hazardous substances or petroleum products that would indicate an existing or past release, other environmental related issues, or well and septic records for the following address:
East Stanley Road along the west side of the Railroad in Genesee Township & Mount Morris, Genesee County, Michigan
(No listed address; consists of 4 parcels)
(Parcel ID # 57-07-100-018) 0.86 acres
(Parcel ID # 57-07-100-017) 3.7 acres
(Parcel ID # 11-07-200-035) 60.87 acres
(Parcel ID # 11-07-400-016) 14.92 acres
MSG requests that the public records be provided using the actual and most reasonably economical cost (electronically mailed or otherwise electronically provided) in lieu of paper copies.
If the public body estimates or charges a fee in accordance with the cited act, MSG requests prior notification of the total amount; that the total fee be in accordance with the cited act; and not exceed the portion of labor costs directly associated with the necessary searching for, locating, and examining of public records in conjunction with receiving and fulfilling a granted written request.

I understand that if I would like the records described above provided on non-paper physical media (computer disc, computer tapes, or other digital or similar media) or electronically mailed to me in lieu of paper copies, I must so indicate. I also understand that the records will be provided to me on non-paper physical media as long as that the County has the technological capability necessary to provide the records on the particular non-paper physical media.

I understand that in requesting copies of these records, I am responsible for all reasonable costs associated with the document search, examination, review, redaction and copying fees, not to exceed limits set forth in MCL 15.234, or as otherwise provided by statute, and will remit to Genesee County all such costs on or before the date of delivery. Payment of this fee becomes an obligation and is guaranteed by me to Genesee County as of the date of filing this request regardless of whether I ever pick up the records ordered in this request, or the material exceeds my anticipated volume. I further agree to remit a deposit in the amount of one-half the estimated fee at the time of making this request if the estimated fee exceeds $50.00.

I understand that certain records that I have requested may not exist or be located under the name or description which I have provided, or may be exempt from release pursuant to the provisions of the Act and that I will be so advised by Genesee County should that be the case. I further understand that portions of the records I have requested may contain information or other material which is exempt from release and may therefore be redacted.

GENESEE COUNTY
FREEDOM OF INFORMATION ACT REQUEST FORM

I understand the County must respond to my request within five (5) business days after my request is received but that, because of the nature of my request or the volume of documents requested, additional time may be required to locate and copy the materials. Accordingly, pursuant to Section 5(2)(d) of the P.A. 442 of 1976, MCL 15.234, I agree to an extension of ten (10) additional business days to produce the records if informed of the need to do so.

I understand that the records requested shall be furnished without charge for the first $20.00 if I provide an affidavit and declare that I am indigent or represent a non-profit organization operating under PL 106-402 as specified in Section 4(2) of P.A. 442 of 1976, as amended.

Pursuant to Section 4(4) of the P.A. 442 of 1976, MCL 15.234, Genesee County maintains a summary of its policy, procedures, and guidelines for FOIA requests on the County website at: https://www.geneseecountymi.gov/government/board_of_commissioners/freedom_of_information.php.

Request for: ☑ Copy ☐ Certified copy ☐ Record inspection ☐ Subscription to record issued on regular basis

Delivery Method: ☐ Will pick up ☐ Will make own copies onsite ☐ Mail to address above ☑ Email to address above
☐ Deliver on digital media provided by the township: _____

Note: *The township is not required to provide records in a digital format or on digital media if the township does not already have the technological capability to do so.*

Describe the public record(s) as specifically as possible. You may use this form or attach additional sheets:

Pursuant to the Freedom of Information Act (MCL 15.231 et seq.), The Mannik & Smith Group, Inc. (MSG) is requesting available information from relevant departments, including, but not limited to, Fire, Building, Zoning, and Planning Departments. Requested information pertains to hazardous substances or petroleum products that would indicate an existing or past release or other environmental related issues and building records, permits, and schematics and utility information associated with the following property:

East Stanley Road along the west side of the Railroad in Genesee Township & Mount Morris, Genesee County, Michigan
(No listed address; consists of 4 parcels)
(Parcel ID # 57-07-100-018) 0.86 acres
(Parcel ID # 57-07-100-017) 3.7 acres
(Parcel ID # 11-07-200-035) 60.87 acres
(Parcel ID # 11-07-400-016) 14.92 acres

MSG requests that the public records be provided using the actual and most reasonably economical cost (electronically mailed or otherwise electronically provided) in lieu of paper copies.
If the public body estimates or charges a fee in accordance with the cited act, MSG requests prior notification of the total amount; that the total fee be in accordance with the cited act; and not exceed the portion of labor costs directly associated with the necessary searching for, locating, and examining of public records in conjunction with receiving and fulfilling a granted written request.

Consent to Non-Statutory Extension of Township's Response Time

I have requested a copy of records or a subscription to records or the opportunity to inspect records, pursuant to the Michigan Freedom of Information Act, Public Act 442 of 1976, MCL 15.231, *et seq.* I understand that the township must respond to this request within five (5) business days after receiving it, and that response may include taking a 10-business day extension. However, I hereby agree and stipulate to extend the township's response time for this request until: _____ *(month, day, year)*.

Requestor's Signature _____ **Date** 11/4/2024

(Complete both sides)

Records Located on Website

If the township directly or indirectly administers or maintains an official internet presence, any public records available to the general public on that internet site at the time the request is made are exempt from any labor charges to redact (*separate exempt information from non-exempt information*).

If the FOIA coordinator knows or has reason to know that all or a portion of the requested information is available on its website, the township must notify the requestor in its written response that all or a portion of the requested information is available on its website. The written response, to the degree practicable in the specific instance, must include a specific webpage address where the requested information is available. On the detailed cost itemization form, the township must separate the requested public records that are available on its website from those that are not available on the website and must inform the requestor of the additional charge to receive copies of the public records that are available on its website.

If the township has included the website address for a record in its written response to the requestor and the requestor thereafter stipulates that the public record be provided to him or her in a paper format or other form, including digital media, the township must provide the public records in the specified format (if the township has the technological capability) but may use a fringe benefit multiplier greater than the 50%, not to exceed the actual costs of providing the information in the specified format.

Request for Copies/Duplication of Records on Township Website

I hereby stipulate that, even if some or all of the records are located on a township website, I am requesting that the township make copies of those records on the website and deliver them to me in the format I have requested above. I understand that some FOIA fees may apply.

Requestor's Signature	Date

Overtime Labor Costs

Overtime wages shall not be included in the calculation of labor costs unless overtime is specifically stipulated by the requestor and clearly noted on the detailed cost itemization form.

Consent to Overtime Labor Costs

I hereby agree and stipulate to the township using overtime wages in calculating the following labor costs as itemized in the following categories:

1. ☐ Labor to copy/duplicate **2.** ☐ Labor to locate **3a.** ☐ Labor to redact **3b.** ☐ Contract labor to redact

6b. ☐ Labor to copy/duplicate records already on township's website

Requestor's Signature	Date

Request for Discount: Indigence

A public record search **must** be made and a copy of a public record **must** be furnished **without charge for the first $20.00 of the fee** for each request by an individual who is entitled to information under this act and who:

1) Submits an affidavit stating that the individual is indigent and receiving specific public assistance, **OR**

2) If not receiving public assistance, stating facts showing inability to pay the cost because of indigence.

If a requestor is ineligible for the discount, the public body shall inform the requestor specifically of the reason for ineligibility in the public body's written response. An individual is ineligible for this fee reduction if **ANY** of the following apply:

(i) The individual has previously received discounted copies of public records from the same public body twice during that calendar year,

(ii) The individual requests the information in conjunction with outside parties who are offering or providing payment or other remuneration to the individual to make the request. A public body may require a statement by the requestor in the affidavit that the request is not being made in conjunction with outside parties in exchange for payment or other remuneration.

Office Use: ☐ Affidavit Received ☐ Eligible for Discount ☐ Ineligible for Discount

I am submitting an affidavit and requesting that I receive the discount for indigence for this FOIA request: Requestor's Signature:	Date:

Request for Discount: Nonprofit Organization

A public record search **must** be made and a copy of a public record **must** be furnished **without charge for the first $20.00 of the fee** for each request by a nonprofit organization formally designated by the state to carry out activities under subtitle C of the Developmental Disabilities Assistance and Bill of Rights Act of 2000 and the Protection and Advocacy for Individuals with Mental Illness Act, if the request meets **ALL** of the following requirements:

(i) Is made directly on behalf of the organization or its clients.

(ii) Is made for a reason wholly consistent with the mission and provisions of those laws under section 931 of the Mental Health Code, 1974 PA 258, MCL 330.1931.

(iii) Is accompanied by documentation of its designation by the state, if requested by the township.

Office Use: ☐ Documentation of State Designation Received ☐ Eligible for Discount ☐ Ineligible for Discount

I stipulate that I am a designated agent for the nonprofit organization making this FOIA request and that this request is made directly on behalf of the organization or its clients and is made for a reason wholly consistent with the mission and provisions of those laws under section 931 of the Mental Health Code, 1974 PA 258, MCL 330.1931: Requestor's Signature:	Date:

RE: PUBLIC RECORDS REQUEST of 11/6/2024, Reference # R146215-110424.

Dear Requester:

The Michigan Department of Licensing and Regulatory Affairs (LARA) has received your November 06, 2024 request for records and has processed it under the provisions of the Michigan Freedom of Information Act (FOIA), 1976 PA 442, MCL 15.231 *et seq.*

You requested the following, in summary:

"Pursuant to the Freedom of Information Act (MCL 15.231 et seq.), the Mannik & Smith Group, Inc. (MSG) is requesting copies of public record documents for the following property:

East Stanley Road along the west side of the Railroad in Genesee Township & Mount Morris, Genesee County, Michigan
(No listed address; consists of 4 parcels)
(Parcel ID # 57-07-100-018) 0.86 acres
(Parcel ID # 57-07-100-017) 3.7 acres
(Parcel ID # 11-07-200-035) 60.87 acres
(Parcel ID # 11-07-400-016) 14.92 acres

Requested public records include information pertaining to: 1) the storage or handling of hazardous substances or petroleum products; 2) current or former underground storage tanks (USTs) and above ground storage tanks (ASTs); and 3) licensed dry cleaning facilities.

MSG requests that the public records be provided using the actual and most reasonably economical cost (electronically mailed or otherwise electronically provided) in lieu of paper copies.

If the public body estimates or charges a fee in accordance with the cited act, MSG requests prior notification of the total amount; that the total fee be in accordance with the cited act; and not exceed the portion of labor costs directly associated with the necessary searching for, locating, and examining of public records in conjunction with receiving and fulfilling a granted written request.

Thank you for your assistance."

Your request has been denied. Please see comments below.

Comments:

The FOIA requires a written request describe a public record sufficiently to enable LARA to find the public record. (MCL 15.233(1)). It is unclear from the description, what record you wish to obtain. If you wish to submit a new request, please include a more detailed description of the record(s). Include license types, license numbers, addresses, and document names, if available. Please be advised that LARA is unable to search by parcel number. Please provide a complete address.

As to the denial of your request, under section 10 of the FOIA, MCL 15.240, LARA is obligated to inform you that you may do the following:

1) Appeal this decision in writing to Appeals Officer Adam Sandoval, Department of Licensing and Regulatory Affairs, P.O. Box 30004, Lansing, MI 48909. The writing must specifically state the word "appeal" and must identify the reason or reasons you believe the denial should be reversed. The head of the Department or her designee must respond to your appeal within 10 business days of its receipt. Under unusual circumstances, the time for response to your appeal may be extended by 10 business days.

2) Commence an action in the Court of Claims within 180 days after the date of the final determination to deny the request. If you prevail in such an action, the court is to award reasonable attorney fees, costs, and disbursements, and possible damages.

If you have questions concerning this matter, please email us at **larafoiainfo@michigan.gov**.

To review a copy of LARA's written public summary, procedures, and guidelines, please visit **www.michigan.gov/larafoia**.

Sincerely,

Kelly Hunt

LARA FOIA Office
