No, that would make too much sense. I don't have a paper copy and can't make color copies. There are 12 pages, I'll send it 4 pages at a time. Thanks, Sue

At least in one location, it appears that it is coming onto the SMI property from Delphi and in another location, it appears it is coming from SMI onto the DPH property. The areas are pretty distinct. Take a look and let me know if you want appendices. Thanks, Sue

Dave, I was at a DPH trustee meeting last week and it was brought to my attention by the Tetra Tech folks, who are the Trust consultants, that the LIF study, completed by ERM for Delphi, defined the NAPL to the SMI property boundary. Since we are going to have a discussion next week regarding the NAPL at SMI, I thought that you might want to look at the report since questions may come up. I will have to send it in a couple e-mails, as the files are large and I need to get them through my system. I will send the report and the figures. Please let me know if you want appendices A-J. Sue
