COMMENTS/QUESTIONS FROM PM:

GM has requested our concurrence that shallow groundwater at the site is not in an aquifer, specifically the groundwater at MW-3s. Attached is a letter outlining their conclusions Do you agree?

Also attached is a copy of the well construction diagram referenced in the letter. Other file information is located in my office.

COMMENTS FROM GEOLOGIST:

Yes, I agree with the conclusion of the consultant for GM on this site that the shallow groundwater is not an aquifer. In addition, the investigation information for this site indicates that the shallow groundwater is not likely to impact deeper groundwater.
