Project Code: C410500021 **Site Status:** Active

Site Name: GENERAL MOTORS FORMER FAIRFAX 1 PLANT

CERCLIS Number: KSD007145899

Other Names:

Address: FAIRFAX PLANT 100 KINDELBERGER R **City:** KANSAS CITY

County: WY **River Basin:** Missouri

Latitude: 39.15331 **Longitude:** -94.61218

Program Name: Voluntary Cleanup **Project Manager:** PRICE, L.

Contaminants: Refined Petroleum, VOC

Site Narrative:

The GM former Fairfax 1 Plant was a large manufacturing facility until its abandonment in the late 1980s when GM moved its operations a short distance away to a new plant. Several investigations have been conducted at the property and petroleum and solvent impacts to soil and ground water have been confirmed. Several documented spills and leaks at the facility have been noted. GM has also done some remediation at the property without any supervision from a state, local, or federally sponsored program.

The subject property has been entered into the VCPRP to achieve closure. Site activities were delayed for a long period of time while it was determined whether or not it was eligible for the Formerly Used Defense Sites (FUDS) program or not along with the adjacent and active #2 plant. A final determination was made that neither the #1 or #2 plant is eligible for FUDS.

A Voluntary Cleanup Investigation work plan was approved 11/24/2004 for the subject property. Currently, a voluntary investigation is in the process to delineate the extent of contaminants in soil and groundwater.

Legal Description:

Township	Range	Section	Parcel	Description
10	25E	26		SW of the SW of the NE

Actions Completed:

Activity Type	Activity	Start	Completed
PRP IDENTIFICATION/NEGOTIATION	Voluntary Agreement		03/14/2001

Actions Underway:

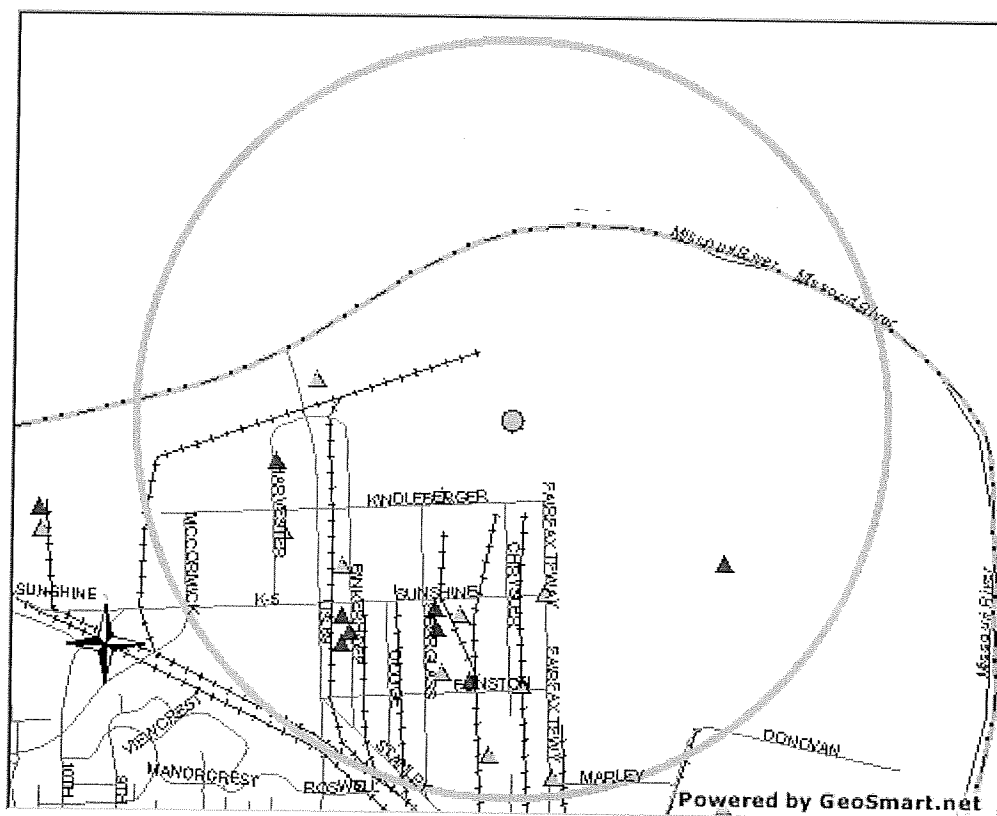

Activity Type	Activity	Start	Completed
INVESTIGATION	Voluntary Cleanup Investigation (VCI)	09/10/2001	

Actions Proposed:

Activity Type	Activity	Start	Completed
