**Annual Significant Non-Domestic User Report**

Date February 12, 2025

Dear **Ms. Minder**

In accordance with requirements of the above referenced discharge permit, we are providing you, on behalf of Revitalizing Auto Communities Environmental Response Trust (RACER), with the attached Annual Significant Non-Domestic User (SNDU) Report for the Coldwater Road Landfill facility, located at 6220 Horton Avenue, Flint, Michigan.

If you have any questions, please feel free to contact me at (313) 333-0211.

Yours sincerely,

**Clifford S. Yantz, PG**

**Annual Significant Non-domestic User Report**

1. Provide the following general information about the identity and location of the sewer user:

Name of Proprietor or Corporation		
Revitalizing Auto Communities Environmental Response (RACER) Trust		
Street Address of Proprietor or Corporation		
660 Woodward Avenue Suite 1521		
City	State	Zip Code
Detroit	Michigan	48226
Name of Establishment		
Coldwater Road Landfill		
Street Address of Establishment		
6220 Horton Avenue		
City	State	Zip Code
Flint	Michigan	48505
Phone Number of Establishment		
No phone (facility is rarely manned). Please call (313) 333-0211 (cell)		

2. Sign and certify the veracity of the report:

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fines and imprisonment for knowing violations."

Signature of Authorized Representative 	Date Signed 2/12/25
Name of Authorized Representative Clifford S. Yantz, as agent for RACER Trust	Title of Authorized Representative Project Manager

3. Briefly describe all manufacturing or service industries conducted at the sewer user's establishment:

The Coldwater Road Landfill is a closed RCRA landfill that only received stabilized electroplating wastewater sludge; therefore, there are no current manufacturing or service industries conducted at the site at this time. The landfill is currently being maintained and monitored.

4. List the Standard Industrial Classification Code(s) which best describe all manufacturing or service industries conducted at the sewer user's establishment:

None.

5. Are any Primary Industries below, described in 40 CFR 413-471, engaged in at the sewer user's establishment?  yes  no

Note: RACER Trust does not believe that the following are primary industries for the site. However, the Coldwater Road Facility is a RCRA Landfill that received stabilized electroplating wastewater sludges, so it is most similar to 40 CFR 413 and 40 CFR 445.

**If yes**, indicated which ones:

6. Report the average flow volume over the last calendar year of each of the following types of wastewater discharged from the sewer user's establishment to drains that ultimately empty into sanitary sewers:

Type of Wastewater	Average Flow (gal/day)
<b>Process wastewater</b> directly contacting, or resulting from the production or use of, any raw material, intermediate product, finished product, byproduct, or waste product.	None
<b>Sanitary wastewater</b> from toilets, washrooms, drinking fountains, kitchens, and other sanitary facilities which may produce human and/or food wastes.	None
<b>Non-contact cooling water</b> used to reduce temperature which <i>does not</i> come into contact with a raw material, intermediate product, waste product other than heat, or finished product.	None
<b>Blowdown or condensate</b> from heating or cooling systems.	None
<b>Other wastewater</b> from miscellaneous sources. *	78.83*

Notes:

\* Periodic discharge of accumulated liquids from the landfill sumps and vaults about every 2 to 3 months over 1 to 5 days. A total of 28,774 gallons were discharged in 2024.

7. Indicate the type of chemicals and chemical products used, produced, processed or housed at the sewer user's establishment and the amount of each type (as either some or none) known, assumed, or expected to normally enter at any time any drain at the sewer user's establishment that ultimately empties into any sanitary sewer:

Chemicals Present	Amount to Drains
<input checked="" type="checkbox"/> acids	<input type="checkbox"/> some <input checked="" type="checkbox"/> none
<input checked="" type="checkbox"/> bases	<input type="checkbox"/> some <input checked="" type="checkbox"/> none
<input type="checkbox"/> salts	<input type="checkbox"/> some <input type="checkbox"/> none
<input checked="" type="checkbox"/> soaps	<input checked="" type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> detergents	<input type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> solvents	<input type="checkbox"/> some <input type="checkbox"/> none
<input checked="" type="checkbox"/> paints	<input type="checkbox"/> some <input checked="" type="checkbox"/> none
<input type="checkbox"/> inks	<input type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> adhesives	<input type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> coolants	<input type="checkbox"/> some <input type="checkbox"/> none
<input checked="" type="checkbox"/> lubricants	<input type="checkbox"/> some <input checked="" type="checkbox"/> none
<input type="checkbox"/> hydraulic fluids	<input type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> biocides	<input type="checkbox"/> some <input type="checkbox"/> none
<input checked="" type="checkbox"/> other(s)	<input checked="" type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> none	

If other, describe the type of chemical(s) and/or chemical product(s):

Accumulated liquids from the landfill sumps and vaults. Also, acids and bases stored at the site within sample collection jars are used for groundwater sampling or equipment calibration and are not discharged to the drains/sewer. Soap for washing hands and/or equipment may be discharged to the drains/sewer, but in very small quantities. All other materials stored on site are used solely for building or grounds maintenance.

In addition, the presence of per- and polyfluorinated alkyl substances (PFAS) consisting predominantly of perfluoro-4-ethylcyclohexanesulfonate (PFECHS), and perfluorooctanesulfonic acid (PFOS) and to a lesser extent perfluorohexane sulfonic acid (PFHxS), perfluoropentane sulfonic acid (PFPeS), and perfluorooctanoic acid (PFOA) have been analyzed for and detected at the landfill site, including in the accumulated liquids that are discharged to the POTW. The presence of PFAS is likely associated with the former wastewater treatment plant operations and the stabilized electroplating wastewater sludge placed within the landfill.

As a result of the presence of PFAS within the Site's discharge, a Discharge Permit Modification and (Certified) Pretreatment Plan letter was submitted to the City of Flint on June 27, 2018, which provided a pretreatment system design package for the removal of PFAS from the discharge from the landfill. A pre-treatment system to remove PFOS/PFOA from the liquids contained in the accumulation tank was installed between August 21, 2018 and August 27, 2018.

Since September 2018, the accumulated liquids at the site are discharged through the pre-treatment system consisting of originally three or now four granular activated carbon (GAC) vessels (and other accoutrements to complete the system: i.e., sediment filter & piping) connected in series to remove the PFAS prior to discharging the liquids from the site to the sanitary sewer. The pre-treatment results are provided to the City of Flint in the quarterly periodic reports on continued compliance (PRCC).

Exclude those used at the sewer user's establishment solely for office work, sanitation, and building and grounds maintenance.

8. Indicate the following types of Potentially Harmful Substances used, produced, processed or housed at the sewer user's establishment and the amount of each type (as either some or none) known, assumed, or expected to normally enter at any time any drain at the sewer user's establishment that ultimately empties into any sanitary sewer.

Type of Potentially Harmful Substances	Amount to Drains
<input type="checkbox"/> <b>Corrosive substances</b> which have a pH of less than or equal to 2.0 Standard Units or greater than or equal to 12.0 Standard Units.	<input type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> <b>Ignitable substances</b> which have a closed-cup flash point of less than 140° F (60 °C).	<input type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> <b>Reactive substances</b> which are normally unstable and readily undergo violent change without detonating; react violently with water; form potentially explosive mixtures with water; when mixed with water, generate toxic gases, vapors, or fumes in a quantity sufficient to endanger humans; or are capable of detonation or explosive reaction.	<input type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> <b>Biocides</b> which eradicate organisms (i.e., disinfectant, insecticide, rodenticide, herbicide, etc.).	<input type="checkbox"/> some <input type="checkbox"/> none
<input checked="" type="checkbox"/> <b>Carcinogens</b> which cause an increased incidence of benign or malignant neoplasms in animals or humans or that substantially decreases the time in which neoplasms develop in animals or humans.	<input checked="" type="checkbox"/> some <input type="checkbox"/> none
<input type="checkbox"/> None of the above.	

Exclude those used at the sewer user's establishment solely for office work, sanitation, and building and grounds maintenance.

9. Are any Potentially Harmful Substances **listed in Worksheet A** of this report, **including any in mixtures**, used, produced, processed, or housed at the sewer user's establishment?  yes  no

**If yes, use worksheet A** to identify them and report the maximum amount (either "small" or "large") of each one present at any time and the amount (either "some" or "none") of each one known, assumed, or expected to normally enter at any time any drain that ultimately empties into any sanitary sewer.

The substances recorded on Worksheet A of this report are substances which are analyzed for as part of the Site's Sewer Use Permit monitoring requirements and have been detected in the discharge liquid during sampling/discharge events. The substances are not actually used, produced, or processed on Site per se (not in a manufacturing type setting), they are processed in that they are in the liquids extracted from the landfill, stored in the tank, and then discharged to the POTW.

Exclude those used at the sewer user's establishment solely for office work, sanitation, and building and grounds maintenance.

10. Has an Emergency and Hazardous Chemical Inventory been prepared for the sewer user's establishment, pursuant to 40 CFR 370?  yes  no

**If yes**, submit a copy of the most recent one with this report.

11. Identify persons to contact during both daytime business hours and non-business hours:

Primary contact for correspondence and assistance during daytime business hours:

**Instructions:** Check the appropriate spaces below to identify the following Potentially Harmful Substances present at the user's establishment, including any in mixtures, and to report the maximum amount (either "small" or "large") of each one present at any time and the amount (either "some" or "none") of each one known, assumed or expected to normally enter at any time any drain that ultimately empties into any sanitary sewer. A "small" amount is less than 55 gallons for any liquid substance or less than 100 pounds for any solid substance. Also enter the name of the user in the space after "SNDU" (Significant Non-domestic User) at the bottom of each page.

**Instructions:** Check the appropriate spaces below to identify the following Potentially Harmful Substances present at the user's establishment, *including any in mixtures*, and to report the maximum amount (either "small" or "large") of each one present at any time and the amount (either "some" or "none") of each one known, assumed or expected to normally enter at any time any drain that ultimately empties into any sanitary sewer. A "small" amount is less than 55 gallons for any liquid substance or less than 100 pounds for any solid substance. Also enter the name of the user in the space after "SNDU" (Significant Non-domestic User) at the bottom of each page.

**City of Flint Significant Non-domestic Sewer User Report  
Potentially Harmful Substances on Premises**

**Worksheet A**

**Instructions:** Check the appropriate spaces below to identify the following Potentially Harmful Substances present at the user's establishment, *including any in mixtures*, and to report the maximum amount (either "small" or "large") of each one present at any time and the amount (either "some" or "none") of each one known, assumed or expected to normally enter at any time any drain that ultimately empties into any sanitary sewer. A "small" amount is less than 55 gallons for any liquid substance or less than 100 pounds for any solid substance. Also enter the name of the user in the space after "SNDU" (Significant Non-domestic User) at the bottom of each page.
