Mr. Greg Rudloff
U.S. Environmental Protection Agency, Region 5
Land and Chemicals Division
77 West Jackson Blvd., LU 9J
Chicago, Illinois 60604 3590

Dear Mr. Rudloff:

**Re: 2nd 2015 Semi Annual Progress Report
Performance Based Administrative Order on Consent
Docket Number RCRA 05 2011 0025
13000 Eckles Road Site, Livonia, Michigan
USEPA ID No. MID 005 356 621**

In accordance with the Performance Based Administrative Order on Consent between the U.S. Environmental Protection Agency Region 5 (USEPA) and Revitalizing Auto Communities Environmental Response Trust (RACER), please find the attached progress report for the 2nd half of 2015 (July 1, 2015 through December 31, 2015).

Please contact Grant Trigger or Jeff Crum (regarding soil vapor related matters), or Dave Favero or myself (regarding system operation and groundwater matters) if you would like to discuss further. Thank you.

Yours truly,

GHD

Two handwritten signatures in blue ink are shown side-by-side. The signature on the left appears to be "Christopher J. Meincke" and the signature on the right appears to be "P.E.".

ATTACHMENT A
2nd SEMI-ANNUAL 2015 PROGRESS REPORT
PERFORMANCE-BASED ADMINISTRATIVE ORDER ON CONSENT
13000 ECKLES ROAD SITE, LIVONIA, MICHIGAN
JULY 1, 2015 TO DECEMBER 31, 2015

1. Description of Work Completed

- Continued operation of the Area 1 French Drain Collection Trench and Groundwater Treatment system.
- Submitted the 1st Semi-Annual 2015 Progress Report dated July 15, 2015 to USEPA.
- Sold an approximately 101-acre parcel to the Livonia West Commerce Center, LLC on August 18, 2015.
- Terminated the 2007 Declaration of Restrictive and recorded a new Declaration of Restrictive Covenant dated August 18, 2015, both of which were recorded with the Wayne County Register of Deeds on August 26, 2015. Copies are provided in Exhibit 1.
- Submitted a Semi-Annual Report for Special Discharge Permit SD6-94508 dated September 23, 2015 to the City of Detroit Water and Sewerage Department for the period March 2015 through August 2015.
- Collected groundwater samples from Area 1 and AOI 31 monitoring wells on September 21 through 25, 2015 as part of the approved Groundwater Monitoring Plan (GMP) activities.
- Performed groundwater elevation and LNAPL thickness measurement activities at AOI 21 monitoring wells on September 25, 2015.
- Collected post-injection groundwater samples (1-week, 3-week, 3-month and 6-month) from Area 1 monitoring wells for the Expanded Pilot Study in July, August, September, November and December 2015.
- Abandoned fourteen monitoring wells (MW-33-7S, MW-33-9S, MW-S-10S, MW-S-4S, MW-A1-16S, MW-21-1S, MW-21-2S, MW-21-3S, MW-21-4S, MW-21-5S, MW-21-6S, MW-24-1S, MW-24-2S, and MW-A2-2S) and repaired MW-104S on October 29 and October 30, 2015, as approved by USEPA on September 25, 2015.
- Completed a meeting/conference call with USEPA to discuss Corrective Action O&M activities, Area 1 remedial alternatives, the results of the Area 1 Pilot Study, and the 2016 scope and budget request on October 13, 2015.
- Submitted 2016 Annual Environmental Budget Request to USEPA on November 9, 2015 and received USEPA approval on December 1, 2015.
- Continued evaluation of potential cost savings and remedial alternatives to decrease the long-term OM&M costs associated with the Area 1 Groundwater Collection and Treatment System.

- Continued operation and maintenance of vapor mitigation system at 37780 Grantland Avenue (Home 7).
- Conducted a vapor mitigation performance evaluation at Home 7, and prepared a summary of the performance results.

2. Data Collected

- Groundwater sample results associated with the 2015 GMP sampling event from Area 1 and AOI 31 monitoring wells are included on Figures 1 and 2, and Tables 1 and 2, respectively.
- Groundwater elevation and LNAPL thickness measurements from AOI 21 monitoring wells are included on Figure 3.
- Monitoring well and injection locations associated with the Area 1 Expanded Pilot Study Injections are shown on Figure 4.
- Vacuum pressure readings obtained from seven sub-slab communication test points and the U-Tube manometer

3. Problems Encountered

- None

4. Estimated Percent Complete and Information Summary for Selected Activities

- | | |
|--|----------|
| • O&M of the Groundwater Pump & Treat System (GWTP, Barrier Wall, Cover) | 15% |
| Continued operation of the Area 1 French Drain Collection Trench and Groundwater Treatment system. Submitted appropriate discharge reports as per the Special Discharge Permit. (Percent complete estimated as 4 years complete of 27 years estimated in the May 2010 RCES.) | |
| • Long-Term Groundwater Monitoring | On-going |
| Long-Term Groundwater Monitoring Plan scheduled to be complete after 5 years of continued stability/reduction in off-Site/boundary concentrations (2006 through 2010). Sampling activities are currently planned to continue pending USEPA approval to cease monitoring. | |
| • Maintenance of the AOI 39 Dust Control Plan | 100% |
| • Restrictive Covenants | 100% |
| Prepared a revised Declaration of Restrictive Covenant (DRC) and Termination Agreement for the existing 2007 DRC and submitted to USEPA on June 25, 2015. | |
| Recorded final DRC and Termination Agreement on August 26, 2015. | |
| • Vapor Intrusion Investigation | 75% |

Undergoing RACER review and awaiting further clarification of USEPA's vapor intrusion approach to address potential short-term effects from trichloroethylene (TCE) vapor intrusion.

- Installation of Vapor Mitigation System 100%
Installation completed and system updated September 2012.
- Operation, Maintenance and Performance Monitoring of Vapor Mitigation System On-going
System performance monitoring is being implemented at pre-scheduled time periods, though some delay in the schedule occurred due to home foreclosure and achieving contact with new homeowners. Latest system performance monitoring completed November 2013.
- Pilot Tests - Alternative Chemicals & Target In-Situ Treatment Injection 95%

Objective was to design, implement and evaluate a pilot test to use alternative chemicals in the wastewater treatment process that could reduce treatment system operating time and/or operating costs. Also, design and implement an in-situ stabilization treatment in Area 1 that could also reduce treatment system operating time and long-term monitoring duration.

The Area 1 field pilot test was conducted in November and December 2010. Based on an evaluation of the pilot test results, additional pilot study injection and monitoring activities were recommended to determine if full-scale on-site implementation would significantly reduce dissolved concentrations of chromium and nickel and allow for the groundwater treatment plant activities to be reduced or eliminated.

The groundwater treatment plant optimization activities have not been conducted due to health and safety concerns associated with handling, storing, and mixing the proposed replacement chemicals.

Additional cost and remedial alternative evaluations were performed in 2013. Additional Area 1 Characterization activities have been implemented. A laboratory treatability study was performed using site groundwater to evaluate the effectiveness of utilizing a permeable reactive barrier wall (PRB) with zero valent iron (ZVI) to treat Area 1 groundwater if the existing groundwater collection and treatment system operations are ceased. Groundwater modeling activities were also performed to evaluate the optimal location and number of PRBs and the effects on groundwater flow inside and outside of the Area 1 Barrier Wall.

An additional field pilot test injection was completed in November 2013 and monitoring activities were completed through October 2014 with an additional Pilot Injections in the northern portion of the Area 1 chromium and nickel-impacted groundwater plume proposed in the 2015 Annual EA Budget Request.

Additional expanded pilot study injections were completed in May through June of 2015 including the injection of sodium sulfide, sodium dithionite, or a combination of the two in 83 injection points in the northern portion of the Area 1 chromium and nickel-impacted groundwater plume. Groundwater monitoring concluded in December 2015. Reporting and evaluation of full-scale implementation will continue in 2016.

- Groundwater Treatment System Decommissioning & Removal 0%
Anticipated to be completed in 2037 per May 2010 RCES.
- Completion Report & Well Abandonment 0%
Anticipated to be completed in 2037 per May 2010 RCES.

5. Summary of Contacts with Interested Parties

- An approximate 101-acre portion of the property was sold to the Livonia West Commerce Center, LLC on August 18, 2015.

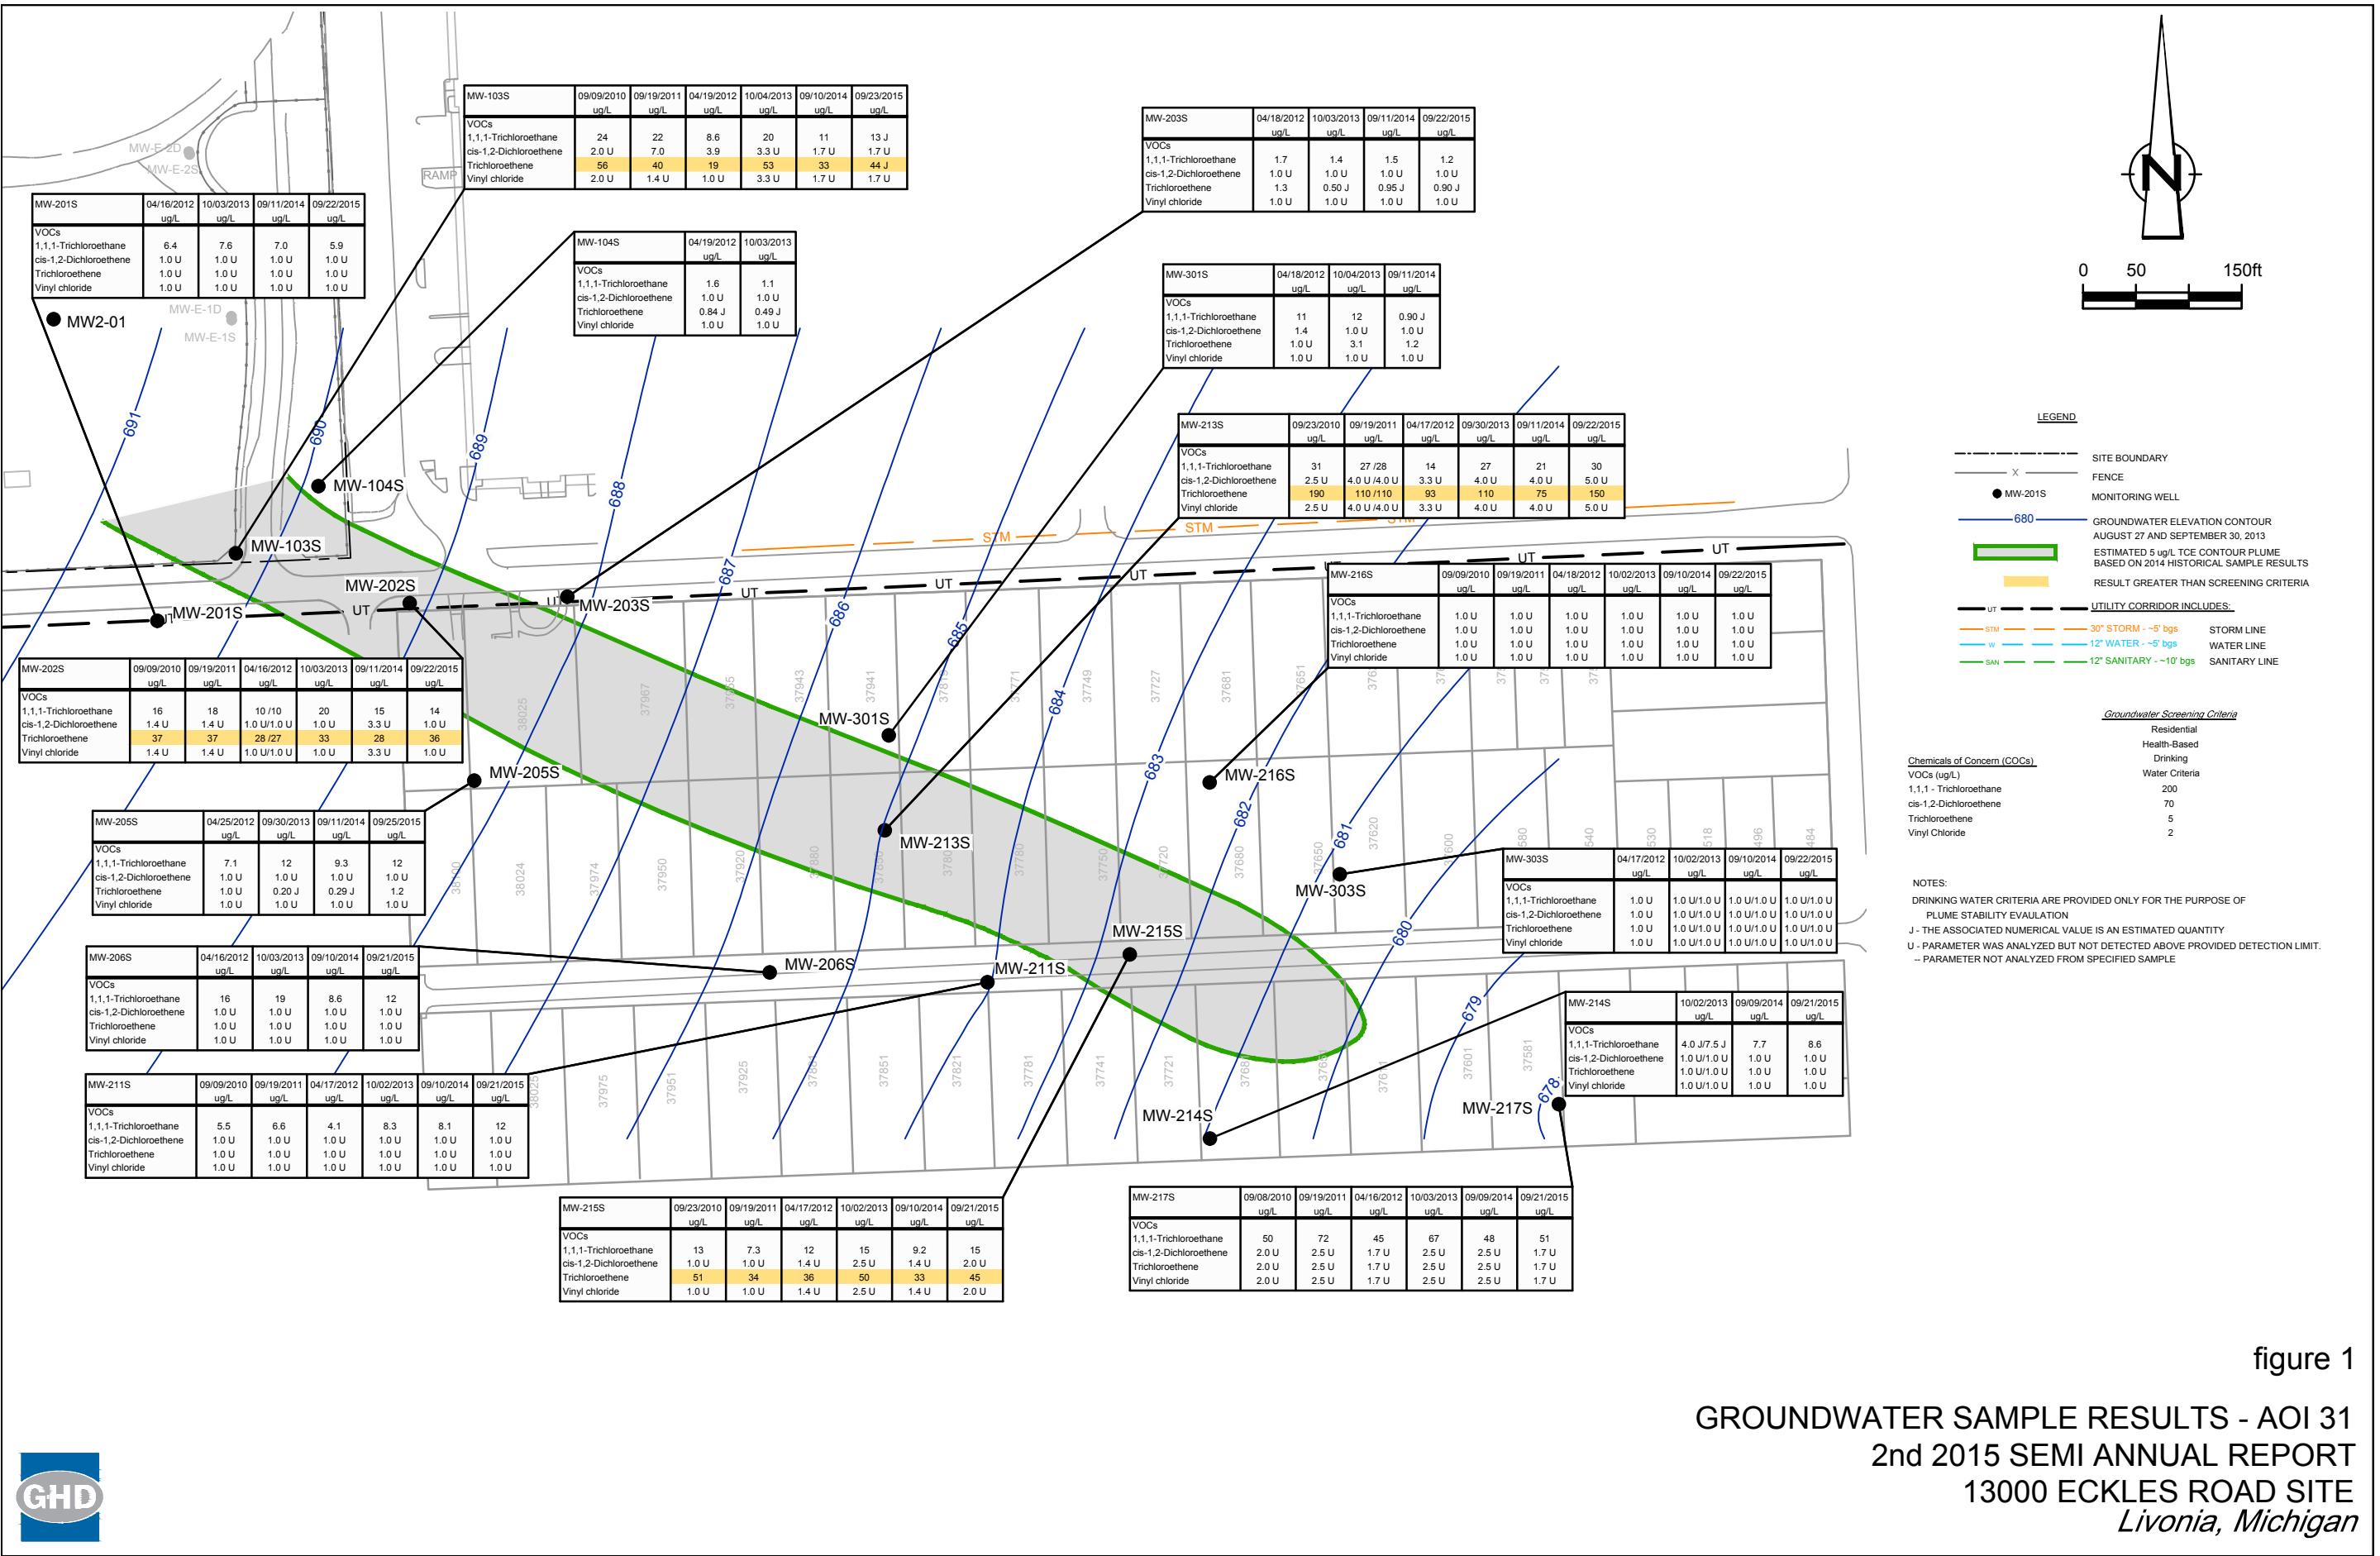

6. Changes in Personnel

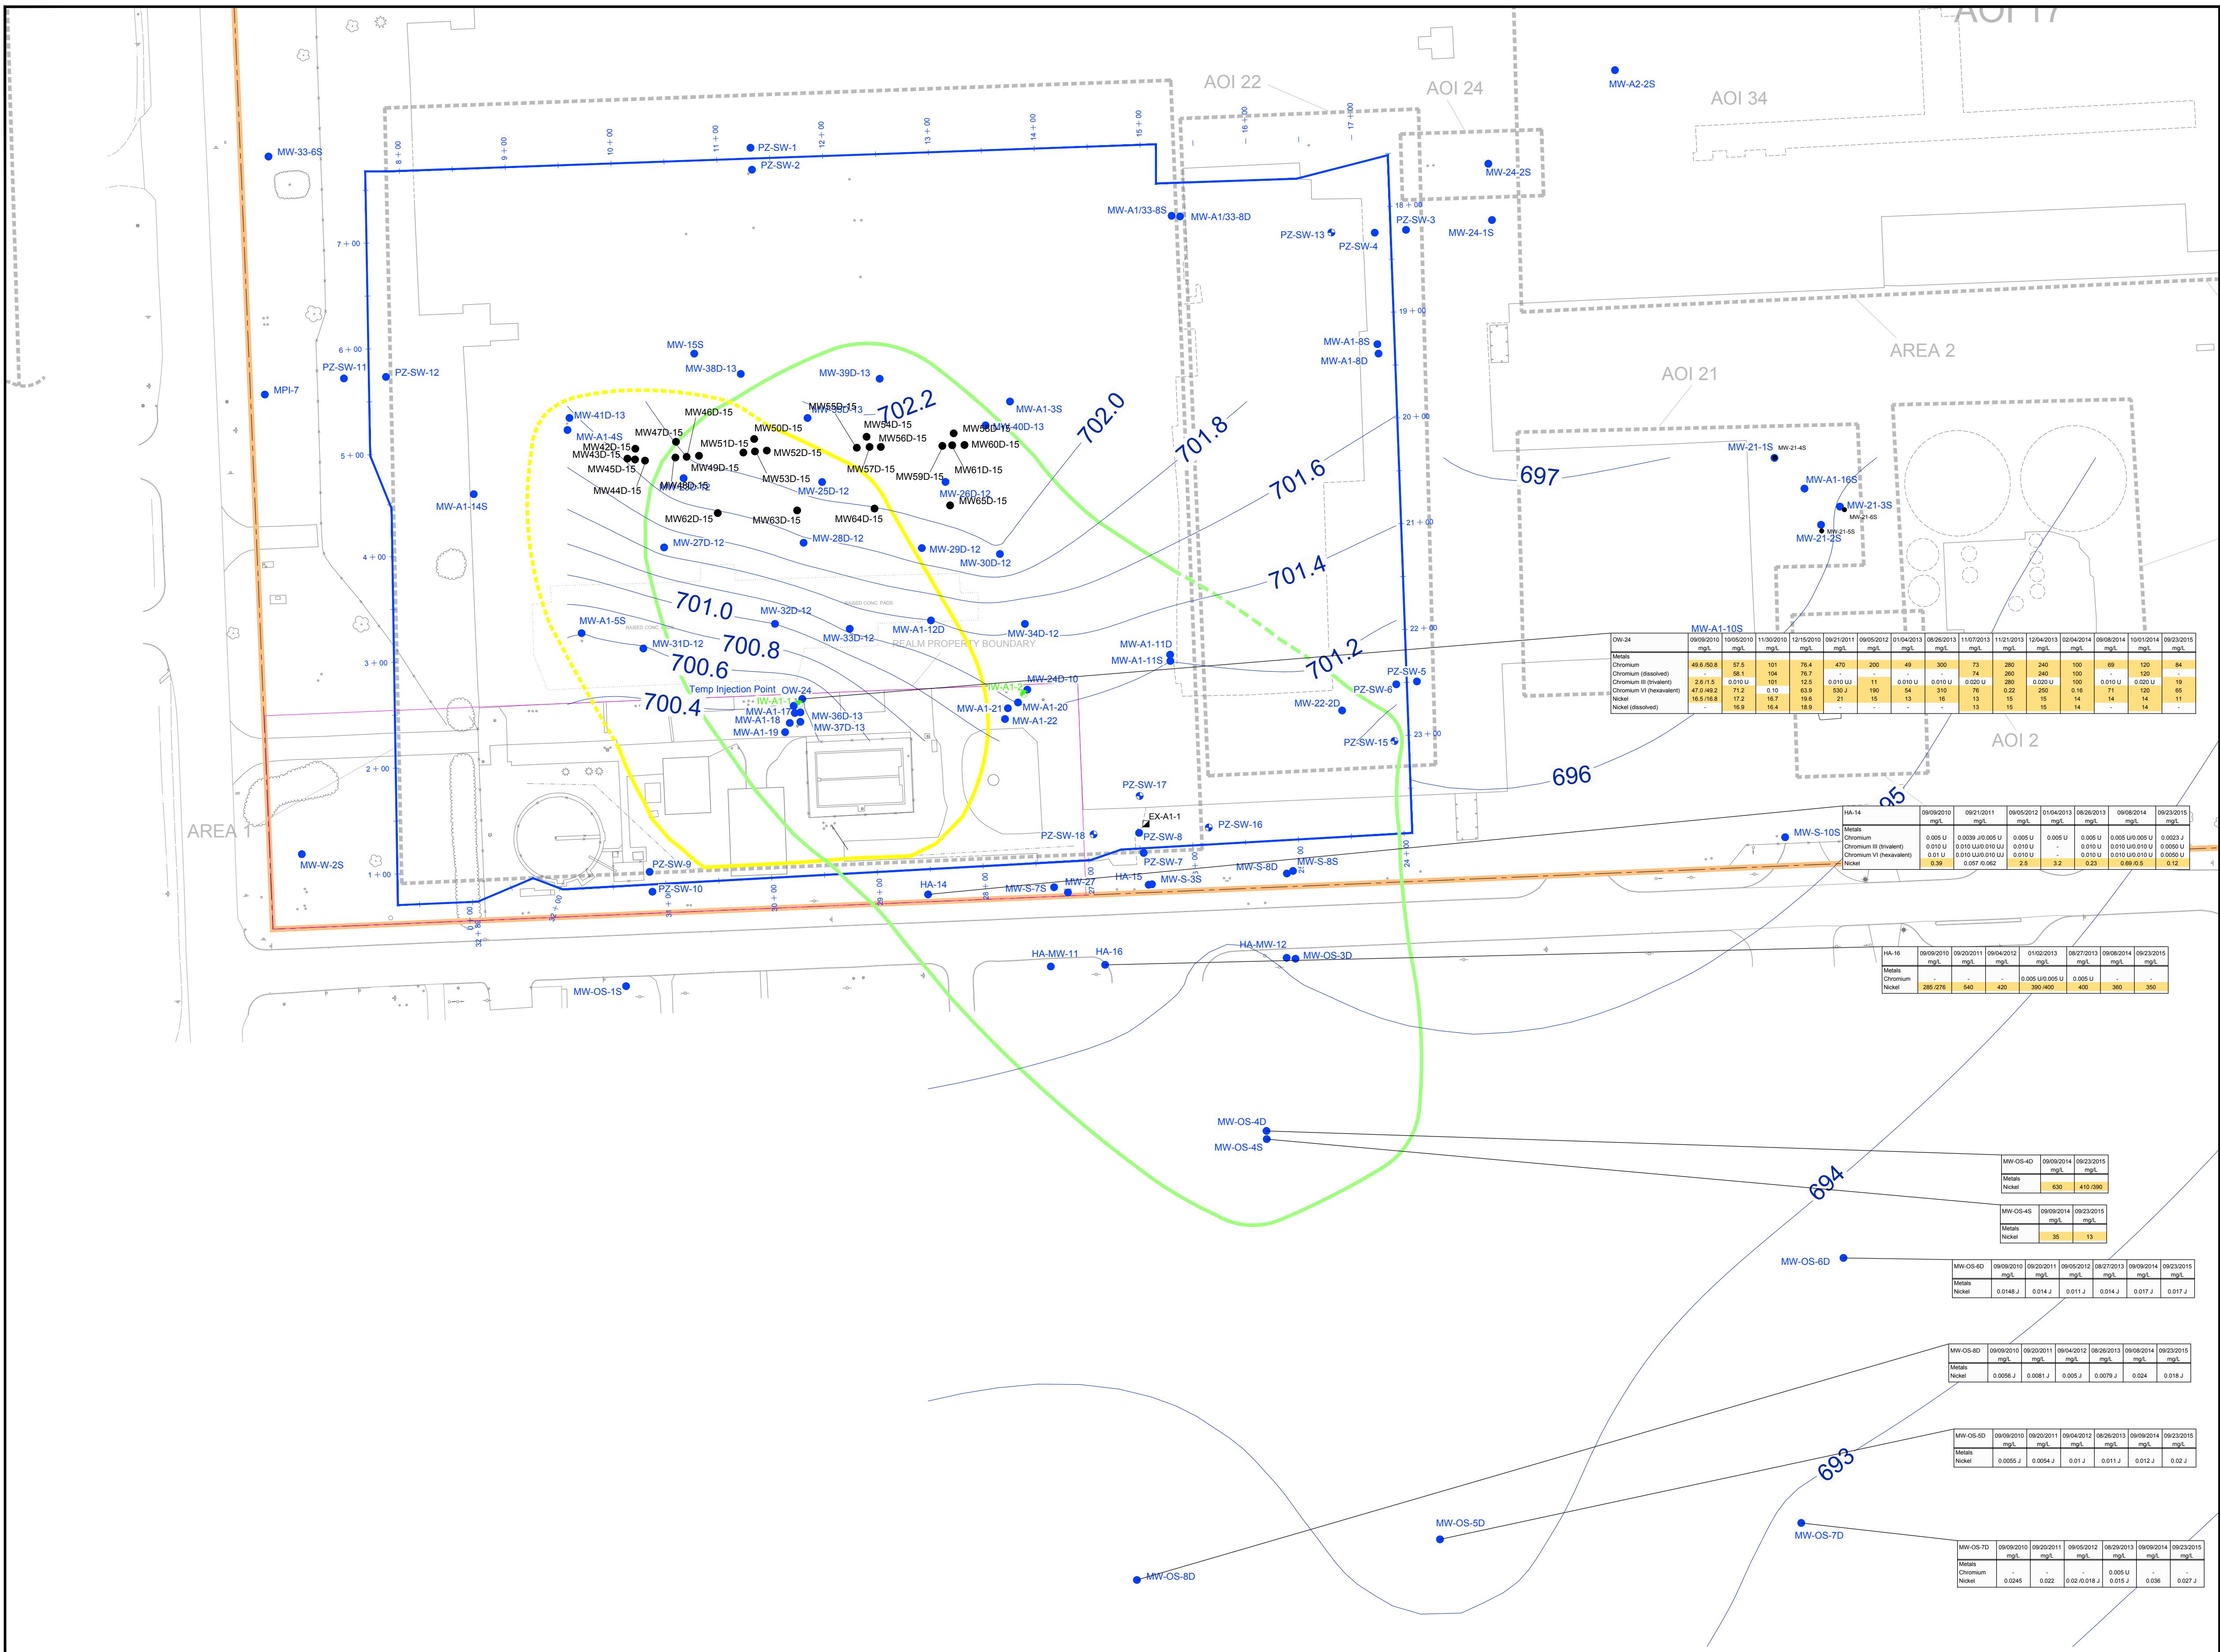

- None

7. Projected Work for Next Reporting Period (January 2016 through June 2016)

- Coordination with USEPA and MDCH with the goal of removing subslab and near-slab soil gas ports from residences.
- Finalize the off-site residential vapor intrusion investigation and results report for submittal to USEPA.
- Evaluate and develop a near and long-term vapor intrusion monitoring plan to determine if properties downgradient from the homes investigated need evaluation of the vapor intrusion pathway.
- Continued operation of the Area 1 French Drain Collection Trench and Groundwater Treatment system.
- Prepare and submit an Area 1 ISCR Pilot Study Summary Report to USEPA.
- Prepare and submit an Area 1 Full-Scale ISCR Work Plan to USEPA
- Continue evaluation of potential cost savings and remedial alternatives to decrease the long-term OM&M costs associated with the Area 1 Groundwater Collection and Treatment System.
- Update the Groundwater Flow and Transport Model and use to evaluate identified alternative treatment and flow options.
- Continued support of redevelopment activities.
- Prepare summaries of meetings, data reviews, or conference calls with USEPA, as appropriate.
- Prepare the 1st 2016 Semi-Annual Progress Report.

DECLARATION OF RESTRICTIVE COVENANT

MDEQ Reference Number: RC-HWMD-111-_____ -
Facility MID Number: MID005356621

This Declaration of Restrictive Covenant is made to protect public health, safety, welfare and the environment pursuant to the provisions of Part 111, Hazardous Waste Management, Michigan Compiled Laws ("MCL") 324.11101 et seq. ("Part 111") and the applicable Sections of Part 201, Environmental Remediation, MCL 324.20101 et seq. ("Part 201") of the Natural Resources and Environmental Protection Act ("NREPA"), 1994 PA 451, as amended, MCL 324.101 et seq., and the Solid Waste Disposal Act, commonly referred to as the Resource Conservation and Recovery Act of 1976 ("RCRA"), as amended by the Hazardous and Solid Waste Amendments of 1984, 42 U.S.C. §§ 6901 et seq.

This Declaration of Restrictive Covenant ("Restrictive Covenant") is made on AUGUST 18, 2015, by RACER Properties LLC, the Grantor and current fee title holder of the Property, whose address is 500 Woodward Avenue, Detroit, MI 48226, for the benefit of the Grantees, State of Michigan, Department of Environment Quality ("MDEQ"), whose address is 525 West Allegan Street, P.O. Box 30473, Lansing, MI 48909-7926, and United States Environmental Protection Agency ("USEPA"), whose address is 77 West Jackson Boulevard, Chicago, IL 60604-3590.

This Restrictive Covenant has been made to prohibit or restrict activities that could result in unacceptable exposure to environmental contamination present at the property associated with the former General Motors Corporation Livonia Spring and Bumper Plant, having the address of 13000 Eckles Road, Livonia, Wayne County, MI ("Property"), having Tax Identification Number(s): 46-118-99-0001-003, and legally described in Exhibit 1 and illustrated in Exhibit 2.

On March 31, 2011, the Revitalizing Auto Communities Environmental Response Trust ("Trust") was established and assumed the rights, title, and interest of Motors Liquidation Company in and to the Property pursuant to an Environmental Response Trust Consent Decree and Settlement Agreement ("Settlement Agreement") entered by the U.S. Bankruptcy Court for the Southern District of New York on March 29, 2011, in the case of *In re Motors Liquidation Company, etc. et al.*, Debtors, Case No. 09-50026 (REG), among the Debtors, the United States of America, certain states including the State of Michigan, the Saint Regis Mohawk Tribe, and EPLET, LLC, (not individually but solely in its representative capacity as Administrative Trustee of the Trust ("Administrative Trustee"). RACER Properties LLC is an entity wholly owned by the Trust. (The Trust and RACER Properties LLC are collectively referred to herein as "RACER".) The Trust entered into a Performance Based Corrective Action Agreement ("Agreement") with USEPA for the Property effective September 29, 2011. Pursuant to the Agreement, the Trust continued the implementation of the long-term groundwater monitoring program, and operated the French drain

collection system to control the off-site migration of chromium and nickel-impacted groundwater from the Property (USEPA Identification Number MID005356621).

Based on the RCRA Facility Investigation (RFI) and subsequent monitoring, the Property contains hazardous substances in excess of the concentrations developed as the unrestricted residential criteria under Section 20120a(1)(a) or (17) of NREPA, 1994 PA 451, as amended. MDEQ and USEPA recommend that prospective purchasers or users of the Property undertake appropriate due diligence prior to acquiring or using this Property, and undertake appropriate actions to comply with the requirements of Section 20107a of NREPA.

Recording of this Restrictive Covenant is designed to restrict exposures to groundwater on the Property, and require any future work, or other activities on the Property by or for the Owner, to be conducted in conformance with: i) applicable MDEQ soil relocation requirements including but not limited to MCL 324.20120c and any related administrative rules and MDEQ guidance; and ii) applicable due care obligations under MCL 324.20107a and associated administrative rules and guidance, as well as the Hazardous Waste Operations and Emergency Response Standard (HAZWOPER), 29 C.F.R. 1910.

The land or resource use restrictions contained in this Restrictive Covenant are based upon information available at the time this document was recorded. Future changes in the environmental condition of the Property or changes in the cleanup criteria developed under Part 201; the discovery of environmental conditions at the Property that were not known at the time this document was recorded; or use of the Property in a manner inconsistent with the restrictions described herein, may result in this Restrictive Covenant not being protective of public health, safety, and welfare, and the environment. Additional restrictions may become necessary.

Definitions

“Agreement” shall mean the February 27, 2012, RCRA Corrective Action Agreement between the Trust and EPA.

“Grantee” shall mean the MDEQ, its successor entities, and those persons or entities acting on its behalf;

“Grantor” shall mean RACER Properties LLC, the title holder of the Property at the time this Restrictive Covenant was executed and an entity wholly-owned by the Trust, or any future title holder of the Property or some relevant sub-portion of the Property;

“MDEQ” means the Michigan Department of Environmental Quality, its successor entities, and those persons or entities acting on its behalf.

“NREPA” shall mean the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, MCL 324.101 *et seq.*

“Owner” means at any given time the then current fee title holder(s) and the holder(s) of a life estate of the Property or any portion thereof, including the fee title holder’s lessees and those persons or entities authorized to act on its behalf.

“Part 201” shall mean Part 201, Environmental Remediation, of the NREPA.

“Property” shall mean the property legally described in Exhibit 1.

"USEPA" means the United States Environmental Protection Agency, its successor entities, and those persons or entities acting on its behalf.

All other terms used in this document which are defined in Part 3, Definitions, of the NREPA, Part 111, Part 201, or the Part 111 and Part 201 Administrative Rules, shall have the same meaning in this document as in those statutes and rules as on the date this Restrictive Covenant is made.

Summary of Response Activities

The following hazardous substances, manganese, lead, benzene, 1,1-dichloroethene, cis-1,2-dichloroethene, methylene chloride, tetrachloroethene, 1,1,1-trichloroethane, 1,1,2-trichloroethane, trichloroethylene (TCE), vinyl chloride, polycyclic aromatic hydrocarbons (PAHs), and polychlorinated biphenyls (PCBs) have been detected at the Property at concentrations above generic residential cleanup criteria for applicable exposure pathways promulgated under Part 201, Environmental Remediation, of NREPA. (See attached Exhibit 6) Corrective action has been undertaken to address this contamination. Contaminated soil was removed from the south central, north central, and southeast portions of the Property. A groundwater monitoring plan, dated April 20, 2008, has been implemented for the Property to ensure that concentrations of constituents at the south and southeast property boundaries remain stable or decline. Institutional controls are being implemented along the north boundary area and south central area of the Property.

Additionally, on the adjacent parcel owned by RACER Properties LLC to the southwest of the Property (identified as "Revised Parcel 2" in Exhibit 2), a soil-bentonite and jet grout barrier wall have been installed to control the migration of chromium and nickel-impacted groundwater. The groundwater in Parcel 2 is collected in a French drain collection system and treated at the treatment plant, prior to being discharged to the Detroit Water and Sewerage Department sanitary sewer.

NOW THEREFORE,

Declaration of Land Use or Resource Use Restrictions

Grantor(s) as current fee title holder(s) of the Property, hereby declare(s) and covenant(s) that the Property, shall be subject to those restrictions on use described below, and intends that said restrictions and covenants shall run with the land, and may be enforced in perpetuity against Owner by the following entities: (1) Grantor, if it is no longer owner; and (2) MDEQ.

1. Land Use Prohibitions. Owner shall prohibit all uses of the Property that are not compatible with nonresidential land use category under MCL 324.20120a(1)(b) and generally described in the Description of Allowable Uses, attached hereto as Exhibit 5. Part 201 cleanup criteria for land use-based response activities are located in the Government Documents Section of the State of Michigan Library, MCL 324.201201 et seq. effective January 2015, and Michigan Administrative Code ("MAC") Rule ("R") 299.1 – R 299.50, effective December 31, 2013.

2. **Activities Prohibited.** Owner shall prohibit activities on the Property that may result in exposures above the nonresidential land use category. These prohibited activities include:
 - a. No drinking water wells may be installed or used on the Property.
 - b. No groundwater extraction wells may be installed or used on the Property except for wells and devices that are part of an MDEQ or USEPA approved response activity, and for short-term dewatering for construction purposes, provided the dewatering, including management and disposal of the groundwater, is conducted in accordance with all applicable environmental laws and does not cause or result in a new release, exacerbation of any pre-existing environmental condition, or any other violation of environmental laws.
 - c. No contaminated soils, if any are present, may be relocated on the Property, except as provided for under Part 201, Section 20120c, MCL 324.20120c.
 - d. Owner shall not “treat,” “store,” “dispose” or release any Hazardous Substances, on, at, or below the Property, in a manner that would require a permit under RCRA, 42 U.S.C. §§ 6901 et seq. or equivalent state Law, except pursuant to a plan or permit approved in writing by MDEQ or USEPA.
 - e. If Owner elects to remove any slabs, pavement or other impervious surface on the Property, Owner shall be responsible for any and all obligations under environmental laws arising from any such removal, alteration or disturbance, whether or not caused by, arising from or related to, an environmental condition.
 - f. Owner shall not damage, remove, destroy or otherwise render inoperable or inaccessible any Monitoring Wells identified on the attached Exhibit 4 without written approval from MDEQ or USEPA or Grantor.
 - g. Owner shall maintain the berm along the northern side of the site and as depicted on Exhibit 3 as a cover/barrier over manganese in soils above the applicable inhalation standard and may not remove this berm unless a plan is approved in writing by MDEQ or USEPA to ensure the cover over the manganese area is properly maintained or other proper measures are taken to protect workers and the community from potential inhalation exposures.
 - h. Owner shall not excavate or disturb the soils in the “LNAPL” area depicted on the attached Exhibit 3 without a soils management plan approved in writing by MDEQ or USEPA or Grantor.
3. **Contaminated Soil Management.** Owner shall manage contaminated soils, media and/or debris (if any) and all other soils located on the Property in accordance with the requirements of Part 111, Section 20120c of the NREPA and RCRA Subtitle C, 42 U.S.C. §§ 6921-6943 et seq., the administrative rules promulgated pursuant to Part 111 and RCRA, and all other relevant state and federal laws, including but not limited to MCL 324.20120c.

4. **Soil Vapor Management.** The Owner shall not build or occupy any building on the Property without first completing one of the following: Option 1) Evaluate and determine, in accordance with applicable environmental laws rules or regulations that no unacceptable vapor intrusion risks to human health exist in any existing or newly constructed site buildings; or Option 2) Install, operate and maintain a vapor barrier and/or mitigation system designed to eliminate the potential for subsurface vapor phase hazardous substances to migrate into any building at concentrations greater than applicable criteria. This prohibition does not apply to short-term occupancy of a building for purposes of construction, renovation, repair, or other short-term activities as long as adequate health and safety precautions are employed during these activities, and they are performed in compliance with Section 20107a of NREPA.

If Option 2 above is selected, the Owner shall install and thereafter maintain a vapor barrier and/or install and thereafter operate and maintain a vapor intrusion mitigation system in accordance with applicable standards and criteria at the time, for the purpose of mitigating the potential intrusion of soil vapor below any human-occupied building constructed on the property after the date of this Restrictive Covenant until it is determined that a vapor barrier or mitigation system is no longer necessary in accordance with Option 1, above.

5. **Access.** Owner shall grant to MDEQ and USEPA the right to enter the Property at reasonable times for the purpose of determining and monitoring compliance with this Restrictive Covenant, including the right to take samples and, inspect any records relating thereto, and to perform any actions necessary to maintain compliance with Part 111, Part 201, and RCRA. Nothing in this Restrictive Covenant shall limit or otherwise affect MDEQ's right of entry and access, as defined in the NREPA, and any successor statutory provisions, or other state or federal laws.
6. **Term.** This Restrictive Covenant shall run with the Property, and shall be binding on Owner, and all current and future successors, lessees, easement holders, their assigns, and their authorized agents, employees, or persons acting under their direction and control.
7. **Enforcement.** Grantor and the Trust are entitled to enforce the restrictions and covenants in this Restrictive Covenant by specific performance or other legal action in a court of competent jurisdiction against subsequent Owners of all or part of the Property. Grantor, on behalf of itself, and its successors in title, intends and agrees that MDEQ or USEPA is entitled to enforce the restrictions and covenants in this Restrictive Covenant by specific performance or other legal action in a court of competent jurisdiction against Grantor, as Owner, and thereafter against subsequent Owners of all or part of the Property. All remedies available hereunder shall be in addition to any and all other remedies at law or equity.
8. **Third Party Beneficiary:** Grantor, on behalf of itself and its successors, and assigns, hereby agrees that the United States, acting by and through USEPA, its successors and assigns shall be a third party beneficiary ("Third Party Beneficiary") of all the benefits and rights set out in the restrictions, covenants, easements, exceptions, notifications, conditions and agreements herein, and that the Third Party Beneficiary shall have the right to enforce the restrictions described herein as if it was a party hereto. No other rights in third parties are intended by this Restrictive Covenant, and no other person or entity shall have any rights or authorities hereunder to enforce these restrictions, terms, conditions or

obligations beyond Grantor, MDEQ, their successors, assigns, and the Third Party Beneficiary.

9. **USEPA Entry, Access:** Nothing in this Restrictive Covenant shall limit or otherwise affect USEPA's right of entry and access, or authority to undertake actions under the Comprehensive Environmental Response, Compensation, and Liability Act, the National Contingency Plan (40 C.F.R. Part 300), and any successor statutory provisions, or other state or federal law. The Grantor consents to officers, employees, contractors, and authorized representatives of USEPA entering and having continued access to this Property for the purposes described in Paragraph 5 (Access) of this Restrictive Covenant.
10. **Modification/ Release/Rescission:** Grantor or Owner may request in writing to MDEQ and USEPA, at the addresses provided in herein, modifications to, or release or rescission of, this Restrictive Covenant. This Restrictive Covenant may be modified, released or rescinded only with the written approval of MDEQ and USEPA. Any approved modification to, or release or rescission of, this Restrictive Covenant shall be filed with the appropriate Registrar of Deeds by the Grantor or Owner and a certified copy shall be returned to MDEQ and USEPA at the addresses provided herein.
11. **Transfer of Interest:** Grantor shall provide notice at the addresses provided in this document to MDEQ and USEPA of the Grantor's intent to transfer any interest in the Property, or any portion thereof, at least fourteen (14) business days prior to consummating the conveyance. A conveyance of title, easement, or other interest in the Property shall not be consummated by Grantor without adequate and complete provision for compliance with the terms and conditions of this Restrictive Covenant and the applicable provisions of Section 20116 of the NREPA. Grantor shall include in any instrument conveying any interest in any portion of the Property, including, but not limited to, deeds, leases, and mortgages, a notice which is in substantially the following form:

NOTICE: THE INTEREST CONVEYED HEREBY IS SUBJECT TO A DECLARATION OF RESTRICTIVE COVENANT DATED _____ [month, day, year], AND RECORDED WITH THE WAYNE COUNTY REGISTER OF DEEDS, LIBER _____, PAGE _____.

12. **Notices:** Any notice, demand, request, consent, approval, or communication that is required to be made or obtained under this Restrictive Covenant shall be made in writing; include a statement that the notice is being made pursuant to the requirements of this Restrictive Covenant; include the MDEQ Site ID number, and reference number; and shall be served either personally, or sent via first class mail, postage prepaid, as follows:

For MDEQ:

Chief
Office of Waste Management and Radiological Protection
Michigan Department of Environmental Quality
P.O. Box 30241
Lansing, MI 48909-7741

For USEPA:

Director
Land and Chemicals Division (DR-8J)

500 Woodward Avenue
Detroit, MI 48226

with a copy to:

General Counsel
RACER Trust
500 Woodward Avenue
Detroit, MI 48226

13. Severability. If any provision of this Restrictive Covenant is held to be invalid by a court of competent jurisdiction, the invalidity of such provision shall not affect the validity of any other provisions of this Restrictive Covenant and all other provisions shall continue to remain in full force and effect.
14. Limitation on RACER's Liability. RACER's and the Administrative Trustee's liability is limited by the terms and conditions of the Settlement Agreement, which are incorporated herein by reference.
15. Authority to Execute Restrictive Covenant. The undersigned person executing this Restrictive Covenant represents and certifies that he or she is duly authorized and has been empowered to execute and deliver this Restrictive Covenant.
16. Notification to Potentially Interested Parties. Notification of this Restrictive Covenant has been provided to the easement holders on the Property identified in Exhibit 2.
17. Miscellaneous:
 - a) Controlling Law. The interpretation and performance of this Restrictive Covenant shall be governed by the laws of the United States as to the obligations referred to in the Agreement, and regulations of the State of Michigan for all other purposes hereunder (without reference to choice of laws principles thereof). The right to

enforce the conditions and restrictions in this Restrictive Covenant are in addition to other rights and remedies that may be available, including, but not limited to, administrative and judicial remedies under RCRA, CERCLA or Part 201 of the NREPA.

- b) Liberal Construction. Any general rule of construction to the contrary notwithstanding, this Restrictive Covenant shall be liberally construed to affect the purpose of this Restrictive Covenant and the policy and purpose of RCRA and the land use restrictions and prospective use limitations required by Part 201. If any provision of this Restrictive Covenant is found to be ambiguous, an interpretation consistent with the purpose of this Restrictive Covenant that would render the provision valid shall be favored over any interpretation that would render it invalid.
- c) Entire Agreement. This Restrictive Covenant and its attachments and appendices supersedes all prior discussions, negotiations, understandings, or agreements relating to the matters addressed herein, all of which are merged herein.

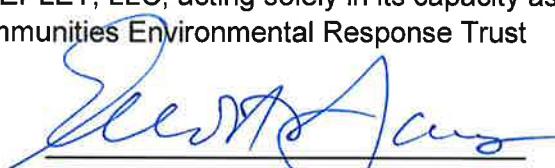

IN WITNESS WHEREOF, RACER PROPERTIES LLC has caused this Restrictive Covenant, to be executed on this 18th day of August, 2015.

DESCRIPTION OF ALLOWABLE USES

Nonresidential Land Use: This land use is characterized by any use which is not residential in nature and is primarily characterized by industrial and commercial uses. Industrial uses typically involve manufacturing operations engaged in processing and manufacturing of materials or products. Other examples of industrial uses are utility companies, industrial research and development, and petroleum bulk storage. Commercial uses include any business or income-producing use such as commercial warehouses, lumber yards, retail gas stations, auto dealerships and service stations, as well as office buildings, banks, and medical/dental offices (not including hospitals). Commercial uses also include retail businesses whose principal activity is the sale of food or merchandise within an enclosed building and personal service establishments which perform services indoors such as health clubs, barber/beauty salons, photographic studios, etc.

Any residential use is specifically prohibited from the non-residential land use category. This would include the primary use of the property for human habitation and includes structures such as single family dwellings, multiple family structures, mobile homes, condominiums, and apartment buildings. Residential use is also characterized by any use which is intended to house, educate, or provide care for children, the elderly, the infirm, or other sensitive populations, and therefore could include day care centers, educational facilities, hospitals, elder care facilities, and nursing homes. The use of any accessory building or portion of an existing building as a dwelling unit permitted for a proprietor or storekeeper and their families, located in the same building as their place of occupation, or for a watchman or caretaker is also prohibited. Any authority that allows for residential use of the Property as a legal non-conforming use is also restricted per the prohibitions contained in this restrictive covenant.

**TERMINATION OF DECLARATION
OF RESTRICTIVE COVENANT** (D)

GENERAL MOTORS CORPORATION was the declarant under that certain Declaration of Restrictive Covenant (MDEQ Reference No.: RC-WHMD-06-007) dated as of January 17, 2007 and recorded with the Wayne County Register of Deeds on January 22, 2007 at Liber 45871 Page 446 (the "Restrictive Covenant") with respect to property located at 13000 Eckles Road, Livonia, Michigan, and described therein as the "Property" (the "Eckles Road Site").

On June 1, 2009 GM filed a voluntary petition for relief under the Bankruptcy Code. As a result of the ensuing bankruptcy process a new entity was formed, General Motors Company, which acquired a portion of the original GM assets. GM was renamed Motors Liquidation Company and retained those assets not acquired by General Motors Company.

The Revitalizing Auto Communities Environmental Response Trust ("RACER Trust") was established on March 31, 2011 and assumed the rights, title, and interest of Motors Liquidation Company in and to the Eckles Road Site and the adjacent property located at 12950 Eckles Road pursuant to an Environmental Response Trust Consent Decree and Settlement Agreement ("Settlement Agreement") entered by the U.S. Bankruptcy Court for the Southern District of New York on March 29, 2011, in the case of *In re Motors Liquidation Company, etc. et al.*, Debtors, Case No. 09-50026 (REG), among the Debtors, the United States of America, certain states including the State of Michigan, the Saint Regis Mohawk Tribe, and EPLET, LLC, (not individually but solely in its representative capacity as Administrative Trustee of the Trust ("Administrative Trustee").

RACER Properties LLC, an entity wholly-owned by the RACER Trust is the current title holder owner of the Eckles Road Site and the adjacent property located at 12950 Eckles Road. **RACER Properties LLC**, with the consent of the US Environmental Protection Agency, hereby terminates the Restrictive Covenant as it relates to all the property described and illustrated in attached Exhibit "A".

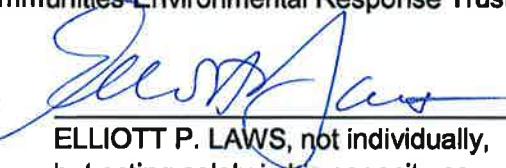

Dated as of August 18, 2015

RACER PROPERTIES LLC

By: Revitalizing Auto Communities Environmental Response Trust, Sole Member of RACER Properties LLC

By: EPLET, LLC, acting solely in its capacity as Administrative Trustee of Revitalizing Auto Communities Environmental Response Trust

By:

ELLIOTT P. LAWS, not individually,
but acting solely in his capacity as
Managing Member of EPLET, LLC

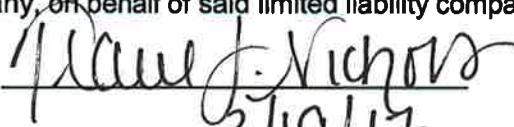

Date: August 18, 2015

Narrative

CASE NARRATIVE

Client: GHD Services Inc.

Project: 12607-019, RACER Eckles Rd

Report Number: 240-55783-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 09/24/2015; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 1.3 C.

VOLATILE ORGANIC COMPOUNDS (GCMS)

Samples GW-12607-092115-EM-001 (240-55783-1), GW-12607-092115-EM-002 (240-55783-2), GW-12607-092115-EM-003 (240-55783-3), GW-12607-092115-EM-004 (240-55783-4), GW-12607-092115-EM-005 (240-55783-5), GW-12607-092215-EM-006 (240-55783-6), GW-12607-092215-EM-007 (240-55783-7), GW-12607-092215-EM-008 (240-55783-8), GW-12607-092215-EM-009 (240-55783-9), GW-12607-092215-EM-010 (240-55783-10), GW-12607-092215-EM-011 (240-55783-11), GW-12607-092215-EM-012 (240-55783-12), GW-12607-092315-EM-018 (240-55783-18) and TB-12607-092315-A (240-55783-24) were analyzed for volatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8260B. The samples were analyzed on 09/29/2015, 09/30/2015, 10/02/2015 and 10/05/2015.

Acetone was detected in method blank MB 240-199492/6 at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Acetone and Methylene Chloride were detected in method blank MB 240-199757/6 at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Case Narrative

TestAmerica Job ID: 240-55783-1

Job ID: 240-55783-1 (Continued)

Laboratory: TestAmerica Canton (Continued)

Acetone and Methylene Chloride were detected in method blank MB 240-200149/6 at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Acetone and Methylene Chloride were detected in method blank MB 240-200347/6 at levels that were above the method detection limit but below the reporting limit. The values should be considered estimates, and have been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Several analytes failed the recovery criteria low for the MS of sample GW-12607-092315-EM-018MS (240-55783-18) in batch 240-200347.

Several analytes failed the recovery criteria low for the MSD of sample GW-12607-092315-EM-018MSD (240-55783-18) in batch 240-200347.

Samples GW-12607-092115-EM-001 (240-55783-1)[1.67X], GW-12607-092115-EM-005 (240-55783-5)[2X], GW-12607-092215-EM-006 (240-55783-6)[5X] and GW-12607-092315-EM-018 (240-55783-18)[1.67X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

There was no MS/MSD run in batch 200149 due to an instrument failure.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOLATILE ORGANIC COMPOUNDS (GCMS SIM)

Samples GW-12607-092115-EM-005 (240-55783-5), GW-12607-092215-EM-006 (240-55783-6), GW-12607-092215-EM-011 (240-55783-11), GW-12607-092315-EM-018 (240-55783-18) and TB-12607-092315-B (240-55783-25) were analyzed for volatile organic compounds (GCMS SIM) in accordance with EPA SW-846 Method 8260B SIM. The samples were analyzed on 10/01/2015.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

TOTAL RECOVERABLE METALS (ICP)

Samples GW-12607-092315-EM-013 (240-55783-13), GW-12607-092315-EM-014 (240-55783-14), GW-12607-092315-EM-015 (240-55783-15), GW-12607-092315-EM-016 (240-55783-16), GW-12607-092315-EM-017 (240-55783-17), GW-12607-092315-EM-019 (240-55783-19), GW-12607-092315-EM-020 (240-55783-20), GW-12607-092315-EM-021 (240-55783-21), GW-12607-092315-EM-022 (240-55783-22) and GW-12607-092315-EM-023 (240-55783-23) were analyzed for total recoverable metals (ICP) in accordance with EPA SW-846 Method 6010B. The samples were prepared on 09/25/2015 and analyzed on 09/28/2015 and 09/29/2015.

Chromium was detected in method blank MB 240-199077/1-A at a level that was above the method detection limit but below the reporting limit. The value should be considered an estimate, and has been flagged. If the associated sample reported a result above the MDL and/or RL, the result has been flagged.

Chromium failed the recovery criteria low for the MS of sample GW-12607-092315-EM-022MS (240-55783-22) in batch 240-199445.

Nickel and Chromium failed the recovery criteria high for the MSD of sample GW-12607-092315-EM-022MSD (240-55783-22) in batch 240-199445.

Samples GW-12607-092315-EM-013 (240-55783-13)[20X], GW-12607-092315-EM-014 (240-55783-14)[20X], GW-12607-092315-EM-019 (240-55783-19)[20X] and GW-12607-092315-EM-022 (240-55783-22)[5X] required dilution prior to analysis. The reporting limits have been adjusted accordingly.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

HEXAVALENT CHROMIUM

Samples GW-12607-092315-EM-022 (240-55783-22) and GW-12607-092315-EM-023 (240-55783-23) were analyzed for hexavalent chromium in accordance with EPA SW-846 Method 7196A. The samples were analyzed on 09/24/2015.

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
F1	MS and/or MSD Recovery is outside acceptance limits.
B	Compound was found in the blank and sample.

Metals

Qualifier	Qualifier Description
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.
B	Compound was found in the blank and sample.
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.
U	Indicates the analyte was analyzed for but not detected.

General Chemistry

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.

Glossary

Abbreviation

These commonly used abbreviations may or may not be present in this report.

¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Narrative

CASE NARRATIVE

Client: GHD Services Inc.

Project: 12607-019, RACER Eckles Rd

Report Number: 240-55868-1

With the exceptions noted as flags or footnotes, standard analytical protocols were followed in the analysis of the samples and no problems were encountered or anomalies observed. In addition all laboratory quality control samples were within established control limits, with any exceptions noted below. Each sample was analyzed to achieve the lowest possible reporting limit within the constraints of the method. In some cases, due to interference or analytes present at high concentrations, samples were diluted. For diluted samples, the reporting limits are adjusted relative to the dilution required.

TestAmerica Canton attests to the validity of the laboratory data generated by TestAmerica facilities reported herein. All analyses performed by TestAmerica facilities were done using established laboratory SOPs that incorporate QA/QC procedures described in the application methods. TestAmerica's operations groups have reviewed the data for compliance with the laboratory QA/QC plan, and data have been found to be compliant with laboratory protocols unless otherwise noted below.

The test results in this report meet all NELAP requirements for parameters for which accreditation is required or available. Any exceptions to NELAP requirements are noted in this report. Pursuant to NELAP, this report may not be reproduced, except in full, without the written approval of the laboratory.

Calculations are performed before rounding to avoid round-off errors in calculated results.

All holding times were met and proper preservation noted for the methods performed on these samples, unless otherwise detailed in the individual sections below.

All solid sample results are reported on an "as received" basis unless otherwise indicated by the presence of a % solids value in the method header.

This laboratory report is confidential and is intended for the sole use of TestAmerica and its client.

RECEIPT

The samples were received on 09/26/2015; the samples arrived in good condition, properly preserved and on ice. The temperature of the coolers at receipt was 1.7 C.

VOLATILE ORGANIC COMPOUNDS (GCMS)

Samples GW-12607-092515-EM-024 (240-55868-1) and TB-12607-092515-EM (240-55868-2) were analyzed for volatile organic compounds (GCMS) in accordance with EPA SW-846 Method 8260B. The samples were analyzed on 10/06/2015.

There is no MS/MSD for batch 200531 due to analyst prep error.

No analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Definitions/Glossary

Client: GHD Services Inc.
Project/Site: 12607-019, RACER Eckles Rd

TestAmerica Job ID: 240-55868-1

Qualifiers

GC/MS VOA

Qualifier	Qualifier Description
U	Indicates the analyte was analyzed for but not detected.
J	Result is less than the RL but greater than or equal to the MDL and the concentration is an approximate value.

Glossary

Abbreviation

These commonly used abbreviations may or may not be present in this report.

□	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Date: October 28, 2015

Re: Analytical Results and Reduced Validation
GMP Monitoring
13000 Eckles Road
Livonia, Michigan
September 2015

1. Introduction

The following document details a reduced validation of analytical results for groundwater samples collected in support of GMP Monitoring at the 13000 Eckles Road Site during September 2015. Samples were submitted to TestAmerica Laboratories, Inc., located in North Canton, Ohio. A sample collection and analysis summary is presented in Table 1. The validated analytical results are summarized in Table 2. A summary of the analytical methodology is presented in Table 3.

Standard GHD report deliverables were submitted by the laboratory. The final results and supporting quality assurance/quality control (QA/QC) data were assessed. Evaluation of the data was based on information obtained from the chain of custody forms, finished report forms, method blank data, duplicate data, recovery data from surrogate spikes, laboratory control samples (LCS), matrix spikes and field QC samples.

The QA/QC criteria by which these data have been assessed are outlined in the analytical methods referenced in Table 3 and applicable documents entitled:

- i) "USEPA Contract Laboratory Program National Functional Guidelines for Organic Data Review", United States Environmental Protection Agency (USEPA) 540/R-08-01, June 2008
- ii) "USEPA Contract Laboratory Program National Functional Guidelines for Inorganic Superfund Data Review", USEPA 540-R-10-011, January 2010

Items i) and ii) will subsequently be referred to as the "Guidelines" in this Memorandum

2. Sample Holding Time and Preservation

The sample holding time criteria for the analyses are summarized in Table 3. The sample chain of custody documents and analytical reports were used to determine sample holding times. The samples were prepared and analyzed within the required holding times.

The samples were properly preserved and delivered on ice, and stored by the laboratory at the required temperature (0-6°C).

3. Laboratory Method Blank Analyses

Method blanks are prepared from a purified matrix and analyzed with investigative samples to determine the existence and magnitude of sample contamination introduced during the analytical procedures.

For this study, laboratory method blanks were analyzed at a minimum frequency of one per 20 investigative samples and/or one per analytical batch.

Several low concentrations of target parameters were detected in the method blanks which indicate a potential for laboratory contamination. The associated samples that contained similar concentrations of these compounds were assumed to be a reflection of laboratory contamination and the results were qualified non-detect, as detailed in Table 4.

4. Surrogate Spike Recoveries - Organic Analyses

In accordance with the methods employed, all samples, blanks and QC samples analyzed for organics are spiked with surrogate compounds prior to sample extraction and/or analysis. Surrogate recoveries provide a means to evaluate the effects of laboratory performance on individual sample matrices.

All samples submitted for volatile organic compound (VOC) determinations were spiked with the appropriate number of surrogate compounds prior to sample extraction and/or analysis.

Surrogate recoveries were assessed against laboratory control limits. The surrogate recoveries met the above criteria.

5. Laboratory Control Sample Analyses

LCS are prepared and analyzed as samples to assess the analytical efficiencies of the methods employed, independent of sample matrix effects.

For this study, LCS were analyzed at a minimum frequency of one per 20 investigative samples and/or one per analytical batch.

5.1 Organic Analyses

The LCS contained all compounds of interest. The percent recoveries were within the laboratory control limits. All LCS recoveries were within the laboratory (method) control limits, demonstrating acceptable analytical accuracy.

5.2 Inorganic Analyses

The LCS contained all analytes of interest. LCS recoveries were assessed per the "Guidelines". All LCS recoveries were within the laboratory control limits, demonstrating acceptable analytical accuracy.

6. Matrix Spike/Matrix Spike Duplicate (MS/MSD) Analyses

To evaluate the effects of sample matrices on the preparation process, measurement procedures, and accuracy of a particular analysis, samples are spiked with a known concentration of the analyte of concern and analyzed as MS/MSD samples. The relative percent difference (RPD) between the MS and MSD is used to assess analytical precision.

MS/MSD analyses were performed as specified in Table 1. The laboratory performed additional site-specific MS/MSD analyses internally.

6.1 Organic Analyses

The MS/MSD samples were spiked with all compounds of interest.

Table 5 presents the outlying matrix spike data. The associated sample results were qualified estimated, as noted in the table. The remaining percent recoveries and RPD values were within the control limits or outlying percent recoveries and RPD values did not result in qualification.

6.2 Inorganic Analyses

The matrix spike samples were spiked with the analytes of interest and the results were evaluated using the "Guidelines". The percent recoveries and RPD values were within the laboratory control limits or outlying percent recoveries did not result in qualification, demonstrating acceptable analytical accuracy and precision.

7. Field QA/QC Samples

The field QA/QC consisted of three trip blank samples and two field duplicate samples.

7.1 Trip Blank Sample Analysis

To evaluate contamination from sample collection, transportation, storage, and analytical activities, three trip blanks were submitted to the laboratory for VOC analysis. One trip blank yielded detections of acetone and methylene chloride. However, since the associated sample detections were previously qualified nondetect based on method blanks, no data qualification was required based on trip blank results.

The remaining trip blank data were free of target parameters.

7.2 Field Duplicate Sample Analysis

To assess the analytical and sampling protocol precision, two field duplicate samples were collected and submitted "blind" to the laboratory, as specified in Table 1. The RPDs associated with these duplicate samples must be less than 50 percent for water samples. If the reported concentration in either the investigative sample or its duplicate is less than five times the reporting limit (RL), the evaluation criteria is one times the RL value for water samples.

All field duplicate results were within acceptable agreement, demonstrating acceptable sampling and analytical precision.

8. Analyte Reporting

The laboratory reported detected results down to the laboratory's method detection limit (MDL) for each analyte. Positive analyte detections less than the reporting limit (RL) but greater than the MDL were qualified as estimated (J) in Table 2 unless qualified otherwise in this memorandum. Non-detect results were presented as non-detect at the RL in Table 2.

9. Conclusion

Based on the assessment detailed in the foregoing, the data summarized in Table 2 are acceptable with the qualifications noted herein.

Carbon tetrachloride	µg/L	1.0 U
Chlorobenzene	µg/L	1.0 U
Chloroethane	µg/L	1.0 U
Chloroform (Trichloromethane)	µg/L	1.0 U
Chloroethane, Methyl chloride()	µg/L	1.0 U
cis-1,2-Dichloroethene	µg/L	1.0 U
cis-1,3-Dichloropropene	µg/L	1.0 U
Cyclohexane	µg/L	1.0 U
Dibromochloromethane	µg/L	1.0 U
Dichlorodifluoromethane (CFC-12)	µg/L	1.0 U
Ethylbenzene	µg/L	1.0 U
Isopropyl benzene	µg/L	1.0 U
Methyl acetate	µg/L	1.0 U
Methyl cyclohexane	µg/L	1.0 U
Methyl tert butyl ether (MTBE)	µg/L	0.43 U
Methylene chloride	µg/L	1.0 U
Syrene	µg/L	1.0 U
Tetrachloroethene	µg/L	1.0 U
Toluene	µg/L	1.0 U
trans-1,2-Dichloroethene	µg/L	1.0 U
trans-1,3-Dichloropropene	µg/L	1.0 U
Trichloroethylene	µg/L	1.0 U
Trifluoromethane (CFC-11)	µg/L	1.0 U

Table 2

Validated Analytical Results Summary
GMP Monitoring
13000 Eckles Road
Livonia, Michigan
September 2015

Trip Blank	
Location ID:	TB-12607-092515-EM
Sample Name:	
Sample Date:	09/25/2015
Depth:	
Parameters	Unit
Volatile Organic Compounds	
Trifluorotrichloroethane (CFC-113)	µg/L
Vinyl chloride	µg/L
Xylenes (total)	µg/L
Metals	
Chromium III (trivalent)	mg/L
Chromium VI (hexavalent)	mg/L
Chromium	mg/L
Nickel	mg/L

Notes:
U - Not detected at the associated reporting limit
UJ - Not detected; associated reporting limit is estimated
J - Estimated concentration

Table 3

Analytical Methods
GMP Monitoring
13000 Eckles Road Site
Livonia, Michigan
September 2015

Parameter	Method ¹	Matrix	Holding Time	
			Collection to Extraction (Days)	Collection or Extraction to Analysis (Days)
VOCs	SW 8260B	water	-	14
1,4- Dioxane	SW 8260B SIM	water	-	14
Total Nickel & Chromium	SW 6010B	water	-	180
Trivalent & Hexavalent Chromium	SW 7196A	water	-	24 hours

Notes:

VOCs - Volatile Organic Compounds

Table 4

Qualified Sample Results Due to Analyte Concentrations in the Method Blanks

GMP Monitoring
13000 Eckles Road
Livonia, Michigan
September 2015

Parameter	Analyte	Analysis Date	Blank Result	Sample ID	Original Result	Qualified Result	Units
VOCs	Acetone	09/30/15	1.51 J	GW-12607-092115-EM-005	2.0 JB	20 U	µg/L
VOCs	Acetone	10/02/15	1.29 J	GW-12607-092215-EM-006	5.1 JB	50 U	µg/L
VOCs	Methylene Chloride	09/30/15	1.51 J	GW-12607-092115-EM-005	1.2 JB	10 U	µg/L
VOCs	Methylene Chloride	10/02/15	0.582 J	GW-12607-092215-EM-006	2.9 JB	25 U	µg/L

Notes:

- VOCs - Volatile Organic Compounds
- U - Not detected at the associated reporting limit
- B - Laboratory qualifier - result detected in associated method blank
- J - Estimated concentration

Table 5

Qualified Sample Results Due to Outlying MS/MSD Results
GMP Monitoring
13000 Eckles Road Site
Livonia, Michigan
September 2015

Parameter	Sample ID	Analyte	MS Recovery	MSD Recovery	RPD (percent)	% Recovery RPD	Control Limits RPD	Qualified Sample	Qualified Result	Units
VOCS	GW-12607-092315-EM-018	1,1,1-Trichloroethane	32	23	8	69-122	14	GW-12607-092315-EM-018	13 J	µg/L
		1,1-Dichloroethene	58	52	10	67-124	24	GW-12607-092315-EM-018	1.7 UJ	µg/L
		1,3-Dichlorobenzene	58	53	8 *	65-120	15	GW-12607-092315-EM-018	1.7 UJ	µg/L
		1,4-Dichlorobenzene	62	56	10	66-120	16	GW-12607-092315-EM-018	1.7 UJ	µg/L
		Carbon disulfide	48	41	15	54-144	34	GW-12607-092315-EM-018	8.4 UJ	µg/L
		Carbon tetrachloride	56	48	16	65-129	20	GW-12607-092315-EM-018	1.7 UJ	µg/L
