DECLARATION OF RESTRICTIVE COVENANT

MDEQ Reference No.: RC-WHMD-111-14-006
Facility MID Number: MID005356902

This Declaration of Restrictive Covenant (Restrictive Covenant) is made to protect public health, safety, welfare, and the environment pursuant to the provisions of Part 111, Hazardous Waste Management, Michigan Compiled Laws (MCL) 324.11101 *et seq.* (Part 111) and the applicable Sections of Part 201, Environmental Remediation, MCL 324.20101 *et seq.* (Part 201) of the Natural Resources and Environmental Protection Act (NREPA), 1994 PA 451, as amended, MCL 324.101 *et seq.* and the Solid Waste Disposal Act, commonly referred to as the Resource Conservation and Recovery Act of 1976 (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984, 42 U.S.C. §§ 6901 *et seq.*

17P
R

This Restrictive Covenant is made on 21st day of August, 2014 by RACER Properties LLC, the Grantor, an entity wholly owned by the Revitalizing Auto Communities Environmental Response Trust (Trust) and the current fee title holder of the Property, formerly owned by General Motors Corporation (GM Corp.), such Property legally described in Exhibit 1 and depicted in Exhibit 2, the address of which is 660 South Boulevard East, Pontiac, Michigan, 48341, Tax Identification Numbers 19-03-101-003 and 19-04-226-020, for the benefit of the Grantee, the State of Michigan, Department of Environment Quality (MDEQ), 525 West Allegan Street, P.O. Box 30473, Lansing, Michigan 48909-7926.

This Restrictive Covenant has been made to prohibit or restrict activities that could result in unacceptable exposure to environmental contamination present at the Property. There is an existing Restrictive Covenant on the Property dated March 30, 2007 and filed with the Oakland County Register of Deeds on April 13, 2007 (2007 Restrictive Covenant), which includes certain land and resource use restrictions, soil management provisions, monitoring well coordination, and prohibition of installation of wells to extract groundwater for potable use.

The land and resource restrictions contained in the present Restrictive Covenant are based upon information available to MDEQ and the United States Environmental Protection Agency (USEPA) at the time this Restrictive Covenant was recorded. Failure of the corrective measures to achieve and maintain the cleanup criteria, exposure controls, and requirements specified in the Corrective Action Complete with Controls Report for the Property (CACC Report – to be filed after recording of this Restrictive Covenant); future changes in the environmental condition of the Property or changes in the cleanup criteria developed under Parts 111 and 201 of NREPA; the discovery of

OK - LG

environmental conditions at the Property that were not accounted for in the CACC Report; or use of the Property in a manner inconsistent with the restrictions described herein or in the 2007 Restrictive Covenant – each may result in this Restrictive Covenant not being protective of public health, safety, and welfare, and the environment. Additional restrictions may become necessary.

Summary of Corrective Measures

In 1998, GM Corp. began RCRA Corrective Action activities at its Pontiac Centerpoint Campus (PCC), USEPA Site Identification No. MID005356902, under an Administrative Order on Consent with USEPA. The Property (which is now owned entirely by the Grantor) is a portion of PCC and generally consists of Area of Interest (AOI) #53 (Building 33), AOI #52 (Dyno Tank Farm), AOI #50 (Duco Stores), and AOI #49 (Former Coal Pile Storage Area). As documented in the August 3, 2006, USEPA Response to Comments and Final Decision, the final corrective measures at the Property include:

- Institutional controls to prohibit use of shallow groundwater for potable use and to restrict land use for any purpose other than commercial/industrial (i.e. non-residential)
- Recovery of light non-aqueous phase liquid (LNAPL) at AOI #53
- Implementation of a long-term groundwater monitoring program at AOI #53
- Underground storage tank closure under Michigan Act 451 Part 213 at AOI #50 and AOI #52

USEPA concurred with a recommendation to terminate LNAPL recovery at AOI #53 in a May 6, 2009 letter. The long term groundwater monitoring at AOI #53 was completed in 2010.

On March 31, 2011, the Trust took title to the Property, and subsequently conveyed it to RACER Properties LLC, an entity wholly owned by the Trust. The Trust was established and assumed the rights, title, and interest of Motors Liquidation Company (as successor to GM Corp.) in and to the Property pursuant to an Environmental Response Trust Consent Decree and Settlement Agreement ("Settlement Agreement") entered by the U.S. Bankruptcy Court for the Southern District of New York on March 29, 2011, in the case of *In re Motors Liquidation Company*, etc. et al., Debtors, Case No. 09-50026 (REG), among the Debtors, the United States of America, certain states including the State of Michigan, the Saint Regis Mohawk Tribe, and EPLET, LLC (not individually but solely in its representative capacity as Administrative Trustee of the Trust).

USEPA preliminarily approved a RCRA CACC Report for the Property with the exception of confirmed MDEQ release numbers C-0235-90, C-0776-90, and C-1831-91(AOI #50 (DUCO Stores)). Subsequently it was agreed upon between USEPA and MDEQ that the above releases at AOI #50 would be addressed pursuant to RCRA Corrective Action under USEPA oversight.

Based on the existing information from the investigations conducted at the Property, constituents were detected in soil above residential, groundwater-surface water interface (GSI), and non-residential cleanup criteria. Because the Property will be restricted to non-residential, residential criteria do not apply to it. Constituents at the Property detected at concentrations that exceed non-residential criteria include: 1,1-dichloroethene, 1,1,1-trichloroethane, 1,2,4-trimethylbenzene,

1,3,5-trimethylbenzene, benzene, ethylbenzene, lead, methyl tertbutyl ether, naphthalene, phenanthrene, tetrachloroethene, toluene, trichloroethene, vinyl chloride, and xylenes.

Soil and groundwater contamination remain at levels that do not allow unrestricted use of the Property. Public health will be protected by limiting the use of the Property to non-residential (Exhibit 3), prohibiting the use of groundwater, and requiring a vapor intrusion assessment to be completed or a vapor barrier and/or mitigation system installed prior to construction of any new building(s) or occupying the designated portion of the existing building (as identified in Exhibit 4). Restricting the Property to uses consistent with the exposure assumptions identified above will allow the use to be protective of the public health, safety, and welfare, and the environment.

Definitions

"Grantee" shall mean MDEQ, its respective successor entities, and those persons or entities acting on its behalf.

"Grantor" shall mean RACER Properties LLC, an entity wholly-owned by the Trust, the title holder of the Property at the time this Restrictive Covenant was executed, or any future title holder of the Property or some relevant sub-portion of the Property.

"MDEQ" means the Michigan Department of Environmental Quality, its successor entities, and those persons or entities acting on its behalf.

"NREPA" shall mean the Michigan Natural Resources and Environmental Protection Act, 1994 PA 451, as amended, MCL 324.101 *et seq*.

"Owner" means at any given time the then-current fee title holder(s) and the holder(s) of a life estate of the Property or any portion thereof, including the fee title holder's lessees and those persons or entities authorized to act on the fee title holder's behalf.

"Part 201" shall mean Part 201, Environmental Remediation, of NREPA.

"Property" shall mean the property legally described in Exhibit 1.

"USEPA" means the United States Environmental Protection Agency, its successor entities, and those persons or entities acting on its behalf.

All other terms used in this document which are defined in Part 3, Definitions, of NREPA, Part 111, Part 201, or the Part 111 and Part 201 Administrative Rules, shall have the same meaning in this document as in those statutes and rules as on the date this Restrictive Covenant is made.

NOW THEREFORE,

Declaration of Land Use and Resource Use Restrictions

The Grantor, as current fee title holder of the Property, hereby declares and covenants that the Property shall be subject to those restrictions on use described below, in addition to the restrictions in the 2007 Restrictive Covenant, and intends that said restrictions and covenants shall run with the land, and may be enforced in perpetuity against the Owner by the following entities: (1) the Grantor, if it is no longer owner; (2) MDEQ; or (3) USEPA.

1. Land Use Prohibitions. The Owner shall prohibit all uses of the Property that are not compatible with the non-residential land use category under MCL 324.20120a(1)(b) and generally described in the Description of Allowable Uses, attached hereto as Exhibit 3.

   Part 201 cleanup criteria for land use-based response activities are located in the Government Documents Section of the State of Michigan Library, MCL 324.201201 *et seq*. effective December 31, 2013, and Michigan Administrative Code (MAC) Rule (R) 299.5701 – R 299.5727, effective December 31, 2013.

2. Activities Prohibited. The Owner shall prohibit activities on the Property that may result in exposures above the non-residential land use category. These prohibited activities include:

   a. No drinking water wells may be installed or used on the Property.

   b. No groundwater extraction wells may be installed or used on the Property, except for wells and devices that are part of an MDEQ- or USEPA-approved response activity and for short-term dewatering for construction purposes, provided the dewatering, including management and disposal of the groundwater, is conducted in accordance with all applicable environmental laws and does not cause or result in a new release, exacerbation of any pre-existing environmental condition, or any other violation of environmental laws.

   c. No excavation and transport of any saturated soils from the Property may be completed without MDEQ or USEPA approval.

   d. No contaminated soils may be relocated on the Property except as provided for under Part 201, Section 20120c, MCL 324.20120c.

   e. If Owner elects to remove any slabs, pavement, or other impervious surface on the Property, Owner shall be responsible for any and all obligations under environmental laws arising from any such removal, alteration, or disturbance, whether or not caused by, arising from or related to, an environmental condition.

3. Monitoring Wells. The Owner shall not remove, disturb, or damage any monitoring wells on the Property without MDEQ or USEPA approval.

4. Contaminated Soil Management. The Owner shall manage contaminated soils, media, and/or debris and all other soils located on the Property in accordance with the requirements of Part 111 and RCRA Subtitle C, the administrative rules promulgated pursuant to Part 111 and RCRA, and all other relevant state and federal laws, including but not limited to MCL 324.20120c; this provision regarding contaminated soil management also applies in the event that the Owner elects to remove any slabs, pavement, or other impervious surface on the Property.

5. Soil Vapor Management. The Owner shall not build on or occupy the portion of the Property included in the vapor intrusion (VI) restriction areas of the Property identified in Exhibit 4 without first completing one of the following:

   Option 1) Demonstrate to the satisfaction of MDEQ and USEPA the absence of an unacceptable vapor intrusion risk to human health in the existing or any newly constructed buildings in the area identified in Exhibit 4; or

   Option 2) With concurrence from MDEQ or USEPA, install, operate and maintain a vapor barrier and/or mitigation system designed to eliminate the potential for subsurface vapor phase hazardous substances to migrate into any building at concentrations greater than applicable criteria. Continued operation and maintenance of the vapor barrier and/or mitigation system is required until evidence is presented to MDEQ and USEPA consistent with Option 1 above. The prohibition not to build on or occupy the portion of the Property included in the VI restriction areas does not apply to short-term occupancy of a building solely for purposes of construction, renovation, repair, or other necessary short-term activities as long as adequate health and safety precautions for workers involved in such construction, renovation, repair, or other short term activities are employed during these activities, and these activities are performed in compliance with Section 20107a of NREPA. Such short-term activities and short-term occupancy would not be expected to exceed six months in duration, and MDEQ or USEPA must be informed if the activities or occupancy are expected to exceed six months.

6. Access. The Owner shall grant to MDEQ and USEPA the right to enter the Property at reasonable times for the purpose of determining and monitoring compliance with this Restrictive Covenant, including the right to take samples, inspect the operation of the corrective measures, and inspect any records relating thereto, and to perform any actions necessary to maintain compliance with Parts 111 and 201, applicable federal laws and regulations, and the USEPA Final Decision and the subsequent CACC Report.

7. Transfer of Interest. The Grantor shall provide notice at the addresses provided in this document to MDEQ and USEPA of the Grantor's intent to transfer any interest in the Property, or any portion thereof, at least fourteen (14) business days prior to consummating the conveyance. A conveyance of title, easement, or other interest in the Property shall not be consummated by Grantor without adequate and complete provision for compliance with the terms and conditions of this Restrictive Covenant and the applicable provisions of Section 20116 of NREPA. The Grantor shall include in any

instrument conveying any interest in any portion of the Property, including, but not limited to, deeds, leases, and mortgages, a notice which is in substantially the following form:

NOTICE: THE INTEREST CONVEYED HEREBY IS SUBJECT TO A DECLARATION OF RESTRICTIVE COVENANT AND ENVIRONMENTAL PROTECTION EASEMENT, DATED _____[*month, day, year*], AND RECORDED WITH THE OAKLAND COUNTY REGISTER OF DEEDS, LIBER _____, PAGE _____.

8. Notices. Any notice, demand, request, consent, approval, or communication that is required to be made or obtained under this Restrictive Covenant shall be made in writing; include a statement that the notice is being made pursuant to the requirements of this Restrictive Covenant; include the Facility MID Number: MID005356902 and MDEQ Reference Number: RC-WHMD-111-14-006; and shall be served either personally, or sent via first class mail, postage prepaid, as follows:

For USEPA:

Director
Land and Chemicals Division (DR-8J)
U.S. Environmental Protection Agency, Region 5
77 West Jackson Blvd.
Chicago, IL 60604

with a copy to:

Office of Regional Counsel (C-14J)
U.S. Environmental Protection Agency, Region 5
77 West Jackson Blvd.
Chicago, IL 60604

For MDEQ:

Chief
Office of Waste Management and Radiological Protection
Michigan Department of Environmental Quality
P.O. Box 30241
Lansing, MI 48909-7741

9. Term. This Restrictive Covenant shall run with the Property and shall be binding on the Owner, and all current and future successors, lessees, easement holders, their assigns, and their authorized agents, employees, or persons acting under their direction and control.

10. Enforcement. The Grantor is entitled to enforce the restrictions and covenants of this Restrictive Covenant by specific performance or other legal action in a court of competent jurisdiction against subsequent Owners of all or part of the Property. The Grantor, on

behalf of itself, and its successors in title, intends and agrees that MDEQ and USEPA are entitled to enforce the restrictions and covenants in this Restrictive Covenant by specific performance or other legal action in a court of competent jurisdiction against the Grantor, as Owner, and thereafter against subsequent Owners of all or part of the Property. All remedies available hereunder shall be in addition to any and all other remedies at law or equity.

11. Third Party Beneficiary. The Grantor, on behalf of itself and its successors, and assigns, hereby agrees that the United States, acting by and through USEPA, its successors and assigns shall be a third party beneficiary (Third Party Beneficiary) of all the benefits and rights set out in the restrictions, covenants, easements, exceptions, notifications, conditions, and agreements herein, and that the Third Party Beneficiary shall have the right to enforce the restrictions described herein as if it was a party hereto. No other rights in third parties are intended by this Restrictive Covenant, and no other person or entity shall have any rights or authorities hereunder to enforce these restrictions, terms, conditions or obligations beyond the Grantor, MDEQ, and their successors and assigns, and the Third Party Beneficiary.

12. USEPA Entry and Access. Nothing in this Restrictive Covenant shall limit or otherwise affect USEPA's right of entry and access, or authority to undertake actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA, 42 U.S.C. §§ 9601 *et seq.*) or under the National Contingency Plan (40 C.F.R. Part 300), and any successor statutory provisions, or other state or federal law. The Grantor consents to officers, employees, contractors, and authorized representatives of USEPA entering and having continued access to this Property for the purposes described in Paragraph 6 (Access) of this Restrictive Covenant.

13. Modification / Release / Rescission. The Grantor or Owner may request in writing to MDEQ or USEPA, at the addresses provided in herein, modifications to, or release or rescission of, this Restrictive Covenant. This Restrictive Covenant may be modified, released or rescinded only with the written approval of the USEPA and MDEQ. Any approved modification to, or release or rescission of, this Restrictive Covenant shall be filed with the appropriate Registrar of Deeds by the Grantor or Owner and a certified copy shall be returned to MDEQ and USEPA at the addresses provided herein.

14. Severability. If any provision of this Restrictive Covenant is held to be invalid by a court of competent jurisdiction, the invalidity of such provision shall not affect the validity of any other provisions of this Restrictive Covenant, and all other provisions shall continue to remain in full force and effect.

15. Limitation on the Trust's Liability. The Trust's and the Administrative Trustee's liability is limited by the terms and conditions of the Settlement Agreement, which are incorporated herein by reference.

16. Authority to Execute Restrictive Covenant. The undersigned person executing this Restrictive Covenant represents and certifies that he or she is duly authorized and has been empowered to execute and deliver this Restrictive Covenant.

17. Miscellaneous:

a. Controlling Law: The interpretation and performance of this Restrictive Covenant shall be governed by the laws of the United States as to the obligations referred to in the 1998 Administrative Order on Consent, the USEPA Final Decision, and the CACC Report; and regulations of the State of Michigan for all other purposes hereunder (without reference to choice of laws principles thereof). The right to enforce the conditions and restrictions in this Restrictive Covenant are in addition to other rights and remedies that may be available, including, but not limited to, administrative and judicial remedies under CERCLA or Part 201 of NREPA.

b. Liberal Construction: Any general rule of construction to the contrary notwithstanding, this Restrictive Covenant shall be liberally construed to affect the purpose of this Restrictive Covenant, the 2007 Restrictive Covenant, and the policy and purpose of RCRA and the land use restrictions and prospective use limitations required by Part 201. If any provision of this Restrictive Covenant is found to be ambiguous, an interpretation consistent with the purpose of this Restrictive Covenant and the 2007 Restrictive Covenant that would render the provision valid shall be favored over any interpretation that would render it invalid.

[Signatures follow]

IN WITNESS WHEREOF, RACER Properties LLC has caused this Restrictive Covenant, RC-WHMD-111-14-006, to be executed on this 21st day of August, 2014.

FLOOD DATA

COMMUNITY PANEL NO. : 26125C0507F
ZONE: X
DSCD:
EFFECTIVE DATE: 09/26/2006

The undersigned hereby certifies, as of MAY 1, 2014 to
FIRST AMERICAN TITLE, NEW ERA, LLC
and its successors and assigns as follows:

a) I have surveyed, on the ground in accordance with the minimum Standard Detail Requirements for ALTA/ACSM Land Title Surveys as jointly established and adopted by the American Land Title Association and American Congress on Surveying & Mapping and National Society of Professional Surveyors, 2011 and this meets the requirements for an urban survey as defined therein, the property legally described hereof and that said legal description is correct, complete and accurate.

b) The boundaries of the property as depicted in the plat were established by actual field measurements and the pins, monuments or other markers were set or found as shown thereon.

c) To the best of my knowledge and in my professional opinion this plat of survey is true and correct in all respects.

d) The size, dimensions and locations of all of the boundaries of the property, buildings, structures, fences and party walls and other improvements, recorded and visible unrecorded easements, streams, signs, drainage ditches, roads, railroads, streams, means of public access, rights of way, utility lines and connections, and set-back lines which affect the property are correctly and accurately shown hereon.

e) All encroachments, overlaps or overhangs on easements, adjoining property, streets or alleys by any of said buildings, structures or other improvements, are as shown on the drawing. There are no encroachment, there are no overlaps or overhangs on said property by buildings, structures or other improvements situated on adjoining property except as shown.

f) This plat correctly shows (i) the courses and measured distances of the exterior property lines of the property and any easements located on or affecting the property; (ii) the scale, north direction, the beginning point and point of reference from which the property is measured, the width of the streets on which the said property abuts, the lot and block number shown on any map or plat to which reference is made in the legal description of the property, together with the recording references for said map or plat; (iii) the address of the property; (iv) the location and number of parking spaces and the total area of the property in acres and square feet and any easements located on or affecting the property; (v) the dimensions of all buildings on the property at ground surface level and the distance therefrom to the nearest facing exterior property lines; and (vi) names of adjoining owners of platted lands.

g) The propertylines shown as surveyed and described on the plat is contiguous along its entire boundaries and is not enclosed within the perimeters thereof.

h) The dimensions shown hereon are expressed in feet and decimal part thereof.

i) All bearings are related to an assumed meridian and are intended to indicate angles only.

j) All parcels are contiguous with each other and there are no gaps or gores between or among parcels.

k) A physical examination of the property reveals no apparent use of the property for pathways, driveways or roadways for which there are not recorded easements, nor for solid waste dump, sump, sanitary land fill, drilling, excavating, building, street or sidewalk construction or repairs, or any changes in street right-of-way lines, either completed or proposed, nor does it serve adjoining property for drainage, ingress, egress or any other purpose.

l) The property has direct access to a dedicated, complete and accepted public street maintained by governmental authority know as SOUTH BOULEVARD AND RING ROAD

m) The property does NOT lie within a flood plain.

n) There are no encroachments, no overlaps, gaps, easements, streets, roads, rights of way, set-back lines or improvements which affect the property which are not shown hereon.

o) A physical examination of the property does not reveal evidence of cemeteries.

p) There are no parking restrictions on said property. There are approximately 2,398 total striped parking spaces (15 handicapped) on said property.

q) The property is zoned M-2 HEAVY INDUSTRIAL DISTRICT

r) No portion of the property lies within a federally designated wetlands protection area as determined by the maps of the Army Corps of Engineers, nor within any designated flood hazard area as determined by the U.S. Department of Housing and Urban Development, the Federal Emergency Management Agency or other federal, state or local government entity.

s) No observable evidence of earth moving work, no building construction or building additions within recent months.

ALTA/ACSM LAND TITLE SURVEY

FIRST AMERICAN TITLE, NEW ERA, LLC
Commitment No. NCS-659267-MICH

I, the undersigned, being a duly licensed and qualified surveyor in and for the State of Michigan, do hereby certify to First American Title Insurance Company, its successors and assigns, as their interest may appear:

This is to certify that this map or plat and the survey on which it is based were made in accordance with the 2011 Minimum Standard Detail Requirements for ALTA/ACSM Land Title Surveys, jointly established and adopted by ALTA and NSPS, and includes Items 1, 2, 3, 4, 6 (b), 7, 8, 9, 10 (where party walls are a factor), 13(b), 13, 14, 16, 17, 18,19 & 20 (if applicable) of Table A thereof. The field work was completed on April 8, 2014. Date of this amendment February 7, 2014.

PROPERTY DESCRIPTION

Real property in the City of Pontiac, County of Oakland, State of Michigan, described as follows:

Parcel 22:

Lots 1, 2 and 4, and Part of Lots 3 and 11, Assessor's Plat No 110, as recorded in Liber 62, Page 33 of Plats, Oakland County Records, Also Part of Section 3, Town 3 North, Range 10 East, City of Pontiac, Oakland County, Michigan, described as: Beginning at a point distant North 67 degrees 22 minutes 09 seconds West, 1,048.38 feet from the North 1/4 corner of said Section 3; thence South 01 degrees 32 minutes 09 seconds West, 2,020.48 feet; thence along a curve to the left, radius 2162.29 feet, chord bears South 10 degrees 58 minutes 14 seconds East, 1,000.00 feet; thence South 24 degrees 28 minutes 37 seconds East, 1,000.00 feet; thence South 67 degrees 12 minutes 09 seconds West, 288.88 feet; thence South 40 degrees 09 minutes 24 seconds West, 841.12 feet; thence along a curve to the left, radius 888.69 feet, chord bears South 66 degrees 39 minutes 59 seconds East, 97.18 feet, distance of 97.49 feet; thence South 72 degrees 54 minutes 43 seconds East, 82.16 feet; thence along a curve to the right, radius 388.69 feet, chord bears South 64 degrees 39 minutes 59 seconds East, 386.85 feet, distance of 389.39 feet; thence South 56 degrees 24 minutes 37 seconds East, 1,000.00 feet; thence South 33 degrees 35 minutes 23 seconds West, 1,000.00 feet; thence South 56 degrees 24 minutes 37 seconds East, 9.22 feet; thence North 39 degrees 25 minutes 57 seconds West, 2,178.82 feet; thence North 66 degrees 39 minutes 29 seconds East, 1,888.39 feet; thence South 46 degrees 17 minutes 39 seconds East, 211.28 feet; thence South 38 degrees 39 minutes 52 seconds East, 287.47 feet; thence South 46 degrees 12 minutes 28 seconds East, 992.14 feet; thence North 66 degrees 19 minutes 41 seconds West, 69.66 feet; thence along a curve to the right, radius 2834.89 feet, chord bears North 57 degrees 57 minutes 39 seconds West, 555.32 feet, distance of 557.20 feet to the Southerly line of Lot 5 of said Subdivision; thence South 46 degrees 18 minutes 44 seconds West, 211.30 feet; thence North 43 degrees 17 minutes 55 seconds West, 1,999 feet; thence North 47 degrees 09 minutes 09 seconds West, 913.17 feet to the most Westerly corner of said Lot 5; thence Northeasterly 54.89 feet to the most Southerly corner of Lot 1 of said Subdivision; thence North 40 degrees 09 minutes 09 seconds East, 576.47 feet to the Southeast corner of said Lot 1; thence Northerly 570.65 feet along the West line of Lots 1 and 2 to the Northeast corner of Lot 2; thence Easterly 288.88 feet to the Southwest corner of Lot 4; thence Northerly 481.38 feet to the North line of Section 3; thence South 67 degrees 59 minutes 09 seconds East to the Place of Beginning, except that part in South Boulevard.

Parcel 23:

Lot 3 of Assessor's Plat No. 110, recorded in Liber 62, Page 33 of Plats, Oakland County Records.

Parcel 27:

Part of Lot 2 of Assessor's Plat No 88, as recorded in Liber 62 of Assessor's Plats, Page 28, Oakland County Records, described as: Beginning at a point distant South 01 degree 34 minutes 32 seconds West, 20.00 feet and North 84 degrees 47 minutes 28 seconds West, 49.70 feet from the Northeast corner of Section 4; thence North 84 degrees 47 minutes 28 seconds West, 349.66 feet; thence South 01 degrees 31 minutes 31 seconds West, 310.27 feet; thence South 14 degrees 39 minutes 31 seconds West, 259.41 feet; thence South 57 degrees 01 minutes 14 seconds East, 288.00 feet; thence North 66 degrees 04 minutes 19 seconds East, 211.28 feet to the Place of Beginning.

Also, Part of Lot 2 of Assessor's Plat No 88, as recorded in Liber 62 of Assessor's Plats, Page 28, Oakland County Records, described as: Beginning at a point distant North 66 degrees 04 minutes 19 seconds West, 374.57 feet and South 01 degree 04 minutes 00 seconds East, 21 feet and South 88 degrees 56 minutes 01 seconds East, 74.50 feet and South 49 degrees 40 minutes 00 seconds East, 233.76 feet and South 12 degrees 19 minutes 00 seconds West, 254.00 feet from the Northeast corner of Section 4; thence North 87 degrees 01 minutes 12 seconds West, 288.10 feet; thence North 46 degrees 29 minutes 29 seconds West, 591.94 feet; thence South 39 degrees 55 minutes 32 seconds East, 45.71 feet; thence South 69 degrees 39 minutes 19 seconds East, 515.35 feet; thence North 49 degrees 40 minutes 00 seconds West, 707.37 feet; thence South 39 degrees 55 minutes 32 seconds East, 170.00 feet; thence North 50 degrees 04 minutes 28 seconds West, 35.19 feet; thence North 39 degrees 55 minutes 32 seconds East, 69.70 feet; thence along a curve to the left, radius 441.69 feet, chord bears North 24 degrees 13 minutes 59 seconds East, 215.74 feet, distance of 214.53 feet to the Place of Beginning.

Parcel 28:

Lot 3 of Assessor's Plat No 88, as recorded in Liber 62 of Assessor's Plats, Page 28, Oakland County Records, except the Southwesterly part thereof, commencing 20.31 feet along the Northerly line and 466.11 feet along the Northeasterly line of Grand Trunk Western Railroad and the Northeasterly lot line, thence South 01 degree 42 minutes 00 seconds West, 49.70 feet; thence along a curve to the right, radius 1183.71 feet, chord bears North 59 degrees 50 minutes 10 seconds East, 69.19 feet, distance of 69.19 feet; thence North 58 degrees 09 minutes 00 seconds East, 426.00 feet to the Northeasterly lot line; thence South 39 degrees 55 minutes 32 seconds East, 145.00 feet to the Place of Beginning.

Parcel 29:

Part of Lots 4, 5, and 8 of Assessor's Plat No. 88, as recorded in Liber 62 of Assessor's Plats, Page 28, Oakland County Records, described as follows: Beginning at a point on the East line of Section 4, located South 39 degrees 55 minutes 19 seconds East, 1,975.37 feet from the Northeast corner of said Section 4, said point being the Northeasterly corner of Lot 4; thence South 79 degrees 16 minutes 34 seconds West, 114.3 feet; thence South 01 degrees 42 minutes 00 seconds East, 130 feet, more or less, to a point on the East line of Lot 8; thence North 58 degrees 39 minutes 19 seconds West, 116.00 feet to the Place of Beginning.

The above-described parcels are the same land as described in First American Title Insurance Company Commitment Number NCS-659267-MICH dated February 7, 2014.

SHEET 1 OF 1

EXHIBIT 3

DESCRIPTION OF ALLOWABLE USES

Non-residential Land Use: This land use is characterized by any use which is not residential in nature and is primarily characterized by industrial and commercial uses. Industrial uses typically involve manufacturing operations engaged in processing and manufacturing of materials or products. Other examples of industrial uses are utility companies, industrial research and development, and petroleum bulk storage. Commercial uses include any business or income-producing use such as commercial warehouses, lumber yards, retail gas stations, auto dealerships and service stations, as well as office buildings, banks, and medical/dental offices (not including hospitals). Commercial uses also include retail businesses whose principal activity is the sale of food or merchandise within an enclosed building and personal service establishments which perform services indoors such as health clubs, barber/beauty salons, photographic studios, etc.

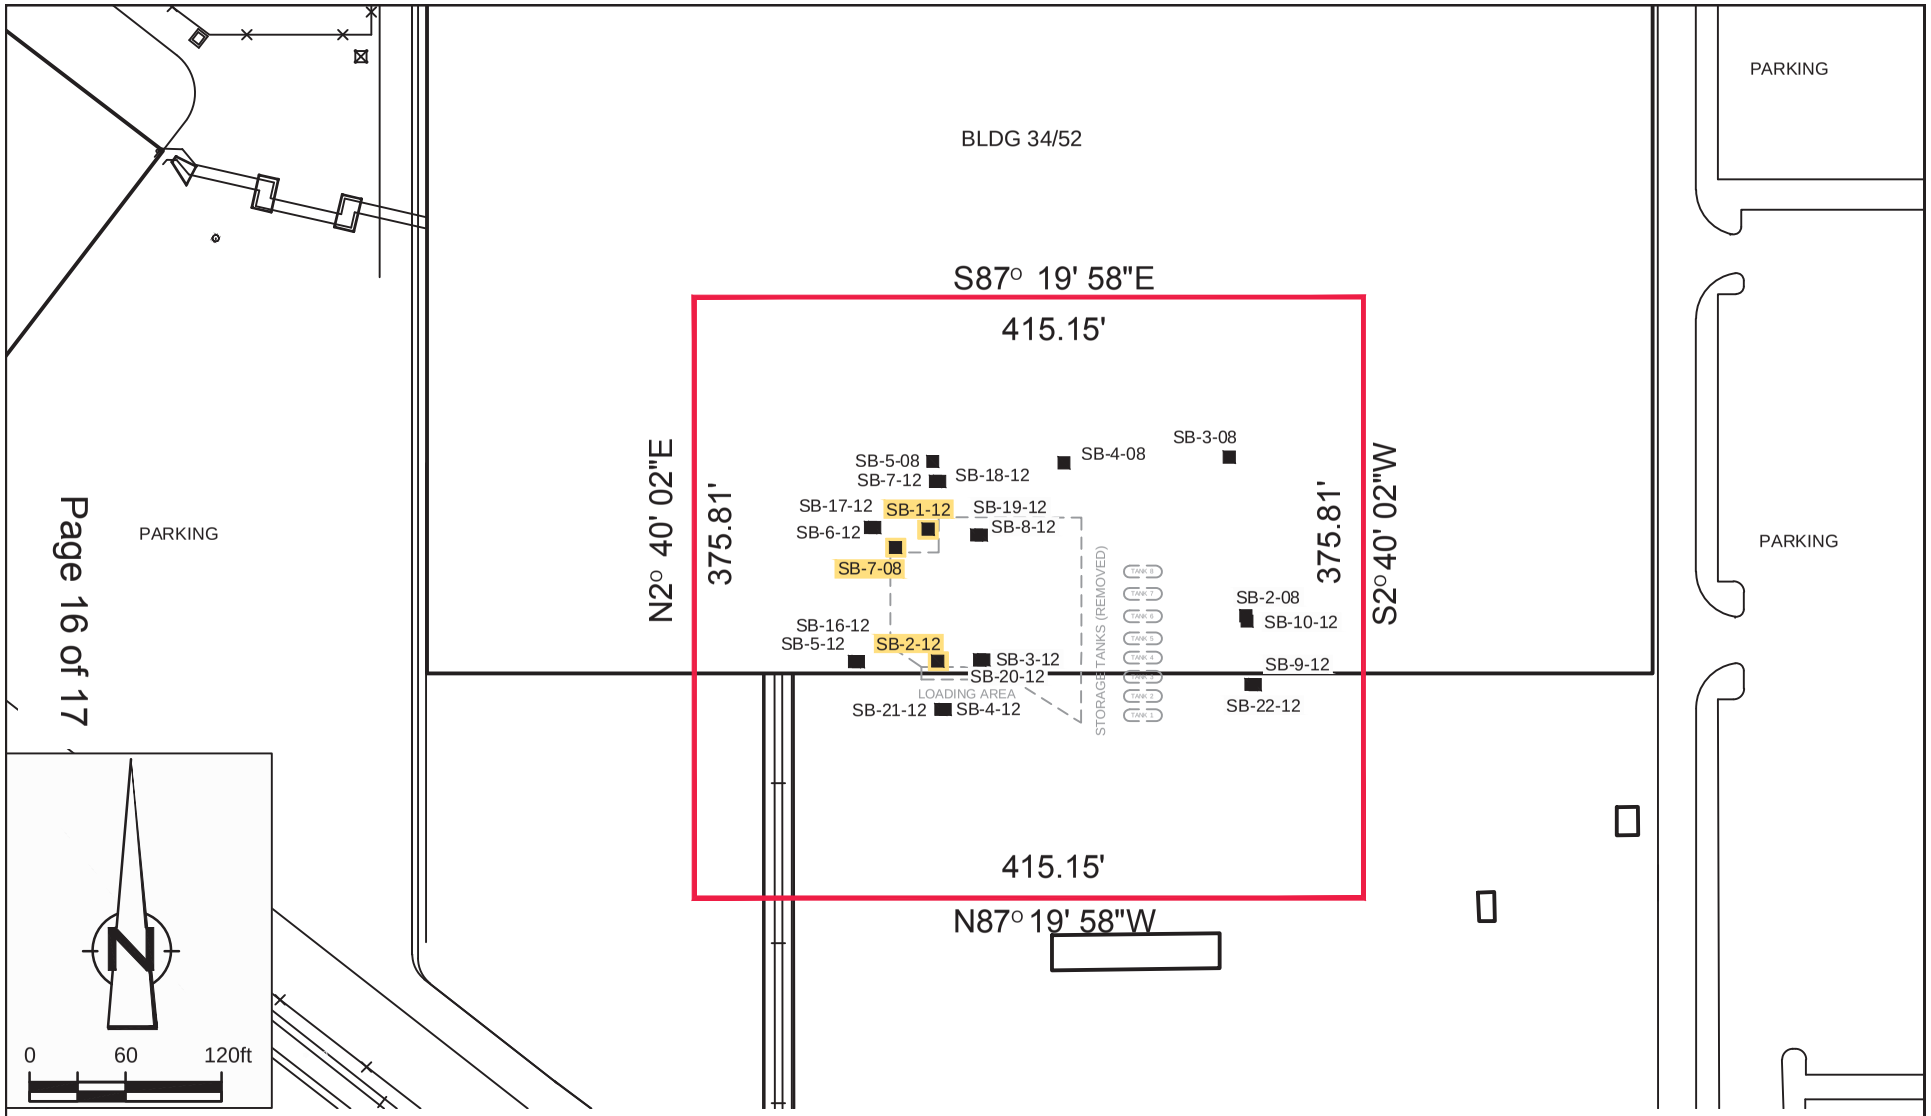
Any residential use is specifically prohibited from the non-residential land use category. This would include the primary use of the property for human habitation and includes structures such as single family dwellings, multiple family structures, mobile homes, condominiums, and apartment buildings. Residential use is also characterized by any use which is intended to house, educate, or provide care for children, the elderly, the infirm, or other sensitive populations, and therefore could include day care centers, educational facilities, hospitals, elder care facilities, and nursing homes. The use of any accessory building or portion of an existing building as a dwelling unit permitted for a proprietor or storekeeper and their families, located in the same building as their place of occupation, or for a watchman or caretaker is also prohibited. Any authority that allows for residential use of the Property as a legal non-conforming use is also restricted per the prohibitions contained in this restrictive covenant.

EXHIBIT 4

LEGAL DESCRIPTION AND DRAWING ILLUSTRATING DESCRIPTION OF VAPOR INTRUSION RESTRICTION AREAS

AOI 50 DUCO STRORES VAPOR INTRUSION RESTRICITON AREA (EXHIBIT 4 FIGURE 1)

A Parcel of land situated in the Northwest 1/4 of Section 3, Town 2 South, Range 10 East, City of Pontiac, Oakland County, Michigan, being part of Lots 1 & 5, "Assessor's Plat No. 110", as recorded in Liber 52 of Plats, page 26 of Oakland County records, more particularly described as: commencing at the Northwest property-controlling corner of said Section 3 (said point being N 87°23'33" W, 2483.50 feet (measured) from the North 1/4 property-controlling corner of said section 3): thence S 87°23"00" E, 1049.50 feet; thence S 02°36'20" W, 60.00 feet to the intersection of the Southerly right-of-way line of South Blvd. and the Westerly right-of-way line of Ring Road (50 feet wide); thence S 02°36'20" W, 1271.62 feet; thence leaving said right-of-way line, N 87°19'58" W, 170.97 feet to the Point of Beginning; thence S 02°40'02" W, 375.81 feet; thence N 87°19'58" W, 415.15 feet; thence N 02°40'02" E, 375.81 feet; thence S 87°19'58" E, 415.15 to the Point of Beginning. Containing 3.58 acres more or less.



pt 19-03-101-003

AOI 53 – BUILDING 33 VAPOR INTRUSION RESTRICTION AREA (EXHIBIT 4 FIGURE 2)

A Parcel of land situated in the Northwest 1/4 of Section 3, Town 2 South, Range 10 East, City of Pontiac, Oakland County, Michigan, being part of Lots 1 & 5, "Assessor's Plat No. 110", as recorded in Liber 52 of Plats, page 26 of Oakland County records, more particularly described as: commencing at the Northwest property-controlling corner of said Section 3 (said point being N 87°23'33" W, 2483.50 feet (measured) from the North 1/4 property-controlling corner of said Section 3): thence S 87°23"00" E, 1049.50 feet; thence S 02°36'20" W, 60.00 feet to the intersection of the Southerly right-of-way line of South Blvd. And the Westerly right-of-way line of Ring Road (50 feet wide) to the Point of Beginning; thence continuing along said Westerly right-of-way line S 02°36'20" W, 646.73 feet; thence N 87°23'00" W, 665.89 feet; thence N 02°36'19" E, 646.73 feet to the Southerly right-of-way line of South Blvd; thence along said Southerly right-of-way line S 87°23"00" E, 665.89 feet to the Point of Beginning. Containing 9.88 acres more or less

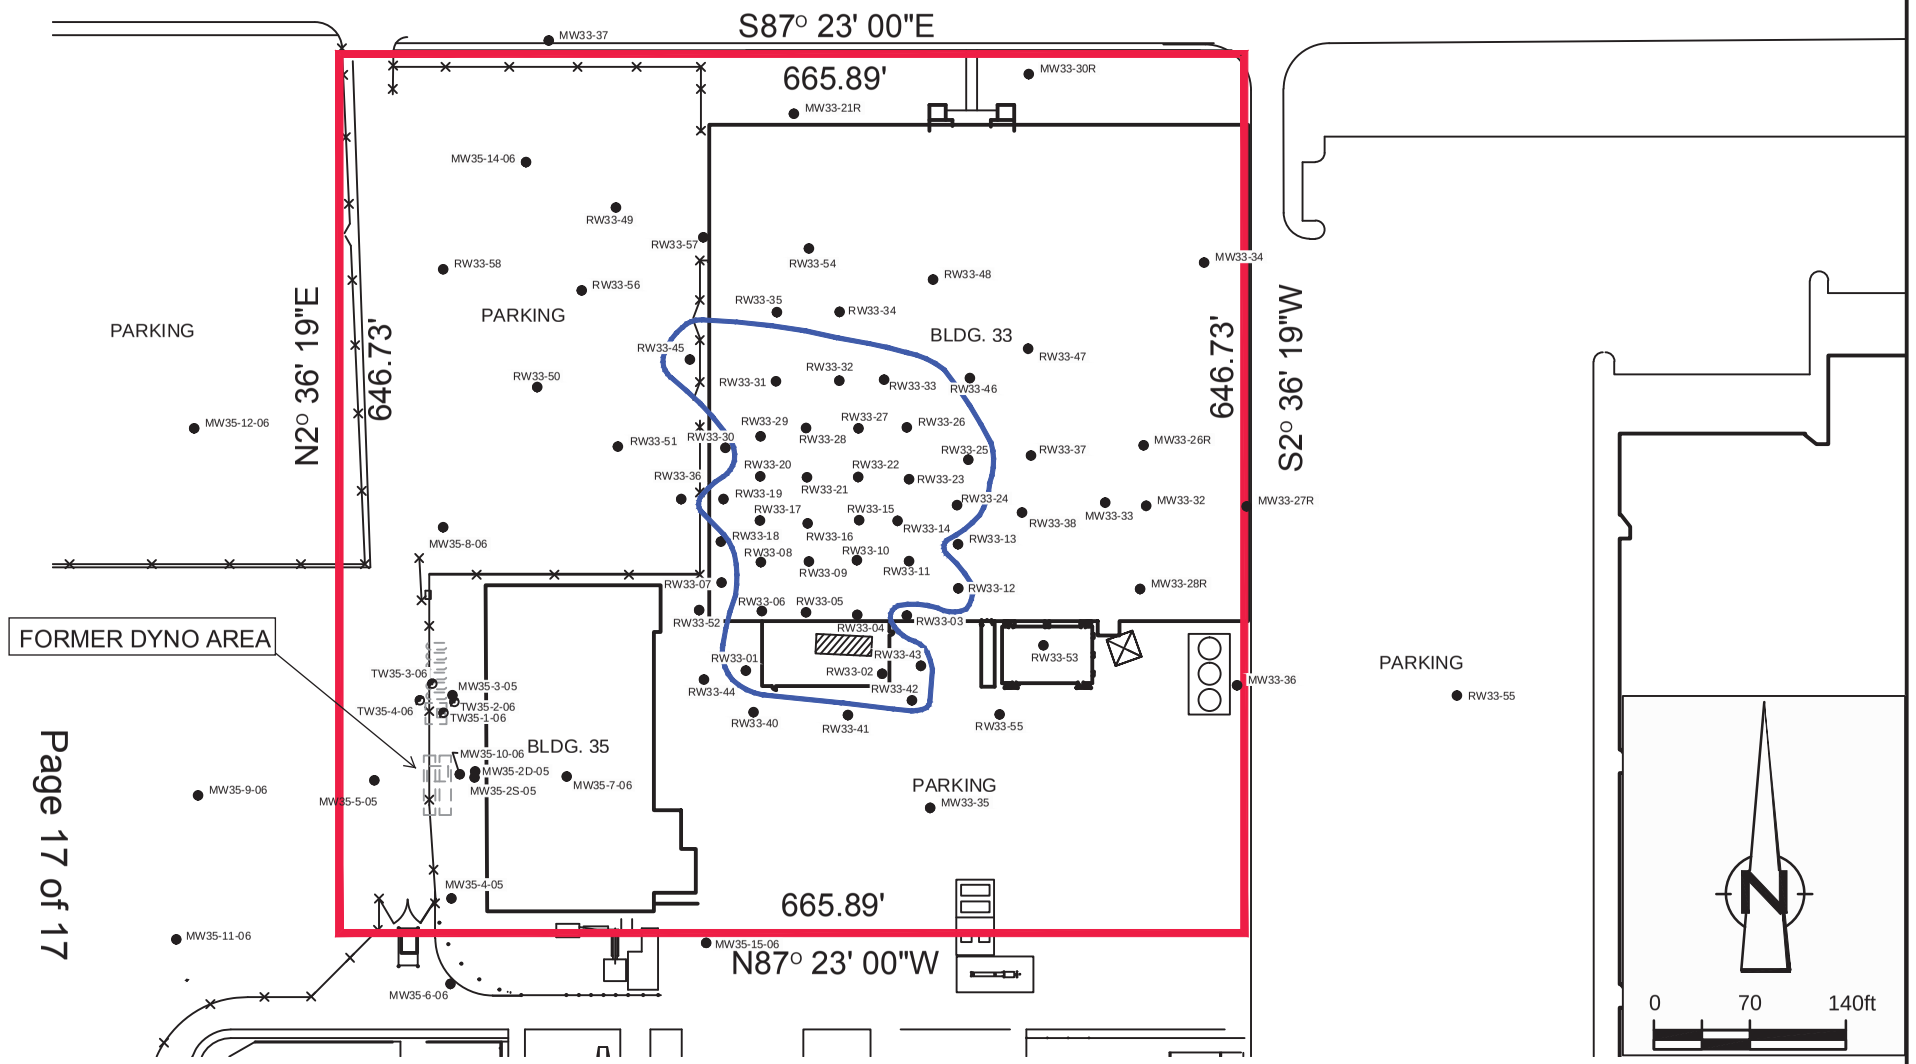
pt 19-03-101-003

DRAWING ILLUSTRATING DESCRIPTION OF VAPOR INTRUSION RESTRICTION AREA

LEGEND

- APPROXIMATE AREA OF RESTRICTIVE COVENANT FOR VAPOR INTRUSION
- SOIL BORING LOCATION
- SOIL BORING WITH VOCs DETECTED ABOVE PART 201 NON-RESIDENTIAL SOIL VOLATILIZATION TO INDOOR AIR INHALATION CRITERIA

NOTE: RESTRICTIVE COVENANT AREA WAS DERIVED BASED ON A MINIMUM DISTANCE OF 100 ft. FROM DELINEATION SOIL BORINGS WITH NO NON-RESIDENTIAL VAPOR INTRUSION EXCEEDANCES AND 100 ft. FROM FORMER USTs.



- AS PER SECTION 3.2.3 OF THE MDEQ GUIDANCE DOCUMENT FOR THE VAPOR INTRUSION PATHWAY (MAY, 2013), A 100 ft. RADIUS FROM VAPOR SOURCES IS DEFINED AS THE PRELIMINARY SCREENING AREA. AND IS THEREFORE CONSIDERED A CONSERVATIVE DISTANCE FROM DELINEATION BORINGS TO ESTABLISH THE EDGE OF THE VAPOR INTRUSION RESTRICTION AREA.

Table CC-1 **Outfall 004 Infiltration Elimination Cost Estimate**
RACER Trust, Buick City Site, Flint, Michigan

RACER Task Number and Description:	Outfall 004 Sewer work and Bulkheading	
	Design	Outfall 004 Reroute and Bulkheading
	Cost	Cost
Consultant Labor [2]:		
Principal	$1,430.00	$1,430.00
Sr. Engineer/Scientist II	$2,358.00	$2,358.00
Sr. Engineer/Scientist I	$5,952.00	$4,216.00
Sr. Project Engineer/Scientist II	$2,592.00	$0.00
Sr. Project Engineer/Scientist I	$8,624.00	$14,700.00
Project Engineer/Scientist	$0.00	$0.00
Engineer/Scientist	$10,804.00	$0.00
Sr. Construction Resident	$0.00	$0.00
Technician IV	$0.00	$0.00
Technician III	$0.00	$0.00
Construction Resident	$0.00	$35,880.00
Technician II	$0.00	$0.00
Technician I	$0.00	$0.00
Sr. Drafter	$345.00	$0.00
Drafter	$1,060.00	$0.00
Document Technician	$1,140.00	$1,140.00
Consultant Labor Subtotal:	**$34,305.00**	**$59,724.00**
Consultant Direct Costs:		
Shipping	$0.00	$0.00
Vehicle Rental	$0.00	$3,500.00
Travel Costs, incl. meals	$0.00	$0.00
Rental Equipment	$0.00	$1,000.00
Disposable Supplies	$0.00	$1,000.00
Phone	$0.00	$200.00
Document Reproduction	$200.00	$200.00
Equipment	$0.00	$0.00
Clean Fill	$0.00	$0.00
Materials (Pilot Testing Additives)	$0.00	$0.00
Energy (Pilot Testing)	$0.00	$0.00
Utilities	$0.00	$0.00
Consultant Direct Costs Subtotal:	**$200.00**	**$5,900.00**
Consultant Indirect Costs Subtotal:	**$0.00**	**$480,500.00**
Task Subtotal:	**$34,505.00**	**$546,124.00**
Task Total [1]:	**$581,000.00**	

Notes:

1. Time and Materials-not to exceed without further change order follow-up.

2. Identified classifications are intended as examples and actual hours and classifications used could vary depending on availability.

3. Consultant Indirect Costs include costs such as laboratory, waste disposal, drillers, surveyors and construction subcontractors. Estimated costs are based on previous work completed at the Site and are for budgetary purposes. ARCADIS makes no warranty, expressed or implied, as to the accuracy of such opinions as compared to bid or actual costs. The Client understands that ARCADIS has no control over costs; the price of labor, equipment, or materials; or the construction contractor's methods of pricing. Final cost will be based on subcontractor quote and subject to Cleanup Manger approval and mark-up.

4. Assumes that the flow at manhole 4-21-1 can be rerouted via a new 24 inch diameter pipe to the Manhole 13 vault. And that the Current Outfall 004 main can be cut and bulkheaded in the vault without additional infrastructure.

5. The cement-bentonite wall is assumed to be 60 feet in length to a depth of 15 feet below ground surface.

6. This field aspect of this work is expected to take 8 weeks to complete working 5 (12 hour) days per week with a remobilization of 2 days upon curing of the concrete.

7. These costs assume that the bulkheading will be completed in the same manner as previous bulkheading work at this site and sewers are in such a condition to allow bulkheading.

8. Volume assumes a 25% swell factor and a 1.5 tons to cubic yard ratio.

9. Laboratory costs include on waste characterization sample.

10. Disposal costs assume Non-Hazardous Non-PCB material (1,000 tons).

Table CC-2

Outfall 003 Infiltration Elimination Cost Estimate
RACER Trust, Buick City Site, Flint, Michigan

RACER Task Number and Description:	**1** **Installation of New Main (1,200 feet)**	
	Reroute and Bulkheading Design	**Reroute and Bulkheading**
	Cost	**Cost**
Consultant Labor [2]:		
Principal	$7,300.00	$5,840.00
Sr. Engineer/Scientist II	$13,400.00	$13,400.00
Sr. Engineer/Scientist I	$30,240.00	$10,080.00
Sr. Project Engineer/Scientist II	$26,400.00	$22,000.00
Sr. Project Engineer/Scientist I	$40,000.00	$0.00
Project Engineer/Scientist	$36,400.00	$27,300.00
Engineer/Scientist	$22,200.00	$0.00
Sr. Construction Resident	$0.00	$0.00
Technician IV	$0.00	$0.00
Technician III	$6,080.00	$45,600.00
Construction Resident	$0.00	$0.00
Technician II	$0.00	$0.00
Technician I	$0.00	$0.00
Sr. Drafter	$11,200.00	$1,400.00
Drafter	$4,320.00	$3,240.00
Document Technician	$4,640.00	$1,160.00
Consultant Labor Subtotal:	**$202,180.00**	**$130,020.00**
Consultant Direct Costs:		
Shipping	$0.00	$0.00
Vehicle Rental	$500.00	$5,000.00
Travel Costs, incl. meals	$0.00	$0.00
Rental Equipment	$0.00	$0.00
Disposable Supplies	$200.00	$1,000.00
Phone	$0.00	$150.00
Document Reproduction	$500.00	$500.00
Equipment	$0.00	$0.00
Clean Fill	$0.00	$0.00
Materials (Pilot Testing Additives)	$0.00	$0.00
Energy (Pilot Testing)	$0.00	$0.00
Utilities	$0.00	$0.00
Consultant Direct Costs Subtotal:	**$1,200.00**	**$6,650.00**
Consultant Indirect Costs Subtotal:	**$15,914.00**	**$3,653,488.00**
Task Subtotal:	**$219,294.00**	**$3,790,158.00**
Task Total [1]:	**$4,010,000.00**	

Notes:

1. Time and Materials-not to exceed without further change order follow-up.

2. Identified classifications are intended as examples and actual hours and classifications used could vary depending on availability.

3. Consultant Indirect Costs include costs such as laboratory, waste disposal, drillers, surveyors and construction subcontractors. Estimated costs are based on previous work completed at the Site and are for budgetary purposes. ARCADIS makes no warranty, expressed or implied, as to the accuracy of such opinions as compared to bid or actual costs. The Client understands that ARCADIS has no control over costs; the price of labor, equipment, or materials; or the construction contractor's methods of pricing. Final cost will be based on subcontractor quote and subject to Cleanup Manger approval and mark-up.

4. Disposal costs assume that the material in the vicinity of AOI 05, 20% of total removal volume, will require TSCA disposal (5,088 tons). All other waste is anticipated to be non-hazardous with no PCB detections (20,352 tons).

5. This cost estimate includes installing two 48 inch diameter piping with a geomembrane-lined trench along a realigned path (~1,200 feet) and connecting back into the existing trunk line up and downstream of the more significantly impacted areas of the site. Corrugated, smooth-bore HDPE piping with gasket connections is assumed to be used. Running two pipes in parallel means the points of connection with the existing trunk line will likely need to be accomplished with custom fabricated precast concrete vaults.

6. The field aspect of this project is expected to take 10 weeks to complete working 5 (12 hour) days per week.

7. Assumes a removal rate of 540 tons per day. Activities will occur concurrently (excavation, pipe installation, backfilling, etc.)

8. Assumes that 1 full waste characteristic sample will be collected ever 100 feet.

9. Volume assumes a 25% swell factor and a 1.5 tons to cubic yard ratio.

10. Assumes surveyors will be onsite 1 day per week to provide control points.

11. Assumes the excavation will be completed without additional support of any adjacent utilities.

12. Assumes stepouts will be completed based on unit rates provided.

13. Does not include delays associated with the large obstructions (i.e. concrete walls, footings, large boulders) encountered during excavation activities.

Table CC-3 **AOI 05-1/05-5 Targeted Excavation - PCB and Lead Containing Soils**
RACER Trust, Buick City Site, Flint, Michigan

RACER Task Number and Description:	AOI 05-1/05-5 TSCA PCB Excavation Design	AOI 05-1/05-5 TSCA PCB Excavation
	Cost	Cost
Consultant Labor [2]:		
Principal	$584.00	$1,168.00
Sr. Engineer/Scientist II	$3,216.00	$2,144.00
Sr. Engineer/Scientist I	$5,040.00	$3,024.00
Sr. Project Engineer/Scientist II	$13,200.00	$6,600.00
Sr. Project Engineer/Scientist I	$20,000.00	$0.00

Equipment	$0.00	$0.00
Clean Fill	$0.00	$0.00
Materials (Pilot Testing Additives)	$0.00	$0.00
Energy (Pilot Testing)	$0.00	$0.00
Utilities	$0.00	$0.00
Consultant Direct Costs Subtotal:	**$20.00**	**$1,770.00**
Consultant Indirect Costs Subtotal:	**$0.00**	**$1,742,190.00**
Task Subtotal:	**$46,020.00**	**$1,819,960.00**
Task Total [1]:	**$1,866,000.00**	

Notes:

1. Time and Materials-not to exceed without further change order follow-up.

2. Identified classifications are intended as examples and actual hours and classifications used could vary depending on availability.

3. Consultant Indirect Costs include costs such as laboratory, waste disposal, drillers, surveyors and construction subcontractors. Estimated costs are based on previous work completed at the Site and are for budgetary purposes. ARCADIS makes no warranty, expressed or implied, as to the accuracy of such opinions as compared to bid or actual costs. The Client understands that ARCADIS has no control over costs; the price of labor, equipment, or materials; or the construction contractor's methods of pricing. Final cost will be based on subcontractor quote and subject to Cleanup Manger approval and mark-up.

4. Laboratory costs assume 10 waste confirmation samples.

5. Volume assumes a 25% swell factor and a 1.5 tons to cubic yard ratio.

6. The field aspect of this project is expected to take 48 days (12 hours per day) to complete. Includes 1 day of surveying and utility clearance.

7. Arcades Labor includes development of a work plan, bid development and solicitation, management of the subcontractor, sampling, and manifesting of wastes.

8. Assumes ARCADIS Technician will recover LNAPL from wells prior to excavation for up to an additional 3 days to decrease product encountered during excavation. It is anticipated that DH 3 and AOI 5-5 will require TSCA disposal, all others will be non-TSCA PCB. Assumes generation of 2 drums of product per day.

9. The excavation is assumed to be completed to a depth of 10 ft. bgs. and does not include excavation below the groundwater table (no dewatering/water management). A 1:1 sidewall sloping will be completed to ensure excavation safety.

10. Assumes the excavation will be completed without additional support of any adjacent utilities.

11. Assumes stepouts will be completed based on unit rates provided.

12. Assumes 540 tons will be trucked offsite per day.

13. Excavated material below 6' are assumed to require solidification at all excavations. Solidified material will be able to be disposed of as a solid at "As Found" concentrations. This estimate assumes that this material at DH-3 and AOI 5-5 will be disposed as TSCA solids (764 tons), While the remaining material is anticipated to be characterized as Non-TSCA PCB (11,962 tons).

14. Does not include delays associated with the large obstructions (i.e. concrete walls, footings, large boulders) encountered during excavation activities.

15. No costs for LNAPL removal from the excavation are included in this estimate.

Drafter	$212.00	$212.00
Document Technician	$570.00	$570.00
Consultant Labor Subtotal:	**$9,546.00**	**$12,522.00**
Consultant Direct Costs:		
Shipping	$0.00	$0.00
Vehicle Rental	$0.00	$1,000.00
Travel Costs, incl. meals	$0.00	$0.00
Rental Equipment	$0.00	$400.00
Disposable Supplies	$0.00	$300.00
Phone	$0.00	$50.00
Document Reproduction	$20.00	$20.00
Equipment	$0.00	$0.00
Clean Fill	$0.00	$0.00
Materials (Pilot Testing Additives)	$0.00	$0.00
Energy (Pilot Testing)	$0.00	$0.00
Utilities	$0.00	$0.00
Consultant Direct Costs Subtotal:	**$20.00**	**$1,770.00**
Consultant Indirect Costs Subtotal:	**$0.00**	**$41,003.26**
Task Subtotal:	**$9,566.00**	**$55,295.26**
Task Total [1]:	**$64,900.00**	

Notes:

1. Time and Materials-not to exceed without further change order follow-up.

2. Identified classifications are intended as examples and actual hours and classifications used could vary depending on availability.

3. Consultant Indirect Costs include costs such as laboratory, waste disposal, drillers, surveyors and construction subcontractors. Estimated costs are based on previous work completed at the Site and are for budgetary purposes. ARCADIS makes no warranty, expressed or implied, as to the accuracy of such opinions as compared to bid or actual costs. The Client understands that ARCADIS has no control over costs; the price of labor, equipment, or materials; or the construction contractor's methods of pricing. Final cost will be based on subcontractor quote and subject to Cleanup Manger approval and mark-up.

4. Laboratory costs assume 7 confirmation samples (1 day turn, 12.5' grid, includes 10% failure rate).

5. Volume assumes a 25% swell factor and a 1.5 tons to cubic yard ratio.

6. The field aspect of this project is expected to take 5 days (12 hours per day) to complete. Surveying work will be completed during this time.

7. Arcades Labor includes development of a work plan, bid development and solicitation, management of the subcontractor, sampling, and manifesting of wastes.

9. Assumes AOI-05-1/05-5 excavation will be completed to a depth of 6 ft. bgs.

10. Costs do not include excavation below the groundwater table (no dewatering/water management).

11. Assumes the excavation will be completed without additional support of any adjacent utilities.

12. Assumes stepouts will be completed based on unit rates provided.

13. Assumes 540 tons will be trucked offsite per day.

14. Assumes excavations can be safely completed with a 1:1 Slope.

15. Assumes excavated material will not require solidification and will be disposed as Non-Haz Manganese solid waste (302 tons).

16. Does not include delays associated with the large obstructions (i.e. concrete walls, footings, large boulders) encountered during excavation activities.

Task Subtotal:	**$27,652.00**	**$313,284.00**
Task Total [1]:	**$341,000.00**	

Notes:

1. Time and Materials-not to exceed without further change order follow-up.

2. Identified classifications are intended as examples and actual hours and classifications used could vary depending on availability.

3. Consultant Indirect Costs include costs such as laboratory, waste disposal, drillers, surveyors and construction subcontractors. Estimated costs are based on previous work completed at the Site and are for budgetary purposes. ARCADIS makes no warranty, expressed or implied, as to the accuracy of such opinions as compared to bid or actual costs. The Client understands that ARCADIS has no control over costs; the price of labor, equipment, or materials; or the construction contractor's methods of pricing. Final cost will be based on subcontractor quote and subject to Cleanup Manger approval and mark-up.

4. Laboratory costs assume 123 confirmation samples (1 day turn, 5' grid, includes 10% failure rate).

5. Volume assumes a 25% swell factor and a 1.5 tons to cubic yard ratio.

6. The field aspect of this project is expected to take 10 days (12 hours per day) to complete.

7. Arcades Labor includes development of a work plan, bid development and solicitation, management of the subcontractor, sampling, and manifesting of wastes.

8. Assumes excavation will be completed to a depth of 10 ft. bgs. and does not include excavation below the groundwater table (no dewatering/water management).

9. Assumes the excavation will be completed without additional support of any adjacent utilities.

10. Assumes stepouts will be completed based on unit rates provided.

11. Assumes 540 tons will be trucked offsite per day.

12. Assumes ARCADIS Technician will recover LNAPL from wells prior to excavation for 3 days, generating 2 drums per day of TSCA PCB waste.

13. Assumes excavations can be safely completed with a 1:1 Slope.

14. Assumes excavated material will not require solidification and will be disposed as TSCA PCB solid waste (1,319 tons).

15. Does not include delays associated with the large obstructions (i.e. concrete walls, footings, large boulders) encountered during excavation activities.

Task Total [1]:	**$280,000.00**	

Notes:

1. Time and Materials-not to exceed without further change order follow-up.

2. Identified classifications are intended as examples and actual hours and classifications used could vary depending on availability.

3. Consultant Indirect Costs include costs such as laboratory, waste disposal, drillers, surveyors and construction subcontractors. Estimated costs are based on previous work completed at the Site and are for budgetary purposes. ARCADIS makes no warranty, expressed or implied, as to the accuracy of such opinions as compared to bid or actual costs. The Client understands that ARCADIS has no control over costs; the price of labor, equipment, or materials; or the construction contractor's methods of pricing. Final cost will be based on subcontractor quote and subject to Cleanup Manger approval and mark-up.

4. Laboratory costs assume 211 confirmation samples (1 day turn, 5' grid, includes 10% failure rate).

5. Volume assumes a 25% swell factor and a 1.5 tons to cubic yard ratio.

6. The field aspect of this project is expected to take 10 days (12 hours per day) to complete.

7. Arcades Labor includes development of a work plan, bid development and solicitation, management of the subcontractor, sampling, and manifesting of wastes.

8. Assumes 70-107R and 70-103 excavations will be completed to a depth of 7.5 ft. bgs.

9. Assumes 70-101 excavation will be completed to a depth of 6 ft. bgs.

10. Costs do not include excavation below the groundwater table (no dewatering/water management).

11. Assumes the excavation will be completed without additional support of any adjacent utilities.

12. Assumes stepouts will be completed based on unit rates provided.

13. Assumes 540 tons will be trucked offsite per day.

14. Assumes ARCADIS Technician will recover LNAPL from wells prior to excavation for up to an additional 3 days to decrease product encountered during excavation. Assumes 2 drums of product per day.

15. Assumes excavations can be safely completed with a 1:1 Slope.

16. Assumes excavated material will not require solidification and will be disposed as non-TSCA PCB solid waste (1,776 tons).

17. Does not include delays associated with the large obstructions (i.e. concrete walls, footings, large boulders) encountered during excavation activities.

Clean Fill	$0.00	$0.00
Materials (Pilot Testing Additives)	$0.00	$0.00
Energy (Pilot Testing)	$0.00	$0.00
Utilities	$0.00	$0.00
Consultant Direct Costs Subtotal:	**$500.00**	**$6,650.00**
Consultant Indirect Costs Subtotal:	**$0.00**	**$725,000.00**
Task Subtotal:	**$54,312.00**	**$816,054.00**
Task Total [1]:	**$871,000.00**	

Notes:

1. Time and Materials-not to exceed without further change order follow-up.

2. Identified classifications are intended as examples and actual hours and classifications used could vary depending on availability.

3. Consultant Indirect Costs include costs such as laboratory, waste disposal, drillers, surveyors and construction subcontractors. Estimated costs are based on previous work completed at the Site and are for budgetary purposes. ARCADIS makes no warranty, expressed or implied, as to the accuracy of such opinions as compared to bid or actual costs. The Client understands that ARCADIS has no control over costs; the price of labor, equipment, or materials; or the construction contractor's methods of pricing. Final cost will be based on subcontractor quote and subject to Cleanup Manger approval and mark-up.

4. Disposal costs assume that the material is anticipated to be non-hazardous with no PCB detections (945 tons).

5. Costs assume installation of 33 collection wells, 8,000 linear feet of HDPE pipe, and the addition of heat trace to the piping.

6. The field aspect of this project is expected to take 8 weeks to complete working 5 (12 hour) days per week.

7. Assumes a removal rate of 540 tons per day. Activities will occur concurrently (excavation, pipe installation, backfilling, etc.)

8. Assumes that 2 full waste characteristic sample will be collected.

9. Volume assumes a 25% swell factor and a 1.5 tons to cubic yard ratio.

10. Assumes relocation of the existing system can be completed with a crane and flatbed. Additional modifications to the system may be necessary as a result of the pilot testing.

Table CC-10 **AOI 83/84-5 LNAPL Removal Cost Estimate**
RACER Trust, Buick City Site, Flint, Michigan

Consultant Indirect Costs Subtotal:	**$0.00**	**$3,900.00**
Task Subtotal:	**$7,576.00**	**$79,010.00**
Task Total [1]:	**$86,600.00**	

Notes:

1. Time and Materials-not to exceed without further change order follow-up.

2. Identified classifications are intended as examples and actual hours and classifications used could vary depending on availability.

3. Consultant Indirect Costs include costs such as laboratory, waste disposal, drillers, surveyors and construction subcontractors. Estimated costs are based on previous work completed at the Site and are for budgetary purposes. ARCADIS makes no warranty, expressed or implied, as to the accuracy of such opinions as compared to bid or actual costs. The Client understands that ARCADIS has no control over costs; the price of labor, equipment, or materials; or the construction contractor's methods of pricing. Final cost will be based on subcontractor quote and subject to Cleanup Manger approval and mark-up.

4. Disposal costs assume that the material will be characterized as non-hazardous with no PCB detections. Waste collection is based on the generating 4 drums per month.

5. Laboratory costs include 1 full waste characterization sample per year.

6. Assumes five 10 hour day of active LNPAL removal per month.

7. Assumes that the removal can be completed using the existing well network.

Remedy Recommendation Report
Appendix DD – RFI-81-38 Investigation Summary Memo
RACER Buick City Site, Flint, Michigan

Introduction

This RFI-81-38 Investigation Summary Memo Appendix DD presents a summary of the investigation activities conducted at the RFI-81-38 Area from March 19, 2014 through December 31, 2105 at the Buick City Site (Site) located in Flint, Michigan.

In 2003 soil boring RFI-81-38 was completed at the former Factory 81 Area during RCRA Facility Investigation (RFI) activities. Concentrations in the soil sample collected at RFI-81-38 from 1 to 3 feet below ground surface (ft bgs) exceeded nonresidential infinite source volatile soil inhalation criteria (NVSICI) ambient air criteria for 1,1,1-trichloroethane, 1,1,2-trichloro-1,2,2-trifluoroethane, 1,1-dichloroethane, and 1,1-dichloroethene.

Summary of Investigation Activities

Investigation activities were completed at RFI-81-38 to characterize VOC concentrations in soil gas beneath the building slab (**Figure DD-1**). Five sub-surface monitoring points (SSMP) were installed to evaluate soil gas beneath the former building slab at the RFI-81-38 Area. One monitoring point (SSMP-81-03) was co-located with monitoring well RFI-81-38, while the remaining four monitoring points (SSMP-81-04 through

SSMP-81-07) were placed approximately 20 feet in each direction. Following installation of the SSMPs in November 2015, soil gas samples were collected and submitted for laboratory analysis of VOCs.

Summary of Data Evaluation

One round of soil gas samples were collected from SSMP-81-03 through SSMP-81-07. VOCs were not detected above Nonresidential Michigan Department of Environmental Quality (MDEQ) Vapor Intrusion (VI) Soil Gas Screening Levels (**Table DD-1**) at SSMP-81-03, which is co-located with RFI-81-38, or the step-outs at SSMP-81-04, SSMP-81-05, or SSMP-81-07. However, the MDEQ VI Soil Gas Screening Levels were exceeded at SSMP-81-06 for 1,1-dichloroethane, trichloroethene, trichlorotrifluoroethane, and vinyl chloride. A second round of soil gas sampling is scheduled to be completed in Spring 2016.

Appendix EE – RFI-10-03 and RFI-10-37 Soil Gas Sampling Summary Memo
RACER Buick City Site, Flint, Michigan

Introduction

This RFI-10-03 and RFI-10-37 Soil Gas Sampling Summary Memo Appendix EE presents a summary of the soil gas sampling data collected downgradient of monitoring wells RFI-10-03 and RFI-10-37 from March 19, 2014 through December 31, 2105 at the Buick City Site (Site) located in Flint, Michigan.

Summary of Investigation Activities

Groundwater samples previously collected from monitoring well RFI-10-03 detected trichloroethene (TCE) at a concentration that exceeds the Michigan Department of Environmental Quality (MDEQ) Vapor Intrusion (VI) Groundwater Screening Levels. Two soil gas sampling probes (SGP-10-01 and SGP-10-02) were installed downgradient of RFI-10-03 to evaluate VOC concentrations in the soil gas along the property boundary (**Figure EE-1**).

TCE was also detected in groundwater samples collected from monitoring well RFI-10-37 at a concentration that exceeds the MDEQ VI Groundwater Screening Levels. Two soil gas sampling probes (SGP-10-03 and SGP-10-04) were installed downgradient of RFI-10-37 to evaluate VOC concentrations along the property boundary (**Figure EE-1**).

Two rounds of soil gas samples were collected from each probe and submitted to the laboratory for VOC analysis.

Summary of Data Evaluation

No VOCs were detected at concentrations exceeding their respective Nonresidential MDEQ VI Soil Gas Screening Levels (**Table EE-1**). Furthermore, the constituents of concern (TCE, cis-1,2-dichloroethene, trans-1,2-dichloroethene, and vinyl chloride) were not detected in any of the soil gas samples.
