LFR an ARCADIS company

December 15, 2009 010-15317-10

Robert W. Hare, P.E., CHMM
Director of Environmental
Motors Liquidation Company

Subject: Phase I Environmental Site Assessment
MLC ID 1294
6241 Cass Avenue
Detroit, Michigan

Dear Mr. Hare:

Attached is the Phase I Environmental Site Assessment (ESA) report for the above-referenced property. The conclusions presented in this report are based on the results of a reconnaissance-level site visit conducted by LFR Inc. (LFR) personnel and a review of available and pertinent background information.

LFR appreciates this opportunity to provide our environmental consulting services to you. If you have any questions concerning this project, please contact me at (781) 356-7300.

Sincerely,

Stephen P. McCarthy
Principal Scientist

EXECUTIVE SUMMARY

LFR Inc. (LFR) performed a Phase I Environmental Site Assessment (ESA) of the Parking Lot 8 property located at 6241 Cass Avenue, Detroit, Michigan (the Site). The Site consists of approximately 1.4 acres of land and is improved with an asphalt parking lot. According to previous reports, the Site was historically occupied by the Detroit Motor Company since at least 1897 and operated a lead smelting building and two fire department structures. Prior to 1910 and until approximately 1941, the Cadillac Motor Company replaced the Detroit Motor Company. From approximately 1941 until 1961, the Site was used for automobile sales. Since 1977, the Site has been vacant and used as a parking lot.

The purpose of the Phase I ESA is to identify, to the extent feasible pursuant to the processes prescribed in the American Society for Testing and Materials (ASTM) document E 1527-05, recognized environmental conditions (RECs) in connection with the Site. A summary of our key findings is provided below:

- The Site was formerly used for industrial and commercial activities including a lead smelting operation and a varnishing and finishing area. An automobile sales operation also formerly existed at the Site.
- According to previous reports, a Phase II Environmental Site Assessment (Phase II ESA) was conducted in 2007 and included the advancement of 16 borings and three test pits. The Phase II objectives were to investigate the presence of underground storage tanks (USTs) and other areas of concern including former industrial operations. Based on the results of the Phase II testing, approximately 150 cubic yards of arsenic and lead contaminated soil was present on the south side and 150 cubic yards of polynuclear aromatic hydrocarbon (PAH) contaminated soil on the north side of the Site that exceeded Michigan Department of Environmental Quality (MDEQ) residential and commercial soil standards. During the Phase II ESA, groundwater was not encountered. As a result of the investigation, it was determined that the Site would be classified as a “Facility” under MDEQ regulations (section 20107a of Part 201). No active remediation is currently on-going at the Site and there are no records which indicate that the arsenic/lead and PAH contaminated soil has been removed.

Conclusion

LFR performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-05 of the property located at 6241 Cass Avenue, Detroit, Michigan. Any exceptions to, or deletions from, this practice are described in Section 9 of this report. This assessment has revealed the following RECs associated with the Site:

- Based on the results of the Phase II testing, approximately 150 cubic yards of arsenic and lead contaminated soil was present on the south side and 150 cubic yards of PAH contaminated soil on the north side of the Site that exceeded MDEQ residential and commercial soil standards. No active remediation is currently on-going at the Site and there are no records which indicate that the arsenic/lead and PAH contaminated soil has been removed.
- According to previous reports and historical information, the former lead smelting building, the former varnishing/finishing area and former storage room, and a former unknown structure in the northeast portion of the Site were not investigated during the Phase II ESA and subsurface investigations.

1.0 INTRODUCTION

LFR Inc. (LFR) performed a Phase I Environmental Site Assessment (ESA) of the Parking Lot 8 property located at 6241 Cass Avenue, Detroit, Michigan (the "Site"). The Site consists of approximately 1.4 acres of land and is improved with an asphalt parking lot.

1.1 Purpose

Motors Liquidation Company (the Client) requested that LFR conduct a Phase I ESA of the Site. The objective of the ESA was to identify RECs in connection with the property, to the extent feasible pursuant to the processes prescribed in American Society for Testing and Materials (ASTM) E 1527-05 guidelines. The term "REC" as defined by the ASTM is the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or the material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

This Phase I ESA includes information gathered from federal, state, and local agencies; personal interviews with people familiar with the Site and surrounding properties; and a site visit conducted by a LFR representative.

1.2 Detailed Scope of Services

The Phase I ESA conducted by LFR included, but was not limited to, the following services:

- a reconnaissance-level visit of the Site to look for evidence of the release(s) of hazardous materials and petroleum products and to assess the potential for on-site releases of hazardous materials and petroleum products
- drive-by observations of adjacent properties and the site vicinity
- interviews with people familiar with the Site, as available
- review of regulatory and local agency files, as necessary
- review of historical documents, as available
- preparation of a report presenting our findings, including a summary of conclusions

1.3 Significant Assumptions

The purpose of this Phase I ESA is to provide appropriate inquiry into the previous ownership and use of the Site consistent with good commercial and customary practice in an effort to minimize liability. LFR also assumes that the information provided by the Client, the regulatory database provider, and regulatory agencies is true and reliable.

1.4 Limitations and Exceptions

The opinions and recommendations presented in this report are based upon the scope of services, information obtained through the performance of the services, and the schedule as agreed upon by LFR and the original party for whom this report was originally prepared. This report is an instrument of professional service and was prepared in accordance with the generally accepted standards and level of skill and care under similar conditions and circumstances established by the environmental consulting industry. To the extent that LFR relied upon any information prepared by other parties not under contract to LFR, LFR makes no representation as to the accuracy or completeness of such information. Only the party for whom this report was originally prepared, its lenders, insurers and professionals, and other specifically named parties, may make use of and rely upon the information in this report, in its entirety, for a period not to exceed 180 days in accordance with the American Society for Testing and Materials (ASTM's) "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" ASTM Designation E 1527-00 dated May 10, 2000, ASTM's "Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process" ASTM Designation E 1527-05 dated November 1, 2005, and/or the Code of Federal Regulations (CFR) 40 CFR Part 312 "Standards and Practices for All Appropriate Inquiries: Final Rule" dated November 1, 2005. After 180 days and prior to using the information contained herein, the report should be updated in accordance with ASTM Standards and Federal regulations.

The findings presented in this report apply solely to site conditions existing at the time when LFR's assessment was performed. It must be recognized, however, that an ESA is intended for the purpose of evaluating the potential for contamination through limited research and investigative activities and in no way represents a conclusive or complete site characterization. Conditions in other parts of the project site may vary from those at the locations where data were collected. LFR's ability to interpret investigation results is related to the availability of the data and the extent of the investigation activities. As such, 100% confidence in ESA conclusions cannot reasonably be achieved.

LFR, therefore, does not provide any guarantees, certifications, or warranties (express or implied) that a property is free from environmental contamination. Furthermore, nothing contained in this document shall relieve any other party of its responsibility to abide by contract documents and all applicable laws, codes, regulations, or standards.

1.5 User Reliance

This report is for the exclusive use of Motors Liquidation Company. Use of this report by any other party shall be at such party's sole risk.

2.0 SITE DESCRIPTION

2.1 Location and Legal Description

The Site is located at 6241 Cass Avenue, Detroit, Wayne County, Michigan. It is located at the intersection of Cass Avenue and Amsterdam Street.

Refer to Figure 1 for the location of the Site.

2.2 Site and Vicinity General Characteristics

The Site is a vacant paved parking lot. The Site is fenced with two access gates along Cass Avenue and one access gate along Amsterdam Street. The surrounding area consists of commercial properties.

2.3 Current Use of the Site

The Site is currently used as parking lot.

2.4 Descriptions of Structures, Roads, and Other Improvements on the Site

The Site consists of approximately 1.4 acres of land improved with an asphalt parking lot. There are no buildings at the Site. The Site was developed as early as 1897. During the Site reconnaissance, storm sewers were observed along the eastern and western portions of the Site.

Refer to Figure 2 for a plan depicting the layout of the Site.

2.4.1 Source of Potable Water

Potable water connections in the vicinity of the Site are provided by the City of Detroit.

2.4.2 Sewage Disposal System

Sanitary sewer connections in the vicinity of the Site are provided by the City of Detroit.

2.4.3 Heating/Cooling Systems

There are no buildings at the Site.

2.4.4 Solid Waste Disposal

There are no buildings at the Site and solid waste is not generated at the Site.

2.5 Current Uses of Adjoining Properties

The use of the adjoining properties at the time of LFR's investigation is summarized as follows:

- The Site is abutted to the north, northeast, and northwest by Grand Trunk Western Railroad easement followed by a parking structure.
- The Site is abutted to the west by an alley and parking area followed by the Westcott Building.
- The Site is abutted to the south and southwest by Amsterdam Street followed by a school.
- The Site is abutted to the east by Cass Avenue followed by a surface parking lot.
- The Site is abutted to the southeast by Cass Avenue and Amsterdam Street followed by Dalgleish Cadillac.

3.0 USER-PROVIDED INFORMATION

The following items regarding the Site were requested by LFR to the Client's representative. The questionnaire was submitted to Douglas Wagner of Genoa Environmental, Inc., on behalf of Motors Liquidation Company. A copy of the questionnaire will be provided in Appendix A.

3.1 Title Records

Title records were not provided to LFR for review.

3.2 Environmental Liens or Activity and Use Limitations

Douglas Wagner was asked the following questions as part of the assessment:

- Is he aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state, or local law? **Answer:** No
- Is he aware of any activity or land use limitations, such as engineering controls, land use restrictions, or institutional controls, that are in place at the Site and/or have been filed or recorded in a registry under federal, tribal, state, or local law? **Answer:** No

3.3 Specialized Knowledge

Douglas Wagner was asked the following questions as part of the assessment:

- Does he have any specialized knowledge or experience related to the property or nearby properties? For example, are they involved in the same line of business as the current or former occupants of the property or an adjoining property so that they would have specialized knowledge of the chemicals and processes used by this type of business? **Answer:** No
- Is he aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as User,
- Does he know the past uses of the property? **Answer:** Yes
- Does he know of specific chemicals that are present or once were present at the property? **Answer:** Only what is included in the Phase I report prepared by LFR.
- Does he know of spills or other chemical releases that have taken place at the property? **Answer:** Only what is included in the Phase I report prepared by LFR.
- Does he know of any environmental cleanups that have taken place at the property? **Answer:** Only what is included in the Phase I report prepared by LFR.
- Does he know if any fill materials have been imported to the Site? **Answer:** Only what is included in the Phase I report prepared by LFR.
- Does he know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property? **Answer:** No
- Does he know of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the property? **Answer:** No
- Does he know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products? **Answer:** No

3.4 Commonly Known or Reasonably Ascertainable Information

Douglas Wagner was asked the following question as part of the assessment:

- Based on his knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property? **Answer:** Only what is included in the Phase I report prepared by LFR.

3.5 Valuation Reduction for Environmental Issues

An analysis of a hypothetical prospective purchase price of the Site has not been conducted.

3.6 Owner, Property Manager, and Occupant Information

According to the Wayne County Treasurer's Office, the Site is owned by General Motors Corporation. General Motors Corporation has changed its name to Motors Liquidation Company.

3.7 Reason for Performing Phase I

The purpose of this Phase I ESA is to provide appropriate inquiry into the previous ownership and use of the Site consistent with good commercial and customary practice in an effort to minimize liability.

4.0 RECORDS REVIEW

The following sections provide information regarding the regulatory status and history of the Site and vicinity developed from information available from local, state and federal agencies and ASTM Standard Historical Sources. It also provides topographic, hydrologic and soil conditions in the area of the Site.

4.1 Historical Use Information

4.1.1 Previous Environmental Reports

The Client provided LFR with three previous environmental reports for the Site which are summarized below:

A "Phase I Environmental Site Assessment", Parking Lot 8, 6241 Cass Avenue, Detroit, Michigan, was prepared by ENCORE Environmental Consortium, LLC (ENCORE), dated May 15, 2009. During their assessment, ENCORE identified several RECs which included the summary of a Phase II ESA conducted in March and August 2007 which identified PAH contaminated soil at the western portion of the Site above MDEQ Generic Residential Direct Contact Soil Cleanup Criteria. The results indicated that the Site would be classified as a "facility" as defined by Section 20107a of Part 201 of the Natural Resources and Environmental Protection Act (NREPA), 1994 PA 451, as amended (Part 201). The Commercial IV land use scenario was determined to be appropriate because the Site usage was a parking lot. ENCORE indicated that the Phase II ESA did not address other areas of concern including the former lead smelting building, the former varnishing and finishing area, the former oil storage room, a former unknown structure at the northeast portion of the Site, and a railroad spur.

A "Lot 8 Delineation – Summary of Findings" report for 6241 Cass Avenue, Detroit, Michigan was prepared by The Traverse Group (Traverse), dated August 27, 2007 and summarized additional soil sampling activities for the delineation of soil contamination at the Site. A geophysical survey was conducted to evaluate the presence of USTs and detected several subsurface anomalies. In March 2007, a test pit program was completed and no evidence of USTs was observed in the anomaly areas. Traverse subsequently advanced five soil borings to depths ranging from 5 to 15 feet below ground surface. Laboratory analysis of the soil samples detected the PAH benzo[a]pyrene, lead, and arsenic above the MDEQ Generic Residential Cleanup Criteria. In August 2007, eleven additional soil borings were advanced to delineate the horizontal and vertical extent of contamination. Groundwater was not encountered in the borings. Traverse concluded that lead and arsenic contaminated soil, although at concentrations below the MDEQ Generic Residential Cleanup Criteria, was located at the southern portion of the Site. The PAH contaminated soil was located at the north side of the Site. Traverse estimated that approximately 150 cubic yards of arsenic and lead contaminated soils was present at the southern portion and 150 cubic yards of PAH contaminated soil was present at the north side of the Site. Additional sampling was recommended at the northwestern portion of the Site to further delineate the horizontal extent of PAH contaminated soil.

A "Phase II Environmental Site Assessment – Summary of Findings", General Motors Parking Lot 8, 6241 Cass Avenue, Detroit, Michigan was prepared by Traverse, dated March 16, 2007. The findings of the Phase II ESA have been summarized in ENCORE's Phase I ESA and the above "Lot 8 Delineation – Summary of Findings" report.

4.1.2 Historic Map Review

LFR reviewed Sanborn® Fire Insurance (Sanborn) maps provided by EDR for the years 1889, 1897, 1910, 1941, 1951, 1953, 1957, 1961, 1977, 1989, 1996, and 2002.

The 1889 Sanborn map shows the Site as undeveloped. Railroad tracks and a coal yard are depicted adjacent to the north. A lumber yard and several structures are shown to the east beyond Cass Avenue. The Detroit City Railway is shown to the southeast beyond Cass Avenue. No development is shown to the south or to the west. Amsterdam Street is not shown on the map.

The 1897 Sanborn map shows the Site and surrounding properties under development. The Detroit Motor Company is depicted on the northern portion of the Site. The Detroit Motor Company is shown to be comprised of offices, electrical department, machine shop, and foundry. A railroad spur is shown adjacent to the north of the Detroit Motor Company. A small structure identified as lead smelting is depicted to the south of Detroit Motor Company. The map shows the Fire Engine Company No. 17 located on the south and southeastern portion of the Site, which appears to have been comprised of a storage building and a main fire hall.

The 1910 Sanborn map identifies the north and central portions of the Site as part of the Cadillac Motor Car Company. A wash room, testing room, stock room, and woodworking area are identified at this portion of the Site. The southern portion of the Site is occupied by two stables and a building identified as Engine No. 17 and Truck No. 7. An additional rail spur is present to the north. Beyond Cass Avenue to the east is a warehouse for the Cadillac Motor Car Company. Property abutting to the west is occupied by buildings associated with the Cadillac Motor Car Company.

The 1941 Sanborn maps indicates that the Cadillac Motor Car Company is no longer present at the Site and a small used auto sales building is located on the south side of the Site. There is also a small unidentified structure at the northeast portion of the Site. Used auto sales buildings are shown both beyond Cass Avenue to the east and beyond Amsterdam to the south. A commercial building abuts to the west and is identified as dilapidated. The Buick Service station is depicted southeast of the Site beyond the intersection of Cass Avenue and Amsterdam Street. A post office is shown to the north beyond the railroad tracks. Commercial structures are depicted to the southwest and west.

The 1951, 1953, and 1957 Sanborn maps are similar. The auto sales building has been removed from the Site and replaced with a used auto sales and service building to the north of the former building. The commercial building abutting to the west is identified as an auto parts store and loft.

The 1961 Sanborn map is similar to the previous maps; however, the used auto sales and service building is no longer present. The commercial building abutting to the west is identified as a paper goods warehouse.

The 1977 Sanborn map indicates that the unidentified building at the northeast portion of the Site is no longer present. The Site is depicted as a parking lot. No buildings are shown to the east beyond Cass Avenue. Chevrolet Service Station (formerly Cadillac Motor Car Division – Wholesale Auto Parts) is depicted southwest of the Site across Amsterdam Street.

The 1989, 1991, 1996, and 2002 Sanborn maps are similar to the 1977 map. An auto sales and service building is depicted to the southeast beyond Cass Avenue and Amsterdam Street.

Copies of the Sanborn maps are included in Appendix B.

4.1.3 Aerial Photograph Review

LFR reviewed historical aerial photographs provided by EDR for the years 1937, 1949, 1952, 1957, 1961, 1972, 1985, 1993, 2000, and 2005. The surrounding area appeared to be developed on each of the photographs.

The 1937 aerial photograph shows the Site as vacant. A railroad easement is present adjacent to the north and the surrounding properties are developed.

The 1949, 1952, and 1957 aerial photographs are similar. Two structures and several automobiles are present on the site. The property to the east beyond Cass Avenue is used as a parking lot where a building previously existed.

The 1961 aerial photograph shows the Site as vacant. The surrounding properties appear similar to the 1957 aerial photograph.

The 1972 and 1985 photographs are similar to the 1961 aerial photograph.

The 1993 aerial photograph shows the Site a vacant with the exception of stored items on the western portion. The surrounding properties appear similar to previous photographs.

The 2000 and 2005 maps show the Site as a vacant parking lot. The surrounding properties appear similar to the 1993 aerial photograph.

Copies of the above-referenced aerial photographs are included in Appendix B.

4.1.4 City Directories

LFR contracted EDR to conduct a city directory search for the Site and surrounding area. EDR reviewed city directories for the Site for the years 1891 through 2009 in approximately five-year intervals, as available. The Site address was not listed in the years researched.

Properties in the vicinity of the Site from 1941 to 2009 have been listed as the Buick Motor Division GM Sales Corp., American Electrical Heater Company, a Chevrolet Dealership, and a Cadillac Dealership.

The EDR City Directory Abstract is included in Appendix B.

4.1.5 Historical Topographic Maps

Topographic maps were obtained from EDR for the years 1905, 1947, 1952, 1968, 1973, and 1980.

The 1905 topographic maps show the Site and surrounding areas to be developed area. The map shows two structures on the Site. The Grand Trunk rail road is depicted north of the Site. The areas east, south and west of the Site are shown to be developed.

The 1947 topographic map depicts the Site as vacant. The buildings are no longer depicted on the Site.

The 1952, 1968, 1973, and 1980 topographic maps show the Site located in an urban area. Individual buildings are not shown in the vicinity of the Site.

The EDR Topographic Map report is included in Appendix B.

4.1.6 Building/Planning Departments

LFR contacted the City of Detroit Building and Planning Departments to review available records on file for the Site. No documents have been received at the time of this report. Pertinent information received will be included in an addendum to this report.

4.1.7 Additional Record Sources

No additional record sources were reviewed in the course of this assessment.

4.1.8 Summary of Historical Information

The Site has been identified on Sanborn maps and aerial photographs as developed from 1897 until at least 1961. Aerial photographs show two structures and several automobiles on the Site in 1949. Former uses of the Site include a lead smelting operation and a varnishing and finishing area. An automobile sales operation also formerly existed at the Site. Since at least 1977, the Site has been vacant and used as a parking lot.

4.2 Historical Use Information on Adjoining Properties

A review of select city directories, aerial photographs and topographic maps indicate that the adjoining and surrounding properties have historically been used for a mixture of commercial and industrial purposes including automobile dealerships, auto manufacturing, and electrical heater manufacturing. The adjoining properties to the south and east are Amsterdam Street and Cass Avenue, respectively. The adjoining property to the north has historically been occupied by a railroad easement.

4.3 Physical Setting

4.3.1 Geology

4.3.1.1 Surface Features

According to the EDR topographic information (C-1 Detroit and D-1 Highland Park Maps), the Site elevation is approximately 633 feet above sea level. Topographically, the Site and surrounding area are relatively flat with a slight slope to the east-northeast.

4.3.1.2 Subsurface Features

According to the EDR report, the Site was not mapped by the United States Department of Agriculture but soils likely consist of urban fill material. Underlying the surface, shallow, and deeper soils are the bedrock deposits classified as Paleozoic Era, Devonian, System, and Middle Devonian Series.

4.3.2 Hydrology

4.3.2.1 Surface Water

There was no surface water visible at the Site or surrounding properties. Surface water flow in the area is largely controlled by artificial structures along roadways and in paved areas. Storm sewers were observed during the Site reconnaissance at the eastern and western portions of the Site.

4.3.2.2 Groundwater

Information regarding the regional hydrogeology of the Site vicinity was obtained from the Geocheck Addendum to the EDR Radius Map Report and a previous report. One AQUIFLOW® point was identified between 0.5 mile and 1 mile south-southeast of the Site. Groundwater flow direction was indicated as varied at the AQUIFLOW point; however, the average depth to groundwater at this well was 6.5 feet below ground level (bgl). Previous reports indicate groundwater was not encountered to a depth of 14 feet bgl. Based on the area topography indicated in the EDR Report and nearby surface water bodies, the inferred localized groundwater flow direction is likely south-southwest. However, localized groundwater flow direction may vary based on several factors. A hydrogeologic investigation would be required to make a more definitive determination of the localized groundwater flow direction.

4.4 Standard Environmental Record Sources – Federal and State

LFR contracted with EDR to conduct a search of state and federal regulatory databases to identify recorded concerns for the Site and surrounding properties. The databases were searched to the approximate minimum search distances as specified in ASTM Standard Practice E 1527-05, "Phase I Environmental Site Assessment Process." The database search is provided as Appendix C.

Review of the EDR report revealed the following pertinent information.

Database	Search Radius	Site	Adjacent	0 – 1/8 mile	1/8 – ¼ mile	¼ - ½ mile	½ - 1 mile
NPL	1 mile	No	0	0	0	0	0
Delisted NPL	1 mile	No	0	0	0	0	0
Federal CERCLIS	0.50 mile	No	0	0	0	1	-
CERCLIS-NFRAP	0.50 mile	No	0	0	2	0	-

4.4.1 Site

The Site was not identified on the databases searched by EDR.

4.4.2 Federal Environmental Record Sources

Based on review of the EDR database report, 148 mapped facilities were identified within one mile of the Site. The following summaries of nearby properties were obtained from the ENCORE Phase I report dated May 15, 2009 and were confirmed with the October 2009 EDR report reviewed by LFR.

The following is a summary of the mapped properties identified within 1/8-mile of the Site:

Surrounding Properties Database Listings – Within 1/8-Mile

Entity Listed / Address	Approximate Location Relative to Site	Database	Comments / Status of Listing
Home Laundry Co. 6238 Cass Ave, Detroit, MI	13 feet north-northwest	Historical Cleaners	• The facility is listed as a laundry in 1926. No further information is included in the listing.
Brake Service Corp. 6204 Cass Ave, Detroit, MI	190 feet south-southeast	Historical Auto Stations	• The facility is listed as an automobile repairing facility in 1926. No further information is included in the listing.
TEF Four LLC 435 Amsterdam Detroit, MI 48202	354 feet south-southwest	RCRA-SQG	• EPA ID: MIK227822129. A former small quantity generator of hazardous waste. No TSDF activities or violations are reported.

Entity Listed / Address	Approximate Location Relative to Site	Database	Comments / Status of Listing
University Prep Elementary II 435 Amsterdam Detroit, MI 48202	354 feet south-southwest	UST	• Facility ID: 00042091. One 2,000-gallon used oil UST was installed on an unknown date and removed from the ground on April 4, 2008.
Dalgleish Cadillac-Oldsmobile Inc. 6160 Cass Ave Detroit, MI 48202	358 feet south-southeast	FINDS RCRA-SQG LUST UST	• RCRA information system • EPA ID: MID006530737. A conditionally exempt small quantity generator of hazardous waste. No TSDF activities or violations are reported. • Facility ID 00006357. Leak Number C-0103-93. A release of an unknown substance occurred on January 13, 1993. The case was closed on January 23, 1995. • Facility ID 00006357. One 4,000-gallon gasoline UST was installed on February 6, 1976 and removed on January 19, 1993. One 1,500-gallon used oil UST was installed on February 5, 1978 and removed on July 18, 1990. One 1,000-gallon gasoline UST was installed on an unknown date and removed on June 16, 1994. Eight 30-gallon hydraulic oil USTs were present on the facility: five were installed on February 6, 1976; two were installed on February 5, 1981; and one was installed on February 6, 1984. All of the hydraulic oil USTs were removed on June 16, 1994.
6200 Second	577 feet	US	• The recipient of the Brownfield

Entity Listed / Address	Approximate Location Relative to Site	Database	Comments / Status of Listing
Street Detroit, MI	southwest	Brownfields	funding was listed as the Wayne County Brownfield Redevelopment Authority. A Phase I Environmental Assessment was completed on September 30, 2000.
James Martin Chevrolet, Inc. 6250 Woodward Detroit, MI 48202	436 feet east-northeast	RCRA-SQG FINDS LUST UST	• EPA ID: MID064186984. A small quantity generator of hazardous waste. No TSDF activities are reported. No TSDF activities or violations are reported. • RCRA information system. • Facility ID: 00002582. Leak ID: C-1912-92. A release of gasoline occurred on October 28, 1992 and was closed on October 19, 1993 • One 3,000-gallon gasoline UST was installed on May 5, 1976 and removed on November 1, 1993. One 4, 000-gallon gasoline UST was installed on July 18, 1994 and is listed as currently in use.
Superior Auto Sales and Service 6227 Woodward Ave Detroit, MI	449 feet east-northeast	Historical Auto Stations	• The facility is listed as an automobile repairing facility in 1926. No further information is included in the listing.
American Electrical Heater Co 6110 Cass Detroit, MI 48202	550 feet south-southeast	FINDS RCRA-NonGen	• RCRA Info program • EPA ID MID985584192. The facility does not generate hazardous waste. No TSDF activities or violations are reported.

Entity Listed / Address	Approximate Location Relative to Site	Database	Comments / Status of Listing
Baltimore-Cass Parking Company 65 W Baltimore Detroit, MI 48202	526 feet north	RCRA-NonGen	• EPA ID MIK667994966. The facility does not generate hazardous waste. No TSDF activities or violations are reported.
Auto Enterprises, Inc 65 W Baltimore Detroit, MI	526 feet north	Historical Auto Stations	• The facility is listed as an automobile garage facility in 1926 (Donald Thurber), 1935 (Detroit Garages), and 1940 (Detroit Garages). The facility is listed as an automobile repairing facility in 1965 (Auto Enterprises, Inc). No further information is included in the listing.
Cass Car Storage Co 65 W Baltimore Detroit, MI	526 feet north	Historical Auto Stations	• The facility is listed as an automobile garage facility in 1956. No further information is included in the listing.
Woodward Laundry 6533 Woodward Avenue Detroit, MI	588 feet north-northeast	Historical Cleaners	• No further information is included in the listing.

Entity Listed / Address	Approximate Location Relative to Site	Database	Comments / Status of Listing
Goldmax 28 West Baltimore Avenue Detroit, MI	595 feet north	Historical Cleaners	• No further information is included in the listing.
Hirsch Cleaners and Dyers/Meckler Barnet 6368 Woodward Avenue Detroit, MI	614 feet north-northeast	Historical Cleaners	• No further information is included in the listing.
Puritan Stations, Inc Office 403 W Baltimore Ave Detroit, MI	659 feet west-northwest	Historical Auto Stations	• The facility is listed as gasoline and oil service station in 1940. No further information is included in the listing.
Wayne State University 435 Burroughs Detroit, MI 48202	643 feet southeast	RCRA-NonGen	• EPA ID MIK325852192. The facility does not generate hazardous waste. No TSDF activities or violations are reported.

Entity Listed / Address	Approximate Location Relative to Site	Database	Comments / Status of Listing
Asterand Inc 440 Burroughs St Detroit, MI 48202	655 feet south	RCRA-CESQG	• EPA ID: MIK346614647. A small quantity generator of hazardous waste. No TSDF activities are reported. No TSDF activities or violations are reported.
Techone 440 Burroughs St Detroit, MI 48202	655 feet south	RCRA-SQG FINDS	• EPA ID: MID980793988. A small quantity generator of hazardous waste. No TSDF activities are reported. No TSDF activities are reported. The facility had two violations on January 16, 2007; one of a state regulation and one generators-manifest. Both violations were corrected on March 27, 2007. • RCRA information system.
Former Chevrolet Creative Services (CSS) Property 440 Burroughs St Detroit, MI 48202	655 feet south	LUST UST BEA	• Facility ID: 00041401. Leak Number C-0390-03. A release of an unreported substance occurred on October 2, 2003. The case status is listed as open. • Facility ID: 00041401. The facility is listed as closed. One 1,000-gallon UST of unknown contents was on an unknown dated and removed from the ground on September 19, 2003. • BEA Number: 1912. A Category N BEA was submitted by Wayne State University on December 27, 2002. A determination is pending.

Entity Listed / Address	Approximate Location Relative to Site	Database	Comments / Status of Listing
Wayne State University 461 Burroughs St Detroit, MI 48202	647 feet south	RCRA-CESQG	• EPA ID: MIK222418931. A small quantity generator of hazardous waste. No TSDF activities are reported. No TSDF activities or violations are reported.

Based on their location, distance, and regulatory status, the above off-site properties are not expected to adversely affect the environmental condition of the Site.

4.4.4 Orphan Summary

LFR reviewed the "Orphan Summary" section of the EDR Radius Map report, which is a list of sites that could not be properly located due to inadequate or incorrect information provided by the reporting agency. The 20 facilities listed in the Orphan summary do not appear to be located within the Approximate Minimum Search Distance for the above-referenced Federal and State regulatory databases.

4.5 Additional Environmental Records Sources

4.5.1 Fire Department

LFR contacted the City of Detroit Fire Department which did not identify records on file for the Site pertaining to ASTs, USTs or the storage or release of OHM.

4.5.2 Health Department

LFR contact the Wayne County Health Department. No information has been received regarding the Site as of the date of this report. Pertinent information received by this department will be incorporated into an addendum to this report.

4.5.3 Michigan Department of Environmental Quality

LFR submitted a Freedom of Information Act (FOIA) request to the Michigan Department of Environmental Quality (MDEQ) to obtain all available records regarding current and former USTs/ASTs, LUST releases, hazardous waste storage and use inspections or violations, air and discharge permits, and any environmental non-compliance issues for the Site. The MDEQ indicated that no records are available for the Site based on their search of records maintained by the Land and Water Management Division, Waste and Hazardous Materials Division, Air Quality Division, Remediation and Redevelopment Division, and Water Bureau.

Additionally, LFR searched the MDEQ - Underground and Leaking Underground Storage Tank and the Waste and Hazardous Materials Division databases the Internet. The Site is not listed on any of databases.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

Mr. Tom Wharton of LFR visited the Site on October 30, 2009. The weather at the time of LFR's investigation was cloudy with light rain, with a temperature of approximately 55 degrees Fahrenheit. LFR inspected the entire Site.

5.2 Current Site Use

The Site is currently a vacant paved parking lot. There are no buildings at the Site.

5.3 Site Observations

5.3.1 Underground Storage Tanks (USTs)

LFR did not observe fill pipes or vent pipes on the Site. During the site reconnaissance, evidence of excavations included patches in the asphalt pavement in various locations across the Site. According to the Phase I report dated May 2009,'' up to nine USTs may have been installed at the Site. In June 2004, an electromagnetic (EM) survey was conducted across the Site in an attempt to identify existing USTs or piping. Three areas (southern portion, southwestern portion, and western portion) on the Site were identified in the survey as anomalies potentially contained USTs. In March 2007, three test pits were excavated in these areas to a depth of approximately six feet below ground level (bgl). A pipe was discovered in the southwestern test pit, and the test pit excavation was extended to trace the pipe to its end. No USTs were encountered during the test pit program.

5.3.2 Aboveground Storage Tanks (ASTs)

LFR did not observe evidence of ASTs at the Site. However, according to the ENCORE Phase I report dated May 2009, ASTs previously existed at the Site during the Cadillac Motor Company operations. According to historical references two 25,000-gallon tanks were present on the eastern portion of the Site, apparently located on the roof of the building over an elevator and stairwell. ASTs located in other sections of the building west of the Site were labeled as being a water tank, and the historical reference indicates that the building contained automatic sprinklers. Therefore, ENCORE concluded that the 25,000-gallon ASTs located on the eastern portion of the Site likely contained water. No RECs or other environmental issues were noted in association with ASTs at the Site.

5.3.3 Hazardous Substance and Petroleum Use

LFR did not observe hazardous substances or petroleum products being used or stored at the Site. However, according to historical references and previous reports, the historical manufacturing and automobile service operations at the Site used petroleum and hazardous substances including oils, varnishes, and solvents. In addition, two railroad spurs were located along the northern portion of the Site, in the vicinity of the current elevated railroad tracks.

5.3.4 Unlabeled Drums/Containers

LFR did not observe unlabeled drums or containers at the Site.

5.3.5 Stained Soil or Pavement

LFR did not observe stained soil or pavement at the Site.

5.3.6 Stains or Corrosion

LFR did not observe stains or corrosion at the Site.

5.3.7 Stressed Vegetation

LFR did not observe evidence of stressed vegetation at the Site.

5.3.8 Polychlorinated Biphenyls (PCBs)

LFR observed did not observe and electric transformer on the Site. Electricity is currently not supplied to the Site.

5.3.9 Solid Waste/Dumping

LFR observed one trash bin in the northeast portion of the site. LFR did not observe any evidence of dumping at the Site.

5.3.10 Site Drainage

LFR observed five storm water catch basins at the Site.

5.3.11 Pits, Ponds, Lagoons and Pools of Liquid

LFR did not observe pits, ponds, lagoons or pools of liquid on the Site.

5.3.12 Wastewater

LFR did not observe processes at the Site that generated wastewater.

5.3.13 Wells

LFR did not observe monitoring wells, dry wells, irrigation wells, injection wells, or abandoned wells at the Site.

5.3.14 Septic Systems

LFR did not observe evidence of septic systems or cesspools at the Site.

5.3.15 Odors

LFR did not note readily noticeable strong, pungent, or noxious odors at the time of the site visit.

5.3.16 Other Observations

No other significant Site observations were noted at the time of the site visit.

6.0 INTERVIEWS

6.1 Interview with Owner/Key Site Manager

LFR interviewed Doug Wagner, MLC Project Manager. Information provided by these individuals is presented throughout the report.

6.2 Site Occupants

The Site is currently occupied by a vacant parking lot.

6.3 Interviews with Local Regulatory Agencies

Research conducted at local regulatory offices has been summarized in Sections 4.5. No additional interviews with local regulatory agencies were conducted.

6.4 Interviews with Others

No additional interviews were conducted as part of this assessment.

7.0 FINDINGS/OPINION

This section identifies known or suspect environmental concerns, historical environmental concerns, and *de minimis* conditions obtained during the ESA.

7.1 Known or Suspect Environmental Concerns

The following section 7.2 summarizes known or suspect environmental concerns.

7.2 Historical Recognized Environmental Conditions

This assessment has revealed the following RECs associated with the site:

- According to previous reports, a Phase II ESA was conducted in 2007 that included 16 borings and three test pits. Based on the results of the Phase II testing, approximately 150 cubic yards of arsenic and lead contaminated soil was present on the south side and 150 cubic yards of PAH contaminated soil on the north side that exceeded MDEQ residential and commercial soil standards. During the Phase II ESA, groundwater was not encountered. As a result of the investigation, it was determined that the Site would be classified as a "Facility" under MDEQ regulations (section 20107a of Part 201). No active remediation is currently on-going at the Site and there are no records which indicate that the arsenic/lead and PAH contaminated soil has been removed.
- According to previous reports, the former lead smelting building, the former varnishing/finishing area and former storage room, and a former unknown structure in the northeast portion of the site were not investigated during the Phase II ESA and subsurface investigations.

7.3 De Minimis Conditions

LFR did not identify any *de minimis* environmental conditions at the Site.

8.0 CONCLUSIONS

LFR performed a Phase I ESA in conformance with the scope and limitations of ASTM Practice E 1527-05 of the property located at 6241 Cass Avenue, Detroit, Wayne County, Michigan. Any exceptions to, or deletions from, this practice are described in Section 9 of this report. This assessment has revealed no evidence of a recognized environmental condition (REC) in connection with the Site.

This assessment has revealed the following RECs associated with the Site:

- Based on the results of the Phase II testing, approximately 150 cubic yards of arsenic and lead contaminated soil was present on the south side and 150 cubic yards of PAH contaminated soil on the north side of the Site that exceeded MDEQ residential and commercial soil standards. No active remediation is currently on-going at the Site and there are no records which indicate that the arsenic/lead and PAH contaminated soil has been removed.
- According to previous reports and historical information, the former lead smelting building, the former varnishing/finishing area and former storage room, and a former unknown structure in the northeast portion of the Site were not investigated during the Phase II ESA and subsurface investigations.

9.0 DEVIATIONS/DATA GAPS

LFR did not identify any deviations or data gaps.

10.0 ADDITIONAL SERVICES

No additional services were provided as part of the Phase I ESA.

11.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

We declare that, to the best of our professional knowledge and belief, we meet the definition of environmental professional as defined in §312.10 of 40 C.F.R. 312. We, have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

APPENDIX A

User Questionnaire

LFR ENVIRONMENTAL MANAGEMENT & CONSULTING ENGINEERING

Phase I Environmental Site Assessment Questionnaire

(User Provided Information Questionnaire)

Date: December 14, 2009
Site Name: 6241 Cass Avenue
Site Location: Detroit, MI
Your Name: Douglas Wagner
Your Title: Project Manager
Relationship to Site: ☐ Owner ☐ Occupant ☐ Purchaser X Other

Length of Time Associated with Site: < 1 year

Please review and complete this questionnaire which will assist LFR in completing our site assessment. If sufficient space in not provided, please compete your response on a separate sheet of paper and attach it to this questionnaire.

1. Are you aware of any environmental cleanup liens against the Site that are filed or recorded under federal, tribal, state or local law?

   ☐ Yes **X** No ☐ Unknown ☐ N/A

   If Yes, please explain: _____

   _____

2. Are you aware of any activity or land use limitations, such as engineering controls (for contaminant control), land use restrictions or institutional controls, that are in place at the Site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

   ☐ Yes **X** No ☐ Unknown ☐ N/A

   If Yes, please explain: Not sure, but use of Groundwater restriction may be in place__

   _____

3. Do you have any specialized knowledge or experience related to the Site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

   ☐ Yes **X** No ☐ Unknown ☐ N/A

   If Yes, please explain: Information relative to previous subsurface investigations at the Validation site is available from CRA.

LFR

4. Are you aware of commonly known or reasonably ascertainable information about the Site that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example, as user,

   a) Do you know the past uses of the Site?

   X Yes ☐ No ☐ Unknown ☐ N/A

   If Yes, please explain: Only what is included in the Phase I ESA report prepared by LFR Inc.

   b) Do you know of specific chemicals that are present or once were present at the Site?

   X Yes ☐ No ☐ Unknown ☐ N/A

   If Yes, please explain: Only what is included in the Phase I ESA report prepared by LFR Inc.

   c) Do you know of spills or other chemical releases that have taken place at the Site?

   X Yes ☐ No ☐ Unknown ☐ N/A

   If Yes, please explain: Only what is included in the Phase I ESA report prepared by LFR Inc.

   d) Do you know of any environmental cleanups that have taken place at the Site?

   X Yes ☐ No ☐ Unknown ☐ N/A

   If Yes, please explain: Only what is included in the Phase I ESA report prepared by LFR Inc.

5. Do you know of any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the Site?

   ☐ Yes **X** No ☐ Unknown ☐ N/A

   If Yes, please explain: _____

6. Do you know of any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the Site?

   ☐ Yes **X** No ☐ Unknown ☐ N/A

   If Yes, please explain: Possible Michigan UST program? _____

7. Do you know of any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products at the Site?

☐ Yes **X** No Unknown ☐ N/A

If Yes, please explain: _____

_____

8. Based on your knowledge and experience related to the Site are there any obvious indicators that point to the presence or likely presence of contamination at the Site?

X Yes ☐ No ☐ Unknown ☐ N/A

If Yes, please explain: Only what is included in the Phase I ESA report prepared by LFR Inc.

_____

9. Does the Site's purchase price reasonably reflect the fair market value of the property?

☐ Yes ☐ No **X** Unknown ☐ N/A

If No, do you know the reason for lower purchase price? Is it possible that the lower purchase price is because of contamination known or believed to be present at the Site?

☐ Yes ☐ No ☐ Unknown ☐ N/A

If Yes, please explain: _____

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDRs professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

Sanborn® Library search results
Certification # 0693-459A-B8FE

The Sanborn Library includes more than 1.2 million Sanborn fire insurance maps, which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ☑ Library of Congress
- ☑ University Publications of America
- ☑ EDR Private Collection

Limited Permission To Make Copies

ARCADIS U.S., Inc. (the client) is permitted to make up to THREE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Certified Sanborn® Map Report Enhancements for 2009

The accompanying Certified Sanborn Map Report reflects a number of enhancements that make it easier for you to review these historical maps. EDR has digitally joined together the more than one million fire insurance maps from the Sanborn Library collection so that your target property is centered, making it easier for you to review adjoining properties. Here is a list of the new features:

· Your target property is centered on each map. You can quickly locate your target property and view adjoining properties. Plus, adjoining properties are included more often, reducing your need to refer to additional maps.

· All maps are now displayed at a uniform scale. This makes it easier for you to view changes to the property over time.

· We've increased coverage by adding thousands of new maps from 40 cities for years 1994-2007.

· A new Map Key and Sheet Thumbnails let you reference sheet numbers, year and volume of original Sanborn Map panels used for this report.

For more information about the new enhancements to the Certified Sanborn Map Report, contact your EDR representative at 800-352-0050.

2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

City Directory Report. Three important enhancements have been made to the EDR City Directory Abstract:

1. *Executive Summary.* The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.

2. *Page Images.* Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.

3. *Findings Listed by Location.* Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

Options for Selecting Adjoining Properties. Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

1. *You Select Addresses and EDR Selects Addresses.* Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.

2. *EDR Selects Addresses.* Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.

3. *You Select Addresses.* Use this method for research based solely on the addresses you select or enter into the system.

4. *Hold City Directory Research Option.* If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit www.edrnet.com/2009enhancements

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL---------- National Priority List

EXECUTIVE SUMMARY

Proposed NPL ---------- Proposed National Priority List Sites
NPL LIENS ---------- Federal Superfund Liens

Federal Delisted NPL site list

Delisted NPL ---------- National Priority List Deletions

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 06/30/2009 has revealed that there is 1 CERCLIS site within approximately 0.5 miles of the target property.

METRO PLATING INC	***216 E MILWAUKEE ST***	***NNE 1/4 - 1/2 (0.272 mi.)***	***116***	***110***

Federal CERCLIS NFRAP site List

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 06/23/2009 has revealed that there are 2 CERC-NFRAP sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/30/2009 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 6 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 3 RCRA-CESQG sites within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Quality's' Contaminated Sites List on Diskette With Address.

A review of the SHWS list, as provided by EDR, and dated 08/11/2009 has revealed that there are 4 SHWS sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Quality's Michigan UST database.

A review of the UST list, as provided by EDR, and dated 09/01/2009 has revealed that there are 11 UST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR PROPRIETARY RECORDS

EDR Proprietary Records

EDR Historical Auto Stations: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

A review of the EDR Historical Auto Stations list, as provided by EDR, has revealed that there are 39 EDR Historical Auto Stations sites within approximately 0.25 miles of the target property.

GREAT WESTERN OIL CO OFFICE	3150 W GRAND BLVD	NNW 1/8 - 1/4 (0.242 mi.)	109	105

EDR Historical Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc.

A review of the EDR Historical Cleaners list, as provided by EDR, has revealed that there are 26 EDR Historical Cleaners sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

DETROIT THERMAL LLC (Continued) **1000366958**

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and

GENERAL MOTORS CORPORATION (Continued) **1000213206**

it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No
Off-site waste receiver: Commercial status unknown

Universal Waste Summary:
Waste type: DEVICES CONTAINING ELEMENTAL MERCURY
Accumulated waste on-site: No
Generated waste on-site: No

Waste type: MERCURY THERMOMETERS
Accumulated waste on-site: No
Generated waste on-site: No

Waste type: MERCURY SWITCHES
Accumulated waste on-site: No
Generated waste on-site: No

Waste type: Batteries
Accumulated waste on-site: No
Generated waste on-site: No

Waste type: Lamps
Accumulated waste on-site: No
Generated waste on-site: No

Waste type: Pesticides
Accumulated waste on-site: No
Generated waste on-site: No

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
US EPA TRIS (Toxics Release Inventory System) contains information

GMC CHEVROLET DETROIT ASSEMBLY (Continued) **1000106685**

from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MCI INC (Continued) **1000138214**

TARGETED BROWNSFIELDS ASSESSMENTS

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Site Description: Building was originally constructed & operated by the GMC Fisher Body between 1919 & 1984. Facility operations involved automotive stamping of special disc & tools, dye sets, jigs & fixtures, including prototype & model parts GMC generated halogenated & nongenated spent solvent, spent plating wastes & ignitiable & corrosive wastes from its operatin at this location. It also received & stored hazardous wastes from other GMC plants. Between 1985-1990, the facility was owned & generated by Cameo Color Coat Inc. The property ownership was transferred to CCC n 10/01/90. CCC closed & abandoned the facility sometime in 1994. Currently, the property is in the process of tax revesion to St. of MI. Both, Cameo & Ccarter used the same type of process & generated similar wastes. Automobile parts were cleared & painted using a cathodic electro deposition painting technology. The facility generated hazardous non-hazardous sludges from in process tanks & a wwts.GMC Fisher Body Plating # 21

Environmental Interest/Information System

US EPA Assessment, Cleanup and Redevelopment Exchange System (ACRES) is an federal online database for Brownfields Grantees to electronically submit data directly to EPA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

TARGETED BROWNSFIELDS ASSESSMENTS

CERCLIS (Comprehensive Environmental Response, Compensation, and Liability Information System) is the Superfund database that is used to support management in all phases of the Superfund program. The system contains information on all aspects of hazardous waste sites, including an inventory of sites, planned and actual site activities, and financial information.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 06/29/2009

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Next Scheduled EDR Contact: 01/11/2010
Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs
A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007

SSTS: Section 7 Tracking Systems
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2007

Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007
Date Data Arrived at EDR: 08/26/2009
Date Made Active in Reports: 09/11/2009

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation
Telephone: (800) 823-6277
This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.
Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.
Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300

Most Recent Revision:	1980
North Map:	42083-D1 HIGHLAND PARK, MI
Most Recent Revision:	1983

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

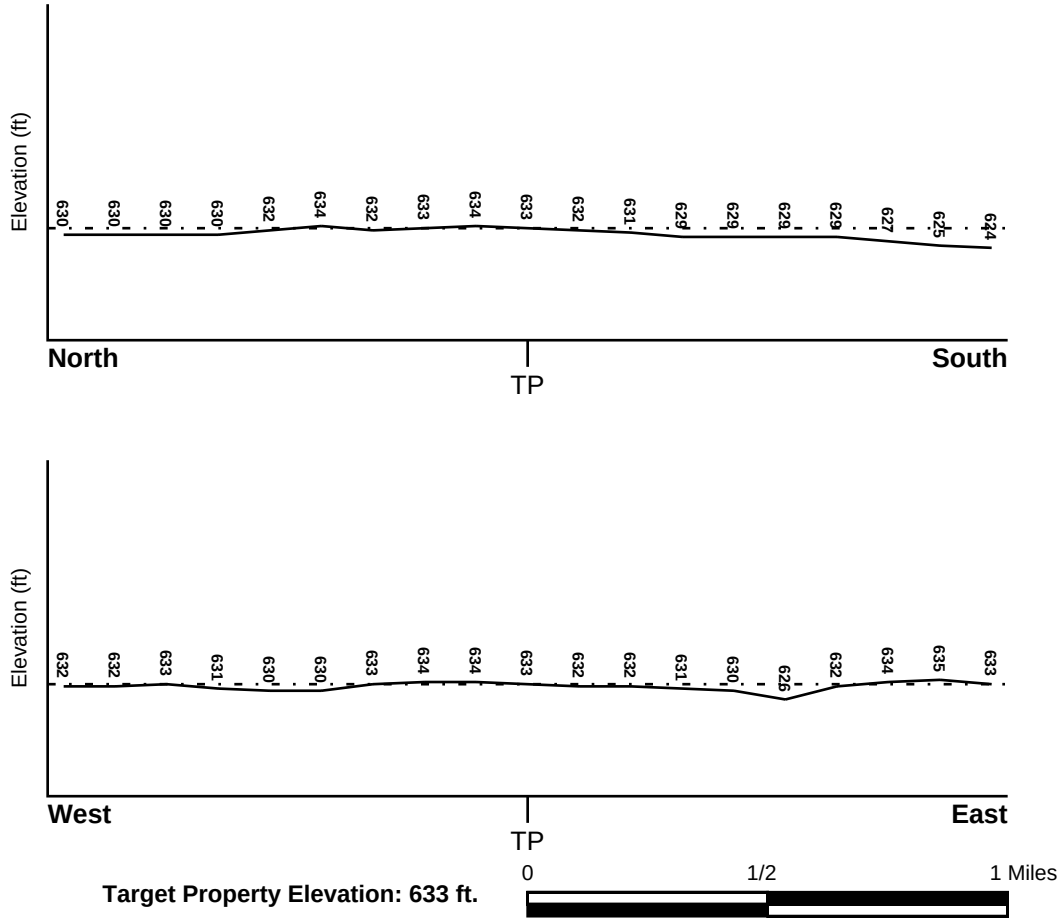
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
WAYNE, MI	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 2602220030B

Additional Panels in search area: 2602220010B

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
DETROIT	Not Available

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
1	1/2 - 1 Mile SSE	Varies
2	1/2 - 1 Mile NE	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Area not mapped

Soil Surface Texture:
Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Telephone: 517-241-2254

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX E

Qualifications of Environmental Professionals

LFR an ARCADIS company

DOUGLAS M. LINDSAY, P.G.

Senior Project Geologist

hydrogeologic investigations
project management
LSP MCP services
soil and groundwater management

Mr. Lindsay has over 12 years of experience involving subsurface and hydrogeologic investigations, contaminated soil and groundwater management, state and federal regulatory compliance, environmental remediation programs, and American Society for Testing and Materials (ASTM) due diligence. Related projects have included the management of extensive state and federal environmental investigations, subsurface soil and groundwater precharacterization programs, asbestos assessments, lead paint screening, radon sampling, and soil, groundwater, and ambient air field screening. Mr. Lindsay has also conducted groundwater elevation surveys, fate and transport modeling, groundwater and surface water sampling, soil sampling, and soil gas sampling.

Mr. Lindsay has supervised and managed numerous projects simultaneously including operation and maintenance (O&M) of groundwater remediation systems, construction project management, contaminated soil and groundwater management, soil vapor extraction systems, dewatering systems, risk assessments, underground storage tank removals, and Massachusetts Contingency Plan (MCP) regulatory reports. Mr. Lindsay is also involved with researching and evaluating environmental liabilities and determining the cost/benefit analysis associated with applicable remedial measures. Mr. Lindsay manages field staff personnel on the completion of multiple projects.

EDUCATION

B.A. Environmental Science, Boston University, 1995

The School for Field Studies, Rainforest Ecology, Belize, Central America

REPRESENTATIVE EXPERIENCE

- **Subsurface Investigation, Soil Management and Regulatory Closure, Worcester, Massachusetts.** LFR was retained by a private developer for the proposed construction of a retail pharmacy on a property formerly occupied by a truck fueling terminal and lumber yard. Mr. Lindsay oversaw the completion of an ASTM Phase I Environmental Site Assessment and Phase II Subsurface Investigation to investigate potential impacts from former gasoline and diesel fuel aboveground and underground storage tanks. A total of 35 soil borings and 6 monitoring wells were completed to evaluate the nature and extent of soil and groundwater contamination. Based on the results of the sampling data, Mr. Lindsay coordinated the removal of 50 cubic yards of petroleum-contaminated soil for off-site recycling. Results of a site-specific risk characterization concluded that a condition of no significant risk existed. Mr.

Lindsay prepared a Class A-2 Response Action Outcome (RAO) in closure report accordance with the MCP.

- **Construction Management, Soil Disposal Coordination and Tank Removal Activities, Kuss Middle School, Fall River, Massachusetts.** LFR was retained by an earthwork contractor to provide construction management activities and soil disposal coordination during excavation activities associated with the construction of a new middle school building. The property was formerly occupied by textile mill buildings and previous soil sampling results identified contaminated urban fill material which required off-site disposal. During soil excavation activities a 1,000-gallon abandoned underground storage tank was discovered. Mr. Lindsay supervised the removal of the tank, arranged for disposal of the tank and associated soil, and prepared a tank closure report in accordance with tank closure guidance and the Massachusetts Contingency Plan. Mr. Lindsay characterized and coordinated the removal of 1,570 tons of urban fill soils to a Massachusetts Unlined Landfill and a soil recycling facility.
- **MCP and US EPA TSCA Site Closure, Hingham Shipyard – East Side Fill Area, Hingham, Massachusetts.** At the request of a private developer, LFR was retained to delineate and remove PCB-contaminated soil from an area proposed for future residential development. Following the submittal of a US EPA-approved Self-Implementing Plan and a MassDEP-approved Release Abatement Measure (RAM) Plan, Mr. Lindsay oversaw a soil precharacterization program designed to select off-site disposal facilities for the PCB soil. Confirmatory soil samples were collected from test pits at 10-foot sampling frequencies to delineate areas of PCBs containing either greater than or less than 50 mg/kg. Discrete soil samples were collected and analyzed for PCBs in the field with a US EPA-conditionally accepted Dexsil L2000 DX screening instrument. In addition, two overburden and two bedrock groundwater monitoring wells were installed and sampled to assess groundwater conditions. Following the removal of 6,910.13 tons of greater than 50 mg/kg PCB soils and 8,240.47 tons of non-hazardous PCB soil, a site-specific risk assessment concluded that remaining PCB concentrations in soil were below the most-stringent residential cleanup criteria. Mr. Lindsay prepared a Completion of Self-Implementing Plan report and a RAM Completion and Class A-2 RAO report.
- **Precharacterization Program, Readville 5 MBTA Yard, Dedham, Massachusetts.** LFR was retained by a developer interested in constructing residential properties on a former 40-acre rail yard. Mr. Lindsay assisted in the development of a soil precharacterization sampling plan in accordance with MassDEP protocol. Mr. Lindsay supervised a total of 250 test pits in GPS-surveyed locations over a two-week period. As part of the management plan, 900 soil samples were field screened in-situ for RCRA 5 metals with an XRF instrument. The depth of fill material was determined at each location and concentrations of arsenic and lead were presented through 3-D visualization software to the client. Construction management and soil remediation alternatives have been presented at public meetings and will be implemented following public and MassDEP comment.
- **Precharacterization Program, JFK School, Waltham, Massachusetts.** Prior to overseeing field activities, Mr. Lindsay prepared a Soil Management Plan, Construction Materials Management Plan, and a worker Health & Safety Plan for construction activities. Following numerous meetings with the client, Mr. Lindsay identified and selected areas to be sampled as part of a large-scale soil characterization program involved with the redevelopment of the JFK Middle School. A total of 25 test pits were excavated in areas proposed for excavation for foundations and subsurface utilities. Soil quantities were calculated and determined to be

either regulated or unregulated materials. In order to meet stringent project deadlines, facility approvals were expedited and materials transported off-site were managed and documented. A total of 4,500 cubic yards of soil was transported to unlined landfills.

- **Underground Storage Tank Closures and Immediate Response Action, Charlestown, Massachusetts.** Prior assessments performed by LFR had identified the potential for historic USTs at a former rubber manufacturing facility. Since the facility was proposed for residential development, Mr. Lindsay supervised the completion of a supplemental subsurface investigation. Following the identification of two 'benzol' USTs through a GPR survey, a closure strategy was implemented to meet client and MassDEP expedited deadlines. Following MassDEP approvals, an immediate response action was undertaken in response to petroleum contamination in the vicinity of the USTs. Mr. Lindsay oversaw the removal and disposal of the USTs and contaminated soil and groundwater in accordance with the MCP. Mr. Lindsay prepared a response action outcome closure report for site closure in accordance with the MCP.
- **Precharacterization Programs, Logan International Airport, East Boston, Massachusetts.** Mr. Lindsay oversaw four separate soil and groundwater precharacterization programs associated with the redevelopment of the Terminal A area. Activities included supervising the advancement of 80 soil borings and test pits, the installation of monitoring wells, and the collection of 200 soil and groundwater samples. Laboratory analysis results were utilized to characterize the soils and select the most appropriate, cost-effective disposal facilities for the soils. Mr. Lindsay was also responsible for managing field staff and prepared comprehensive reports documenting the findings of the investigations. A total of 270,000 tons of soil was characterized, removed, and transported to 23 Massport and MassDEP-approved facilities. Detailed coordination with the client, subcontractors, and state officials was necessary to complete the project in an organized and timely manner. Additional responsibilities included spill management, health and safety oversight, air sampling, and the operation of temporary groundwater treatment systems for isolated jet-A fuel-impacted areas.
- **Soil Disposal Management/Subcontractor Coordination, Former Mystic Station Power Generating Facility, Everett, Massachusetts.** A total of 60,000 tons of No. 6 oil-contaminated soil and 30,000 tons of urban fill material was excavated and removed from the facility throughout the project's demolition phase. Activities included coordination with seven asphalt batching facilities, two landfills, and several transportation companies. Mr. Lindsay also assisted in the pre-characterization of excavated soil to determine proper off-site disposal alternatives. Continuous management of soil volumes and contractor invoices was necessary to expedite the soil removal process and reduce delays to the project.
- **Tidal Study, Former Mystic Station Power Generating Facility, Everett, Massachusetts.** Mr. Lindsay completed a study involving the effect of tidal fluctuation on groundwater elevation in the vicinity of a large soil excavation and two one-million-gallon bulk fuel oil tanks. The tidal data and its effect on groundwater elevation were used to assess the stability of the supporting matrix beneath the bulk oil tanks. The data assisted in the determination of the type of engineering needed to protect the structural integrity of the fuel oil tanks during planned soil excavation located adjacent to the tanks. By including the tidal fluctuation data, excavation in the immediate vicinity of the tanks was conducted without jeopardizing the tanks or causing delays to the project.

- **Multiphase Investigation, Stoughton, Massachusetts.** In order to bring the property into compliance with the MassDEP, Mr. Lindsay completed an MCP Phase I and Tier Classification to address eight areas of concern. Each area of concern was associated with a release of petroleum compounds and lead from the former use of the Site as an asphalt batching facility. Existing soil and groundwater analysis data, soil removal quantities, and previous RAM Plans completed by others were used to delineate the existing areas of contamination and propose remedial alternatives. The primary sources of subsurface impacts were attributed to asphalt fill material, liquid asphalt tanks, buried drums, and a dry well. The property was classified as a Tier II disposal site and response actions were completed under a new RAM Plan which included oxygenate injections, petroleum-contaminated soil removal, and natural attenuation monitoring. A partial RAO closure report was prepared for seven of the eight areas of concern and natural attenuation monitoring of one area is ongoing.
- **PCB Release Abatement, Former Edgar Station, Weymouth, Massachusetts.** Mr. Lindsay delineated the extent and distribution of high concentrations of PCBs impacted soil and groundwater beneath several former transformers at the facility. In accordance with US EPA TSCA regulations, activities included on-site, quantitative PCB field screening of soil, groundwater, and surface wipe samples, supervision of soil excavation, and management of soil transportation to select soil disposal facilities. Several thousand tons of PCB-impacted soil was removed, risk to on-site workers was eliminated, and future project demolition milestones were completed on schedule.
- **Multiphase Investigation and Remedial Operation Status, Sharon, Massachusetts.** Mr. Lindsay conducted a Phase I and a Phase II Comprehensive Site Assessment at a former manufacturing facility. Activities included the calculation of groundwater flow and determining the extent and distribution of chlorinated solvents in groundwater. Mr. Lindsay assisted in source area location, fate and transport – mass flux calculations, and risk assessment. As part of a Phase III study, remedial alternatives were proposed to comply with stringent drinking water standards applicable to the property. Because natural attenuation and monitoring were determined to be the most cost-effective alternatives, a Phase IV Remedy Implementation Plan and Phase V Remedial Operation Status were prepared and submitted to the MassDEP. Semi-annual groundwater monitoring and status reports are generated for client and MassDEP review.
- **Multiphase Investigation, Stoughton, Massachusetts.** Mr. Lindsay completed a Phase I Site Assessment at a former trucking facility. Activities included the review of prior U.S. Environmental Protection Agency (U.S. EPA) CERCLA investigations, identification of an underground storage tank, and completion of a Tier Classification for the property. A Phase II Comprehensive Site Assessment completed by Mr. Lindsay included the installation of several soil borings and monitoring wells and removal of an underground storage tank and impacted soil in order to delineate subsurface impacts. A Method 3 risk characterization was completed utilizing all existing site data and an RAO closure report was completed.
- **RAOs and Activity and Use Limitations (AULs), Cambridge, Massachusetts.** Several subsurface investigations designed to delineate the extent of urban fill material were supervised by Mr. Lindsay on six parcels of industrial land in Cambridge. At each parcel, site-specific risk characterizations followed by the preparation of separate Activity and Use Limitations restrictive of current and future site uses were completed in order to effectively 'close' the parcels under the MCP.

- **Phase I and Phase II Environmental Investigations, Mesa, Arizona.** Mr. Lindsay completed Phase I and Phase II environmental investigations at a dry cleaning facility and oversaw several Geoprobe borings. Based on soil sampling results, a risk characterization was conducted in order to bring the property into compliance with State of Arizona regulations.
- **Corrective Action Plan and Underground Storage Tank Removal, Alexandria, Virginia.** Mr. Lindsay monitored and maintained a groundwater petroleum extraction system for two years at an active trucking facility. After supervising the dismantling of the groundwater extraction system, over 900 tons of petroleum-contaminated soil was removed and the property was closed in accordance with Virginia regulations.

asbestos management
industrial hygiene
environmental investigations
environmental site assessments

As Director of Site Assessments at LFR Inc. (LFR) Braintree, Massachusetts office, Mr. McCarthy is responsible for the technical supervision of all personnel performing Phase I Environmental Site Assessments (ESAs). His responsibilities include technical oversight, logistics, scheduling and cost control, interface with clients and regulatory agencies, quality control of environmental assessments conducted within the branch and conducting Phase I ESAs throughout the United States.

With over 20 years of experience in the environmental consulting field, Mr. McCarthy has provided his technical expertise on a wide-range of projects for property owners, financial institutions, school departments, governmental agencies and hospitals. Mr. McCarthy has conducted environmental assessments on commercial/retail, residential and industrial properties in accordance with the American Society for Testing and Materials (ASTM) standard practice for Environmental Site Assessments E 1527 and client specific scopes of work. In addition, Mr. McCarthy has conducted asbestos identification surveys, prepared Operations and Maintenance programs, developed asbestos abatement technical specifications, monitored removal of asbestos-containing materials, performed indoor air quality investigations, managed the removal of underground petroleum storage tanks and prepared Spill Prevention, Control and Countermeasure (SPCC) plans.

EDUCATION

B.A. History, Providence College, 1986

REPRESENTATIVE EXPERIENCE

- **Various Properties (Client Confidential), Nationwide**. As Project Manager, Mr. McCarthy was responsible for the overall project management of multi-site/multi-state environmental assessment projects. These projects ranged in size from a single site up to 36 different sites located across the United States. Mr. McCarthy was responsible for project scheduling, cost control, technical oversight and review of all final reports prior to issuance to ensure they complied with ASTM standards and client specific requirements.
- **NationsBank, Dallas, TX.** As Project Manager, Mr. McCarthy was responsible for the overall project management of the performance of 50 Phase I ESAs of bank buildings located throughout the State of Texas within a six-week time frame. The ESAs consisted of inspections of current site operations and a reconnaissance of abutting/adjacent properties, historical research and review of federal, state and local regulatory records.
- **NationsBank, Corsicana, TX.** Performed a Phase I ESAs on three tracts of land in downtown Corsicana, TX. Project involved a detailed historical research on former uses of the tracts of

land revealed numerous suspect underground storage tank (UST) locations. Designed and coordinated performance of a geophysical survey on the three tracts of land to identify the likely presence of USTs to aid in the preparation of the scope of work for a Phase II subsurface investigation. The geophysical survey consisted of the use of a combination of electromagnetic induction (EM31) and ground magnetics. Based upon the findings of the geophysical survey, prepared a scope of work and cost estimates for the performance of the subsurface investigation.

- **NCNB Texas National Bank, Dallas, TX.** Provided asbestos identification surveys on 110 buildings containing over 8 million square feet of space located throughout the state of Texas. Responsibilities consisted of design of the survey strategy, on-site inspection and collection of bulk material samples, assessment of asbestos-containing materials, interpretation of data and preparation of final reports. Project included preparation of recommendations for further action at each facility, if warranted, and associated cost estimates.
- **First Republic Bank, Dallas, TX.** Managed a $2 million dollar asbestos abatement project at an occupied high rise office building. Responsibilities included project design, specification preparation, conducting pre-bid conferences, collection and analysis of air samples, daily inspections of abatement contractor's work practices and consultation with owner's representative on all aspects of the abatement project.
- **First Republic Bank, Dallas, TX.** Performed an asbestos-containing material survey of the 50-story, 1.8 million square foot, First Republic Bank complex in Dallas, Texas. Responsibilities consisted of design of the survey strategy, overall management of the five person survey team, on-site inspection and collection of bulk material samples, assessment of asbestos-containing materials, interpretation of data and preparation of a final report.
- **NationsBank, Dallas, TX.** Coordinated the emergency removal of four underground storage tanks, which were uncovered during construction of a highly publicized branch bank facility. Successfully coordinated with state regulatory officials and a tank removal contractor for the removal of the USTs within 48 hours of detection so as to not impede bank construction. Performed project oversight which included preparation of a health and safety plan, collection of appropriate soil samples from the tank excavation, interpretation of analytical data and preparation of the tank closure report for submission to state regulatory officials.
- **Spill Prevention Control and Countermeasures (SPCC) Plans, NYNEX, various locations throughout New England**. Performed facility inspections and prepared SPCC plans in compliance with regulations of the Environmental Protection Agency (EPA) for various NYNEX facilities located throughout New England.
