Reference No. 017303

Mr. Luther Blackburn
YCUA Industrial Pretreatment Program Supervisor
Ypsilanti Community Utilities Authority
2777 State Road
Ypsilanti, Michigan 48198-9112

Dear Mr. Blackburn:

Re: April 2013 Discharge Permit
Industrial User Permit #RA 12-15
RACER Trust
Company Vehicle Operations Area (CVO)
2901 Tyler Road
Ypsilanti, Michigan

Pursuant to requirements of Industrial User Permit #RA 12-15 (Permit) Appendix A, the permittee is required to submit a monthly discharge summary by the 5th of every month for the previous calendar month. CRA has prepared this discharge summary for April 2013 on behalf of Revitalizing Auto Communities Environmental Response (RACER) Trust for Willow Run Company Vehicle Operations Area (CVO), located in Ypsilanti, Michigan (Site).

During the month of April 2013, the total volume of treated water discharged to Outfall 01 was 14,212 gallons. The water was treated with sodium permanganate and was discharged on April 25, 2013, as previously discussed with YCUA representatives and as indicated below.

Date	Flow Totalizer Readings (Gallons)		Total Volume Discharge (Gallons)
	Initial	Final	
04/25/2013	522717*	536,929	14,212

* The flow totalizer was previously used at a different site and has been used to treat into totes (without discharge) at the Site. This initial reading does not represent only historic discharges to Outfall 001.

The semi-annual (January – June 2013) and quarterly (April – June 2013) self monitoring reports will be submitted prior to July 20, 2013 as outlined in Appendix A of the industrial permit.
