Mr. Ben Hall
Michigan Department of Natural Resources
Region 3 Headquarters
P.O. Box 30028
Lansing, MI 48909

Dear Mr. Hall:

Thank you for the opportunity to meet with you on September 21, 1989 to discuss the Linden Road Landfill. Per our agreement, I am writing to inform you of our plans for further investigation of the site.

At this time we have contracted with Roy F. Weston, Inc. to perform a Phase I investigation. The investigation will include a records search to determine what wastes may have been disposed of at the site, a review of historical aerial photographs and topographic maps, a review of all existing groundwater monitoring data and boring logs for the site, and an aerial and ground survey of the site to identify those areas showing surface contamination or unusual topography.

A report summarizing all existing information, including a contour map of the site showing pertinent surface features, will be submitted to AC Rochester by February 1, 1990. The report will include recommendations for additional field work, (borings, wells, geophysical measurements, etc.), as well as an evaluation of the suitability of the existing wells for future groundwater monitoring. A copy of this report will be submitted to your office.

Based on the recommendations from this report, we anticipate beginning the additional field investigation work in the spring of 1990.

I'll be your primary AC Rochester contact for the Linden Road Site. If you have any questions, please call me at (716) 647-4766.

Sincerely,

Richard C. Eisenman
Senior Environmental Engineer
Divisional Environmental
Activities
