**RE: Significant Industrial User – Annual Inspection/Evaluation**  
RACER- Company Vehicle Operations (CVO)- Permit #RA12-15  
2901 Tyler Road, Ypsilanti, Michigan 48198

Dear Ms. Landale:

Enclosed please find a copy of our report on the annual compliance inspection/evaluation conducted on October 9, 2014 at the above referenced facility. The Ypsilanti Community Utilities Authority appreciates the time you spent with us to inspect and evaluate your facility.

The Authority is in receipt of your facility's letter report dated September 25, 2014 titled "Final Quarterly Self-Monitoring Report/Formal Permit Cancellation Request". This report notes that the facility has ceased discharge of wastewater and that no wastewater was discharged to YCUA collection system from January through September 2014. Furthermore the report indicates that interim remedial actions have resulted in discontinuation of groundwater extraction, treatment and disposal and hence requests for the termination of the referenced industrial user permit. Based on your report and the findings of the recent annual industrial user inspection, the YCUA Director of Wastewater Operations/Compliance is recommended to accept your request for termination of the industrial user permit. Upon determination and termination of the permit by YCUA Director of Wastewater Operations/Compliance, the monthly billing of IPP funding charge will also be terminated. In the event of future necessity for disposal of treated groundwater to YCUA Collection system, please note the recommendations/required actions outlined in Section I of the enclosed report. Should there be any questions, please contact my office by phone at 734-484-4600 ext. 123 or by email at [smullapudi@ycua.org](mailto:smullapudi@ycua.org).

Sincerely,

Sree Mullapudi, P.E.  
Compliance Supervisor
