------	--------	------------------

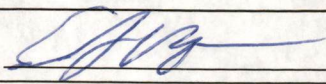

Facility/Site Name Linden Road Landfill	County Genesee	Facility/Site Number
Address Linden Road	City/Township Flint	Staff Van Riper
Participants/Contacts		

REMARKS: MEETING w/ GM (Bob Mercat & Ed Peterson), Weston (BADO) and MYSELF to discuss the July 19, 1996 letter from Al Howard and GM's draft response. The following items were agreed upon (tentatively pending further review by MDER):

comment #1A - A proposal will be formulated to conduct geoprobe borings Also 2 damaged wells will be drilled at proposed locations. A proposal will be submitted for MDER review. within the interior of the landfill for groundwater quality data. Borings will be placed where access can be obtained. It was recommended that one geoprobe boring be conducted between MW3 and P2-2 since GM does not feel that a damaged well is necessary in this direction. (See below).

comment #1B - GM contends that no waste material extends off site to the north or south or east. They have review aerial photos and the borings indicate no waste off site. The material on the boring logs identified as fill is allegedly not waste material. GM will further elaborate this in their response.

comment #1C - GM contends methane was already evaluated. They also indicate that no structures in which methane may trap will be constructed.

Signature  Date 8/9/96

Facility/Site Name <i>Lindero ROAD LANDFILL</i>	County <i>Greene</i>	Date <i>8-8-96</i>	Time on Activity
Address <i>Lindero ROAD</i>	City/Township <i>FRUIT</i>	Facility/Site Number	Staff <i>VAN Riper</i>
Participants/Contacts			

REMARKS:

comment #1-d - GM will conduct an assessment of the drain. This will be addressed in a response letter.

comment #1-e - GM indicated that the 40 feet excavation was determined to be incorrect. Soil borings conducted at the site have not shown any type of excavation extending 40 feet deep.

comment #2 - GM will propose a Limited Recreational use RAP. Details will be provided in the design phase of the project, however, the RAP will address the site for Recreational use.

comment #3 - A zoning map will be provided.

comment #4 - The chart provided in GM's draft response seems appropriate.

comment #5 - GM will provide a response on how the soil cover will be protective of the public health and environment. It was recommended that GM first evaluate water quality w/in the interior of the landfill prior to evaluating which type of cover is applicable.

REMARKS:

comment #6 - GM's draft response appears adequate

comment #7(a) -

comment #7(b) - GM will provide the outline of the groundwater monitoring plan in an addendum to the RAP. Length of monitoring, parameters, and frequency will be dependent on additional RI work.

comment #7(c,d) - GM's draft response appears adequate.

GM's comments to Linda Longo will be provided to her for review.

GM will provide a final response to MDEQ's letter by 8-16-96. MDEQ will review letter and provide written approval (response). Upon completion of additional RI work, an addendum to the RAP will be prepared addressing MDEQ comments.

* The RAP addendum will also address fencing/access restrictions to the site. Object is to control access once complete with construction, not restrict access.
