

October 15, 2010

Mr. Richard Conforti

Environmental Engineer
Waste and Hazardous Materials Division
Dept of Natural Resources and Environment
PO Box 30241
Lansing, MI 48909-7741

Subject: *Quarterly Status Report – July - September 2010
Coldwater Road Landfill
1245 East Coldwater Road, Flint, MI
MID 005 356 860 / Consent Order No. 64-05-92*

Dear Mr. Conforti:

In accordance with requirements of the above referenced Consent Order, we are providing you with this Quarterly Status Report for the third quarter 2010. Monthly Status Reports were replaced with Quarterly Status Reports, as approved in your e-mail dated February 22, 2010.

1. Work Completed This Reporting Period

- » Dewatering of the leak detection vaults occurred on July 28, 2010, July 29, 2010, August 18, 2010, and September 24, 2010.
- » Reconfiguration of the dewatering system occurred during the quarter to allow dewatering of the vaults directly into a holding tank (rather than pumping from them into their corresponding sumps) that is transported and emptied into the accumulation tank. This separates the vault water from the sump water until they are combined in the accumulation tank.
- » A letter was submitted to the MDNRE on August 2, 2010 to respond to their July 9, 2010 comment letter concerning their June 2010 site inspection.
- » A section of the perimeter fence was repaired on August 5, 2010.
- » Site-specific RCRA training was conducted on August 17, 2010 for site personnel.
- » A Sanitary Sewer Use Permit Application was submitted to the City of Flint on August 25, 2010.
- » The 2010 semi-annual groundwater monitoring and leak detection system reports were submitted to MDNRE on August 26, 2010.
- » Discharge of accumulated liquids from leachate tank occurred on August 30, 2010.
- » Attempts to clear the blocked storm sewer at the northwest corner of site occurred on August 30, 2010 and September 9, 2010.
- » The third quarter 2010 site inspection occurred on September 14, 2010.

2. Summaries of Findings

- » During landfill cap inspections, a number of trees and shrubs were removed and 3 animal burrows were located during the quarter.
- » The storm sewer blockage was due to tree root encroachment. Approximately 305 ft of the storm sewer line was cleared this quarter. A manhole will need to be installed downstream before the main sewer to properly clear the remaining line.

3. Summaries of Changes

» None.

4. Summaries of all Contact with Local Community

» None.

5. Summaries of all Problems

» None.

6. Actions Being Taken to Rectify Problems

» None.

7. Changes in Personnel

» None.

8. Projected Work

- » Dewatering of the leak detection vaults is scheduled for October 19, 2010, November 17, 2010, and December 15, 2010.
- » Sampling and discharge of accumulated liquids will be conducted as needed.
- » Installation of storm sewer manhole will be conducted within the next quarter, once a contractor can be scheduled to perform the work.
- » Semi-annual monitoring well and leak detection system sampling is scheduled for November 8, 2010.
- » Landfill cap inspection with the Department of Natural Resources and Environment (DNRE) is scheduled for October 20, 2010.

9. Reports/Data

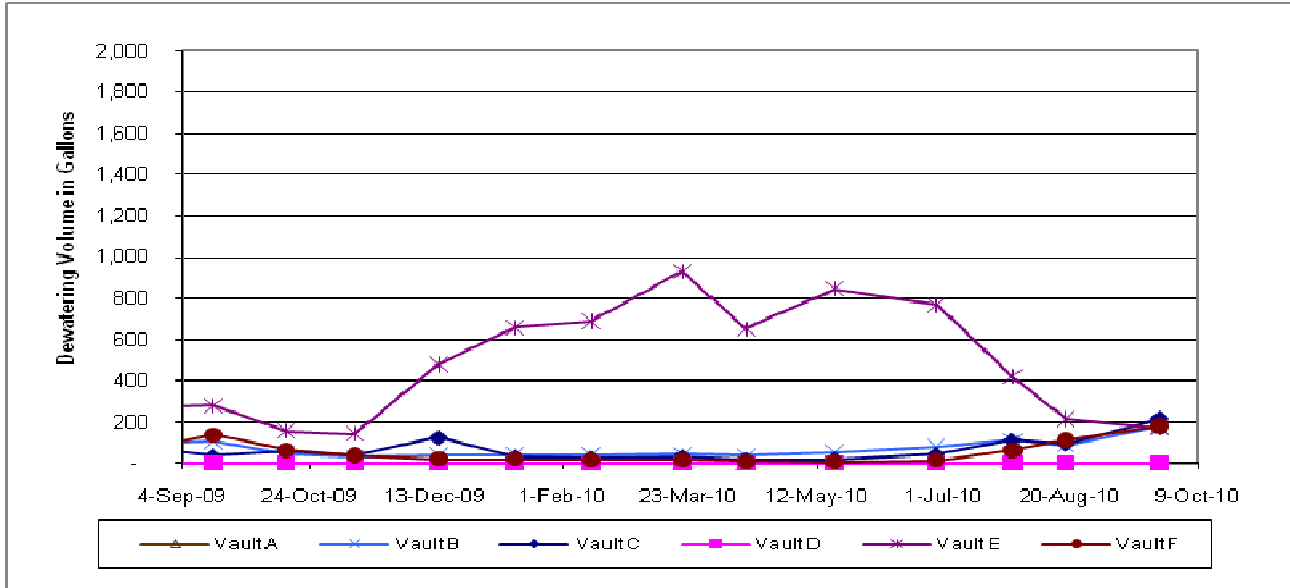

- » Leak detection Vaults A, B, C, D, E and F were pumped on July 28, 2010, July 29, 2010, August 18, 2010, and September 24, 2010.

The following table presents the vault dewatering data for the second quarter:

DATE 2010	GALLONS LEAK DET A	GALLONS LEAK DET B	GALLONS LEAK DET C	GALLONS LEAK DET D	GALLONS LEAK DET E	GALLONS LEAK DET F	TOTAL LEAK GALLONS
28/29-July-10	-	111	111	-	421	64	707
18-Aug-10	-	89	94	-	216	113	512
24-Sept-10	-	180	217	-	170	182	749
TOTAL	-	380	422	-	807	359	1,968

Total volume of water removed from the vaults during the second quarter was 1,968 gallons. According to the master flow meter, a total of 1,212 gallons were pumped from the sumps during the second quarter.

The following graph presents the vault dewatering data in graphical format for the past year:
