Mr. David Favero  
Motors Liquidation Company  
Favero Geo Sciences  
1210 South 5<sup>th</sup> Street  
Springfield, Illinois 62703-2316

Dear Mr. Favero:

SUBJECT: Linden Road Landfill Quarterly Groundwater Sampling Monitoring Results,  
Flint, Genesee County, Michigan

The Michigan Department of Natural Resources and Environment (DNRE) has completed review of the subject document dated July 22, 2010, and submitted on your behalf by O'Brien & Gere Engineers, Inc.

The DNRE has the following questions in regard to the request to sample groundwater at the site semi annually:

How was the target concentration of 5 ug/l of vinyl chloride in MW-03S determined? Unrestricted use of groundwater criteria for vinyl chloride is 2 ug/l.

Why request a change from quarterly sampling at this point? It would appear that one additional summer sampling event, should it not show a marked increase in vinyl chloride at MW-03S and continue to show the other monitoring wells below criteria, would possibly meet the requirements of the November 2008 letter, allowing Motors Liquidation Company to request no further groundwater monitoring at the site.

Please feel free to contact me at 517-335-6241; innesj@michigan.gov; or at DNRE, P.O. Box 30242, Lansing, Michigan, 48909.

Sincerely,

James E. Innes  
Lansing District Office  
Remediation Division
