**Part 201 Rule 716(14) Notice of Groundwater Venting to Surface Water
Delphi Former Plant 2, Saginaw, Michigan**

Dear Ms. Klann:

On behalf of Delphi Saginaw Steering Systems (Delphi), MACTEC Engineering and Consulting, Inc. (MACTEC) is submitting this notice pursuant to Rule 714(14)(a) of Part 201 of the Natural Resources and Environmental Protection Act (NREPA) 1994, as amended (PA 451). Recent groundwater analytical data indicates that there are exceedances of Groundwater/Surface Water Interface (GSI) criteria based on acute toxicity in GSI monitoring wells on the adjacent downgradient property owned by REALM, Inc.

Delphi and REALM have been investigating the nature and extent of volatile organic compounds (VOCs) in groundwater beneath the southern half of the Delphi property and the northern half of the adjacent REALM Peninsula Area property. Specifically, we are attempting to evaluate the source of hazardous substances in groundwater that is apparently discharging to the REALM wetland area, which is adjacent to (west of) REALM's Peninsula Area property (Figure 1, enclosed). In response to data collected by Delphi and REALM, Inc. during August and September 2004, Delphi installed additional onsite groundwater monitoring wells in December 2004 and collected groundwater samples from the new wells and other onsite and offsite wells. The samples were submitted to Merit Laboratories of East Lansing, Michigan for VOCs analyses.

The onsite monitoring wells that are closest to the wetland area are MW-04-11, MW-200S, MW-200D, MW-201S, and MW-201D. The offsite REALM Peninsula Area wells that are closest to the wetland area are TW98-111WT, MW98-111S1, MW04-122WT, MW04-122S1, MW04-118WT, MW04-118S1, MW04-123WT, and MW04-123S1. In addition, there are three wells installed on the offsite REALM wetland area property: MW-129WT, MW04-124WT, and MW04-123S1. These wells were not installed with the intent to serve as GSI monitoring points for the Delphi property, but nonetheless, we are comparing the groundwater data from these wells against the GSI criteria and Final

Page 2

Acute Values (FAVs) for the purpose of this notification letter. After further investigation and evaluation, potentially more appropriate or alternative GSI monitoring locations may be determined.

After initial evaluation of the December analytical and groundwater-level data, Delphi has likely contributed to the VOCs detected in groundwater beneath the northern half of the REALM property. Figure 1 shows the monitoring locations, the compounds detected in groundwater, and the estimated groundwater flow directions. FAVs were calculated, and the groundwater analytical data were compared to generic GSI criteria and FAVs (Tables 1 and 2, enclosed). FAVs were not exceeded in those onsite monitoring wells listed above. The offsite monitoring wells listed above that exceed FAVs are as follows:

- MW04-122S1 for ethylbenzene at 400 µg/l (FAV is 320 µg/l) and p,m-xylene at 700 µg/l (FAV is 630 µg/l)
- MW04-123WT for vinyl chloride at 30,600 µg/l (FAV is 17,000 µg/l)
- MW98-111S1 for ethylbenzene at 1,860 µg/l; o-xylene at 1,460 µg/l (FAV is 630 µg/l); p,m-xylene at 4,290 µg/l; and 1,2,4-trimethylbenzene at 510 µg/l (FAV is 310 µg/l)

In accordance with Rule 716(14)(b), Delphi, in cooperation with REALM, is immediately assessing remediation alternatives for mitigating or preventing these FAV exceedances. We will continue to coordinate and cooperate with the MDEQ and REALM to address the exceedances of GSI criteria based on acute toxicity. Within 60 days, Delphi will submit a plan for further investigation of the nature, extent, and source of the contamination and our response plan and schedule to address FAV discharges to the wetland area. Delphi and MACTEC are currently preparing a summary report of the recent groundwater monitoring activities. This report will be submitted to you in February 2005.

Ms. Rhonda Klann

**Notice of Migration of Contamination
Delphi Former Plant 2, Saginaw, Michigan**

Dear Ms. Klann:

Delphi Saginaw Steering Systems (Delphi) has enclosed with this letter a Notice of Migration of Contamination (EQP4482) for Delphi's Former Plant 2 located in Saginaw, Michigan (site) to ensure compliance with MDEQ's requirements (R 299.5522) regarding such notification.

During December 2004, Delphi conducted additional site investigation to evaluate the nature and extent of potential contaminants in site groundwater. This additional site investigation included the installation of new monitoring wells and an additional round of groundwater levels and sampling from selected monitoring wells and piezometers within the southern half of the site and on the offsite Remediation and Liability Management Company, Inc. (REALM) Peninsula and wetland area properties. MACTEC received the final analytical data package from Merit Laboratories, Inc. of East Lansing, Michigan to MACTEC Engineering and Consulting, Inc. (MACTEC) on January 17, 2005. On behalf of Delphi, MACTEC evaluated this data set along with Delphi data collected in August 2004 and REALM data that was recently submitted to Delphi.

At this time, Delphi has reason to believe that hazardous substances are likely to have migrated beyond the southern site property boundary. Specifically, analytical results indicate that several volatile organic compounds may be migrating offsite in groundwater from Delphi's Plant 2 property onto adjacent REALM (former General Motors [GM] Saginaw Malleable Iron Plant) property.

Ms. Rhonda Klann

NOTICE OF MIGRATION OF CONTAMINATION

(Under the authority of Part 201, Natural Resources and Environmental Protection Act, 1994 Act 451, as amended, (NREPA) and the Rules promulgated thereunder)

An owner or operator of property that is a facility, and/or who is subject to MCL 324.20114, and who has reason to believe that a hazardous substance is emanating from, has emanated from, or is likely to be emanating from the property and migrating beyond the boundaries of the property that he or she owns or operates is required under R 299.5522 and R 299.51017(1) to notify the Michigan Department of Environmental Quality ("DEQ") and affected property owners, unless he or she is exempt from MCL 324.20107a (see MCL 324.20107a(4) for exemptions), or unless he or she has provided the notice required by MCL 324.21309a. Submission of this notice does not fulfill the notification requirements of MCL 324.21309a.

The notice must be provided within 45 days after the owner or operator has reason to believe that hazardous substances have migrated, or are likely to have migrated, to or beyond the boundary of his or her property (see R 299.51017 and R 299.5522 for exceptions). If a person is required to provide additional notice as a result of the changes in R 299.51017 that took effect on December 21, 2002, then that additional notice shall be provided not later than September 21, 2003.

Use of this form is mandatory for the notice required by R 299.51017(1) and may also be used by parties subject to MCL 324.20114 to provide notice required by R 299.5522. This form may also be used to provide notice to affected property owners as required by those rules.

If a person holds a permit for an oil and gas well under Part 615, Supervisor of Wells, of the NREPA and there is a release from the oil and gas exploration or production activities, that person shall give notice to the DEQ and to the owner of the surface rights of the property.

If a person holds an easement and there is a release from the easement holder's activities, that person shall provide notice to the DEQ and to the grantor of the easement, or the grantor's successor in interest, if any.

Completing this notice in no way relieves a person who is subject to MCL 324.20114 from the responsibility to undertake required response activities.

This notice must be sent to the DEQ office that serves the county in which the property is located. A list of DEQ offices is available at www.michigan.gov/bea, or by calling the Remediation and Redevelopment's Lansing office at 517-373-9837. The DEQ will not prepare acknowledgement of receipt of these notices. The sender is responsible for sending the report using a method that provides proof of delivery if such proof is desired. Please label the outside of the envelope "Migration Notice." Additional guidelines for the compliance with the requirements of R 200.51017(1) or R 299.5522 are available at www.michigan.gov/bea.

THIS NOTICE IS PROVIDED PURSUANT TO:
(check both, if applicable)

R 299.5522

R 299.51017

Please provide the following information as completely as possible.

1. Name and location of the property that hazardous substances are emanating from:

Name: Delphi Saginaw Steering Systems
Address: 1400 Holmes Street
Location: Former Plant 2
City/County: Saginaw/Saginaw
Property Tax Identification Number, or if applicable, the ward and item number: Parcel # 19 2233
00000 and #19 1594 00000

2. Status relative to the property:
(Check one or both, as applicable.)

Owner
Operator

Provide any additional ID numbers associated with the property (e.g., EPA ID No., BEA No., Part 213 facility ID No., etc.): **EPA ID - MID 990 760 282**

3. Name, address, and telephone number of the property owner, operator, or other party submitting the notice:

Name: **Mr. Dale Thrush**
Address: **3900 Holland Road, M/C 486-390-000 WWTP**
City/State: **Saginaw, Michigan 48601-9494**
Telephone number: **(989) 757-4679**

4. Name, address and telephone number of a contact person familiar with the content of the notice:

Name: **Mr. Dale Thrush**
Address: **3900 Holland Road, M/C 486-390-000 WWTP**
City/State: **Saginaw, Michigan 48601-9494**
Telephone: **(989) 757-4679**

5. If this Notice is provided pursuant to R 299.51017, provide the address and other location information for the *adjacent* property(s) onto which contamination is migrating, has migrated, or is likely to migrate. If this Notice is provided pursuant to R 299.5522, provide the address and other location information for *each* property onto which contamination has migrated. Notice should be sent to the property owner of record. If the impacted property is owned by the State of Michigan, notice should be sent to the department managing the property (i.e. a prison, state park, etc.). Notices to the Michigan Department of Transportation (MDOT) for state owned roadways should be sent to Ms. Heather Hicks, MDOT-Bureau of Transportation Planning, 425 W. Ottawa Street, P.O. Box 30050, Lansing, MI 48989. If it isn't readily apparent what state department manages the property, notices should be sent to Mr. Thomas Saxton, Tenant and Land Services, Department of Management and Budget, 1st Floor Lewis-Cass Building, P.O. Box 30026, Lansing, MI 48909.

Address: **Pontiac Centerpoint Campus - Central
2000 Centerpoint Parkway, M/C: 483-520-190**

Notified? No Yes Date: **1/27/05**

City/State: **Pontiac, MI 48341-3147**

Property Tax ID number: **Parcel#:19 2258 00000 and
#19 2249 00000**

Other: Owner: **REALM, Inc.** Property addresses:
3305 Gabriel Rd and 77 W. Center St.

Address: **[REDACTED]**

Notified? No Yes Date: **[REDACTED]**

City/State: **[REDACTED]**

Property Tax ID number: **[REDACTED]**

Property Tax ID number: **[REDACTED]**

Other: **[REDACTED]**

(Attach additional pages as needed)

6. Complete the Table on Page 3 of this Form for each hazardous substance which has migrated, or is likely to have migrated, beyond the property boundary at a concentration that exceeds a Generic Residential Cleanup Criterion developed by the DEQ pursuant to MCL 324.20120a(1). Complete and attach additional copies of Page 3, if necessary, to list all hazardous substances that must be reported. Include a scaled map or drawing that shows the location of sampling points identified on the Table on Page 3, the property boundaries, and the adjacent property owners if providing notice pursuant to R 299.1017(1) or all impacted property owners if providing notice pursuant to Rule 299.5522.

See Attached.

7. Provide a summary of the information which shows that contamination is emanating from, or has emanated from, and is present beyond the boundary of the source property at a concentration which exceeds that allowed by MCL 324.20120a(1)(a). This summary shall identify the environmental media affected, specific hazardous substances, and the concentrations of those hazardous substances in all affected environmental media at the property boundary and in any sample locations beyond the property boundary. The summary shall also describe the basis for the conclusion that the contamination is emanating, has emanated, or is present beyond the boundary of the source property, including whether the conclusion is based on groundwater analytical data or fate and transport modeling, both, or neither.

Enclosed Table 1: Analytical Results for Groundwater Samples – Volatile Organic Compounds and Table 2: Analytical Results for Groundwater Samples – General Water Quality Parameters summarize the groundwater analytical data from which we concluded that the contaminants listed in the attached Form 1 table (excluding trichloroethylene) have migrated via groundwater across the southeastern boundary to the adjacent REALM property.

8. If the person making this notice has reason to believe that a migrating hazardous substance has affected, or is likely to affect, a private or public water supply, then that water supply must be identified here:

None

- | | YES | NO |
|---|-------------------------------------|-------------------------------------|
| 9. Is this notice being submitted within the timeframes established under R 299.5522 and/or R 299.51017, as applicable? | <input checked="" type="checkbox"/> | <input type="checkbox"/> |
| 10. Is this notice in addition to a notice submitted prior to December 21, 2002? (R 299.51017(4)(c)) | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| 11. Is this notice related to an oil and gas well permit (R 299.51017(2))?
Permit #: | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| 12. Is this notice related to an easement (R 299.51017(3))?
(NOTE: All easement grantors <i>must</i> receive this notice.) | <input type="checkbox"/> | <input checked="" type="checkbox"/> |
| 13. Has surface water been affected (R 299.51017(1) and R 299.5522(2))?
(If yes, please identify the affected surface water body.)
Wetland on REALM, Inc. property | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

CERTIFICATION:

With my signature below, I certify that I am the owner of the facility or that I am legally authorized to execute this notice on behalf of the owner or operator named on this form, and that to the best of my knowledge and belief the above representations are complete and accurate. I understand that intentionally submitting false information to the DEQ is a felony and may result in fines up to \$25,000 for each violation.

Signature Dale Thrush Date 1-27-05
(Owner or person legally authorized to bind the person making this report)

Name (Typed or Printed) Dale Thrush

Title (Typed or Printed) Sr. Env. Engineer

See Item 6 on Page 2 of this Form for instructions to be used in completing this Table. Attach additional pages if necessary. The information to be included in each column of the Table is:

Column A Name of hazardous substance.
 Column B Chemical Abstract Service (CAS) Number for the hazardous substance.
 Column C Maximum hazardous substance concentration measured on the property, expressed in parts per billion (e.g., ug/L or ug/Kg). Report maximum concentration separately for each environmental medium.

Column D Sample location for Column C (relate to label on map).

Column E Environmental medium in which concentration reported in Column C was measured (e.g., soil or groundwater).

Column F Distance from point of maximum measured concentration (Column D) to property boundary, in direction of contaminant migration, if direction is known or can reasonably be inferred. If direction is unknown, list distance to nearest property boundary.

Column G Direction of contaminant migration, if known.

Column H Concentration closest to property boundary, if known. If a concentration lower than the maximum concentration reported in Column C has been measured at a point closer to the property boundary in the direction of contaminant migration, use Column I to list the concentration that was measured closest to the property boundary in the direction of contaminant migration.

Column I Sample location for Column H (relate to label on map).

Column J Environmental medium for measurement reported in Column H, if applicable.

A Hazardous Substance	B CAS Number	C Maximum Concentration	D Sample Location for "C"	E Environmental Medium for "C"	F Distance to Property Boundary	G Direction of Migration	H Boundary Concentration	I Sample Location for "H"	J Environmental Medium for "H"
Trichloroethylene	79016	176,000	MW-04-01D	Groundwater	40 feet	Southwest			Groundwater

Concentrations reported in micrograms per liter (ug/L)

U - The analyte was not detected above the indicated reporting limit.

FAV - Final Acute Value, Rule 57 Water Quality Values (MDEQ Table, November 2004)

GSI - Groundwater surface water interface cleanup criteria (MDEQ Part 201, December 2004)

NC - No criterion

ID - Insufficient data to develop criterion

Results that exceed criteria are boxed and bolded.

Results that exceed FAVs are boxed, bolded, and shaded.
